Acerca de este libro

Esta es una copia digital de un libro que, durante generaciones, se ha conservado en las estanterías de una biblioteca, hasta que Google ha decidido escanearlo como parte de un proyecto que pretende que sea posible descubrir en línea libros de todo el mundo.

Ha sobrevivido tantos años como para que los derechos de autor hayan expirado y el libro pase a ser de dominio público. El que un libro sea de dominio público significa que nunca ha estado protegido por derechos de autor, o bien que el período legal de estos derechos ya ha expirado. Es posible que una misma obra sea de dominio público en unos países y, sin embargo, no lo sea en otros. Los libros de dominio público son nuestras puertas hacia el pasado, suponen un patrimonio histórico, cultural y de conocimientos que, a menudo, resulta difícil de descubrir.

Todas las anotaciones, marcas y otras señales en los márgenes que estén presentes en el volumen original aparecerán también en este archivo como testimonio del largo viaje que el libro ha recorrido desde el editor hasta la biblioteca y, finalmente, hasta usted.

Normas de uso

Google se enorgullece de poder colaborar con distintas bibliotecas para digitalizar los materiales de dominio público a fin de hacerlos accesibles a todo el mundo. Los libros de dominio público son patrimonio de todos, nosotros somos sus humildes guardianes. No obstante, se trata de un trabajo caro. Por este motivo, y para poder ofrecer este recurso, hemos tomado medidas para evitar que se produzca un abuso por parte de terceros con fines comerciales, y hemos incluido restricciones técnicas sobre las solicitudes automatizadas.

Asimismo, le pedimos que:

+ *Haga un uso exclusivamente no comercial de estos archivos* Hemos diseñado la Búsqueda de libros de Google para el uso de particulares; como tal, le pedimos que utilice estos archivos con fines personales, y no comerciales.

+ *No envíe solicitudes automatizadas* Por favor, no envíe solicitudes automatizadas de ningún tipo al sistema de Google. Si está llevando a cabo una investigación sobre traducción automática, reconocimiento óptico de caracteres u otros campos para los que resulte útil disfrutar de acceso a una gran cantidad de texto, por favor, envíenos un mensaje. Fomentamos el uso de materiales de dominio público con estos propósitos y seguro que podremos ayudarle.

+ *Conserve la atribución* La filigrana de Google que verá en todos los archivos es fundamental para informar a los usuarios sobre este proyecto y ayudarles a encontrar materiales adicionales en la Búsqueda de libros de Google. Por favor, no la elimine.

+ *Manténgase siempre dentro de la legalidad* Sea cual sea el uso que haga de estos materiales, recuerde que es responsable de asegurarse de que todo lo que hace es legal. No dé por sentado que, por el hecho de que una obra se considere de dominio público para los usuarios de los Estados Unidos, lo será también para los usuarios de otros países. La legislación sobre derechos de autor varía de un país a otro, y no podemos facilitar información sobre si está permitido un uso específico de algún libro. Por favor, no suponga que la aparición de un libro en nuestro programa significa que se puede utilizar de igual manera en todo el mundo. La responsabilidad ante la infracción de los derechos de autor puede ser muy grave.

Acerca de la Búsqueda de libros de Google

El objetivo de Google consiste en organizar información procedente de todo el mundo y hacerla accesible y útil de forma universal. El programa de Búsqueda de libros de Google ayuda a los lectores a descubrir los libros de todo el mundo a la vez que ayuda a autores y editores a llegar a nuevas audiencias. Podrá realizar búsquedas en el texto completo de este libro en la web, en la página `http://books.google.com`

This is a reproduction of a library book that was digitized by Google as part of an ongoing effort to preserve the information in books and make it universally accessible.

NOTE.—Accounts and various financial data relating to the subject matter herein discussed will be found among "Exhibits Nos. 4202 through 4205, 4213, and 4214", Hearings, Part XXXIII; "Exhibit No. 4217", Hearings, Part XXXIV; and "Exhibits Nos. 4220, 4221, 4226, and 4229", Hearings, Part XXXV.

INVESTIGATION OF MUNITIONS INDUSTRY

MONDAY, JANUARY 13, 1936

United States Senate,
Special Committee to Investigate
the Munitions Industry,
Washington, D. C.

The hearing was resumed at 10 a. m., in the Caucus Room, Senate Office Building, pursuant to adjournment, Senator Gerald P. Nye presiding.

Present: Senators Nye (chairman), Clark, Vandenberg, and Barbour.

Also present: Stephen Raushenbush, secretary, and Lawrence Brown, financial assistant to Committee, and Robert Wohlforth, assistant to the secretary.

The Chairman. The committee will be in order. Mr. Brown, you may proceed at this time.

TESTIMONY OF J. P. MORGAN, THOMAS W. LAMONT, AND GEORGE WHITNEY—Resumed

ANGLO-FRENCH LOANS OF 1915 [1]

Mr. Brown. There are a few little details——

Mr. Lamont. Mr. Chairman, before Mr. Brown proceeds, may I be permitted to read into the record photostats of newspaper clippings that bear upon one phase of the examination on Thursday?

The Chairman. These are clippings of that date?

Mr. Lamont. No; newspaper clippings dating back to August 9 and 10, 1915.

The Chairman. That is what I mean.

Mr. Lamont. Yes; quite.

The Chairman. All right.

Mr. Lamont. Because there was a good deal of discussion, you will recall, in regard to Mr. Davison's visit with Secretary McAdoo in regard to the question of exchange. The impression was created that it followed more or less the break in exchange.

The Chairman. In that connection, Mr. Lamont, when Mr. Davison called upon Mr. McAdoo, was there anything more than one thing that Mr. McAdoo could have done, that would have been in response to what appeared to be the need at that time?

Mr. Lamont. I cannot answer that, Senator. May I try to answer it in part by reading this?

The Chairman. All right.

---

[1] For previous discussion of this subject see Hearings, Part XXVI, p. 7873 et seq.

Mr. **Lamont**. Thank you so much. This is from the New York American of August 10, 1915 [reading]:

> Wall Street was deeply interested yesterday in the visit to the financial district of Secretary McAdoo and W. P. G. Harding, of the Federal Reserve Board * * *

Then it goes on to say [reading]:

> Secretary McAdoo made his headquarters at the Subtreasury, where he conferred with Henry P. Davison of J. P. Morgan & Co.

The other clipping is from the Evening Telegram, in which it says:

> One of the principal financiers with whom he was in conference was Henry P. Davison, of the firm of J. P. Morgan & Co. Mr. McAdoo invited Mr. Davison to call on him at the Subtreasury.

This came about on August 9, whereas the withdrawal of the support of the exchange did not occur, as I recall it, Mr. Whitney, until August 13.

Mr. **Whitney**. Fourteenth.

Mr. **Lamont**. Fourteenth. I think it is of some interest to show just how this interview came about, at Mr. McAdoo's own invitation.

Mr. **Brown**. Was there any other meeting with Mr. Davison, Mr. Lamont?

Mr. **Lamont**. Evidently not. Until we looked up the public-press record, you will recall we had no record of the thing. It just said there had been a meeting.

Mr. **Brown**. Just to keep the record straight, you said after the break you were sending word to the Secretary of the Treasury.

Mr. **Whitney**. You will remember, Mr. Brown, that on August 18 we wired, that following a conference Mr. Davison had had with Mr. McAdoo, we had that day sent word to Mr. McAdoo of the serious state of the exchange.

You questioned us a good deal heretofore as to how, when, and where Mr. Davison had the interview, so that when we went home on Saturday, we tried to check up, because our records had nothing in regard to it. We found that Mr. Davison saw Mr. McAdoo, at Mr. McAdoo's invitation, on the 9th day of August.

On the 11th of August we cabled London that we thought that we ought to keep some slack against a severe break. On the 13th, as you will remember, we bought roughly $7,500,000 worth of exchange, which left about $7,500,000, and on the 14th they instructed us to stop selling.

So that this talk with Mr. McAdoo was not afterward, chronologically, but was before there had been quite such a severe break. The exchange on the 9th was 4.74 and broke to 4.71 on the 13th.

And just to get you chronologically right, this talk to which the cable of the 18th referred, according to the public press, was on the 9th of August, and was held at Mr. McAdoo's invitation.

Mr. **Brown**. That was the meeting with regard to acceptances, if you will recall, which will come up later.

Mr. **Whitney**. You have got the advantage of us because we do not know what it was about.

Mr. **Brown**. There was a meeting at the Subtreasury about acceptances.

Mr. LAMONT. How do you know that there was a meeting at the Subtreasury about acceptances?

Mr. BROWN. It will come up in passing. It was discussed in the long letter of Secretary McAdoo, in the record. After the break you stated to the Secretary of the Treasury that you regarded the exchange situation as serious, and yet you said you stopped selling.

Mr. WHITNEY. Stopped buying.

Mr. BROWN. You said you stopped selling.

Mr. WHITNEY. Excuse me. We stopped buying sterling and bought dollars.

Mr. BROWN. You continued selling sterling, did you not?

Mr. WHITNEY. Where?

Mr. BROWN. On the commercial agency, for some days.

Mr. WHITNEY. I do not want——

Mr. BROWN. You continued selling sterling. It was all brought out after the break the other day.

Mr. WHITNEY. The last day we did it was the 13th of August.

Mr. BROWN. It was the other way around, Mr. Whitney. You stopped buying sterling on the 13th of August, but you did not stop selling sterling on the 13th of August. You continued selling sterling for several days into August, a week, at least. That will come out in another item.[1]

Mr. LAMONT. The point, Mr. Chairman, of these clippings, the point of putting them into the record, is to show that the public was being made fully aware of what was going on. That is the point. They were being kept informed of these facts from day to day. Will you mark those?

Mr. BROWN. The full awareness of those to the public in that manner does not include your suspension of exchange support, does it, Mr. Lamont?

Mr. LAMONT. Yes.

Mr. BROWN. You mean, from the clippings?

Mr. LAMONT. It may not include that, but Mr. Whitney has some clippings here, showing the attitude or knowledge of the public press all during July, as to the weakening of the exchange.

Mr. BROWN. That is true, but not that you had withdrawn from the market?

Mr. LAMONT. Mr. Brown, everybody in Wall Street knew the moment that J. P. Morgan & Co. were not buying or selling exchange. There was no secret there.

Mr. BROWN. Will you find the clippings for the record, showing that it was known in financial circles that J. P. Morgan & Co. had withdrawn from the financial market?

Mr. WHITNEY. I do not believe we could.

Mr. LAMONT. That attitude is known and cannot help but be known.

Mr. BROWN. I have read the English newspapers with great care at that time, and there is no reference with regard to any actual withdrawal from the market.

Mr. LAMONT. The English papers?

---

[1] See "Exhibit No. 4220", Hearings, Part XXXV, showing credits of $12,604,125 against £2,700,000 over London. This appears not to have been a sale of sterling in New York but a purchase of dollars in London, having a similar effect on the sterling rate.

Mr. **Brown**. The English financial papers.

Mr. **Lamont**. That is not surprising.

Mr. **Brown**. If this were known in New York, it would be known in England.

Mr. **Lamont**. You mean the British financial papers?

Mr. **Brown**. I mean the British financial papers.

Mr. **Lamont**. Excuse me, Mr. Brown, but the British financial papers were concerned at that time primarily with the domestic financing.

Mr. **Brown**. They were terribly concerned about the American exchange.

Mr. **Lamont**. You have looked up the British papers and I have not, but that does not bear on the situation.

Mr. **Brown**. Supposing we go on.

Mr. **Lamont**. Quite.

Mr. **Whitney**. May I put in these clippings, Mr. Brown, or Mr. Chairman, which just show that beginning July 29, right on through, and even beginning as early as July 3, the weakness of the exchange and the apparent danger to American export trade which is emphasized? There are four of them.

Way back on July 3 Davies, who was chairman of the socalled English Exchange Committee, is quoted here in the Chronicle as stating:

> I consider the best way for American exchange to be righted will be by Americans subscribing liberally to the new war loan, the exchange being at present something like 2 percent in favor of America on such an operation; or by Americans granting about $500,000,000 of credit to Great Britain.

In other words, the Chronicle in New York on July 3, 1915, already raised the question of necessity of credits to keep exchange steady.

The **Chairman**. Let the clippings be received for the record.

(The six clippings referred to were marked, respectively, "Exhibits Nos. 2279, 2280, 2281, 2282, 2283, and 2284", and are included in the appendix on pp. 8285–8288.)

The **Chairman**. Proceed, Mr. Brown.

Mr. **Brown**. At the end of the session on Friday mention was made of the ruling of the Comptroller of the Currency. This is contained in a letter which I offer for the record from John Skelton Williams, the Comptroller, to the Mechanics and Metals National Bank, in which he says [reading]:

> In reply you are informed that this office has been advised by counsel that governments are not "corporations" or "persons" within the meaning of section 5200, and that investments made by national banking association in Government securities, such as Government bonds, in excess of 10 percent of the unimpaired capital and surplus of the association, would not be in violation of that section.

(The document referred to was marked "Exhibit No. 2285" and is included in the appendix on p. 8290.)

Mr. **Brown**. I offer also the answer of Mr. McHugh, apparently, of the Mechanics and Metals Bank, dated September 29, 1915.

(The document referred to was marked "Exhibit No. 2286" and is included in the appendix on p. 8291.)

Mr. **Brown**. That was a great aid in floating that loan, was it not, that ruling of the Comptroller?

Mr. **Lamont.** It was undoubtedly a favorable ruling, Mr. Brown; undoubtedly.

Mr. **Brown.** I mean, it made it a great deal easier to sell the loan, to be able to sell a great deal more than the capital and surplus to a national bank?

Mr. **Lamont.** It is hard to measure what difference it made, but undoubtedly it was a favorable ruling.

Mr. **Brown.** Mr. Lamont, all these cables, and you yourself, have had a good deal to say about the process of educating the American investors to buy these belligerent bonds. I have here a letter, a series of letters, of Harris, Forbes & Co., who were associated with you intimately in that syndicate, were they not?

Mr. **Lamont.** They were one of the 61 syndicate managers, undoubtedly, Mr. Brown.

Mr. **Brown.** I will ask you if you consider this a fair sample of the sales method on the Anglo-French loan——

Mr. **Lamont.** This is a letter from Harris, Forbes & Co. to whom?

Mr. **Brown.** A series of letters, apparently, to their out-of-town offices, Chicago and Boston.

Mr. **Lamont.** I see.

Mr. **Brown** (reading):

> Things are boiling on the big credit loan to England and France. At a meeting yesterday of representatives of about 40 distributing houses at Morgan's office, Mr. Forbes was appointed chairman of a committee to work out the details of both the underwriting and the public offering.

Then further down it states [reading]:

> You will at once see that it is distinctly for the best interests of the flotation to make the underwriting a great big success. It must be quick and snappy, and the more withdrawals the better. Then, when the remainder of the issue is offered for subscription at 98, dealers and banks everywhere can jump in and push the final distribution with great enthusiasm. As Mr. Morgan said today, this loan is going to be a tremendous success, and a whole lot of people will wake up and find themselves about 8 days too late.
>
> Just think of an interest return of 5⅞ percent to an institution or investor who goes into the syndicate and withdraws his bonds. Why, nothing like it was ever heard of before—a 5-year obligation of the two greatest governments in the world, next to the United States—on close to a 6-percent basis.
>
> Confidentially, one withdrawn bond subscription was turned in today for $35,000,000. We are getting requests for participations from all directions. Every clearing-house bank in Pittsburgh has subscribed, and enthusiasm is at a high pitch in Philadelphia, Baltimore, Boston, and all the other financial centers of the East as well as here in New York.
>
> Tonight's wire is going to the most important banks in the Middle West and out on the Pacific coast over signatures like Mr. Wiggin, president of the Chase National; Mr. Prosser, president of the Bankers Trust; Mr. Sabin, president of the Guaranty; and Mr. Vanderlip, president of the National City, strongly recommending the loan both as to security and price and asking these few carefully chosen banks in each city to form a group and take charge of the distribution in their locality. As the telegram reads: "We are forming a countrywide syndicate, etc."

The letter further continues [reading]:

> * * * the writer personally doesn't see how any of your clients who are not prejudiced can fail to take advantage of this wonderful opportunity.

(The document referred to was marked "Exhibit No. 2287", and is included in the appendix on p. 8291.)

Mr. Brown. For the record I enter a letter of September 30, 1915, also from Harris, Forbes, being more about the loan.

(The document referred to was marked "Exhibit No. 2288", and is included in the appendix on p. 8292.)

Mr. Brown. Is that a fair sample of the educational process in that work?

Mr. Whitney. Did you say that was a letter from Harris, Forbes?

Mr. Brown. Harris, Forbes.

Mr. Lamont. Of course they are a retail selling house and very effective salesmen in that field.

Mr. Brown. Very effective salesmen in that field.

Mr. Lamont. I am not commenting on that letter, Mr. Brown.

Mr. Brown. Would you comment on it, and do you think it is a fair sample of the educational machine at work?

Mr. Lamont. I do not recall seeing this letter, or any other letter, and I am not able to comment on it.

Mr. Brown. It was one of your distributing and educational houses?

Mr. Lamont. It was not one of our houses. They got up their own letters without suggestion from us, and adopted their own approach, being one of the 61 syndicate managers. I suppose every bond-selling house, Mr. Brown, adopts its own approach to its own customers.

Mr. Whitney. You may remember, or perhaps you do not, Mr. Brown, that Harris, Forbes at that time were far and away the outstanding retail distributing house in the United States. There were very few at that time.

Mr. Brown. And they were very useful to you in that capacity, were they not?

Mr. Whitney. We never had any retail distribution of bonds.

Mr. Brown. That is what I mean.

Mr. Whitney. They were——

Mr. Brown. You were dependent upon retail distributors for the bonds?

Mr. Whitney. They were considered about the most effective and highest standing house in the whole country, in the Middle West and here. We had no distribution, and if you sold any bonds, retail or otherwise, that was the situation on them. They were not an educational house but a bond house.

Mr. Brown. You said it was necessary to educate the public to the goodness of these bonds. Is that glowing language accurate, first, and secondly, is it successful salesmanship?

Mr. Whitney. I do not know anything about salesmanship.

Mr. Lamont. In that connection, Mr. Brown, because you have mentioned this particular meeting of the bond houses, et cetera—suppose you put that in, Mr. Morgan?

Mr. Morgan. The only thing about the educational feature that I had to do with was to make a speech to all the distribution houses we could get to come to the Waldorf, on October 8, and I made them a very simple and, I think, a very careful speech.

Mr. Brown. Do you care to place that in the record?

Mr. Morgan. I would like to have leave to put it in the record.

Mr. Lamont. This reprint includes also, does it not, Mr. Morgan, brief remarks made by Dwight W. Morrow?

Mr. MORGAN. It includes brief remarks made also by Dwight W. Morrow.

The CHAIRMAN. On the same occasion?

Mr. MORGAN. Yes, sir.

Mr. LAMONT. Same occasion.

(The document referred to was marked "Exhibit No. 2289", and is included in the appendix on p. 8293.)

Mr. BROWN. Just to keep the record straight, I offer a cable, no. 7972, which does not need to be read.

I call your attention to cable of October 13, 1915, no. 9202.

Mr. LAMONT. What is the date, Mr. Brown?

Mr. BROWN. October 13.

Mr. WHITNEY. Mr. Brown, excuse me, but did you put in no. 7972?

Mr. BROWN. Yes, sir.

Mr. WHITNEY. Were you going to read it?

Mr. BROWN. It does not seem to be necessary. If you feel it is, read it.

Mr. WHITNEY. I do not think it is. I do not think it makes very much difference but I wondered why you put it in.

(The document referred to was marked "Exhibit No. 2290", and is included in the appendix on p. 8297.)

Mr. LAMONT. What is the next one?

Mr. BROWN. No. 9202, October 13, 1915, from J. P. Morgan & Co., New York, to E. C. Grenfell in London. I quote from about the middle of the cable.

> We have also thought it to advantage in quoting figures to associates to intimate that such figures did not include our own subscription, leaving them to infer as favorable things as they might desire from such a statement. For your confidential information, amount of underwriting, outside our own subscription, $508,000,000. You can readily see, therefore, how near right we were when we declined to undertake formation of syndicate for over amount mentioned. Two weeks ago, just after agreement had been reached, Lord Reading asked us pointedly what our firm's subscription was going to be. At that time we declined to tell him and, in fact, did not relish the inquiry, but have since said to him substantially as above.

I take that to mean that you just got the loan in under the wire.

Mr. MORGAN. It was underwritten with the margin mentioned, and, I think, finally reached $512,000,000.

Mr. WHITNEY. What do you mean by "just under the wire"?

Mr. BROWN. I take it to mean, if you had acceded to the Commission's request to float a larger loan, you would have been caught very much short.

Mr. WHITNEY. The record here is just the reverse. We recommended that it be only $250,000,000, but at their insistence did $500,000,000, and all through the record there has been the statement of how difficult we expected that would be. You did not read the first couple of sentences of that.

Mr. BROWN. Read it.

Mr. WHITNEY. The cable states:

> We have from start put ourselves down for minimum of $10,000,000 but among ourselves have agreed to hold ourselves further in reserve up to a total of $25,000,000, if that should be necessary. We have all thought it wise to make our amount somewhat elastic so as to be able to take up slack if necessary at last moment.

And then follows where you began.

403251

Mr. Brown. From the first sentence that I read, it would indicate that your associates in the syndicate were a little nervous about the amount.

Mr. Lamont. The underwriting came through very well, Mr. Brown. I do not remember.

Mr. Whitney. I think it is fair to say, Mr. Lamont, that all our associates thought the amount was stupendous, and as big a commercial transaction had never been done before or since.

Mr. Brown. That cable was offered for the record.

(The document referred to was marked "Exhibit 2291" and is included in the appendix on p. 8297.)

Mr. Brown. On October 16, 1915, I call your attention to cable no. 9296, in which the last sentence reads, the cable being from Morgan in New York to Morgan in London:

> Bear in mind, however, that most of the people who could be expected to buy the bonds for investment came in as underwriters, and it will be only by hard personal work of the 100 or more distributing houses that we have enlisted that the loan will be placed with the small investors.

(The document referred to was marked "Exhibit No. 2292" and is included in the appendix on p. 8297.)

Mr. Brown. I do not think that cable needs any comment.

On October 18, 1915, cable no. 9334, from Morgan in New York to Morgan in London, the last sentence of which reads [reading]:

> Response to public subscription is as yet very slow and, frankly, we do not look to see syndicate materially relieved under 90 days.

The first part is very significant and well known and has been talked about very much and we do not need to go into that.

(The document referred to was marked "Exhibit No. 2293" and is included in the appendix on p. 8298.)

Mr. Brown. That means, does it not, that the syndicate was loaded up with these bonds; the people whose business it is to engage in distributing bonds are not investors, primarily, are they, Mr. Lamont; these underwriting syndicates?

Mr. Lamont. Oh, yes; it is in this instance, Mr. Brown, and not private investors, but they included some banks which are investors.

Mr. Brown. They included investors, but to a large mass, at least half the loan was subscribed by people whose business it is not to buy bonds and hold them but to buy bonds and sell them; in other words, that the distributing mechanism of the bond market was loaded up with these bonds at this time, at any rate. Is that the correct interpretation, to your mind?

Mr. Lamont. I do not recall the proportions the selling houses shared in the amounts of the underwriting, but it was always clear all the time to all the underwriters that the distribution of these bonds, as we say, was going to be a slow and gradual process.

They therefore knew that as underwriters they were going to have to take up a good proportion of this underwriting. They knew that perfectly well.

WAR-TRADE INFLATION

Senator VANDENBERG. Mr. Brown, before you proceed, I have been reading Mr. Morgan's speech to the bond houses. Abstractly, now, I would like to ask one or two questions about it:

On page 2, Mr. Morgan, in the black-face type, you are emphasizing the fact that this loan is essential to the encouragement of this new export trade which had been developed in the course of the war, and you are making the point that that makes the loan a pro-American affair because it is in favor of American business.

Mr. MORGAN. Yes.

Senator VANDENBERG. Mr. Morgan, is it a healthy thing for a country to have an export trade booming on the basis of war orders that necessarily must be temporary. Is it not a direct invitation to inflation, which must be followed by a disastrous deflation?

Mr. MORGAN. I do not think that you can look ahead that way at the time and say that.

Senator VANDENBERG. Let us admit that you cannot look ahead at the time; let us just look at it abstractedly, because, after all, that is the function of the inquiry, as I see it. Would you not now say that when you are encouraging a war export trade of this nature you are encouraging an inflationary trade which must come to an end and which, therefore, must be followed by a very disastrous deflation?

Mr. MORGAN. No; I think that is overstating it, Senator.

Senator VANDENBERG. To what extent would you go in stating it?

Mr. MORGAN. I should say that to the extent that you have real exports and are paid real money for them, or advanced real money on them—it is the same thing—that you do not have an inflationary situation at all.

Senator VANDENBERG. But have you not induced a vast industrial activity which has to be demobilized at any moment when the war stops?

Mr. MORGAN. That is the case in any case of times of prosperity. There are times when your production exceeds your needs. That comes afterward.

Mr. VANDENBERG. Precisely; but if you build industrial expansion to fit a trade and appetite which is definitely known to have a terminus, is not that an invitation to industrial inflation that is bound to have a deflationary postcript subsequently?

Mr. MORGAN. I should not say that that was so; no.

Senator VANDENBERG. You think necessarily war trade is healthy?

Mr. MORGAN. I think the increase of exports helped this country. I do not think it led us into the war. I have always said that.

Mr. VANDENBERG. I am not discussing that.

Mr. MORGAN. A man will not decline an order that he is able to fill because later on he may have difficulty in selling all his products. He will take what he can get at the time, inevitably.

Senator VANDENBERG. Precisely, but is he a wise manager if he stupendously expands his production if he knows that these new orders have to stop next year or the year after?

Mr. MORGAN. Yes; I think he is.

Mr. LAMONT. In these particular munitions plants, the British Government were required to make an advance payment covering the outlays for new equipment, and so forth, that these people put up. In addition to that, there are certain figures here that I think are very interesting as bearing on your inquiry, which is a very pertinent inquiry.

Those are these:

The total amount of American exports during these neutral years to the four great Allies, Great Britain, France, Russia, and Italy, were seven billions of dollars. Of that not over two billions were in what were called munitions of war. The other five billions were in commodities, foodstuffs, cotton, raw materials, metals, manufactured goods of a general order.

Senator **Vandenberg**. Would not this be true: All substantially increased as the result of withdrawal of similar production abroad, and therefore, all related to the war?

Mr. **Lamont**. Oh, certainly, certainly; no question about that. But what would you have the country do, may I ask? Would you have the farmer who grows the wheat and the cotton grower say, "No; I will not fill orders at this time for cotton or for wheat?" Would you have the copper people say, "No; we will not fill orders for copper for fear that we might get a little out of gear"?

Senator **Vandenberg**. I certainly would say that we were penny-wise and pound-foolish if we tremendously expanded our productivity based solely upon a foreign-war appetite which we would know had to come to an end. It seems to me that that is what is inherent in this plea to investors to finance this trade for the benefit of America.

I am not quarreling with the viewpoint that you had at the time; we all had it. You are guilty of nothing that all the rest of us were not guilty of in respect to our enthusiasm for war trade.

But what we are now trying to find out is whether, as a matter of cold fact, that is not bad business, just from a business standpoint, not from a peace standpoint; from a business standpoint, is it not an invitation to an industrial inflation which has to be followed by disastrous industrial deflation?

Mr. **Lamont**. But, Senator, any boom in business, any boom in prosperity, whether it is in wartime or any other time, is bound to be followed by a certain period of deflation. Look at our 1920's. We do not want to forget them. And that was not wartime business, was it?

Senator **Vandenberg**. No; but do you not discriminate between an economic stimulus which comes in the natural course and an economic stimulus which is specifically the result of orders induced by war?

Mr. **Lamont**. I do not see that there is very much difference, Senator.

Senator **Vandenberg**. In other words, you still feel, Mr. Lamont, that heavy war export trade is a useful thing for the United States?

Mr. **Lamont**. That is a very general question, of course, Senator, and you would always want to look at the circumstances surrounding it, but in the case we have under discussion, the case of the World War, as Mr. Morgan has replied, the customers abroad wanted to increase their purchases of all sorts of American commodities.

Our country had those commodities to sell. I think it was the most natural and the most proper thing that they should sell them.

Senator **Vandenberg**. You do not feel that it had any unfortunate repercussions subsequently?

Mr. **Lamont**. No; I think that the repercussions came from other phases of the war, Senator—from other phases of the wartime.

Senator **Vandenberg**. I just want to ask one more question from this speech, quoting Mr. Morgan [reading from "Exhibit No. 2289"]:

> It is absolutely imperative for the country——

speaking of England and France——

> to make good the external bonds, no matter what arrangements it has to make as to internal affairs, because it may want to come again, and without incurring the worst form of bankruptcy and disgrace, it cannot abandon its external debts.

Is that still true?

Mr. **Morgan**. Yes.

Senator **Vandenberg**. That was sound doctrine then, and it is sound doctrine now?

Mr. **Morgan**. I can only say that is exactly what I thought at the time and I still do believe; yes.

Mr. **Whitney**. Senator Vandenberg, you asked if that industrialist had expanded his plant tremendously for war orders; would it not be imprudent to do that, knowing that the war must end sometime?

I think there has been a lot of evidence submitted to this committee, prior to our arrival here, that shows that, generally speaking, they did want to write off in the orders and take up the excess plant they built for these particular orders. That certainly was carried right through that rifle discussion; that they wanted to get their expenditures for expansion back from the purchaser rather than wait and try to carry on that great excess plant into some future peacetime activity.

Of course, it is true that there was industrial deflation immediately after the war, just along the lines you spoke of.

The munitions people are different from the agricultural people, who expanded their acreage and steamed up for a very large demand, where there was a reaction.

But I think you will find the industrial people pretty generally did allow against war orders for the fact that they were temporary and marked off their excessive plant during the period of the receipt of the war proceeds.

Senator **Vandenberg**. I think many of them attempted to be foresighted in that aspect, but, Mr. Whitney, I have been unable to escape the conclusion that a great portion of our post-war tragedy in the country, our post-war deflation, is the direct and inevitable result of pre-war inflation.

Mr. **Lamont**. But, of course, everybody knows the effect of every war economically is dreadful. Everybody knows that. But I do not see why, Senator, you tie it up so particularly to these particular purchases. If you are talking about controlling inflation and the circumstances leading to it, we are supposed to have a Federal Reserve System and a Federal Reserve Board that controls that very thing in the way of inflation, puts up rates and makes it more costly to carry on your trade.

That is the engine that is supposed to put on the brakes.

Senator Vandenberg. I am unable to see how any engine can put on the brakes if you are going to expand factories and create artificial employment, extend acreage, and create artificial markets, all of which are known to be contingent upon the duration of a war which everybody wants to stop as soon as possible. It seems to me that is a complete impossibility.

What I am saying is in no sense critical of what happened at the time, because it was the standard practice and the standard viewpoint. But if we are going to try to learn something from the experience we went through—and that is the sole extent of my interest in this affair—I cannot escape the conclusion that an artificially stimulated war export trade for America, instead of being profitable in the long run, is one of the worst liabilities we can possess.

Mr. Lamont. But, Senator, if you are to analyze that, it would be fair, would it not, to point out following the war how badly off our industrial plants were because of what you say was the pricking of the bubble, or break-down of the war orders and that sort of thing. We certainly had something of a depression in 1920 and 1921, but the commercial failures and manufacturing failures, and so forth, were very rare then, as I recall it. They were not heavy.

That fact was due largely to the fact that manufacturers had fortified themselves with excess reserves and all that sort of thing arising out of their excess earnings. The prudent farmer had presumably fortified himself out of his excess earnings.

Mr. Brown. Mr. Lamont, in regard to that writing-off that you and Mr. Whitney have both mentioned, if that writing-off is done with money raised by bonds, so long as those bonds are outstanding in the country's fiscal system, that is not written off, is it?

The interest charge on all that machinery that you say has been written off is still a burden in the bonds that have enabled the manufacturers—I mean, you float bonds for the Allied governments. The proceeds are used in heavy advance payments, and the wise manufacturer writes off his machinery. But the interest charge on that machinery survives in the bonds, and when the Liberty bond was floated to pay off those bonds, the interest charge still survives.

So that when we come to the financial, the banking crisis of the thirties, as against the industrial crisis of the immediately post-war years, I think it is entirely fair to say that that still unwritten-off-charge is right there in the depression of the thirties.

Mr. Lamont. To what bonds are you alluding when you say "those bonds"?

Mr. Brown. Any bonds. Mr. Whitney said that the advance payments enabled the write-down.

Mr. Lamont. Yes.

Mr. Brown. But that was possible only because you were borrowing money in the American market.

Mr. Lamont. Who were?

Mr. Brown. The Allied governments, to make these advance payments that were so judiciously applied by the manufacturers. Somebody put up money to do that, and the interest charge on that money stands still.

Mr. Whitney. They were paid.

Mr. Brown. They were paid? They were refunded.

Mr. LAMONT. They were paid off.

Mr. BROWN. Not all of them. Those that were paid, the six-hundred-and-odd millions that were paid out of the Liberty loans, the 600 millions in Liberty bonds, still survive in the banking structure.

Mr. WHITNEY. There were not 600 to start with.

Mr. BROWN. Eventually there were 600 paid.

Mr. WHITNEY. Where?

Mr. BROWN. According to the Treasury statement. We will come to that later.

Mr. WHITNEY. Senator Vandenberg, as I understood it, was directing his question to the effect upon the American economy of general expansion of industry and all the other businesses that were involved in these exports. But whether the people who did that expanding, namely, the munitions companies, the farmers, and all the other people, were being imprudent so to expand their facilities, knowing the bubble must be bursted, my answer to that question would be that those companies took means to write off their excess expansion; and I cannot see what it has to do with those companies because Great Britain or France borrowed in this country to pay them a sufficient price to permit that amortization of their plants.

Mr. MORGAN. And they paid the interest also.

Mr. WHITNEY. And they paid the interest, did they not?

Mr. BROWN. If there is a financial difficulty in a company because it has idle plants, that comes down in practical matters to the difficulty of paying interest on the cost of that plant.

If that has been written off by creating a debt somewhere else in the banking system, the interest still has to be met.

Mr. WHITNEY. It is not in the banking system, Mr. Brown. The interest was being borne by the Allied governments who borrowed money in this country to pay an entirely different group of investors who had purchased those bonds.

As far as the industrial corporations went, it is true that the carrying of excess plants has to be taken out of earnings. To do that they amortized these excess plants, those who did it—such as du Pont, primarily, I had in mind. They wrote off their excess plant out of their current earnings.

Mr. BROWN. Yes; and that current earning was borrowed money, Mr. Whitney.

Mr. WHITNEY. By whom?

Mr. BROWN. By the Allies.

Mr. WHITNEY. What has that to do with du Pont?

Mr. BROWN. Because the interest must be paid, and when the United States Treasury pays that off, still the interest must be paid.

Mr. WHITNEY. If you are going into the question of the promotion of industry and agriculture and the rest of it that came after we got into the war, there was a very intense expansion, guaranteed prices, and so forth, at that time. That was not what Senator Vandenberg was speaking about.

Of course, the cost of that was paid by the Liberty Loans and therefore had to be taken care of by taxing the public of the United States. That is true.

Mr. BROWN. Surely, and insofar as the du Pont expansion was paid by bonds that were refunded from the Treasury, the same thing is true.

Mr. **Whitney**. You take your figure, which I do not recognize as being accurate. There was 600 million dollars out of 27 billions, was it not?

Mr. **Brown**. I forget the figure.

Mr. **Lamont**. That is what it is.

Mr. **Whitney**. Roughly.

Mr. **Lamont**. Mr. Chairman, I do not want to prolong this discussion, but it is very interesting to me and I wanted to get, if we could, Senator Vandenberg's mind. I am interested in his thesis.

What would you have us do in similar circumstances, Senator? Would you have us say to the farmer, the cotton grower, the meat packer, and so forth, "No; you must not sell your goods"?

Senator **Vandenberg**. I would not have similar circumstances.

Mr. **Lamont**. None of us would, but suppose——

Senator **Vandenberg**. What I want to see is whether we can write the rules so there will not be similar circumstances.

Mr. **Whitney**. But, Senator Vandenberg, looking at it objectively and directing our attention purely to the catastrophe that has happened in this country in the last 5 years, is it not probably fair to say that more of that trouble was caused by the reconstruction years after the war and the economic struggles that all the nations got into among themselves, that caused the inflation which burst in 1929 and 1930, or reached its height then, and then blew up?

Is not that more the reconstruction period? That, of course, can be traced directly back to the war, if you want.

Mr. **Morgan**. Might I add there, Senator Vandenberg, that during a war everybody lives on his capital, and they get the habit of living on their capital. It gives you a feeling of extraordinary comfort and wealth while you are doing it.

Senator **Vandenberg**. They live on their capital and their commissions.

Mr. **Morgan**. They live on what they can get.

Senator **Vandenberg**. That is right.

Mr. **Morgan**. They live on what they get, but they turn their capital loose, and that gives you a great feeling of luxury. I have done it myself; I know.

Then the day comes when you have got to get back to living on your earnings.

Senator **Vandenberg**. That is the same kind of luxury we are living in right now.

Mr. **Morgan**. That is the same kind of luxury we are living in right now. We are trying to live on our earnings.

Senator **Vandenberg**. On our capital.

Mr. **Morgan**. We have been trying to live on our capital. Now we come back to the fact that we have to live on our earnings, and it is not very comfortable.

Mr. **Brown**. As fitting right into the discussion that has been going back and forth, it is worth while at this point to put into the record a letter from Brien Cokayne, the Deputy Governor of the Bank of England, written to Governor Strong on January 15, 1917. The particular occasion of the letter is the Reserve Board's ruling in regard to the British Treasury bills, which is irrelevant, but he has this to say——

Mr. **Lamont**. Where did that come from, Mr. Brown?

Mr. **Brown**. It is from the Bank of England to the Federal Reserve Bank.

Mr. **Lamont**. Thank you.

(The document referred to was marked "Exhibit No. 2294" and is included in the appendix on p. 8298.)

Mr. **Brown** (reading):

> I almost wonder that the Board, when it saw that millions of money were being invested in ephemeral works to supply the enormous temporary requirements of the Allies, did not issue a warning in time to check such dangerous expansion.

Those are practically the words of Senator Vandenberg, out of the mouth of the Bank of England, who is certainly, in this case, an unprejudiced witness.

Here is another letter from Governor Strong to Adrian Larkin, written in February 1918.

(The document referred to was marked "Exhibit No. 2295" and is included in the appendix on p. 8298.)

Mr. **Brown** (reading):

> Failure to produce the result desired; that is, reduce consumption—

This is in regard to war financing—

> means that the materials required for the war, both by this country and by our allies, must be produced as an addition to the normal production of the country in peace times, thereby causing a tremendous expansion of credit, a shortage of labor and materials, constantly rising prices for labor and materials, a much more expensive war, domestic discontent with living hardships, and a mortgage upon the production of future generations that may prove to be a staggering load.
>
> The goods now produced and consumed in war, without the germ of reproduction in them, will be paid for partly by taxes and partly by bonds sold to those who have incomes in excess of their present needs. Those who buy the bonds must some day have their loans repaid by taxes collected from others in the future. The loans are mortgages upon the productive efforts of all the people.

Mr. **Lamont**. Senator Vandenberg, I think that you and I are in accord if you mean and I mean that war is always economically very bad for everybody whether they are fighting or not. It is a bad thing, a disastrous thing.

Senator **Vandenberg**. We agree on that; and then I add that I think that since that is our fundamental premise, we notoriously err if we try to stimulate our partnership in that liability.

Mr. **Lamont**. If that means embargo, you would have to include food, would you not, because, in the late war, that amounted to such a large proportion—food and ordinary manufactures?

Senator **Vandenberg**. You have to include whatever is essential to reach the net result I am talking about. While I am not yet prepared to say what the precise formula ought to be, I am thoroughly sure that America is not going to lose anything in the long run when it loses the opportunity to participate in war trade.

Mr. **Lamont**. We are all determined to keep out of war; there is no doubt about that. It is simply as you indicate, a question of what is the best formula to that end.

Senator **Vandenberg**. I apologize for detouring, Mr. Chairman.

The **Chairman**. You have not detoured at all. This has been very material.

Mr. **Lamont**. I associate myself with Senator Vandenberg.

ANGLO-FRENCH LOANS OF 1915

Mr. **Brown**. Turning again to the few remaining details of the Anglo-French loan, we have here a cable of November 3, 1915, from E. C. Grenfell to Mr. Lamont.

(The document referred to was marked "Exhibit No. 2296" and is included in the appendix on p. 8300.)

Mr. **Brown** (reading):

> As soon as if ever you have a little leisure, will you write me fully history of Anglo-French loan 1915 negotiations, plots and counterplots, and attitude of Commissioners. This would greatly help me as there has been considerable amount of underground work here, possibly begun in New York. Sir Edward Holden has returned with very swelled head and has been forming committee and making arrangements on his own authority. He has been always very jealous of Morgan houses and practically gave out here that he was going to work through other parties, form a committee of National City Bank, New York; Guaranty Trust Co., New York; and Bankers Trust Co., New York, to your exclusion. * * *

By the way, do you suppose Sir Edward's jealousy of the Morgan houses in any way contributed to Governor Strong's refusal to deal with him on the first question of an unsecured loan?

Mr. **Lamont**. Mr. Brown, do you really want to ask that question?

Mr. **Brown**. Yes; I think that is a fair question. We have seen the intimacy between J. P. Morgan & Co., and Governor Strong.

Mr. **Lamont**. You are the person that introduced into the record Governor Strong's letter to Sir Edward Holden. Governor Strong is dead. There is nobody to interpret what he meant except his letter itself. In that letter Governor Strong, a man of high integrity and sense of public duty, said to Sir Edward Holden that because of his semi-official position as head of the Federal Reserve Bank of New York, and therefore the connection with the United States Treasury, he felt it inadvisable for him to advise Holden on any question of a British Government bond.

Mr. **Brown**. Thank you.

Mr. **Lamont**. That is the record.

Mr. **Brown**. In regard to the first or opening three lines there, what were the negotiations, plots, and counterplots to which Mr. Grenfell refers?

Mr. **Lamont**. Oh, well, the negotiations were as I described to you briefly on Friday. Plots and counterplots—I have not seen this for a long time, but I would say that was a pleasant phrase on the part of Mr. Grenfell alluding simply to the fact that in a mixed commission of that kind there was a certain amount of pulling and hauling behind the scenes.

Mr. **Brown**. Do you recall what that pulling and hauling was?

Mr. **Lamont**. I recollect the chief pulling and hauling, as I would call it; that was when, after only three or four days of negotiation, we made an outright proposition to try to form a syndicate for $500,000,000 at a point and a half more for the British Government than they afterward secured.

At that point the French threw a monkey wrench into the situation by demanding $750,000,000. And Lord Reading, the head of the Commission, was undoubtedly having a very difficult time and there was a lot of pulling and hauling over that item; because, as it afterward turned out, it lost a point and a half to the British

Government and delayed the operation, as Mr. Whitney pointed out the other day, so it made it much more difficult.

I think that was the chief thing.

Mr. Brown. Your criticisms were directed against the French, primarily?

Mr. Lamont. I was not criticizing. You were asking me to describe what the allusion was.

Mr. Brown. I call your attention to a cable of the same date to Mr. Grenfell, signed by yourself, no. 9658.

(The document referred to was marked "Exhibit No. 2297" and is included in the appendix on p. 8301.)

Mr. Brown (reading):

> Two weeks ago, dictated memorandum for you covering this matter——

This is an answer to the preceding cable——

> but because it contained pretty drastic criticism hesitated to send same. Am now transmitting to you, tomorrow.

It seems that you were criticizing somebody.

Mr. Lamont. Undoubtedly I criticized the general course of the Commission in having failed to take advantage of the early proposition that was made to them.

Mr. Brown. Judging by your former statement that criticism, then, was directed primarily against the French?

Mr. Lamont. I guess there was some for Sir Edward Holden, undoubtedly.

Mr. Brown. The cable goes on:

> For your further information, remaining British and French commissioners here express bitter disappointment over slow sales of loan, total sales to public being less than $10,000,000, over and above the $260,000,000 withdrawn by participants, thus leaving $230,000,000 to be sold to the public. Sales proceeding so slowly that practically no chance before dissolution of syndicate December 15 of being able to dispose of any large amount.

Mr. Lamont. Yes; that indicates, as I said before, that the underwriters from the start had contemplated taking over the greater part of their participations.

Mr. Brown. I call your attention to the end of the cable:

> Lord Reading, however, will remember that throughout the negotiations we adhered to the position that the best possible plan for enhancing the credit of the Governments here, and for eventually obtaining the largest possible credit was to authorize our forming initial syndicate $250,000,000, have same oversubscribed, with the result that the underwriting would be considered as very choice, bonds would be handled quickly, go to premium, etc., and put us in early position for repeated operation. Commission would not listen to this and insisted upon our conducting an operation which we plainly foretold them would surfeit everybody and, in the long run, prove nothing like as creditable to Governments. We are doing everything in our power to disprove our own prophecy, but the circumstances are too much for us, for in order to accomplish the $500,000,000 underwriting we were obliged to throw it open to all investors of any size and even at that barely squeezed by the necessary mark. The result is that investing public came in largely on underwriting and on our offering we have limited public to appeal to until educational work throughout country has had opportunity to take effect, which will be a matter not of weeks but of months.

Does not that bear out my question before, that the distributing houses of the country were loaded up with this, and that the men whose business it was to buy and sell bonds had bought these bonds but now they were unable to sell them, because, as you say, the investing public was in on the other half of the loan already?

Mr. LAMONT. I would say that it bore out our statement, which we have made again and again Friday, and make it again this morning, that it was a very heavy operation, and we had to use every possible effort.

Mr. Whitney can explain to you the state of the bond-selling situation in those days much better than I can. Supposing you indicate that, Mr. Whitney.

Mr. WHITNEY. Mr. Brown, you know today it is supposed that according to the studies made by the Securities & Exchange Commission, there are something like 10,000 firms engaged in the distribution of securities.

At that time, according to our best guess, there were about 175. I am leaving out of that, of course, members of the stock exchanges, who at that time did nothing but pure brokerage business.

Also we must remember that until the Liberty loans, or until the war, really, this country was a debtor Nation, and the question of buying bonds was an almost unknown business.

At that time, if you go back to study the records, you will find that the savings among the people generally went to the savings banks and to some form or other of insurance. It was only with the introduction of the Liberty Loan and all the very intensive work that was then done that it became the customary thing for the ordinary individual to buy securities.

Of course, with that development there grew up in the post-war period a very large and active organization for distributing bonds to private investors. Prior to the war practically the only buyers of securities individually were savings banks, insurance companies, and certain people of substantial means, who knew about it and who understood it.

There were not many salesmen. They say there are 300,000 salesmen in this country now. At one time back there, in 1916, we figured it out and there were about 2,000 salesmen of bonds and at that time about 250 bond houses.

So, obviously, when you say all the distributing people were loaded up, I think the records will show the people who were engaged in the actual distribution of bonds were rather few and were not particularly loaded up because they were not people of any substantial capital. That was long before the days of so-called "bank affiliates", and there were about five or six what you call national bond distributing houses. It was a long, slow, and difficult process in the first place to educate the distributing houses themselves, and then, in the second place, to distribute to the salesmen they had and ultimately through them to the public.

It is just like any other merchandising proposition.

Senator CLARK. This loan was really the entering wedge, was it not, on the enormous expansion of the sale of securities to the American public, which did so much to bring us into our present deplorable economic situation?

Mr. WHITNEY. I really do not think that is so.

Senator CLARK. That follows from your statement.

Mr. WHITNEY. No; I said, the Liberty loans. If you had been, as I was, then engaged in trying to distribute securities in this country, you would find that really the Liberty Loan made the great difference, because that was organized, as you know, very completely, through all the districts. That is really what converted this country.

Senator **Clark**. This loan seems to have been rather completely organized through all the districts, from the exhibits we put in last Friday.

Mr. **Whitney**. For the underwriting, that is quite true. It was a tremendous, a terrific job, and very serious intensive work was done to organize the underwriting. When $512,000,000 of underwriting was obtained, as it says in this cable, it was obtained only because a lot of investors who would normally be investors, people of large means, came in at the underwriting price. This cable perfectly clearly indicates what we said right along, that we did not expect to do more than get the underwriting. That got Great Britain the money.

Senator **Clark**. But you have explained here repeatedly, both yourself, Mr. Morgan, and Mr. Lamont, that this was an operation of absolutely unprecedented magnitude in this country at that time.

Mr. **Whitney**. Absolutely.

Senator **Clark**. It required a development of distribution resources hitherto unknown in the country.

And granting that the Liberty loans were a little greater than this before they subsequently got through with them, this was really the entering wedge of that great development in the distribution of securities of all kinds to the American people, was it not?

Mr. **Whitney**. Certainly, to the extent that this is the public offering that marked the change from the United States being a debtor to a credit nation; yes.

Senator **Clark**. Yes; and it was the first offering that really marked this enormous expansion of distribution to the American public?

Mr. **Lamont**. But, Senator, here are some figures——

Senator **Clark**. Just let Mr. Whitney answer that question, if you please, Mr. Lamont.

Mr. **Lamont**. Excuse me, sir.

Senator **Clark**. This is a fact, that it really marked an epoch—let us say, marked a state in development from the comparatively moderate distribution which we have described awhile ago by one-hundred-and-some distributors in this country into a process which ultimately expanded into 10,000 distributors and billions of dollars of securities being offered and taken up by the American people.

Mr. **Whitney**. In a certain sense I suppose it did. It was the first effort. But from the standpoint of distribution, the only thing that could be used was the existing organization, which was not developed.

Senator **Clark**. Yes; I understand, but it was the first step in that enormous expansion that subsequently took place.

Mr. **Whitney**. I think that is fair, because it was the first perhaps large step in opening the markets of this country, which permitted the development of this country industrially and every other way.

This marked the change where we had to look in this country for our own development to our own capital, as before that we had largely looked to European markets.

So if you want to say this is the beginning of the present ability of industrials and railroads and public utilities and all kinds of business to get money to carry on their business, I think that is fair.

Senator CLARK. Even to very much overexpansion?

Mr. WHITNEY. Oh, certainly. Before you came in, Senator, we had talked about the expansion of the country in the twenties.

Senator CLARK. I do not know what went on before I came in. I was in another committee.

Mr. LAMONT. There were some figures on that. You said, "Increased during the Liberty Loan financing." I think they are of great interest, and I will give them from memory.

We figure that the total number of investors in Allied loans in the United States was not over 400,000, possibly 500,000 investors in all the United States.

The first Liberty Loan campaign resulted in 4,000,000 applications for that one loan. There is a jump from 400,000 to 4,000,000; 400,000 for all the Allied loans to 4,000,000 for the first Liberty Loan.

Senator CLARK. One of the important results of this enormous expansion of the means of distribution and this education, so to speak, of the American investing public, was the investment of hundreds of millions of dollars of money in the American investments in South American bonds.

I am not meaning to suggest Morgan & Co. put out the South American bonds, but that was an immediate result of this campaign of education and distribution of securities throughout the country. Is not that a fair statement, Mr. Morgan?

Mr. MORGAN. May I answer that for a moment?

Senator CLARK. Yes, sir.

Mr. MORGAN. You said, yourself—you gave the whole story—did not this result in the putting out to the American public of securities of all kinds? I tell you that that is the whole trouble.

Senator CLARK. That is true.

Mr. MORGAN. You are absolutely right.

Senator CLARK. All right. That is all I wanted to develop.

Mr. MORGAN. If they are not choosy about their securities, they make a great mistake.

Senator CLARK. All right. That is all I was interested in.

Mr. BROWN. I call your attention to a letter from J. P. Morgan & Co., to R. Y. Hebden, Esq., on November 4, 1915. I judge it is Mr. Anderson's letter.

(The document referred to was marked "Exhibit No. 2298" and is included in the appendix on p. 8301.)

Mr. BROWN (reading):

> We haven't made any statement as to the amount of sales of Anglo-French bonds and, for tactical reasons, I would rather prefer to be in a position where we could make the statement that we hadn't given the figures to anyone. For your own information, however, the sales, while slow for the first few days, have been increasing in a very satisfactory way. It is too early yet to make a guess as to the total result of the sales by the time the syndicate is dissolved, and I wouldn't want at this time to hazard an opinion on the subject.

In contrast to that, I call your attention to a cable of November 11, of J. P. Morgan & Co., to Morgan, Grenfell & Co., no. 9832, the bottom part.

(The document referred to was marked "Exhibit No. 2299" and is included in the appendix on p. 8302.)

Mr. BROWN (reading):

> * * * reason being that with bonds going as slowly as they are, it is increasingly manifest that upon dissolution of syndicate next month market price is practically certain to decline and we are anxious to be in a position ourselves to protect the market as far as may be feasible. After dissolution of syndicate there are really no members of group that we can ask to assist in this, it being quite a thankless operation.

There does not seem to be any indication of the great public responsiveness there.

Mr. WHITNEY. We have never pretended there was.

Mr. BROWN. I think there was some testimony along that line, or at least some people construed it so.

Mr. WHITNEY. That is different.

Mr. BROWN. I have here a letter from Harris, Forbes & Co., to Harris Trust & Savings Bank, Chicago, on December 9, 1915.

(The document referred to was marked "Exhibit No. 2300" and is included in the appendix on p. 8302.)

Mr. BROWN. I will read part of it [reading]:

> We have this morning discussed the matter with J. P. Morgan & Co., and they have authorized us to trade the "seller contracts" at the market.

This, I judge, refers to the dissolution of the syndicate.

> As intimated above, we are quite confident that unrestricted trading for the time being "at the market" is all that is needed to stimulate the demand for these bonds and that any turn may reasonably be expected to put the bonds back within a short time to a point more nearly in keeping with their actual investment value.

The closing line is:

> We shall be glad to execute orders for the bonds at the market.

You do not recall, do you, whether that was Harris, Forbes' own idea or whether they gathered that in conversation from you at all?

Mr. LAMONT. I have not the slightest recollection.

Mr. WHITNEY. It is only fair to assume it is their own idea.

Mr. BROWN. A letter from Lazard Freres, New York, to Lazard Freres, Paris, dated October 29, 1915, going back a little.

(The document referred to was marked "Exhibit No. 2301", and is included in the appendix on p. 8303.)

Mr. BROWN. It says:

> Not very much interest is taken by the general public in these bonds and it is therefore difficult to predict whether the syndicate will be able to uphold the quotation at anywhere near the issue price when the syndicate is once dissolved.

As a matter of fact, the syndicate was not able to hold the price up, was it?

Mr. LAMONT. Mr. Whitney can answer it. I do not think the syndicate attempted to maintain the price at the issue level, did it?

Mr. BROWN. The result was that all the underwriters whose business, as I said, was not only to buy bonds but to sell them, had them left on their shelves or else had their choice of taking a handsome loss.

Mr. WHITNEY. Mr. Brown, you use the word "underwriter." The underwriters in this loan, as we have stated many times, were not only those who distributed the bonds but largely banks and investors?

Mr. Brown. But insofar as the ordinary term is used, they were also included and they were unable to distribute the bonds except at a loss.

Mr. Whitney. I do not have the record here—I can get it very easily—but I do not think the so-called distributors, the retail houses in the bond business, had a very heavy underwriting position. I can look it up. It is not, relative to the total.

Mr. Brown. We can offer for the record, and the record will therefore show, the participation and subscription lists of the Anglo-French loan.

(The document referred to was marked "Exhibit No. 2302", and is included in the appendix on p. 8303.)

Mr. Whitney. There is no question about it that the underwriters, as they were made up of banks, individuals, and bond houses, did not find a ready sale of the bonds to the public. There is no question about that.

Mr. Brown. I will introduce in the record, just to make the record complete, a letter from Sir Frederick Williams Taylor to Mr. Lamont, dated the 28th of April 1916, in which he is inquiring about the market for Anglo-French loans.

(The document referred to was marked "Exhibit No. 2303", and is included in the appendix on p. 8319.)

Mr. Brown. I also introduce Mr. Lamont's answer, of May 1.

(The document referred to was marked "Exhibit No. 2304", and is included in the appendix on p. 8319.)

Mr. Brown (reading from "Exhibit No. 2304"):

> My guess upon the course of any particular security usually turns out wrong; but, if I were obliged to guess in regard to the Anglo-French bonds, I should be inclined to think that, even with the steady absorption which is going on, it would be some little time yet before we should see a material advance in the security.

He says:

> * * * undoubtedly a good many American manufacturers still have on hand considerable holdings of this security.

Then Mr. Anderson's answer of the same date to Sir Frederick Williams Taylor.

(The document referred to was marked "Exhibit No. 2305", and is included in the appendix on p. 8320.)

Mr. Brown. In that he says [reading]:

> We are not so closely in touch with the buying by small individual investors, but from the reports that come to us, it seems to be clear that a steady absorption in small denomination bonds is going on all the time. As against this, some of the larger interests—notably the manufacturing concerns who subscribed to the loan from business reasons when it was first arranged—have found it advisable to convert some of their bonds into cash, and the selling of one or two large amounts of this sort is probably the reason for the market's having failed to advance more from the recent low.

Then at the bottom of that paragraph Mr. Anderson says he has tabulated the transactions on the Stock Exchange since the active trading began a few days prior to the dissolution of the syndicate, and it aggregated approximately $89,132,000.

I offer for the record at that point an account entitled "Summary of British and French Government, joint bond purchase loan account, Anglo-French 5-year, 5-percents", which shows that up to the date of this letter this purchase account, that is, by J. P. Morgan & Co., had purchased in the aggregate $18,814,000 Anglo-French bonds and had sold $15,893,000; so that out of the total market operations from October 15th to May 1 of $89,000,000, $34,000,000 was activities of J. P. Morgan & Co.

(The document referred to was marked "Exhibit No. 2306", and is included in the appendix on p. 8321.)

EXCHANGE CRISIS [1]

Senator BARBOUR. Mr. Lamont, just while there is a pause here, if I may, revert to the discussion we had about, you might say, the lack of information of the support or lack of support of the pound sterling at that time, and the newspaper photostatic clippings that you supplied, as a businessman at the time, I am under the impression, and I would like to have you correct me if I am wrong, that practically every bank knew about this situation as far as the exchange departments were concerned.

In other words, anybody interested in exchange approaching any bank would have been informed pretty quickly as to the situation as it was generally known among banks.

There was some discussion here as to the fact that at the time the British decided no longer to support the pound sterling in the American market it was something of a secret. My impression is that it was no secret at all.

Senator CLARK. The exchange quotations showed just what was happening to the exchange market.

Senator BARBOUR. Yes. I think that everybody knew about it.

Mr. LAMONT. There was no doubt, Senator, it was a thing that was being talked about.

Senator BARBOUR. That is what I mean.

Mr. LAMONT. It was every-day gossip.

Senator CLARK. Nobody ever contended, so far as I know, Mr. Lamont, that there was any secret about the fact that the exchange market was taking a tumble. It was obvious that support had been withdrawn from the market, to anybody that studied the market reports, I take it.

Senator BARBOUR. The whole development I do not think was secret.

Mr. WHITNEY. A month before that the newspapers commented on the weakness of exchange. When it broke first to 4.76, and then to 4.74, then to 4.72, there were repeated comments. We put in those newspaper clippings showing the comments from financial journals of one kind or another, showing it was receiving a great deal of attention and causing a great deal of worry among the banks or financial communities.

Mr. BROWN. Clearly the sterling rate could not jump all around without having anybody know about it.

Mr. WHITNEY. Certainly.

Mr. BROWN. The question is, how much did the public know, not about the rate, but what was being done to support it or not to support it.

Senator BARBOUR. The point is this, I think that anybody that was really interested or who had reason to be interested or might want to buy pounds sterling, could have at any time gotten the information.

---

[1] See also "Exhibits Nos. 3123 and 3124", Hearings, Part XXX.

Senator CLARK. Gotten what information?

Senator BARBOUR. As to the situation generally.

Senator CLARK. You mean, information that Morgan & Co. had been in communication with the British Government urging them to take steps to bolster up the market, and that at a certain date, Morgan & Co. withdrew its support from the market, at the same time notifying the Secretary of the Treasury of a very drastic situation? Do you think that was known to the public?

Senator BARBOUR. I do not think it knew all the intimate details, but the point was, I do not think the public was uninformed as to what the whole situation was at any particular stage of the time.

Senator CLARK. Certainly the public was not uninformed that the exchange market was selling off. Anybody could pick up a newspaper and read that, of course.

But as to the point of this stage as to the negotiations between Morgan & Co. and the British Government, with the subsequent effect on the market, I do not think that was known to the public, and nothing has been produced here to indicate it was.

Mr. LAMONT. Earlier in the session this morning——

Senator CLARK. I just came in a little while ago.

Mr. LAMONT. We introduced a couple of photostats of newspaper clippings of August 10, 1915,[1] which you see was 7 days prior to the break in exchange, alluding to the talk which Mr. Davison had the honor of having with Secretary McAdoo.

From those clippings, which appeared in several papers at the time, it appears that Mr. McAdoo had sent for him to come to the Subtreasury in New York, together with a great many other different people, to discuss pending questions. So that the public was fully informed that there must have been something——

Senator CLARK. Was there anything in any of these clippings that had to do with this visit of Mr. Davison to Secretary McAdoo on the 14th?

Mr. LAMONT. There was none.

Senator CLARK. That was referred to in this cablegram when Mr. Davison went to Secretary McAdoo to serve notice on him that there was a very serious and tragic situation existing, which was the occasion of Mr. McAdoo's letter to President Wilson.

It seems to me that is really the initial interview, the one on the 14th.

Mr. LAMONT. There was none on the 14th.

Senator CLARK. When Morgan & Co. notified the British Government that Mr. Davison was communicating with Secretary McAdoo.

Mr. LAMONT. Certainly.

Senator CLARK. I assumed the interview took place because you had notified the British Government that it was taking place.

Mr. WHITNEY. Senator Clark, that is what we tried to bring up this morning. This newspaper clipping was on August 10, and referred to a visit by Mr. Davison made to the Secretary on the 9th of August at the Secretary's invitation.

If you remember the chronology, the cable to which you now refer was the 18th.[2] May I just read it again?

---

[1] "Exhibits Nos. 2279 and 2280", appendix, p. 8285.

[2] Previously entered as "Exhibit No. 2213." See Hearings, Part XXVI, p. 8121.

Senator **Clark**. Yes. It says: "In view of the conference, H. P. Davison had with the Secretary of the Treasury."

Mr. **Whitney**. "In view of the conference H. P. Davison had with the Secretary of Treasury." We were asked if we knew anything about it. We went home and tried to find out, and we found this clipping, which we had no record of—I mean, of the meeting. That is the 18th. The point is only that on the 11th of August, 2 days after Mr. Davison saw the Secretary, was the first day when we warned them that they were coming to the end of their immediate resources; and 2 days again after that, sterling having broken another 2 cents, we stopped buying; and on the 14th we got the cable instructing us, as we interpreted it, to stop buying exchange on the market. In other words, the talk Mr. Davison had with him was prior to this action rather than subsequent.

Senator **Clark**. The talk to which I am referring, Mr. Whitney, is the information conveyed to Secretary McAdoo, in which you say, "In view of the previous conversation"—I have not the exhibit right before me.

Mr. **Whitney**. That is what it did say.

Senator **Clark** (referring to exhibit): In view of the previous conversation between Mr. Davison and Mr. McAdoo, you were notifying Mr. McAdoo that a very serious situation exists. And it was evidently as the result of this warning that Mr. McAdoo wrote his letter to President Wilson.

Mr. **Whitney**. I would not know.

Senator **Clark**. You say it is perfectly clear as to what happened. This refers to the interview to which you just referred.

Mr. **Whitney**. On the exchange.

Senator **Clark** (reading):[1]

> For your information, in view of the conference H. P. Davison had with the Secretary of the Treasury——

that is the one to which we referred——

> we have today sent word to the Secretary of the Treasury that we regard the exchange situation very serious from the point of view of our commerce.

Evidently the message which you sent on the 18th touched off the letter to President Wilson.

Mr. **Morgan**. Would it not be quite natural to expect that Secretary McAdoo said to Mr. Davison, "Just keep me informed because I have got to know about this thing"?

Senator **Clark**. That may be, Mr. Morgan. I am not disputing that at all. What I am saying is that apparently what set the trigger off for the McAdoo letter to President Wilson was your letter of the 18h.

Mr. **Morgan**. Mr. Davison was not the only man Mr. McAdoo saw.

Mr. **Lamont**. Senator, do you not suppose that the Administration, and all parts of the Administration, were hearing from all over the country about the exchange situation?

Senator **Clark**. You were not evidently willing to rely on that, Mr. Lamont, because on the 18th you sent him word yourself.

Mr. **Lamont**. Certainly, but do you not suppose, on the point that Mr. Morgan just made, that the cotton Senators or the wheat Senators, those hooked up with cotton and wheat, had to be taken care of?

---

[1] Previously entered as "Exhibit No. 2213." See Hearings, Part XXVI, p. 8121.

Senator **Clark**. I do not know.

Mr. **Morgan**. Nobody knows.

Mr. **Lamont**. Nobody knows, because all the great amounts of sterling were for cotton, wheat, and so forth, and would interest the western Senators.

Senator **Clark**. I do not know as to that, Mr. Lamont. All I do know is that the firm which had been, on behalf of the British Government, supporting exchange, had withdrawn its support just a few days before, and did notify the Secretary of the Treasury, which was followed by his letter to the President of the United States. That much of the sequence we know. Whether any cotton Senators, or any other Senators, or others, intervened, we do not know at the present time, but we may find out some day.

Mr. **Whitney**. We did not withdraw support, Senator, as to the exchange until 4 days after Mr. Davison had had a talk with the Secretary.

Senator **Clark**. That seems to be perfectly obvious on the face of the letter.

Mr. **Brown**. After you withdrew support, you sent word about it?

Mr. **Whitney**. Four days again. Four days seems to be a mystic period.

ANGLO-FRENCH LOANS OF 1915

Mr. **Brown**. I introduce into the record another letter of Harris, Forbes to N. W. Harris & Co., Boston, Mass., dated November 4, 1915. The second paragraph of that letter reads as follows:

> At a conference about a week ago it was decided to discontinue the large syndicate advertisement and in place of this large advertisement to run a number of single, double, and triple-column advertisements. These advertisements are to appear under the name of different houses; and while they are to be paid for by the syndicate, the idea is to make them appear to be the individual advertisement of the different houses.

Then at the bottom the letter continues [reading]:

> Each house is to be allowed to prepare its own advertisements and place them through their own advertising agents. We have prepared in New York and have set up about fifty different advertisements, which advertisements will be available for the other central cities if desired.

This indicates that all over the country there were advertisements of this bond, signed by local distributors, does it not?

Mr. **Whitney**. Quite.

Mr. **Brown**. But the advertisement was paid for and written in the central office of the Guaranty Trust Co., was it not?

Mr. **Whitney**. As I remember it, there was a group of offices, of various houses and banks, which had the advertising; yes.

Mr. **Brown**. That letter is offered for the record.

(The document referred to was marked "Exhibit No. 2307" and is included in the appendix on p. 8330.)

Mr. **Brown**. What was the object of having the same advertising of the central people signed by different houses?

Mr. **Whitney**. Because all those houses were members of the original managers' syndicate, and these pieces of local advertising were placed where the particular houses happened to have their chief offices. In other words, houses in New England would advertise in New England, and a house in Chicago would advertise there. I am speaking from memory; any house in St. Paul would advertise there, and so forth. They would take the local distributors, the retail houses, in the different localities.

Mr. **Brown**. They signed it, but the advertisement was prepared in the central office and paid for centrally?

Mr. **Whitney**. Yes, sir; and it is always done that way in the bond business, Mr. Brown. Arthur Young & Co.'s account shows so much for advertising. It is perfectly open, and the expenses were for that purpose.

Mr. **Brown**. I offer for the record a letter on the Anglo-French loan situation dated December 17, 1915, merely showing for the record the number of advertisements run, and so forth.

(The document referred to was marked "Exhibit No. 2307–A" and is included in the appendix on p. 8330.)

Mr. **Brown**. I call attention to letter of December 21, 1915, again from Harris, Forbes & Co., addressed to J. P. Morgan & Co.

Mr. **Lamont**. What date?

Mr. **Brown**. December 21, 1915, from Harris, Forbes & Co., to J. P. Morgan & Co. I do not know if it is in your book, Mr. Lamont. I offer it for the record.

(The document referred to was marked "Exhibit No. 2308" and is included in the appendix on p. 8331.)

Mr. **Morgan**. What is it about?

Mr. **Lamont**. You discontinued this method of centralized advertising.

Mr. **Whitney**. You mean advising us to?

Mr. **Brown**. Yes.

Mr. **Whitney**. Could I see a copy of it?

Mr. **Brown**. Certainly. The fifth paragraph is the significant one. There is another letter of January 6, 1916.

Mr. **Lamont**. Let us look at this first one, please, Mr. Brown.

Mr. **Brown**. Certainly.

Mr. **Lamont** (after reading document). Yes.

Mr. **Brown**. Letter of January 6, 1916, saying [reading]:

> The committee feels that any advertising which may be done, in order to be effective, must carry some signature. * * *

This is touching the record about centralized advertising.

Mr. **Whitney**. There is no question about the centralized preparation.

Mr. **Brown**. That letter is offered for the record.

(The document referred to was marked "Exhibit No. 2309" and is included in the appendix on p. 8331.)

Mr. **Brown**. I call attention to a letter of October 8, 1915, to Fairfax Harrison, which is offered for the record.

(The document referred to was marked "Exhibit No. 2310" and is included in the appendix on p. 8332.)

Mr. **Brown**. That letter of October 8, 1915, reads in part as follows [reading]:

> Attached hereto is a statement which a number of eminent gentlemen in this country have expressed their desire to sign and which, if you approve, we should be very glad to have your name added to. The Anglo-French loan is of such great importance to the country and the opinions of its leading citizens

are at this juncture of such moment that it has been deemed wise to gather up various opinions, put them in the form of one concise statement, and then have that statement signed by various leading men.

Those who have already expressed a desire to sign are James J. Hill, Howard Elliott, Henry L. Higginson, Theodore N. Vail, Robert T. Lincoln, Seth Low, and others.

Was it your custom to try to get up a list of prominent names of people who approved of this loan?

Mr. Lamont. There was no custom about it. You see, Mr. Brown, this was a special loan, which had features of its own, and was outstanding. On this one loan we undoubtedly were glad to arrange to receive endorsements from these eminent gentlemen. We never did before or since, that I know of, but there was no reason why we should not.

Mr. Brown. I offer for the record two letters, one of October 28, 1915, and one of November 5, 1915, which indicate that it was the custom in selling this loan to have contact with various fraternal orders and to use their membership lists.

Mr. Whitney. British and Scotch.

Mr. Brown. Yes, sir.

(The documents referred to were marked, respectively, "Exhibits Nos. 2311 and 2312" and are included in the appendix on p. 8332.)

Mr. Brown. I have a letter from Mr. Fischer, Bonbright's agent in Paris, to William P. Bonbright, of July 20, 1915, which I offer for the record with appropriate number.

(The document referred to was marked "Exhibit No. 2313" and is included in the appendix on p. 8333.)

Mr. Brown. That letter reads in part as follows:

My Dear Mr. Bonbright: I wrote you last on July 19. Yesterday I dined with a friend of mine—

Mr. Lamont. What is the date?

Mr. Brown. July 20, 1915.

Mr. Lamont. Thank you.

Mr. Brown (continuing reading):

Yesterday I dined with a friend of mine who is well posted on the financial situation here and particularly on the Franco-American situation. He has been the last 3 years director of the Banque Privee and has lately joined Messrs. Morgan, Harjes & Co.—

As a partner of Morgan, Harjes?

Mr. Lamont. Not partner.

Mr. Brown. It says he had lately joined. It does not say he became a partner, but joined [continuing reading]:

Speaking in a general way of the Franco-American financial situtiou my friend was of the opinion that you will in America come by and by to the idea of financing European requirements with much greater facility than now.

He mentioned a possible operation of England and France jointly, operation which has not taken place yet because the English find money easily on much cheaper terms and conditions in their own country. * * *

I am telling you all this to show you how everybody is following with the keenest interest this financial situation and how the largest banks in France are trying to decide their American connections to finance European requirements. It is certain that American financiers have not yet taken a decided position in this war, which is no doubt particularly due, besides commercial reasons, to the attitude of your Government, * * *

Now, in contrast with that, or on that matter, I would like to call your attention again to what was put in the record, your remarks on the Life of Mr. Davison, that the final result was deemed by the whole American community a great triumph for the Allied cause.

(Extract from Henry P. Davison, "The Record of a Useful Life", by T. W. Lamont was marked "Exhibit No. 2314" and is included in the appendix on p. 8335.)

Mr. **Brown**. Was it a great triumph for the Allied cause because it marked the definite commitment of the American financial community to the cause of the Allies?

Mr. **Lamont**. I would not have gone as far as that, I do not think, Mr. Brown.

Mr. **Brown**. Wherein was it a definite triumph for the Allied cause?

Mr. **Lamont**. When you pull a man's book on him, he is at a disadvantage ordinarily [laughter]. What I mean to say is this, Mr. Brown:

When I wrote that phrase—and I wrote it years ago, although the book came out only 2 or 3 years ago—what I undoubtedly had in mind was that at that time the great preponderant sympathy in America was for the Allies, and since the two great leading Allied Governments had been able to arrange this notable loan, against various odds and in an amount that we had considered very, very heavy, as we have pointed out, I considered that as quite a triumph. That is about all I meant.

Mr. **Brown**. Thereafter a great many investors were holding Anglo-French bonds that they could not dispose of except at a serious loss?

Mr. **Lamont**. Wait a minute on that. The Anglo-French loan, as I say, you have been pointing out that on that particular loan issue it was distributed to the bondholders very slowly; I mean to say to private investors very slowly; so that the amount in the hands of private investors until after 6 months had elapsed was comparatively limited.

As I said before, the total number of American investors in all these Allied loans then and thereafter only amounted to four or five hundred thousand.

Mr. **Brown**. My question was that there was no way of getting out of this loan except at a loss, was there?

Mr. **Lamont**. The bonds had shown an initial decline, certainly, but, Mr. Brown, in that connection, let me point out this to you, because it has come up here so often, the point has come up here so often, in this sense: That it is not likely that American investors in these Allied loans had put everything they had in the world in those loans.

Mr. **Brown**. If I do that, it is my mistake.

Mr. **Lamont**. That is the impression. And, therefore, they were very much worried about them. There was nothing like that in the situation. No prudent investor, unless he was an absolute fool, would put anything but a small portion of his savings in any one investment. So that, so far as any particular sentiment on that ground is concerned, I never thought it amounted to very much.

Mr. **Whitney**. Mr. Brown, as a matter of interest, the low, up until April 1917, when we got into the war, the lowest price they touched was 90 on February 17, and went back to 93¾, and the low before that was 92½ in January, taking it by months, so that after all they had a 10-percent low, it is true, but that was in the months before going into the war, and afterward they went much further down.

Mr. **Lamont**. Of course, it would be just as fair to say that, Mr. Brown, in connection with the American investment in Liberties 4¼, which went down 18 points.

Mr. **Whitney**. It is largely a matter of money rates. Of course, they did have that situation.

Senator **Clark**. What about Liberty bonds?

Mr. **Lamont**. The 4¼'s went down to 82 in 1920.

Senator **Clark**. Of course that was after the Allies had gotten into us for billions of dollars, was it not?

Mr. **Whitney**. The money rates went up.

Senator **Clark**. That is perfectly natural, after the Government of the United States had loaned billions and billions of dollars to those nations, and it became apparent at that time that we were never going to get all of it back, that American bonds would sell off.

Mr. **Morgan**. May I say, also, Senator, that it is perfectly natural, if you have got too many securities to be digested at once, that there should be a period when they go down below their cost price?

Senator **Clark**. That is perfectly true.

Mr. **Morgan**. They glut any market.

Senator **Clark**. It is perfectly true that these bonds had been issued with the understanding that billions of dollars, which were then issued for the purpose of loaning money to the Allies, were to be repaid by the Allies. As the Allies evinced a disinclination to pay back the money they had borrowed, the natural effect of that would be felt on the American bond market.

Mr. **Morgan**. I do not know how much was said about it, but I do not think anything was said about the Allied loans. I was on the Liberty Loan committee, and I do not recall anything being said that the bonds would be taken care of in part by the Allied Governments.

Senator **Clark**. They were loans to the Allied Governments, which were to be paid. That was certainly the understanding between the Allied Governments and the United States Government, that they were to be paid, and as the Allies showed a disinclination to pay their debts, naturally it affected the credit of the United States, who loaned them the money.

Mr. **Lamont**. Senator Clark, this is an important point to bring out: The two chief Allies were not in default in their debts until December 1931.

Senator **Clark**. I read propaganda to that effect before we came home from France in the Army.

Mr. **Lamont**. I do not know anything about that.

Senator **Clark**. The French early showed a very great disinclination to pay. I heard Mr. Clemenceau make a speech in St. Louis in 1920, I think it was, in which he vigorously upbraided the United States for suggesting the collection of those debts.

Mr. **Lamont**. You say that the decline in general of the bond market in the United States, including Liberty bonds, was due to a rumor in 1920 that the Allies might default in making their payments?

Senator **Clark**. I think that would be perfectly natural, if they should; yes, sir.

Mr. **Lamont**. When, as a matter of fact, it was only 10 years later, or 11 years later, that they defaulted. You and I deplore the default equally, but it is only fair to point out that the default occurred 11 years later.

Senator **Clark**. That is perfectly true, and nobody has contended to the contrary; but in the agitation, as long ago, I think, as 1923, Americans were being mobbed in Paris for the suggestion on the part of the United States that they would like to have those obligations met, and that agitation has been continuing ever since the war.

Mr. **Lamont**. Of course I do not want to labor the point too much, except I would like to point out that there was a decline in all sorts of bonds, industrial, railroad, and all that sort of thing in 1920; and, speaking of this intimation on the part of the Allied Governments, what has that to do with the situation which took our bonds down?

Senator **Clark**. I think that is perfectly natural, considering the situation as a whole, Mr. Lamont, that that was one contributing cause; but it is perfectly natural that with this tremendous investment which had been built up during the war, both before and after we got into it, together with the question of tremendous expansion and industrial development, the overbuilding of plant capacity, which was absolutely useless in normal times, it would naturally make for a reaction at the conclusion of the war.

Mr. **Whitney**. Senator Clark, there was never at that time the slightest question of impairment of United States credit. It was the money condition; and the best risks in the country had to pay 7 percent in 1921, take Bell Telephone of Pennsylvania, which put out 7-percent bonds, because I remember them; and at that time there was no question of United States credit being impaired, but merely a matter of money rates, which came about in the contraction of credit, but there was never any question at that time that the United States credit was impaired. It was not instanced by that doubt or by any doubt at that time.

Mr. **Brown**. That renders the Anglo-French loan quite worthless. There was a business depression in the winter of 1915 and '16.

Mr. **Whitney**. But there was a tightening of money rates.

Mr. **Brown**. The rate was often well below 9 percent and the Anglo-French never sold above 96.

Mr. **Whitney**. I grant that. There is no argument about that.

Mr. **Brown**. There is no comparison between the two.

Mr. **Whitney**. Not the slightest except economic conditions govern the situation to some extent.

Mr. **Morgan**. A glut in the market always causes such an effect.

Senator **Clark**. What was the glut in the market?

Mr. **Morgan**. The $500,000,000 issue would take a long time to place and get it out.

Senator **Clark**. That is not because it glutted the market?

Mr. **Morgan**. It glutted the market at that time.

Senator **Clark**. The United States Government was not putting out loans at that time.

Mr. **Morgan.** When Liberty Loans came out and you got 10 times as many people to invest in such things as ever did before, you also glut the market, and it could not be helped.

Mr. **Lamont.** In 1927, the Federal Reserve bank rate went up to 7 percent, and confirms the story which Mr. Whitney says.

EMBARGOES AND MUNITIONS PRICES

Mr. **Raushenbush.** Mr. Chairman, there are a few questions on the record which I would like to straighten out, if I can. Would any of you gentlemen care to fix about the time in those neutrality years, from 1914 to 1917, when any cessation of war, any sudden cessation of the war, or the equivalent, to wit, an embargo on munitions, would have given the economic life of the country a very stiff jolt? About when were we so involved, in other words, in this munitions business, that if things were suddenly banged shut, if we could put on an embargo and everything was suddenly stopped, that the country would have gotten a very stiff economic jolt. Could you fix that time in your own memory?

Mr. **Lamont.** That is a very academic question, is it not, Mr. Raushenbush. We all know during the autumn of 1916 that talk of peace was becoming stronger and stronger.

Mr. **Raushenbush.** In the autumn of 1916, the late autumn of 1916. The talk about peace was becoming stronger and stronger, and people were hoping that Mr. Wilson might succeed in his efforts to be a mediator, we will say, and the general talk about peace at that time I recall very distinctly was having an effect on people. They said quite philosophically, "That is fine. Let peace come along. That means a temporary let down in these foreign orders—O. K."

The **Chairman.** Incidentally, that was the same autumn when a Presidential campaign was on, was it not?

Mr. **Lamont.** Certainly, certainly. But, as I am reminded, Senator, the peace talks were almost all subsequent to this election, being in late November.

Mr. **Raushenbush.** Mr. Lamont, do I take the purport of your answer to be, that, if any cessation of munitions shipments had happened, even as late as the fall of 1916, it would not have given the economic life of the country a very severe jolt? Do I understand you correctly?

Mr. **Lamont.** No; I would not make any categorical utterance like that, Mr. Raushenbush, but I do not exactly see the point of what you are trying to get at.

Mr. **Raushenbush.** All right.

Mr. **Lamont.** If you can conceive of our Government saying: "From tomorrow morning on, at 10 o'clock, there shall be no further shipments of wheat or cotton, or copper, or manufactured goods, including munitions, abroad", why, of course, it would cause a jolt. Why not?

Mr. **Raushenbush.** You touched me on the raw here, a minute ago, quite unintentionally, I am sure, Mr. Lamont.

Mr. **Lamont.** I am sorry.

Mr. **Raushenbush.** When you suggested I was asking an academic question. I once had the misfortune to teach school in college for a year, so that I have got an aversion to academic questions, and I never ask them. It was a very real question. The question came to me in looking at a letter from your export department to du Ponts, dated April 22, 1915, and I think I better read it, because apparently the British War Office had envisioned a possibility of that sort of a stoppage.

Mr. **Lamont**. I did not get that.

Mr. **Raushenbush**. I am going to read it, because apparently, at that time, in April 1915 the British War Office had envisioned that there might be an embargo by the United States Government on munitions.

Mr. **Lamont**. Somebody introduced a resolution to that effect; did they not?

Mr. **Raushenbush**. They may have.

Mr. **Lamont**. Senator Hitchcock.

Mr. **Raushenbush**. The answer to that, to which I want to come immediately afterward, seems to indicate at least a little bit that the munitions companies were a little bit involved. Just let me read the letter.

Mr. **Lamont**. Please.

Mr. **Raushenbush** (reading):

April 22, 1915.

E. G. Buckner, Esq.,
Vice President, E. I. du Pont de Nemours Powder Co.,
Wilmington, Del.

Dear Sir: In connection with the order just placed with you for 6,000,000 pounds nitro cellulose powder, we ask that in preparing the contract you embody a clause somewhat along the following lines:

"It is agreed that if by reason of an embargo the powder hereby contracted for cannot be exported from the United States, the buyers, at their option, may terminate this agreement, but in such event the sellers shall be entitled to receive the unpaid purchase price of any powder then actually manufactured and accepted or ready for acceptance hereunder, and the sellers shall further be entitled to retain or receive a sum sufficient to cover the actual expenditures and outstanding obligations of the sellers made with respect to powder contracted for hereunder but not so manufatcured and accepted or ready for acceptance at the time of such termination."

We have been asked by the War Office to incorporate a clause somewhat similar to the above in all contracts that may be closed from now on.

Yours truly,

Export Department,
By ——— ———.

(The document referred to was marked "Exhibit No. 2315" and appears in full in the text.)

Mr. **Raushenbush**. Considering the question is being raised there by your export department, by Mr. Stettinius, on request of the British War Office, asking du Ponts to put in that sort of protective clause into their contracts at that time. That is right, is it not?

Mr. **Lamont**. Would you mind putting that question again, Mr. Raushenbush?

Mr. **Raushenbush**. On April 22, 1915, Mr. Stettinius, in your export department——

Mr. **Lamont**. Yes.

Mr. **Raushenbush** (continuing): On the request of the British War Office——

Mr. **Lamont**. Right.

Mr. **Raushenbush** (continuing): Was asking du Ponts to do that.

Mr. **Lamont**. Right.

Mr. **Raushenbush**. Then on April 27, 1915, we find a letter from E. G. Buckner, vice president of the du Pont Co., addressed to you, Messrs. J. P. Morgan & Co., as follows (reading):

> E. I. du Pont de Nemours Powder Co.,
> *Wilmington, April 27, 1915.*
>
> Messrs. J. P. Morgan & Co.,
> *New York City.*
>
> Gentlemen: I enclose herewith agreement in duplicate between His Britannic Majesty's Government and this company covering 2,000,000 pounds of trinitrotoluol. Please sign and have executed both copies of the agreement, and return same to this office when we will have them executed on behalf of this company, and return one copy for your files.
>
> In reply to your letter of April 22 with request for a change in our contracts relative to an embargo clause, will say that this matter has had our careful consideration, but we find ourselves unable to meet your views. It is necessary for us to make large commitments for raw materials, which are now at high prices, in order to be certain of the deliveries which are required. These contracts cannot be canceled nor could the material be used by us in other contracts; so that we are committed. In addition to this we are obliged to construct, or to hold in readiness, factories which cannot be turned to other purposes and we could not command a requisite operating force were we at liberty to cancel contracts and close factories at a moment's notice. Moreover, were such action taken as a result of a temporary embargo on the manufacture of powder, it would be impossible to reassemble the operative force at a later date; a difficulty much to the disadvantage of your principal.
>
> Your truly,
> E. G. Buckner, *Vice President.*

(The document referred to was marked "Exhibit No. 2316" and appears in full in the text.)

Mr. **Raushenbush**. Now, the question there is, Mr. Lamont, in April, did not du Ponts, at least, as one of the chief munitions manufacturers, find themselves so committed that they would not even accept these fairly reasonable terms by the British Government? They just painted a picture there that their commitments had extended out through the whole country, and that if they were canceled, the jolt all around the place would be terrific. Is not that fairly true, that that was happening to du Ponts?

Mr. **Lamont**. I do not see any reason to question that.

The **Chairman**. Cannot we agree that an embargo at that time would have wrought havoc throughout industry?

Mr. **Lamont**. A sudden embargo, Senator, at any time, would have been very upsetting; no doubt about it.

The **Chairman**. At any time after we had sought to gain any share of the profits or the commerce that flowed from the war abroad?

Mr. **Lamont**. Of course, Senator, I think it would have been not only upsetting at any time during the period which you indicate, but I think it would have been simply calamitous for these United States, if it had been put on at the beginning of the war, for the reason that we were already in a depression and quite a serious depression, you will recall, during the latter part of 1912, 1913, and the early part of 1914, and it was only the increase of our export trade at that time that took us out of that depression.

The **Chairman**. I could not agree with you totally on that score, Mr. Lamont, but in disagreeing and taking up the matter between us we would only get back into a debate again which would be quite removed perhaps from the record.

Mr. **Lamont.** Fine.

Mr. **Raushenbush.** There was another question which came along a little later in March. Did you, representing the British, ever find that the American manufacturers were insisting on what you and they considered exorbitant prices for their munitions?

Mr. **Whitney.** What year is this?

Mr. **Raushenbush.** In 1916.

Mr. **Whitney.** Have you got reference to the question of a 5 percent tax, the tax question?

Mr. **Raushenbush.** No; I just want to know, as a general impression, as to whether you and the British had had that impression, that the American manufacturers were charging very exhorbitant prices.

Mr. **Lamont.** I think there is some talk every now and then, in the course of the discussions Mr. Stettinius was having with American manufacturers, that he thought, in this way and in that way, the prices were too high. Is not that in the record?

Mr. **Raushenbush.** Not yet.

Mr. **Lamont.** Are there not cases of that?

Mr. **Raushenbush.** There is one case here, which we want to ask about, and perhaps you can throw some light on it, but I was asking the question as to how general it was.

Mr. **Lamont.** Of course, between the buyer and the seller, there is bound to be not always perfect accord as to what is the correct price.

Mr. **Whitney.** I think the fair answer is that there were certain cases, yes; but as a general question, no. That is of course, what I have been told.

Mr. **Raushenbush.** Could you mention those cases?

Mr. **Whitney.** I could not, because I did not have anything to do with the export department. [Conferring with associates.] Apparently not.

Mr. **Raushenbush.** Here we have only one, of Midvale Steel, and I call your attention to a telegram from Morgan in London to G. W. Bacon, March 28, 1916. It is labeled no. 14974.

Mr. **Whitney.** I remember that.

Mr. **Raushenbush.** It reads:

> Appreciate your prompt reply which was discussed with authorities yesterday morning. Price of $30,500 each for 100 howitzers which Midvale Steel Co. now ask is considered exorbitant, particularly as their former price of $27,500, as Corey will recall, was regarded by Sir H. F. Donaldson as excessive.

I think there is nothing further in that telegram of interest, unless you see something.

Mr. **Whitney.** Except it has got a rather interesting paragraph there.

Mr. **Raushenbush.** Go ahead.

Mr. **Whitney** (reading):

> Confidential, for your information only, manufacturing facilities have increased enormously here and under system of controlled factories prices have been and are being greatly reduced.

Mr. **Raushenbush.** That paragraph you have just read there supposedly gave an excuse for pressure, if you will, or getting these American manufacturers to come down in their prices.

Mr. **Whitney.** This is from Mr. Stettinius, who was in England at that time.

Mr. RAUSHENBUSH. Let that be introduced.

(The document referred to was marked "Exhibit No. 2317" and is included in the appendix on p. 8335.)

Mr. RAUSHENBUSH. This, I think, will be of some significance to the committee, Mr. Chairman, being a cablegram dated March 29, 1916, from Morgan in New York to Morgan in London. It reads in part as follows:

> For E. R. Stettinius. 8-inch howitzers: Have conferred fully with officials Midvale Steel Co., who state it is impossible for them accept suggestion of $26,000 per gun, including bonus of $750 for deliveries within 10 months from date of order. The reasons for declining this suggestion are as follows:
>
> (1) The actual shop cost of gun, including carriage and limber and amortization of plant they estimate under most favorable manufacturing conditions at $26,000.
>
> (2) Any price now accepted from British Government would necessarily form price basis for future manufacture for United States Government.
>
> (3) United States Government have recently purchased 6-inch howitzers, including carriage and limber, comparable with the 8-inch guns in every way except as to size, at $30,425 each.

The CHAIRMAN. What are we to gather from this; that the United States Government was having to pay more at that hour for its munitions than Great Britain was paying for its?

Mr. LAMONT. Senator, if you will look further along in that cable, it says:

> Delivered your cable in entirety to W. E. Corey, yesterday, who then stated very frankly would meet your views even though he did not make a dollar on the order, provided on investigation he did not find this would jeopardize future relations between Midvale Steel Co. and United States Government. He now finds, as above outlined, that such relations would be seriously affected by accepting your suggestion and therefore states you may regard their offer herein as Midvale Steel Co.'s last word.

Mr. RAUSHENBUSH. That is $27,500.

Mr. LAMONT. Does not that answer your inquiry, Senator?

Mr. RAUSHENBUSH. Let us go on with it [reading]:

> We would add for your information that, in hearing before Committee on Naval Affairs, United States Senate, last week, strong pressure was brought to bear on American manufacturers, charging discrimination against the United States Government in favor of foreign governments for whom work had been done at lower prices.

Mr. WHITNEY. Is not the net of that, Mr. Raushenbush, that Mr. Stettinius wires Mr. Bacon, who was in charge in his absence, that he thinks the price of $30,000, which apparently was the price they were quoting for the Government, was too high?

Mr. RAUSHENBUSH. We have got a letter to maintain that. This, by the way, is from Mr. Bacon to Mr. Stettinius.

Mr. WHITNEY. This one was, but the other was from Mr. Stettinius to Mr. Bacon.

Mr. RAUSHENBUSH. He says that the United States Government is paying $30,425 for a comparable gun, and therefore no reason why Midvale does not feel itself free to take a very much lower price from the British Government, as a result of large scale orders, as it would jeopardize their future arrangements with the United States Government. In other words, the significant thing seems to be that they want to keep their price to the Government up. That is the point that we get out of it. They do not want to get under that.

Mr. MORGAN. This is what is stated by the officials of the Midvale Steel Co. We do not know anything about that.

The CHAIRMAN. That is clearly understood.

Mr. MORGAN. We had nothing to do with it.

Mr. RAUSHENBUSH. It went through your export department, and you passed it back and forth.

Mr. MORGAN. We transmitted it, but we are not responsible for the statement that price was the reason. They gave that as their own reason.

Mr. RAUSHENBUSH. That letter is offered for the record.

(The document referred to was marked "Exhibit No. 2318" and is included in the appendix on p. 8336.)

The CHAIRMAN. Was it probable that Midvale was contemplating large-scale orders from the United States Government?

Mr. MORGAN. I have not an idea what was contemplated or what was not.

Mr. WHITNEY. It says it is for 100 howitzers for the British Government, does it not?

Mr. RAUSHENBUSH. Yes.

The CHAIRMAN. What was the situation closer to home at that time, that was occasioning the United States contemplating a little better preparation?

Mr. MORGAN. I do not know.

The CHAIRMAN. Was that the Mexican matter?

Mr. MORGAN. Was it Mexico?

The CHAIRMAN. Exactly.

Mr. MORGAN. I do not know.

Mr. RAUSHENBUSH. Mr. Chairman, the Committee might at some time want to consider that price arrangement with the United States Government, with fairly high prices for few pieces, as a possible means of throwing some light on the future of the munitions industry in this country during the years following the war.

The CHAIRMAN. Exactly.

Mr. MORGAN. That statement, and the price, and the whole thing, rests entirely on the Midvale people, and we have nothing to do with it at all.

The CHAIRMAN. The Committee understands that.

Mr. LAMONT. I am not a military man, but was it ever contemplated to use howitzers in Mexico?

The CHAIRMAN. I am sure I do not know.

Mr. MORGAN. I do not know.

The CHAIRMAN. I have never been charged with being a military man either.

Mr. RAUSHENBUSH. They seem to be using them in Ethiopia at the moment, Mr. Lamont.

Mr. LAMONT. Not of this type.

Mr. RAUSHENBUSH. Not of that type.

I want to turn to a cable from Morgan in London, dated March 13, 1916, for H. P. Davison. I will offer it for appropriate number.

(The document referred to was marked "Exhibit No. 2319" and appears in full in the text.)

Mr. RAUSHENBUSH. That cable reads:

> 14685. Denkstein for H. P. Davison. Suggestions are being made here that the possibility of intervention by United States Government in Mexico will re-

sult in requirements for munitions of war by United States Government which will greatly delay fulfillment of contracts for British Government and Allies. It has even been suggested United States Government is already placing orders with Remington Arms U. M. C. Co., Midvale, Eddystone Ammunitions Co., and others, and that this policy is being supported by German intriguers.

Please cable whether you believe there is any truth in these suggestions or whether you think United States action as regards Mexico is likely to develop in such a way as to interfere with British Government contracts.

Does it really seem there as if preparedness for the United States, rather than for the Allies, could be possibly labeled as German intrigue, German propaganda?

Mr. LAMONT. What is that?

Mr. WHITNEY. The next cable, no. 15686, answers it, I think.

Mr. RAUSHENBUSH. I was asking about the German question.

Mr. WHITNEY. I cannot see that was ever answered. That was an inquiry, was it not?

Mr. RAUSHENBUSH. This is something from Morgan in London, in which it says that it has been suggested that the reason the United States was putting out orders with these various companies was because of German intrigue, apparently, to get the United States prepared. It is the first time I ever heard our preparedness discussed as pro-German.

Mr. MORGAN. It was a suggestion made in London. That is all we know about it.

Mr. RAUSHENBUSH. It was an English suggestion, that if the United States got itself prepared, it would be pro-German?

Mr. WHITNEY. That must have been it.

Mr. LAMONT. I would not attach too much importance to that, Mr. Raushenbush. This is probably some little question asked by somebody in the War Office.

The CHAIRMAN. As we go along, I think you will find, Mr. Lamont, that the Committee is justified in placing more importance upon that than might now seem to be the case.

Mr. LAMONT. I see.

Mr. RAUSHENBUSH. Mr. Chairman, Mr. Baker, who was Secretary of War, made some statements about this which I think were put in the record yesterday,[1] that at the time we entered the war, the munitions manufacturers could not have been said to have gotton us in because there were none. That was his statement, and might have some bearing.

Mr. MORGAN. Won't you put in the answer to that telegram?

Mr. RAUSHENBUSH. I am on the point of doing so, Mr. Morgan. As soon as I got through with my interchange with the chairman, I was going to read that.

On March 14, 1916, to Morgan in London, signed by H. P. Davison. I will offer that for the record with appropriate number.

(The document referred to was marked "Exhibit No. 2320" and appears in full in the text.)

Mr. RAUSHENBUSH. That reads as follows:

15686, 14685. DENKSTEIN. Have conferred with Remington Arms-U. M. C. Co., Midvale Steel Co., Bethlehem Steel Co., and Eddystone Amm. Co., who advise us that they see no indication that such contracts as the U. S. Government may place for their requirements even if augmented by Mexican situation will in any way affect present contracts between these companies and British Government. In fact, they go further and state that in their opinion any contracts made by them with British Government will be filled whatever the requirements of U. S. Government may be. We understand that up to present time U. S. Government have gone no further than to make tentative inquiries of most general character for shells and field artillery. From our present knowledge we believe it is unlikely that further delays in execution of British contracts here will be incurred due to requirements of U. S. Government with respect to Mexican situation. H. P. DAVISON.

---

[1] "Exhibit No. 2165", Hearings, Part XXVI, p. 7790.

There seems to be an indication here that in fact the contracts made by those four companies, Remington Arms U. M. C., Midvale, Bethlehem and Eddystone will be filled regardless of what the requirements of the United States may be.

I turn to a further letter——

The CHAIRMAN. Is it unfair to draw that conclusion?

Mr. LAMONT. I think so.

Mr. WHITNEY. That they will be able to take care of both?

Mr. LAMONT. That is all.

The CHAIRMAN. That is not what it says; that the British orders would be filled, whatever the requirements of the United States may be.

Mr. WHITNEY. They were under contract. There is nothing there that they would not fulfill United States Government contracts.

Mr. RAUSHENBUSH. Let us go on, Mr. Chairman.

The CHAIRMAN. Yes, sir.

Mr. RAUSHENBUSH. On June 23, 1916, there was a letter from E. W. Moir to Morgan & Co. We have already identified E. W. Moir as the agent in America for the British Ministry of Munitions of War.

Mr. LAMONT. Technically; yes sir. What is the date of that?

Mr. RAUSHENBUSH. June 23, 1916. The heading is "Midvale Steel Co. 12″ shell contracts." I will offer it for the record.

The document referred to was marked "Exhibit No. 2321" and appears in full in the text.)

Mr. RAUSHENBUSH. It reads in full as follows:

(Attention of Mr. Sneddon. Midvale Steel Company 12″ shell contracts.)

DEAR SIRS: As you are no doubt aware, the above company are at present manufacturing shell in a portion of one of their old machine shops, and they are now installing new machinery in a building recently erected for this purpose. We have always understood that it was the intention to continue working the existing plant on British 12″ shell after the new shop is finished, until the completion of the contracts, but now I am informed that the company intend turning over existing machines and the labor employed on same on to the manufacture of shell for the American Government. This means, of course, that unskilled labor is going to be put on the manufacture of 12″ British shell, and in consequence it appears that deliveries for some considerable time will remain unsatisfactory. The company have not notified me officially to this effect, but my tracer heard this on his last visit, and I am informing you so that you will be aware of the position.

Yours faithfully,

Was he not complaining there for the British Ministry of Munitions of War that the United States might get priority here over the British shells?

Mr. LAMONT. I do not see it was a complaint. He was stating a fact, was he not, Mr. Raushenbush?

Mr. RAUSHENBUSH. That will be explained. July 22, 1916——

Mr. LAMONT. Of course, we all know, Mr. Raushenbush, do we not, that in the event of emergency, the United States Government would always be able, under the law, to requisition its supplies from any American manufacturer?

Mr. **Raushenbush.** Mr. Lamont, let me interrupt this discussion, for only a brief minute to state this:

What we do know from the results of the testimony of the War Department officials before this Committee, at length, is that while the United States always has the power to requisition, yet they did not use it once during the Great War, although they felt under provocation a great many times to use it. I think I am quoting accurately Colonel Harris' testimony. And when they testified as to why they did not use it, they developed that they did not have the personnel to take over the plants and run them, and that they are in that situation today. So that while there is a legal power, there is no practical power.

This is in answer to your comment there. I think you will find that running through the testimony.

Mr. **Lamont.** Yes, sir.

Mr. **Raushenbush.** July 22, 1916, a letter from your export department by E. R. Stettinius to A. C. Dinkey, Esq., President, Midvale Steel Co., Philadelphia, Pa. I will offer that for the record with appropriate number.

(The document referred to was marked "Exhibit No. 2322" and appears in full in the text.)

Mr. **Raushenbush.** It reads as follows:

[Copy to Mr. J. P. Sneddon]

Dear Sir: We beg to acknowledge receipt of your letter of the 20th, confirming your phone conversation in regard to 12-inch shells, and submitting a schedule of estimated deliveries under orders that heretofore have been placed with you. We have transmitted your offer to the British Government, and if they conclude to accept it, we have no doubt that they will insist that you satisfy E. W. Moir's organization of the adequacy of your manufacturing program and arrangements.

We are advised by the inspection department that they are much disappointed in your deliveries. We understand they are of the opinion that you have failed to keep the promises you made to Mr. Moir on the occasion of his visit to Philadelphia some months ago.

Have you accepted any orders from the United States or Italian Governments, the execution of which has interfered or may interfere with the orders you have received?

Yours truly,

That is simply an inquiry, is it not, asking if they had received United States or Italian orders and pointing out that they were delayed in their deliveries?

Then I want to offer for the record a letter dated July 27, 1916, signed by E. W. Moir and addressed to Morgan & Co., attention Mr. Stettinius.

(The document referred to was marked "Exhibit No. 2323" and appears in full in the text.)

Mr. **Raushenbush.** That reads as follows:

Dear Sirs: With reference to additional 25,000 12-inch shells to be placed with the Midvale Steel Co., their Mr. Dinkey and Mr. Barba called on me today and assure me that they will put in sufficient plant to increase their capacity of 150 per day to 200 per day. This, combined with 1,000 per month from the General Electric Co., will give them 6,000 per month in all after November, and this should be sufficient to finish up their present contracts and the new one by March 31.

They assured me that they have given up the idea of turning over the old shop to the United States Government shells and that they will put their whole capacity on the British order, except to the extent of four lathes which will be used for the United States.

They are fully aware of the lack of efficiency in their output at the present time and have been taking steps since the 4th of July to efficiently organize their plant and propose visiting some of the more efficient plants in this country so that they may improve their output. If this is done, I see no reason why they should not reach the outputs they mention as they have the capacity for 150 per day now, and with the increase which they propose installing at once of 33⅓ percent I would be quite satisfied.

Yours faithfully,

Is not the purport of that letter this: That Moir informs Morgans that Midvale would give up the idea of giving the preference to the United States Government, except to the extent of four lathes?

Mr. WHITNEY. That is what it says.

The CHAIRMAN. It does? That is the purport of it, is it not?

Mr. WHITNEY. Yes; but there is no indication that that is not sufficient for everything the United States needs.

Mr. RAUSHENBUSH. In reply to that, I offer a letter from A. C. Dinkey, President of the Midvale Steel Co., to J. P. Morgan & Co., dated July 29, 1916, attention Mr. Stettinius.

(The document referred to was marked "Exhibit No. 2324" and appears in full in the text.)

Mr. RAUSHENBUSH. That letter reads, in full, as follows:

GENTLEMEN: Replying to Mr. Stettinius' letter of July 22, we beg to advise that we are preparing equipment and will surely have it in operation definitely to bring the weekly production of 12-inch projectiles up to 1,200 per week, and we believe that Mr. Moir's department is satisfied that this production will be reached and maintained.

We have accepted no orders from either the Italian Government or the United States Government, the execution of which has interfered or may interfere with orders we have taken for English projectiles. On the contrary, in order to further production of English projectiles on orders which we have on hand, we have seriously delayed the completion of orders for American projectiles which were placed long prior to your orders and on which delayed orders we are paying penalties in serious amounts.

Yours very truly,

Is it not fairly clear that Midvale says they have delayed the completion of American shells in order to give the British preference? Take the last paragraph.

Mr. WHITNEY. It was issued long before our orders.

The CHAIRMAN. That is neither here nor there. The facts were that whatever the emergency might have been, the Midvale people were continuing and giving positive assurance of a continuation of British deliveries, in spite of orders that had been placed by the United States Government.

Mr. LAMONT. Have you had the Midvale people on the stand, Senator?

The CHAIRMAN. No; we have not.[1]

Mr. RAUSHENBUSH. This went through Morgan & Co.

The CHAIRMAN. This went through your export department?

Mr. LAMONT. We cannot testify on that, except what is in the record.

Mr. MORGAN. We cannot testify on that.

Mr. RAUSHENBUSH. Is there any other case which you know of, where a sort of divided loyalty came up where their big business was in foreign orders, and small business in Government orders? Our Government was still in the place where it was ordering individual units, small units, but the large-scale production or mass production, if you will, was foreign business, and we happened to run into this instance which seemed to be a clear case of somewhat divided loyalty.

---

[1] For testimony of Midvale officials see Hearings, Part XXXVI.

Mr. WHITNEY. Loyalty?

The CHAIRMAN. I would say so.

Mr. RAUSHENBUSH. Whom were they going to manufacture for, their own Government or someone else?

Mr. WHITNEY. What is there to indicate they held up the United States Government unduly? I do not know.

Mr. LAMONT. We cannot comment on that. This is the first time I have ever seen those cables, Mr. Raushenbush, and perhaps the same remark applies to Mr. Morgan.

Mr. MORGAN. It does. At any rate, I suggest that we have no knowledge of anything whatever except what is in that letter written to us by the Midvale people, assuring us that a certain contract they had made with us would be carried out, at any rate.

The CHAIRMAN. Regardless of what orders might be in the way, having been placed by the United States Government?

Mr. MORGAN. We received the assurance from them. It is not necessary for us to arrange for business. I do not see why we should be held to blame for that.

Mr. RAUSHENBUSH. Mr. Morgan, all that we are asking for is information.

Mr. MORGAN. We have not got any.

Mr. RAUSHENBUSH. You seem to think that in every question we ask that we are trying to hold somebody to blame, but we are trying to find out the mechanism or the function.

The CHAIRMAN. The Committee will be in recess until 2 o'clock.

(Thereupon, at 12:10 p. m., the Committee recessed until 2 p. m. of the same day.)

AFTER RECESS

(The hearing was resumed at 2 p. m.)

FURTHER TESTIMONY OF J. P. MORGAN, THOMAS W. LAMONT, AND GEORGE WHITNEY

SMALL LOANS OF 1915 [1]

The CHAIRMAN. The Committee will proceed. Mr. Raushenbush.

Mr. RAUSHENBUSH. Mr. Chairman, I want this afternoon to put on record some of the other financing outside of the Anglo-French, which we discussed at such length.

I do not think it will take much time, but in order to have the full story of financing complete, we want to go through these things as completely as we can.

Gentlemen, in January of the year 1915, did you not arrange for an acceptance credit to the Russian Government of $25,000,000?

Mr. WHITNEY. Yes.

Mr. RAUSHENBUSH. Was any of that credit ever rediscounted in the Federal Reserve banks?

Mr. WHITNEY. Of course, as far as we were concerned, it was not, because we were not members of the Federal Reserve System. I have no idea whether the other two participants in the credit rediscounted or not. They were all sold, I think, disposed of. Whether the privilege was taken advantage of I do not know.

---

[1] See also "Exhibits Nos. 3243 through 3265", Hearings, Part XXX.

Mr. Raushenbush. We find here cable to Harjes from Morgan, dated January 4, 1915. It seems to suggest that the question of their being rediscounted depended on the adoption of a policy by the administration toward all belligerents alike. Do you have any memory about that at all?

Mr. Lamont. Did not that have to do with a little French credit of March 31 or April 1, a French credit?

Mr. Raushenbush. We thought it might have a connection with the Russian credit, too.

Mr. Whitney. Our Paris office had nothing to do with the establishment of the Russian credit. That was arranged direct with the Russian representative here, a man named Wilenkin.

Mr. Raushenbush. I will read this. [Reading:]

> If that party requires, as you indicate, 150 as total for past, present, and near-future operations, it is then clear she must export gold on large scale or enter into some joint undertaking with British Government, or give us time confer here with all chief interests looking toward acceptance proposition on a very large scale, in which we should be obliged seek open approval of Federal Reserve Board at Washington inasmuch as such steps would involve cooperation of many national banks and adoption of a policy by Administration toward all belligerents alike.

(The document referred to was marked "Exhibit No. 2325", and is included in the appendix on p. 8337.)

Mr. Whitney. I do not think, Mr. Raushenbush, that had anything to do with the Russian credit. It had to do with various suggestions through that period. It might be possibly a French commercial credit.

Mr. Raushenbush. We think so; but the point I was trying to get at was that apparently no national policy had been adopted at the time the Russian credit was floated, on rediscounting, is that right?

Mr. Whitney. You mean by the Federal Reserve Board?

Mr. Raushenbush. Yes; by the Federal Reserve Board, on these foreign credits.

Mr. Whitney. I do not think there was any question about it, as far as I know. The Russian credit, of course, was a 90-day credit with one renewal, which I have always supposed came within their rulings.

Mr. Raushenbush. I want to offer for the record the participation in that $25,000,000 Russian Government 90-day sight bills arrangement, which shows that National City, Guaranty Trust, and others were in it.

The Chairman. That is ordered for the record.

(The document referred to was marked "Exhibit No. 2326" and is included in the appendix on p. 8337.

Mr. Raushenbush. May I ask one question in that connection: After this you did not take the lead in any Russian financing at all; did you?

Mr. Whitney. No.

Mr. Raushenbush. And you did not do any purchasing for Russia?

Mr. Whitney. No.

Mr. Raushenbush. This was the only transaction in which you took the lead for Russia?

Mr. **Whitney**. And this was paid at maturity.

Mr. **Raushenbush**. I want to offer, Mr. Chairman, an excerpt from Mr. Hamlin's diary—a member of the Federal Reserve Board—which has been made available to us, in which the witness, at the time of the discussion of the French credit says [reading "Exhibit No. 2327"]:

> Question raised whether Federal Reserve banks can discount paper where goods are to be used by a foreign government.
>
> Cites case of Russian Ambassador.
>
> C. S. H.—

C. S. H. refers to Mr. Hamlin—

> points out reason Board refused to permit discount by Federal Reserve banks, in case of Russian Ambassador, was because he took credits and could use proceeds for any purpose.

(The document referred to was marked "Exhibit No. 2327" and appears in full in the text.)

Mr. **Raushenbush**. I might say in comment that we were asking for information. We do not know exactly what the transaction was, but I offer that for the record.

To go on to the French credit of April 1, 1915, we find a cable to Morgan, Harjes, dated March 15, 1915.

(The document referred to was marked "Exhibit No. 2328" and is included in the appendix on p. 8337.)

Mr. **Raushenbush** (reading):

> Duration option not very material to us. These friends seem wish money so earnestly that we have no misgivings as to our being able secure second lot at same prices as first. We talked of selling the 3- and 5-year maturities at 5.90 interest basis.

Mr. **Lamont**. What was the date of that?

Mr. **Raushenbush**. March 15, 1915.

The only point I was making there was that there seemed to be some discussion as to 3- and 5-year maturities, did there not, in that cable?

Mr. **Whitney**. It says [reading]:

> We are now, however, somewhat more dubious as to our ability form syndicate on basis mentioned, even if your friends request it.

Mr. **Raushenbush**. Yes. But the discussion was at that time on the 3- and 5-year basis. It says: "We talked of selling"; yes. Then a cable to Morgan, Harjes, dated March 17, 1915.

(The document referred to was marked "Exhibit No. 2329" and is included in the appendix on p. 8338.)

Mr. **Raushenbush** (reading):

> Figures given your 761 exactly correct. We also should have preferred straight commission transaction but thought that such form of transaction might be more difficult politically for your friends.

Could you go back and tell us why that was thought more difficult politically for the French Government on a straight commission basis?

Mr. **Lamont**. I have no recollection, on that, Mr. Raushenbush.

Mr. **Raushenbush**. All right.

Mr. **Lamont**. I was given advice at the time, but it does not strike a fire in my mind.

Mr. Raushenbush. Then there is a discussion a line or two later [reading]:

> If transaction had gone through along lines suggested we should have planned subject alteration on account market conditions to offer yearlings 5-percent-discount basis, 3 and 5 years both 5.90-percent basis, which would mean approximate commission for our group as follows, etc.

There was still discussion there on March 17, then, of the possibility of floating those on a 3- and 5-year basis, was there?

Mr. Lamont. I would have rather gathered that that has been abandoned altogether, but we explained what we had in mind more fully at the time, because we go on to say—I am not familiar with this cable—that 1 year—oh, yes.

Mr. Raushenbush. The discussion seems to go on, Mr. Lamont, on March 18.

Then this cable from Morgan, Harjes, dated March 18, 1915, no. 765.

(The document referred to was marked "Exhibit No. 2330" and is included in the appendix on p. 8338.)

Mr. Raushenbush [reading]:

> Can you not make them a tentative and somewhat more advantageous offer for one category of notes, say 1 year at a fixed price in dollars perhaps including your commission or 2- or 3-year notes with a straight commission.

I offer also for the record another cable of March 18, without comment, unless you have any. That is cable No. 766.

(The document referred to was marked "Exhibit No. 2331" and is included in the appendix on p. 8338.)

Mr. Raushenbush. I also offer for the record cable to Morgan, Harjes & Co., dated March 19, 1915, no. 504.

(The document referred to was marked "Exhibit No. 2332" and is included in the appendix on p. 8339.)

Mr. Raushenbush [reading]:

> For your private information. We are now working on question issuing for account your friends up to $50,000,000 1-year notes on 5½-percent basis, our commission, about which we are as yet undecided, to be in addition.

It ends up:

> Jack sailed on steamship *Philadelphia* yesterday for England.

Mr. Morgan, you understand that these are your own friends referring to you as Jack. We will always refer to you as Mr. Morgan.

Mr. Morgan. Oh, yes.

Mr. Raushenbush. In the terms you were using in those days, was this transaction as it was being contemplated and discussed back and forth, on a 1-, 3- or 5-year basis, a loan or a credit in the terms of the definition of loans and credits that were being used those days?

Mr. Morgan. I tell you, I have got so mixed up as to what they went by in the way of loans and credits that I do not know which it was.

Mr. Raushenbush. Do you remember, Mr. Lamont?

Mr. Lamont. No, I do not. When we finally brought it out, Mr. Raushenbush, we called it a 1-year credit. It got down that time to a length of 1 year, and naturally we threw it under the category of a credit.

Mr. RAUSHENBUSH. I also want to offer for the record a copy of a cable to Morgan, Harjes, dated March 22, 1915.

(The document referred to was marked "Exhibit No. 2333" and is included in the appendix on p. 8339.)

Mr. RAUSHENBUSH. It begins [reading]:

> Are suggesting to Leon, who is transmitting to Washington, that we form group to offer twenty-five or fifty million dollars, as we may mutually decide after testing market, 1-year 5-percent notes at 99½. Of this amount we take firm $10,000,000, charging an inclusive commission on total sales of ¾ percent, etc.

Then we come to a letter from your firm to His Excellency Jules Jusserand, the French Ambassador, on March 23, 1915.

(The document referred to was marked "Exhibit No. 2334" and appears in full in the text.)

Mr. RAUSHENBUSH. By this time it was true, was it not, Mr. Morgan, that you had left the country?

Mr. MORGAN. I had left the country.

Mr. RAUSHENBUSH. You had left on March 18, had you not?

Mr. MORGAN. Yes; that is right.

Mr. RAUSHENBUSH. This letter to the French Ambassador reads:

> Referring to the memorandum which we submit to you herewith through your representative, Mr. Maurice Leon, in reference to this matter you will of course understand that the group deems it necessary to inform the Administration of the United States so as to give it the opportunity to express any views, in the remote contingency that it should desire to do so.
>
> Very truly yours,

Do you remember, Mr. Morgan, at all about any discussion before you sailed, that there was only a remote contingency that the Administration of the United States would care to be queried on this?

Mr. MORGAN. I cannot remember anything about that, but I do not think that it makes any difference whether I remember it or not. There it stands on the record that we do say it was necessary to inform the Administration.

Mr. RAUSHENBUSH. All right. Then I submit for the record a memorandum submitted by Morgan to Mr. Leon on March 23, and initialed by him; superseding the one dated March 22, which was canceled.

(The document referred to was marked "Exhibit No. 2335" and is included in the appendix on p. 8339.)

Mr. RAUSHENBUSH. I call attention only to the first paragraph or two [reading]:

> An amount of $25,000,000 or $50,000,000 as may later be determined, of French 1-year 5-percent notes to be offered upon a 5½-percent basis.
>
> Of the total issue, whatever it may be, Messrs. J. P. Morgan & Co., National City Bank, First National Bank, and such, if any, associates as they may elect, to take firm $10,000,000.

At that time it was discussed as a 25- to 50-million transaction, was it not?

Mr. MORGAN. Yes.

Mr. RAUSHENBUSH. We find that on March 25, 1915, there is a letter from Morgan to Secretary of State Bryan. It is also signed by the National City Bank and the First National Bank.

(The document referred to was marked "Exhibit No. 2336" and appears in full in the text.)

Mr. **Raushenbush**. It is addressed to the Secretary of State [reading "Exhibit No. 2336"]:

> The French Government, finding themselves under very great expense for transferring funds from France to America owing to the position of exchange, consider it necessary to obtain temporary credit in this country to meet their obligations for American products and continue their purchases in this country.
>
> We beg to advise you, therefore, that we are arranging to place for them some $50,000,000 1-year Treasury notes, the proceeds of which are to be expended in this country.

That letter was drawn to ask for a temporary credit, was it not?

Mr. **Whitney**. Which we were going to place with the public.

Mr. **Raushenbush**. The temporary credit which you were going to place with the public. That would differ entirely from the ordinary definition of a commercial credit, would it not?

Mr. **Whitney**. Yes.

Mr. **Raushenbush**. Then a cable to Morgan, Harjes, from Morgan in New York, dated March 26, 1915.

(The document referred to was marked "Exhibit No. 2337" and appears in full in the text.

Mr. **Raushenbush** (reading):

> 519. Thanks your cable French loan.
>
> We reciprocate your kind congratulations. Are today laying matter before Washington administration so as to be certain no objection. Doubt whether matter will be in shape for us to make advances Monday, but are quite willing make such advances as soon as matter is formally concluded.

If you have no comment on that, we will pass on to a cable received from Morgan, Harjes, dated March 27, 1915, which shows nothing more than there seems to be some urgency on the part of the French Government to get their money.

(The document referred to was marked "Exhibit No. 2338", and is included in the appendix on p. 8340.)

Mr. **Raushenbush**. There is also a cable dated March 29, signed by J. P. Morgan, who is now apparently in England.

(The document referred to was marked "Exhibit No. 2339", and is included in the appendix on p. 8340.)

Mr. **Raushenbush**. I will read the second paragraph [reading]:

> Very glad about French business, but understood before leaving Washington did not wish be placed in position approving or disapproving any steps taken to arrange deferred payments for materials supplied from United States, so presumed we were free to do as seemed wise to us without regard to opinion there.

Mr. Morgan, there seems to be an indication here that before you left you had gotten from somebody in the State Department a fairly good indication that they did not want to be asked. Is not that the way you read that?

Mr. **Morgan**. I think that refers really back to the information in regard to the first French credit—was it not the City Bank?

Mr. **Lamont**. Yes.

Mr. **Morgan**. When that statement was definitely made to us, as I understand it.

Mr. **Lamont**. Did not Mr. Vanderlip testify on that the other day, as to what his vice president, Mr. McRoberts, said?

Mr. **Raushenbush**. If I understand Mr. Morgan's answer at this moment, it is, that away back there in October, it was indicated to you by the State Department they did not want to be asked about credits any more. Do I summarize it correctly?

Mr. **Morgan.** No. Whenever that French credit was put over by the City Bank, it was put over in consequence of receipt of information from Washington that they did not wish to be disturbed about it, they did not wish to be consulted about it, or something of that kind. I forget what the exact phrasing was.

Mr. **Raushenbush.** The thing that happened back on October 14 was that a distinction was drawn between loans and credits. Maybe I did not remember all of McRoberts' correspondence, but there is nothing that I remember that said the State Department did not want to be asked about credits any more. And you had this earlier letter to the French Ambassador saying that there was only a remote contingency that Washington wanted to be asked.

Mr. **Lamont.** I may be mistaken, Mr. Raushenbush, but I was distinctly under the impression that Mr. Vanderlip testified the other day that McRoberts told him, after talking with him, that they did not want to be asked pro or con in the matter. Was not a letter on file from Monsieur Jusserand, also, to that effect, addressed to the City Bank?

Mr. **Raushenbush.** I do not have that. All I see is that you did ask them on March 25.

Mr. **Lamont.** Yes.

Mr. **Whitney.** May I refresh Mr. Morgan's memory? The day before he sailed, the 17th of March—he sailed the 18th—the New York Times carried a story under the headline that Mr. Morgan was going abroad, and the last concluding paragraph in that says, if I may read it [reading]:

> The State Department has been consulted several times as to the propriety of these foreign loans, and in the early days of the war raised some objections on the ground that they might not be consistent with absolute neutrality. To some of the bankers who have been in consultation with the officials recently, the idea was plainly conveyed that the State Department would be suited quite well if such matters were not brought to its attention. The Department might find it impossible actively to sponsor a plan presented to it, while, if the transaction were carried through entirely as a matter of business, the State Department would not feel called upon to do anything about it. The result is that Wall Street feels now that it has a free hand in dealing with foreign nations, either neutral or belligerent, along the lines that have been followed or discussed heretofore.

That came out the day before Mr. Morgan sailed.

Mr. **Morgan.** That must have been what I referred to, then. I do not remember.

Mr. **Raushenbush.** It is not clear in my mind; is that inspired in an interview before he sailed as a result of the discussion with the State Department, or was that inspired by the State Department?

Mr. **Whitney.** I have no idea. It is a long story. Would you like to see it?

Mr. **Raushenbush.** Not particularly. It deals only with commercial credits, does it not?

Mr. **Whitney.** This rather would sound, although it has no date line, as if it were a New York date line, because it says, in one of the early paragraphs, "The understanding in Wall Street yesterday was that Mr. Morgan's trip would be concerned primarily", and so forth, so I rather assume that it was a Wall Street story rather than a Washington story.

Mr. **Raushenbush.** There still is a distinction between the official Government pronouncements——

Mr. **Whitney.** This is not official, but that might well account for Mr. Morgan's understanding.

Mr. **Morgan.** I had the impression. I did not say that I was advised.

Mr. **Whitney.** It said, " Understood before leaving."

Mr. **Morgan.** That cannot be very important because they did consult the State Department.

Mr. **Raushenbush.** They did it apparently to your surprise, because you point out here in this cable that you had presumed that you were free to do as seemed wise, without regard to opinion there.

Then a cable to Morgan, Harjes, dated March 29, 1915.

(The document referred to was marked " Exhibit No. 2340 " and is included in the appendix on p. 8341.)

Mr. **Raushenbush** (reading):

> Cabled you Friday explaining Washington delay matter.
>
> This has now been cleared up. Are tonight submitting formal proposal to Ambassador which presume he will accept promptly and matter will then be concluded. Upon receiving his acceptance tomorrow will credit Consul's account $10,000,000, etc.

I now offer for the record a letter dated March 30, 1915, which is a National City Bank letter. I will offer instead of that a letter dated March 31 from Maurice Leon to Messrs. J. P. Morgan & Co., National City Bank, and First National Bank of New York.

(The document referred to was marked " Exhibit No. 2341 ", and is included in the appendix on p. 8341.)

Mr. **Raushenbush.** This, Mr. Morgan, was the day before the credit was opened, was it not? That was opened on April 1?

Mr. **Morgan.** So I understand. I do not know to what letter you are referring. I do not have a copy of it here.

Mr. **Raushenbush.** March 31 was the day before the credit was opened?

Mr. **Morgan.** The credit was opened on the 1st of April, was it not?

Mr. **Lamont.** What happened on March 31?

Mr. **Raushenbush.** This letter was sent to Messrs. Morgan & Co., National City Bank, and First National Bank of New York [reading]:

> Gentlemen: In accordance with your message received through Messrs. J. P. Morgan & Co., your letter under date of the 29th addressed to His Excellency, Mr. Jusserand, the Ambassador of France to the United States and which I handed to the Ambassador yesterday morning was corrected as follows:

Then he gives a corrected letter, which is then signed by J. P. Morgan & Co., National City Bank and First National Bank.

In those corrections—and I show you a photostat—the French representative here has in every case crossed off the words "gold notes" and inserted the words "Treasury bonds" or simply "bonds" in about 10 different cases throughout the letter.

Do you have this letter in front of you?

Mr. **Whitney.** I think that has to do with the question of legislation. They were not properly described as "notes." To comply with the French legislation they had to be called "Treasury bonds."

Mr. RAUSHENBUSH. There is an attachment to that letter, which I offer for the record. The attachment was written on March 30, in other words, the day before this letter to the banks. Mr. Leon here makes the correction on March 30 [reading]:

> The word gold notes, which I gather from your telegram of today's date, is to be considered as duly erased from your said letter; the bonds will, therefore, be called, like those issued in November last, French Treasury bonds—"Bons du Trésor Public Francais."

So at that time, on the 30th of March, before the State Department had informed the press about this matter, the credit was being secured by French bonds, was it not?

Mr. WHITNEY. I am not speaking by the book, but in my recollection, in looking this matter up, it was merely a question of French practices, and required new legislation to term them "gold notes" rather than French Treasury bonds. It was just a matter of phraseology. It had no significance whatever except from a technical point of view.

But if you want me to, I can very easily check it. It is somewhere in the cable.

Mr. RAUSHENBUSH. Let us go on a minute and see whether we need to.

On March 31, 1915, then, the State Department gave another release to the press.

(The document referred to was marked "Exhibit No. 2342" and appears in full in the text.)

Mr. RAUSHENBUSH. It reads as follows:

> The State Department has from time to time received information directly or indirectly to the effect that belligerent nations had arranged with banks in the United States for credits in various sums. While loans to belligerents have been disapproved, this Government has not felt that it was justified in interposing objection to the credit arrangements which have been brought to its attention. It has never approved these nor disapproved—it has simply taken no action in the premises and expressed no opinion.

Then on April 1, 1915, there was a letter, which I offer, to J. P. Morgan & Co., summarizing the transactions and pointing out that the French law of March 27, 1915, "provides for an increase of the authorized amount of French Public Treasury bonds to four and a half billion francs."

(The document referred to was marked "Exhibit No. 2343", and is included in the appendix on p. 8342.)

Mr. RAUSHENBUSH. I also offer for the record syndicate participation of the Treasury bonds, showing that they were taken up to the extent of $26,290,000, in the various names of the people that took them. That was somewhat less than the $50,000,000 that had been proposed, was it not?

You asked the State Department for $50,000,000 and this was what was sold, $26,290,000.

(The document referred to was marked "Exhibit No. 2344", and is included in the appendix on p. 8343.)

Mr. RAUSHENBUSH. I also offer for the record a letter dated June 16, 1915, from Morgan to F. L. Hine, President, First National Bank, New York City, advising you had disposed of total of $26,200,000 and for their share of the compensation they received $26,000 plus.

Mr. WHITNEY. What date was that, Mr. Raushenbush? We do not seem to have it. It apparently is not very important.

Mr. Raushenbush. I will offer that for the record.

(The document referred to was marked "Exhibit No. 2345", and is included in the appendix on p. 8344.)

Mr. Raushenbush. I also offer for the record some figures taken from your books showing the cost of these bonds, and there is one figure there showing the "cost of $2,622,000 purchased and taken from purchasers."

What is the explanation of that, Mr. Whitney? We just did not understand what that meant in your parlance.

The Chairman. It is the second item up on the first page

Mr. Whitney. That was an additional amount taken from purchasers. Mr. Keyes tells me that is a matter of bookkeeping. The first step in taking them up for the obligor, the French Government, is for the account of the purchasers, and then transferred to the syndicate.

Mr. Raushenbush. That would be a matter of supporting the market, to some extent, would it not?

Mr. Whitney. No, sir. And the bond syndicate account had $23,706,000 of them in there, which was the first step, in which we and the two banks, the City and the First National, bought from the French Government; and in addition there was $2,622,000 which the syndicate bought from us.

So that meant the total number of bonds in there was $26,328,000.

Mr. Raushenbush. That is merely an intermediate step between the syndicate and buying them for the French Government, and the purchasers in this case are——

Mr. Whitney. J. P. Morgan & Co., First National Bank, and National City Bank.

Mr. Raushenbush. You did give some support to the market, did you not, as agents for the French?

Mr. Whitney. Yes; a good deal later, and Brown Bros. were in that. They were in with us.

Mr. Raushenbush. You and Brown Bros. supported the loan somewhat, did you not?

Mr. Whitney. Considerable later on.

Mr. Raushenbush. When you say "considerable later on" do you mean 2 months later or 3 months later?

Mr. Whitney. I cannot give the months here. Somewhere there is a statement that we have. If you will give me a chance to check it up, I will get the date.

(The document referred to was marked "Exhibit No. 2346" and is included in the appendix on p. 8345.)

Mr. Raushenbush. Would you look at a cable dated May 28, 1915, to Harjes?

(The document referred to was marked "Exhibit No. 2347" and is included in the appendix on p. 8346.)

Mr. Raushenbush. In that you say [reading]:

> We venture to suggest for your consideration the question of our buying in market for account of French Government notes up to £1,000,000, drawing on London therefor.

Mr. Whitney. That would be the date that we suggested it, and I think later on—I am sure we bought some more of it. I cannot tell you the exact date.

Mr. **Raushenbush.** I also offer for the record a cable dated June 1 from Harjes, ending up [reading]:

> In the meantime French Government authorize you to support market by buying for their account up to £500,000.

(The document referred to was marked "Exhibit 2347–A" and is included in the appendix on p. 8347.)

Mr. **Raushenbush.** This distinction still worries us, you see. This book that you wrote, Mr. Lamont, entitled "Henry P. Davison, the Record of a Useful Life", on page 192 you wrote as follows [reading "Exhibit No. 2348"]:

> In April 1915 J. P. Morgan & Co. consented to bring out a French Republic 1-year loan, which was successfully issued in the amount of $30,000,000.

(The document referred to was marked "Exhibit No. 2348" and appears in full in the text.)

Mr. **Raushenbush.** There is a small matter of $4,000,000 there, but you do describe it as a loan.

Mr. **Lamont.** I certainly allude to it as a loan; yes.

Mr. **Raushenbush.** According to any definition we have had to which you have subscribed, it was a loan, was it not? It was backed by French Government treasury bonds, and it was distributed out in this syndicate, the 1-year thing?

It was pretty far removed——

Mr. **Whitney.** We said in our letter to the State Department——

Mr. **Raushenbush.** In your letter to the State Department you described it as a temporary credit, if I remember.

Mr. **Lamont.** For 1 year.

Mr. **Whitney.** Excuse me.

Mr. **Raushenbush** (reading)[1]:

> The French Government, finding themselves under very great expense for transferring funds from France to America, owing to the position of exchange, consider it necessary to obtain temporary credit in this country to meet their obligations for American products and continue their purchases in this country.
>
> We beg to advise you, therefore, that we are arranging to place for them some $50,000,000 1-year treasury notes, the proceeds of which are to be expended in this country.

There is nothing about distribution there.

Mr. **Lamont.** All these cables are filled with the word "offer", Mr. Raushenbush.

Mr. **Raushenbush.** All right. You told the State Department?

Mr. **Lamont.** Certainly. There we say "notes." We do not say either "loan" or "credit."

Mr. **Raushenbush.** Still on the question of whether according to your own definitions this was not really a loan.

Mr. **Lamont.** Yes; I think so.

Mr. **Raushenbush.** It was a loan at the time that the State Department was handing out the press releases to the public, as the one on March 31 again, using the language [reading][2]

> While loans to belligerents had been disapproved, this Government—

And so forth.

That was incidental there, was it not?

---

[1] Previously entered as "Exhibit No. 2336", see supra, p. 8195.

[2] "Exhibit No. 2342", see supra p. 8198.)

Mr. **Lamont.** I think that nobody knows where to draw a distinction and there is no real distinction between a loan of that kind and the street parlance of a credit.

You open a credit for a man and he does not necessarily draw against that, and until he draws against it, it does not become a loan. The moment he does draw against it, then it becomes a loan.

Mr. **Raushenbush.** We have gone into this once before, and I just wanted to get the thing clear in my own mind. There seemed to be two alternatives. As I get your and Mr. Morgan's remarks, you had a pretty definite picture in your own minds, a perfectly clear picture of what was happening.

Mr. Morgan the other day, on page 11856 of the record,[1] answered a question by saying [reading]

> Was not the transition period made in order to ease a decision of the Government contrary to Mr. Bryan's original language?

Mr. **Morgan.** I made that suggestion.

Mr. **Raushenbush.** Yes. And that fitted in, it seemed to me, with Mr. Morgan's comment again. The chairman asked [reading][2]:

> Is there a difference between loans and credits?

And Mr. Morgan said [continuing reading]:

> Actually, I suppose not, but technically they do make a distinction.

Mr. Lamont added, a few minutes later [reading] [3]:

> The Administration began rather early in those early months of the war apparently to draw a distinction between commercial credits or private credits, they might be called, and public loans.
>
> They were the people that first began to draw that distinction.

That all fits together, that you give us the picture that the Administration felt that it had apparently made a mistake and was slowly pulling out the props from under its loan policy, if you will, by one distinction after another. I was trying to get at one this afternoon, that maybe there is still a further step there, that maybe they conveyed the information they did not even want to be asked about it any more. We did not come to a determination of that.

So I have expressed one alternative fairly clearly, that you thought you saw what the Administration had in mind and acted accordingly.

Before you answer that, perhaps I may put the other alternative, which is another perfectly plausible one: If, then, that alternative that I have described were not so, then it would follow that the State Department has made a distinction between loans and credits in October, that it has said to the public in January when it wrote to Senator Stone of the Senate Foreign Relations Committee that no steps had been taken to change the loan policy, that again in March here, as I have read, it was again saying there was no change in the loan policy.

The State Department in this alternative, in its very statement, sticks to the proposition that it had not made any change in the loan policy.

If the State Department's proposition stands up there, then it would follow that wherever these credits would be called and described as loans, the bankers made loans while the State Department was informing the public and informing the Senate Committee on Foreign Relations that loans were not permitted, and that therefore the bankers had not generally been quite informing the State Department in full.

---

[1] See Hearings, Part XXVI, p. 7832.
[2] Hearings, Part XXV, p. 7501.
[3] Ibid, p. 7502.

You reject that alternative, I understand. That is the alternative you reject?

Mr. LAMONT. You are going back 20 years now, you know, Mr. Raushenbush, and asking us to remember about certain details which are exceedingly cloudy. What do you want us to say? What would you like to have me say now, anyway?

Mr. RAUSHENBUSH. I do not think that is fair, Mr. Lamont. I am not trying to put anything into your mouth at all.

Mr. LAMONT. I do not mean that, but I honestly do not get your point. Perhaps I can answer it in this way; perhaps it will not be a satisfactory answer.

My answer would be that up to Mr. Bryan's solitary declaration in August 1914 that he did not believe loans were consistent with the true spirit of neutrality, the policy of the Government for generations had been to make loans and to make sales because they considered the principle sound that if you are permitted to sell a man goods, you are permitted to get him to pay cash or on time, as you like. That has been their policy.

Bryan, perhaps with some inexperience, declared that that ought to be changed. We have gone over this whole ground before. But he does change it.

And in the middle of October, at the end of 1914, it begins to be changed back. It begins to be changed back through the application of the National City Bank to put out a $10,000,000 French credit for 1 year.

Time goes on and apparently from the public prints that appear from time to time there is a gradual relinquishing on the part of our Government on the whole question of Allied loans. We come along to the French operation. On March 15 we say again in our cables we are talking about an offering, which means an offering to the public.

Then in our letter to the State Department which you have just quoted we talk about offering these notes, and so forth, which would indicate in our minds, and we get it from the public, too, that the Administration had moved along to that point, so that they had no objection to what might be a 1-year loan publicly offered.

I do not know whether that answers you at all.

Mr. RAUSHENBUSH. That answers it. You accept what I was trying to propose as the first alternative, too. It seemed to me, in trying to figure a way out of this mess, there were only two to choose. If you choose, yourself, and the thing was exactly as you described, that is one fair picture of the mechanism that was operating at the time. But at the same time, when you choose that alternative, you do exactly what Mr. Morgan was doing the other day when he pointed his finger across the way and said:[1]

> Was not the transition period made in order to ease a decision of the Government contrary to Mr. Bryan's original language?

---

[1] Hearings, Part XXVI, p. 7832.

He points, in other words, to the other alternatives that the State Department was breaking away constantly on almost every new loan that came up from his own definition, and was at the same time still adhering in all expressions to the public and the Senate Committee on Foreign Relations to the old one; and if there is any fault to be found it is with the State Department for deceiving the public to the extent that it may have deceived it.

Mr. LAMONT. I would not have thought that they were deceived at all, Mr. Raushenbush, but that is neither here nor there. All I know is that from the very start we were determined to abide very strictly by whatever regulations the State Department laid down for us. We showed that in our application in August 1914, which was turned down. That was always our policy.

Mr. RAUSHENBUSH. But that is the point: the regulations laid down to you were not the same ones it made public in its various pronunciamentos, which are all on the same formula [reading]:[1]

> While loans to belligerents have been forbidden—

And so forth.

If you accept your hypothesis, the quarrel seems to be with the fact that the State Department, while letting down its policy, kept saying to such important people as the chairman of the Committee on Foreign Relations and the public constantly, "We have not let down; we are still right where we were when Bryan's first statement came out."

Mr. LAMONT. Let us let the State Department fight that battle out itself.

Mr. RAUSHENBUSH. I want to point out to you that when you took your alternative you pointed the finger, as Mr. Morgan did, directly across the street there.

Mr. WHITNEY. I do not suppose it is worth delaying the committee, but I should like to sit down with you sometime and clear up the use of these words "credit" and "loan."

Mr. RAUSHENBUSH. We have already asked Mr. Morgan and Mr. Lamont and you about it, and we have a pretty good explanation in the record about it.

Mr. WHITNEY. The word "bon" in French means "note." They have no such word as "note." When they are speaking of bonds, they use "obligation." "Bon" means "note"; that is, the treasury note. You speak of it as "bon du Trésor." They do not have French notes.

Mr. RAUSHENBUSH. How are they listed on the French exchange?

Mr. MORGAN. The long-term bond, "obligation." "We promise to pay"——

Mr. WHITNEY. The word "note" was "bon du Trésor." They have no word "note." That is the change they wanted to make in the letter to comply with the French law.

Mr. RAUSHENBUSH. I will take my lesson in French with good grace. That is all.

The CHAIRMAN. Mr. Brown.

---

[1] "Exhibit No. 2342." See supra, p. 8198.

Mr. **Brown**. The next subject is the de Rothschild Frères loan of the late spring of 1915, and I offer for the record as a brief and excellent summary your memorandum prepared for us.

(The document referred to was marked "Exhibit No. 2349" and is included in the appendix on p. 8347.)

Mr. **Brown**. I will read the first paragraph:

> May 28, 1915. The First National Bank, National City Bank, and J. P. Morgan & Co. agreed to lend de Rothschild Freres, Paris, up to $30,000,000 on their promissory notes maturing July 1, 1916, with interest at 5 percent; compensation was a commission of 1¼ percent. The notes were secured by deposit of Pennsylvania Railroad Co. 3¾-percent French franc loan certificates, due 1921, and Chicago, Milwaukee & St. Paul Railroad Co. French 4-percent debenture, due 1925.

That is merely a description of the issue.

Mr. **Whitney**. Are you putting that memorandum in?

Mr. **Brown**. In the record, Mr. Whitney; the entire memorandum.

To complete the record at this point, I am offering, subject to some later comment, cable dated April 22, 1915, no. 2985; cable of April 23, 1915, no. 3036; and cable of April 30, 1915, no. 4122.

They belong at this point because of their date. I would like to recur to them later, if you do not mind.

(The documents referred to were marked "Exhibits Nos. 2350, 2351, and 2352", respectively, and are included in the record on pp. 8348 and 8349.)

Mr. **Brown**. I merely put them in here because of their chronological position. They outline the status of the negotiations, and so on. I would like to recur to them later when some of the points would make more sense.

I come now to cable of May 1, 1915, no. 619, from Mr. Davison to Harjes, Paris.

(The document referred to was marked "Exhibit No. 2353", and is included in the appendix on p. 8349.)

Mr. **Brown** [reading]:

> After careful consideration with Trio, suggest following: That we can probably take firm, say thirty Rothschild and thirty Bank of France, 1 year at 6 percent, to be secured by mixture in each of St. Pauls and Pennsylvanias.

I stop at that point for a moment. I take that to mean you agreed to lend thirty million to the Rothschilds and thirty million to the Bank of France?

Mr. **Whitney**. That is what was read.

Mr. **Brown**. What was the reason for offering thirty to one and thirty to the other?

Mr. **Whitney**. Because I think the cable that you referred to a minute ago, 4122, said [reading from "Exhibit No. 2352"]:

> French Government would not consider operation worth while unless it could be done for say $50,000,000 or $60,000,000.

Mr. **Brown**. What I mean is, refer to the second page on my copy of this same cable that I was reading:

> Suggestion that Bank of France make half the issue made as on account of legal limit, institutions could take twice as much in aggregate of two makers as of one.

Mr. **Whitney**. Because, you see, the so-called "Trio" planned just to keep it themselves. I suppose if they got up to $60,000,000 with the Rothschilds on the proportions outlined, that would have been beyond the legal limit of one of the other two banks.

Mr. **Brown**. There was no thought of distributing this loan beyond the Trio?

Mr. **Whitney**. We apparently did distribute it.

Mr. **Brown**. Yes, I believe so; but that raises the question whether you were concerned at that time about the ability of the banking circles in general to absorb Allied obligations. You said, yourself, that if you split the obligors, you could sell twice as much.

Mr. **Whitney**. Yes; that was a suggestion. Of course, we did not do it.

Mr. **Brown**. You did not, in this case.

Mr. **Whitney**. I think the record has been perfectly clear.

Mr. **Brown**. You did not, at that time, have any anticipation of such extended loans that it would be practically necessary to keep the bank examiners happy?

Mr. **Whitney**. It is not to keep them happy, it is to do what the law provided.

Mr. **Brown**. The next correspondence, so far as we are aware, on this loan, is dated May 17, 1915, no. 826. There is a gap of 16 days.

(The document referred to was marked "Exhibit No. 2354" and is included in the appendix on p. 8350.)

Mr. **Brown**. I read the opening lines:

> In view of recent events, Minister of Finance suggests that public opinion in U. S. A. likely more favorable to belligerents' obligations than few weeks ago and that consequently some financial arrangement with France might now have better chance of success.

Do you recall to what he is possibly referring, "that opinion in the U. S. A. is likely more favorable to belligerent obligations"?

Mr. **Whitney**. Mr. Harjes is referring to the opinion of the Minister of Finance.

Mr. **Brown**. Do you suppose it was the *Lusitania*, that was sunk on May 7?

Mr. **Whitney**. I would not know.

Mr. **Raushenbush**. Were there any other recent military operations of any importance equal to that?

Mr. **Brown**. Not that I recall [continues reading]:

> Although recognizing lack of urgency, Minister of Finance naturally desirous of taking advantage of any good opportunity—

Which I judge he concludes is now offered in the *Lusitania*.

Mr. **Whitney**. You are assuming. You are doing the Minister's thinking.

Mr. **Brown**. No; assuming, Mr. Whitney.

The **Chairman**. Mr. Whitney, you do not think that there is grave doubt but what that was his reference?

Mr. **Whitney**. I have no idea, Senator.

Mr. **Brown** (reading):

> Even if something very big could not be done, he feels as we do that the mere moral effect of additional financial assistance on your part would be of great help.

I just want to note in passing that connection again between financial assistance and moral effect which has run through many of these cables.

I call attention to the lower part of this cable, in which it says [reading]:

> Now that you control future purchases, could you not arrange for these that sellers accept payment by means of renewable 6-months drawings on groups of U. S. A. banks.

Does not that, to your mind, indicate any connection between the financing and the purchasing agency on which there have been several questions?

Mr. WHITNEY. Perfectly, clearly; it does, because that was just after the commercial agency agreement with the French Republic had been made.

This constantly recurring suggestion in connection with those purchases, that the contracting firm sell it on time, was quite obviously just a very customary way of selling goods, as you know, on long time, to the purchaser. This is a suggestion which never happened.

Mr. BROWN. Never happened, but the point is very clear in the mind of Mr. Harjes, who has just been talking to the Minister of Finance, that there is a connection between the purchasing and finances; that if you are to do the purchasing, it is up to you to go out and get the financing, too.

Mr. WHITNEY. Oh, not at all; not at all. It could not be clearer than what it says here, that we suggest to the people that the sellers, under the contracts, accept payment by means of renewable 6-month drawings on groups of U. S. A. banks, and it is perfectly clear.

There is no argument about what he says.

Mr. BROWN. But it indicates to my mind that in the minds of the French there is a connection between financing these purchases that you were making and purchasing. That is a matter of interpretation.

Mr. WHITNEY. All you have to do there is refer to the contract, which says it has nothing to do with financing.

Mr. BROWN. On May 18, in cable 10016, in answering a previous cable, you cabled to Mr. Harjes in Paris [reading]:

> In view President's note to Germany, situation here not at all clear. Therefore this inopportune time to reconsider general financing plan.

(The document referred to was marked "Exhibit No. 2355", and is included in the appendix on p. 8350.)

Mr. BROWN. I judge by that sentence that the reference is distinct to this drawing plan, that for the time being you want to drop the drawing plan, at any rate. "However, we undoubtedly could arrange for loan on bonds along lines our 619", which I take it is the de Rothschild Freres loan.

Mr. WHITNEY. That is, of course, the note of the 13th, President Wilson's first United States note to Germany.

Mr. BROWN. Why did that make it, to your mind, an inopportune time to reconsider general financing?

Mr. WHITNEY. I cannot answer that. I do not know. Do you know, Mr. Lamont? I was not there.

Mr. LAMONT. No; I do not remember, particularly.

Mr. BROWN. Did you have the feeling that an announcement at that time of a fairly sizeable loan to one of the belligerents would in any way embarrass the Administration's negotiations with Germany?

Mr. LAMONT. I do not remember 20 years ago, Mr. Brown; I am sorry.

Mr. **Brown**. I offer for the record at this point, to keep it in chronological order, a cable of May 28, 1915, no. 10046, which discusses the details and the nature of the collateral and the amount offered on it.

(The document referred to was marked " Exhibit No. 2356 " and is included in the appendix on p. 8350.)

Mr. **Brown**. Cable of June 6, no. 15086, which encloses a note, the form of note of de Rothschilds Frères.

(The document referred to was marked " Exhibit No. 2357 " and is included in the appendix on p. 8351.)

Mr. **Brown**. At this point, just to keep the record straight, I read from page 3 of the edition that I have of that cable, at the bottom of the page [reading]:

> J. P. Morgan & Co. will credit De Rothschild Freres, Paris, account with them upon the date which will be fixed as that upon which the operation commences, of the amount of the advance, and that same day J. P. Morgan & Co. will transfer at once to the credit of the French Treasury, in an account on their books, this same amount, of which the French Treasury alone will have the right to dispose.

I do not think there is any question but that this is a loan to France, is there?

Mr. **Whitney**. It is a loan to de Rothschilds for account of France.

Mr. **Brown**. And the money was credited, of course, by you, yourselves, the same day on your own books?

Mr. **Whitney**. Under these instructions.

Mr. **Brown**. I offer the French form of that letter, just to be complete in the record. It is a letter dated the 18th of June from de Rothschilds to J. P. Morgan & Co. Excuse me; that is not the French form of that, that is the French form of the next exhibit, which is a letter of the 18th of June 1915, from de Rothschilds to Morgan.

(The document referred to was marked "Exhibit No. 2358" and is included in the appendix on p. 8352.)

Mr. **Brown**. What was the authority to sell the collateral under this loan other than the event of default?

Mr. **Whitney**. Let us see if I can find that. I would not want to speak from memory.

Mr. **Brown**. I have no recollection of the authority, if you could look it up and introduce it in the record.

Mr. **Whitney**. Of course, we know that ultimately the collateral was sold by arrangement.

Mr. **Brown**. It ultimately was sold; yes.

Mr. **Whitney**. May I just make clear, Mr. Brown—of course, we know, do we not, that there were a lot of cables before the collateral was sold.

Mr. **Brown**. Yes.

Mr. **Whitney**. What you would like to know is if we could find out the exact arrangements of the sale of the collateral?

Mr. **Brown**. Just the authority for the sale of the collateral.

Mr. **Whitney**. Do you have any reason to believe there was any provision for selling the collateral?

Mr. **Brown**. The letter from de Rothschild does not provide for anything except default, as I understand it.

Mr. **Whitney**. Have you any reason to believe there was any provision? Of course, ultimately the collateral was sold, but that was a subject of a great deal of conversation, or cables to and fro, which ultimately resulted in authority to make these two sales.

I will look it up, gladly.

Mr. BROWN. Thank you.

I offer for the record cable of June 21, 1915, no. 10143; also no. 15142, of June 22; no. 10155, of June 22; and 10126, of June 17.

I believe that disposes of the actual mechanics in negotiation of the loan.

(The documents referred to were marked "Exhibits Nos. 2359, 2360, 2361, and 2362" and are included in the appendix on pp. 8352 and 8353.)

Mr. LAMONT. Do you want to put in 15140?

Mr. BROWN. I have no objection to any one that you think is relevant.

Mr. LAMONT. I think it is just another little link.

(The document referred to was marked "Exhibit No. 2363", and is included in the appendix on p. 8354.)

Mr. BROWN. Having got the mechanics in the record and out of the way, I would like to recur to the first exhibit, which is no. 2349. That is a memorandum that you submitted to us.

I point out the loan finally amounted to a total of $44,436,395, in which the commission was applied as follows [reading from "Exhibit No. 2349"]:

Expenses for cables, etc	$1,000.00
Morgan, Harjes & Co	105,476.95
First National Bank	105,006,58
National City Co	105,006.58
J. P. Morgan & Co	210,894.63
Total	527,384.74

on the loan, profit alone.

That is not considering for the moment the sale of collateral.

Mr. WHITNEY. They are right. I correct myself. You remember I said they were participants. There were no participants except ourselves and the two banks.

Mr. BROWN. I wish to introduce at this point an account showing that the total amount of profit and interest paid the participants amounted to $1,416,563.73.

(The document referred to was marked "Exhibit No. 2363A" and is included in the appendix facing p. 8354.)

Mr. WHITNEY. And interest?

Mr. BROWN. And interest; yes.

Mr. WHITNEY. You mean, we bought a note, and we got interest on it, and that is profits.

Mr. BROWN. No; I said, "Profits and interest."

How was this loan paid off? This was paid by the sale of this collateral, was it not?

Mr. WHITNEY. Yes; paid off by the sale of the collateral of the Pennsylvania bonds to Kuhn, Loeb & Co.

Mr. BROWN. The bonds were sold, were they not, by having the two railroad companies issue dollar obligations instead of francs?

Mr. WHITNEY. The arrangement made by their own bankers on the issuance of dollar securities; yes.

Mr. BROWN. I call your attention to a cable of April 22, 1915, in which Mr. Morgan says, in regard to this loan; the suggestion having been made that instead of a loan perhaps the Pennsylvania

Railroad would be willing to buy its bonds back and the St. Paul would be willing to buy its bonds back [reading from "Exhibit No. 2350"]:

> Chief difficulty I see is that Pennsylvania Railroad business being in hands Kuhn, Loeb & Co. and they having considerable to say in regard to Chicago, Milwaukee & St. Paul, they might endeavor to prevent such a transaction taking place, but should be glad your opinion whether something could not be struck out of this idea.

Mr. WHITNEY. Well, they did it.

Mr. BROWN. Why do you think that Kuhn, Loeb would have opposed it?

Mr. WHITNEY. I have not the remotest idea why Mr. Morgan thought they might oppose it.

Mr. BROWN. The next cable is "Exhibit No. 2351." This is April 23, 1915, cable from Mr. Lamont to Mr. Morgan in London [reading]:

> Hardly possible that railway companies concerned would consider repurchase for the reason that they now feel securities are nicely tucked away, but there is possibility might consider purchase small amount for sinking funds, especially Pennsylvania Railroad early maturities.

Apparently you seem to be quite aware that the railroad companies would not be enthusiastic about this proposition that was afterward put to them to refund these in dollar form.

Mr. WHITNEY. We thought they would not be.

Mr. BROWN. As the record shows, you eventually went ahead with the loan on that basis.

Mr. WHITNEY. There were many other transactions, of course, Mr. Brown, as you know, of the same character, the New Haven and Southern Railway bonds, and so forth.

Mr. BROWN. We will come to that in a minute.

For the record I offer the agreement between the Pennsylvania Railroad Co., J. P. Morgan & Co., and Kuhn, Loeb & Co., which is a letter of August 20 from Mr. Anderson, apparently, to Messrs. Kuhn, Loeb & Co.

(The document referred to was marked "Exhibit No. 2364", and is included in the appendix on p. 8355.)

Mr. BROWN. I also offer a letter from Kuhn, Loeb & Co., dated August 20, 1915, to Messrs. J. P. Morgan & Co., and another letter of September 23, 1915, from Kuhn, Loeb & Co., to Messrs. J. P. Morgan & Co.

(The documents referred to were marked "Exhibits Nos. 2365 and 2366" respectively, and are included in the appendix on p. 8356.)

Mr. BROWN. On the first of those to which I referred, the letter of August 20, 1915, the first-numbered paragraph begins [reading from "Exhibit No. 2364"]:

> Subject to our obtaining, within 20 days, assurances satisfactory to the Pennsylvania Co. on the points indicated below.

In other words, it was very clearly depending, as you were aware, on the consent and approval of the Pennsylvania Railroad.

I mean, you stated before that their bankers, Kuhn, Loeb & Co., sold it to the railroad. That was, of course, true.

Mr. WHITNEY. If I did, I was mistaken. They sold it to the public.

Mr. **Brown**. They sold the dollar bonds to the public, but they sold the franc bonds to the railroad.

Mr. **Lamont**. For the railroad.

Mr. **Brown**. No; to the railroad. They sold the franc bonds back to the railroad for dollar bonds.

Mr. **Morgan**. Then the railroad issued dollar bonds to the public.

Mr. **Brown**. Then Kuhn, Loeb issued dollar bonds to the public.

Mr. **Morgan**. Yes.

Mr. **Brown**. The point I was making was, you were aware it was not simply between Kuhn, Loeb and the Pennsylvania Co., you were aware that the matter required a certain amount of "assurances satisfactory to the Pennsylvania Co. on the points indicated below." You were not altogether out of touch with the picture, were you?

Mr. **Whitney**. Oh, no; of course not. We negotiated with them.

Mr. **Brown**. Now I offer for the record a letter from Edward B. Taylor, second vice president, Pennsylvania Lines west of Pittsburgh, addressed to Messrs. Kuhn, Loeb & Co., dated August 25, 1915, from which I read only one part [reading from "Exhibit No. 2367"]:

> The new certificates—

which, I take it, are the dollar certificates—

> are to be limited to the aggregate amount of $48,262,500 at any time outstanding, are to mature June 15, 1921, are to bear interest at the rate of 4½ percent per annum * * *.

The Pennsylvania bonds had originally been 3¾, had they not?

Mr. **Whitney**. They were; yes.

Mr. **Brown**. And this figure of $48,262,500 indicated that the bonds were refunded at the par of the exchange, does it not?

Mr. **Whitney**. You mean the figure you have just read?

Mr. **Brown**. Yes.

Mr. **Whitney**. I have not got that contract.

(The document referred to was marked " Exhibit No. 2367 " and is included in the appendix on p. 8356.)

Mr. **Brown**. Further down in section IV of this letter it states [reading]:

> This company—

that is the Pennsylvania—

> will issue and deliver to you or upon your order new certificates, dollar for dollar, at the rate of $96.525 for fcs. 500 * * *—

which is the par of exchange. At that time exchange was not at par, was it, Mr. Whitney?

Mr. **Whitney**. No; it was not.

Mr. **Brown**. It was not.

Mr. **Whitney**. You are talking now about a contract with which we had nothing to do. Are you not talking about a contract with Kuhn, Loeb?

Mr. **Brown**. Yes, sir. I point out that you were not strangers in the negotiation, and I thought that possibly you might be familiar with it.

Mr. **Whitney**. I was undoubtedly familiar with it, in the summer of 1915, 20 years ago last summer, but I do not remember the terms of the contract passing between two other people.

Mr. **Brown**. The only point, I take it, which lies here is at the time the franc was considerably below par, and yet the railroad company was willing, not only to continue its fixed charges on its old book value, at par of exchange, but even to increase the fixed charges by increasing the interest rate. Do you have any reason to offer why the Pennsylvania Railroad made any such contract?

Mr. **Whitney**. I could not say I recall it. I remember what it was on the New Haven, because we handled that business ourselves, but there must have been a satisfactory compensation to the Pennsylvania or certainly they would not have done it.

Mr. **Brown**. The net result was at the time when it would have been possible to have taken advantage of the depressed exchange to reduce their fixed capital and thereby their fixed charges, they, in a transaction in which you and Kuhn, Loeb were the principal ones, as well as the railroad, continued that same fixed capital indebtedness and increased its interest charge. Is not that correct?

Mr. **Whitney**. You put us and Kuhn, Loeb together. Kuhn, Loeb & Co. were the bankers for the Pennsylvania. The Pennsylvania are extraordinarily well able to take care of themselves. I have no idea. Why don't you ask the Pennsylvania?

Mr. **Brown**. The gentlemen in Kuhn, Loeb & Co. who were involved in this are all now dead, and I was wondering, since you had a rather important part in this transaction, if you had any memory of it.

Mr. **Whitney**. We had nothing to do with it except to suggest if they wanted to work out the transaction, whereby they could call in the French franc bonds and issue some others for them, we thought they could be made available, and we had nothing to do with the transaction with the Pennsylvania, or whether it was wise for them.

Mr. **Brown**. I offer for the record a letter to Edward B. Taylor, vice president, Pennsylvania Co., dated August 26, 1915.

Mr. **Whitney**. From whom?

Mr. **Brown**. It appears to be from Kuhn, Loeb.

Mr. **Whitney**. It is not from us, is it?

Mr. **Brown**. No, sir.

(The document referred to was marked "Exhibit No. 2368" and is included in the appendix on p. 8358.)

Mr. **Brown**. I offer a further letter from Mr. Tatnall, vice president of the Pennsylvania Railroad, to Kuhn, Loeb & Co., dated September 23, 1915.

(The document referred to was marked "Exhibit No. 2369" and is included in the appendix on p. 8359.)

Mr. **Brown**. You stated you had no connection with these negotiations?

Mr. **Whitney**. I did not say quite that.

Mr. **Brown**. Excuse me, not at the focal point, let us say. But in one of the earlier exhibits, Mr. Davison, as I read here, expressed the opinion that the roads would be very reluctant to purchase, and I am still trying to find out if you have any recollection of how, in the face of that reluctance, they were not only willing to purchase, but to repurchase, if they could not take advantage of the reduced exchange, that they repurchased those at par. Before the transaction was made, Mr. Davison thought they might be reluctant to do so.

Mr. WHITNEY. I should assume, without any knowledge, that Mr. Davison's opinion that they would be reluctant was that the public did not have enough cash on hand, but at a later date, and during the course of several months, there was a period—are you sure that that was a disadvantageous trade?

Mr. BROWN. I have not said that it was a disadvantageous trade. I said it was refunded at the par of exchange.

Mr. WHITNEY. Was not the principal amount reduced?

Mr. BROWN. No.

Mr. WHITNEY. I do not know. I had nothing to do whatever with the discussions with the Pennsylvania Railroad.

Mr. BROWN. There is just one point there, Mr. Whitney. You said the railroad did not have any money. Railroads almost never engage in their own refunding operations, do they?

Mr. WHITNEY. That is what I mean. They have to refund it.

Mr. BROWN. They get bankers to refund it for them?

Mr. WHITNEY. Yes, sir; certainly, bankers.

Mr. BROWN. The fact that the Pennsylvania had no money to refund it is entirely irrelevant. They would have gone to bankers to get it, anyway?

Mr. WHITNEY. That is what Mr. Davison was hesitant about, was it not?

Mr. BROWN. Presumably.

I offer for the record a letter from Kuhn, Loeb & Co. to Mr. Tatnall, dated September 24, 1915.

(The document referred to was marked "Exhibit No. 2370" and is included in the appendix on p. 8359.)

Mr. BROWN. I offer for the record a letter from Mr. McKnight, the president of the Pennsylvania Co., to Mr. A. M. Anderson, dated June 2, 1915, simply showing the collateral underlying the Pennsylvania issue.

(The document referred to was marked "Exhibit No. 2371" and is included in the appendix on p. 8359.)

Mr. BROWN. We have been discussing the Pennsylvania, and the same arrangements were made in regard to the St. Paul, were they not, or similar?

Mr. WHITNEY. They were arrangements made with the St. Paul; yes, sir.

Mr. BROWN. I offer for the record a letter from J. P. Morgan & Co. to Messrs. Kuhn, Loeb & Co., dated January 17, 1916. This is from Kuhn, Loeb & Co., and won't be in your book, although it is addressed to you and upon your stationery.

(The document referred to was marked "Exhibit No. 2372" and is included in the appendix on p. 8360.)

Mr. BROWN. I call attention to the second paragraph of that letter, in which it says [reading]:

> We agreed to sell to you, and you agreed to purchase from us, francs 153,051,000, 4-percent bonds of the above loan at a price of francs 476.50 per francs 500 principal amount, plus accrued interest to the date of your payment therefor, such purchase price to be payable in dollars to us at the fixed rate of exchange of francs 5.90 to the dollar.

Which is not the exchange rate at which the railroad was refunding these issues.

Mr. **Whitney**. I suppose it was the rate of the day, was it not?

Mr. **Brown**. I suppose it must have been.

I offer for the record a letter from Mr. Schiff, I believe it is—it is only initialed "S"—dated October 29, 1915, to Mr. Percy A. Rockefeller, and I call your attention to the last paragraph of that letter [reading]:

> I would also call to your attention that while the company carries on its books the French debt at $96.3533 per franc 500 bond, it would doubtless cost the company more than this to repay them after the war is over.

(The document referred to was marked "Exhibit No. 2373" and is included in the appendix on p. 8361.)

Mr. **Brown**. That turned out to be a very bad prophecy, did it not?

Mr. **Whitney**. If they had quit entirely, whatever it was, 1926.

Mr. **Brown**. It so happened that this bond issue which was refunded at the par of exchange in dollars by the railroad was the first bond which went into default after the St. Paul went into receivership, after the war?

Mr. **Whitney**. I do not know that.

Mr. **Brown**. When the franc was selling at 5 cents?

Mr. **Whitney**. I do not know. Did they lengthen the maturity on the Pennsylvania bonds?

Mr. **Brown**. I believe not.

Mr. **Whitney**. I am asking as a matter of curiosity.

Mr. **Brown**. It is in the record. The franc issue of the Pennsylvania matured in 1916, and the franc issue of the St. Paul matured in 1925. As I recall the record, that particular incident, that was the bond issue which put the St. Paul into receivership at a time when the franc was selling at 5 cents.

Mr. **Whitney**. Which time?

Mr. **Brown**. 1925.

Mr. **Whitney**. The first time.

Mr. **Brown**. I offer for the record some more letters, which I will just enumerate here, being a confidential memorandum dated October 29, 1915.

Mr. **Whitney**. May I ask whose memorandum this is?

Mr. **Brown**. A confidential Kuhn, Loeb memorandum.

Mr. **Lamont**. To themselves?

Mr. **Brown**. Yes, sir; an interoffice memorandum. It is just for the record.

Mr. **Whitney**. Does it have anything to do with us?

Mr. **Brown**. It does not have anything to do with you. It is simply for the completeness of the record.

Mr. **Lamont**. We never had any connection of any kind with the St. Paul Road.

(The document referred to was marked "Exhibit No. 2374" and is included in the appendix on p. 8361.)

Mr. **Brown**. I also offer a letter from Kuhn, Loeb & Co. to the Chicago, Milwaukee & St. Paul, dated December 13, 1915.

(The document referred to was marked "Exhibit No. 2375" and is included in the appendix on p. 8362.)

Mr. **Brown**. I also offer a letter from H. R. Williams, of the Chicago, Milwaukee & St. Paul to Kuhn, Loeb & Co. and the National City Bank, dated December 16, 1915.

(The document referred to was marked "Exhibit No. 2376" and is included in the appendix on p. 8364.)

Mr. **Brown**. I also offer for the record a letter, apparently from Jacob Schiff, to the Chicago, Milwaukee & St. Paul, dated December 16, 1915.

(The document referred to was marked "Exhibit No. 2377" and is included in the appendix on p. 8364.)

Mr. **Brown**. I also offer for the record a letter from Mr. Williams, of the St. Paul, to Kuhn, Loeb & Co. and National City bank, dated December 16, 1915.

(The document referred to was marked "Exhibit No. 2378" and is included in the appendix on p. 8364.)

Mr. **Brown**. I also offer for the record a letter from Mr. Williams to Kuhn, Loeb & Co., dated January 19, 1916.

(The document referred to was marked "Exhibit No. 2379" and is included in the appendix on p. 8365.)

Mr. **Brown**. You had an interest with National City Bank in the sale of the St. Paul, did you not?

Mr. **Whitney**. It has been a matter of common knowledge, and frequently testified to in the past 25 years, that we had an arrangement of reinsurance with the National City, whereby each offered the other a one-fourth interest in any of the purchases having to do with the bonds, and in this we had a quarter of the City Co.'s share.

Mr. **Brown**. I offer for the record a letter from someone unknown at Kuhn, Loeb & Co., addressed to Messrs. Clark, Dodge & Co., dated January 19, 1916.

(The document referred to was marked "Exhibit No. 2380" and is included in the appendix on p. 8365.)

Mr. **Brown**. I also offer for the record a syndicate list from Kuhn, Loeb & Co. of the Pennsylvania dollar bonds.

(The document referred to was marked "Exhibit No. 2381" and is included in the appendix on p. 8366.)

Mr. **Brown**. Then I offer for the record statements re Rothschild Freres loan, from your books, which has been referred to.

(The document referred to was marked "Exhibit No. 2382" and is included in the appendix on p. 8366.)

Mr. **Brown**. I also offer for the record a statement from Kuhn, Loeb & Co. of the profits on the operation in Pennsylvania and Milwaukee bonds, and from these statements it appears that on the Pennsylvania operation——

Mr. **Lamont**. This is on profits to the Kuhn, Loeb syndicate?

Mr. **Brown**. To the Kuhn, Loeb syndicate. It appears that Kuhn, Loeb's profit on Pennsylvania was $860,367.33, and the Pennsylvania profit was $859,361.34.

(The documents referred to were marked "Exhibit No. 2383" and are included in the appendix on p. 8372.)

Mr. **Brown**. On the Milwaukee operation, which was the issue, as I recall it, which put them into bankruptcy, the total profit was $3,626,971.33, of which Kuhn, Loeb & Co. received $970,649.48, and National City Co. $792,483.46, and Clark, Dodge & Co., $53,567.65.

Of the National City's share, J. P. Morgan received, according to the statement, $181,927.40.

Mr. **Whitney**. Mr. Brown, just a couple of moments, if I can make a correction. All our profits over the years 1916, 1917, 1918, and 1919 were 104,000.

Mr. **Brown**. Have I misread the figures?

Mr. **Whitney**. In the second place, I do not think it matters much, but you said this was the issue which put the St. Paul in receivership. What you said earlier was the first issue on which they defaulted.

Mr. **Brown**. The first statement was correct.

Mr. **Whitney**. It was the first issue, but not the issue which put them into receivership. It was the first issue on which they defaulted.

Mr. **Brown**. It was the first issue on which they defaulted.

To complete the record, I offer a J. P. Morgan & Co. memorandum in regard to a similar transaction in New Haven bonds, in which again the New Haven Railroad issued dollar bonds at the formal parity of exchange in return for franc bonds in the amount of 75,237,500 francs, which amounted in dollars—I believe it is here somewhere—$14,118,529.

(The document referred to was marked "Exhibit No. 2384" and is included in the appendix on p. 8384.)

The **Chairman**. The Committee will be in recess for 10 minutes.

(Whereupon, at this point a 10-minute recess was taken, after which the proceedings were resumed as follows:)

(Senator Barbour presiding.)

ACCEPTANCES 1915[1]

Senator **Barbour**. The Committee will please come to order. Are you ready to proceed, Mr. Brown?

Mr. **Brown**. I am ready to proceed, Mr. Chairman.

Mr. Chairman, further this afternoon we wish to take up the question of acceptances. The wartime acceptance business, as we see it, is a necessary part of wartime financing, and is doubly interesting because it is another form of belligerent obligation, floated in those years, in which the reserves of the American banking system, the Federal Reserve banks, as distinguished from the members, are involved, and although J. P. Morgan & Co. were not directly involved in most of the negotiations in regard to acceptances, the record will show that the firm was not entirely without interest in the subject, which is the reason for bringing it up at this time.

I first offer a cable of December 3, 1914, to H. P. Davison in Paris from Morgan & Co. in New York.

The cable reads [reading "Exhibit No. 2385"]:

> In spite statements made to Herman——

that is Mr. Harjes, is it not?

Mr. **Lamont**. Yes, sir.

---

[1] Documents dealing with further acceptance transactions will be found among "Exhibit No. 3218", Hearings, Part XXX; "Exhibits Nos. 3557 through 3658 and 3883 through 3899", Hearings, Part XXXI.

Mr. Brown (continuing reading):

> In spite statements made to Herman to contrary, we know France urging manufacturers here take payment for materials in 5-percent Treasury notes running 6 to 12 months. We have two positive instances of this, one of them Ford Motors. These manufacturers in general declining such notes on valid ground that market for them indeterminate, fluctuating, etc.
>
> France can accomplish same purpose in large measure by drawing on us 90 days, possibly; one renewal same period agreeing repay such drafts dollars here or sterling London. Possibly if exchange at time of payment permits we could accept payment in gold in Paris. Foregoing simply for your information.

(The document referred to was marked "Exhibit No. 2385" and appears in full in the text.)

Mr. Brown. Could you, for the sake of the record, explain the nature of a banker's acceptance, taking just one form of acceptance to keep it straight?

Mr. Lamont. I will refer you to Mr. Morgan on that.

Mr. Morgan. A banker's acceptance is a bill drawn by the furnisher of some goods on a bank. The bank gives the right to draw that acceptance under somebody's guarantee; it accepts for somebody, but their name being better known than the other individual's, they write across the front of the bill "Accepted", and they accept a bill for a dated term, 90 days or 60 days after sight.

Then that bill is handed back to the man who presented it for acceptance, and he sells it in the market, and it is a perfectly good investment for a bank, or for a trust company, or even for a private person.

Mr. Brown. The security of the buyer, Mr. Morgan, is the acceptance stamp of the accepting bank, is it not?

Mr. Morgan. It is the name of the accepting bank.

Mr. Brown. Is it the security of the accepting bank?

Mr. Morgan. The accepting bank has the security they receive; they either have a claim on the goods to be imported or a charge on them, if they are exported, or they have the promise or undertaking of the house that asked for the acceptance to take it up when due.

Mr. Brown. It is normally, is it not, the first, rather than the second?

Mr. Morgan. What?

Mr. Brown. Is there any particular choice whether it is secured by the goods or secured by the general credit?

Mr. Morgan. It depends on the general credit. If a man has not got a good enough general credit, they exact the goods also.

Mr. Brown. That instrument is used largely, is it not, in financing exports and imports?

Mr. Morgan. In financing exports and imports largely, but it can be used in domestic trade just as well.

Mr. Brown. I call your attention to a cable dated December 9, 1914, from Mr. Davison, in London, to J. P. Morgan & Co., in which I call your attention to only the last paragraph. [Reading:]

> How much do you suppose our market would take of like acceptances, say 90 days with one renewal? This suggestion sent for your consideration, as yet matter entirely indefinite this side.

Mr. Lamont. What cable is it?

Mr. Brown. December 9, 1914.

Mr. Lamont. Yes, sir.

Mr. **Brown**. No. 9. Mr. Davison at this time was apparently interested in how much the American market would take of these acceptances.

(The document referred to was marked "Exhibit No. 2386", and is included in the appendix on p. 8384.)

Mr. **Brown**. Now, these acceptances, by reason of their short term, their extreme liquidity, are always eligible for purchase by the Reserve banks?

Mr. **Whitney**. Under regulation.

Mr. **Brown**. Under regulation of the Reserve Board. In regard to a great many kinds of paper on the market, the Reserve banks cannot buy them, but those may be rediscounted by member banks or purchased in the open market?

Mr. **Whitney**. Maybe.

Mr. **Brown**. Just recalling for a moment a cable that was read into the record this morning on the Russian acceptances, you were aware, were you not, that if there were to be any widespread Allied acceptances in this market, it would have to be after approval and consideration by the Federal Reserve Board?

Mr. **Morgan**. They have general rules which they make in regard to what acceptances could be rediscounted by the Federal Board, or what acceptances they would buy in the market.

Mr. **Brown**. The cable reads:[1]

> * * * or give us time confer here with all chief interests looking toward acceptance proposition on a very large scale, in which we should be obliged seek open approval of Federal Reserve Board at Washington inasmuch as such steps would involve cooperation of many national banks and adoption of a policy by Administration toward all belligerents alike.
>
> We shall await your further comments meanwhile conferring privately with associates like G. F. Baker.

Mr. **Whitney**. That was not in connection with the Russian at all.

Mr. **Brown**. It was read in on that discussion, but apparently concerns the French negotiations which we were considering here.

Mr. **Whitney**. The rules were being changed.

Mr. **Morgan**. The rules were being changed. The Federal Reserve banks had just been started, and they had not got the thing organized yet. It was an entirely new method of financing in this country.

Mr. **Brown**. The question right at the outset was up to this Government body, the Federal Reserve Board.

Mr. **Morgan**. Yes, it was supposed to be less political than it afterward became, with less actual Government.

Mr. **Brown**. Were not the Comptroller of the Currency and the Secretary of the Treasury ex-officio members of the Board?

Mr. **Morgan**. They were members of the Board; yes.

Mr. **Brown**. And the other members of the Board are appointed by the President, are they not?

Mr. **Morgan**. Yes.

Mr. **Brown**. Do you recall whether at that time, in January 1915, there was any thought in anyone's mind of arriving at the large syndicate to draw the arrangements which were afterward issued?

Mr. **Morgan**. I cannot remember. There were so many things which went over at that time.

---

[1] See "Exhibit No. 2325", appendix, p. 8337.

Mr. **Brown**. That has been offered for the record.

I would like to introduce in the record a memorandum prepared for the Federal Reserve Board by Mr. Warburg, who was a member, dated 1915.

(The document referred to was marked "Exhibit No. 2387" and is included in the appendix on p. 8384).

Mr. **Brown**. I read the following which is pertinent [reading]:

> The question had to be considered—

That is of acceptance regulation—

> from several points of view—one the broad economic basis, involving the question of whether foreign governments shall be permitted to finance their requirements by using the rediscount facilities of the Federal Reserve Bank System or whether they should ~~not~~ be forced to do their financing in the security market by selling their long-term bonds or short-term Treasury notes. In the latter case, the appeal is to the investor, while if permitted to rediscount their bills of exchange drawn on American banks they would absorb the funds of the bill market; that is to say, the facilities which properly should be reserved for the requirements of commerce and trade, and for the individual borrower. One might say, for the "smaller" borrower, because what applies to a government would apply with equal force to the larger corporations * * *.

Further in the same memorandum he uses this language [reading]:

> If this broad view be adopted—

that is, the export as well as the import market—

> If this broad view be adopted, it would dispose of the second angle from which the problem will have to be viewed; that is, the question of whether Federal Reserve banks should purchase bills drawn by or for account of foreign governments which are belligerents.

Mr. **Morgan**. Whether the Federal banks should purchase?

Mr. **Brown**. Yes, sir.

Mr. **Morgan**. Yes, sir.

Mr. **Brown**. Under his interpretation, as I take it, if the regulations were so drawn—I should not address this to you but to the Chair—if the regulations were so drawn as to exclude the belligerent governments financing from the market, the question of whether they could aid belligerent governments would not occur.

Senator **Barbour**. To whom is the memorandum addressed?

Mr. **Brown**. It is addressed to the Board.

He points out further [reading]:

> The question, if put in this form, would have been not one to be disposed of by the Federal Reserve Board but rather by those in charge of our national policy.

He says the door is open to these belligerent obligations.

Further on it has this to say [reading]:

> It is only when the foreign government wants to use its own credit in our market and secures accommodation, not as a direct borrower selling its own treasury notes, but by the subterfuge of letting the banker accept, and when it secures such credit from the bill market instead of from the investor, that the regulation would act as a preventive.

I take it, Mr. Chairman, this merely indicates that the Board at that time was concerned with a certain problem, the problem of keeping the discount market clear of what might be conceived to be investment paper, and then with the problem of neutrality, of the propriety of Reserve Bank funds being at the disposal of belligerent governments.

I call your attention now to cable dated March 29, 1915, from Mr. Morgan in London.

Senator **Barbour**. By the way, is there anything on which any of the witnesses want to comment in this connection?

Mr. **Lamont**. No; thank you.

Mr. **Brown**. That is offered for the record.

(The document referred to was marked "Exhibit No. 2388" and is included in the appendix on p. 8386).

Mr. **Brown**. That cable reads:

> Believe it will be desirable for the present to work along all the lines by which we can create exchange. (Stop.) Ask Strong if Federal Reserve Board have decided as to approving purchase by Federal Reserve Banks of bills drawn by joint-stock banks here on United States of America acceptors, proceeds to be used for export materials.

This would seem to indicate that the acceptance business was one of considerable interest to you, Mr. Morgan.

Mr. **Morgan**. Yes. You say it was of considerable interest to me?

Mr. **Brown**. Yes; as a step in Allied financing, the possibility of using acceptances.

Mr. **Morgan**. I was trying to work on all the ways by which we could create exchange, and this was rather a good one, I thought at the time.

Mr. **Brown**. I introduce in the record at this point a letter signed "Harry"—Mr. Davison, I take it—to Benjamin Strong, Jr., governor of the Federal Reserve Bank of New York, dated April 9, 1915.

(The document referred to was marked "Exhibit No. 2389" and appears in full in the text.)

Mr. **Brown**. That letter reads as follows:

> Dear Ben: Herein please find copy of a cablegram received from Mr. Morgan, under date of March 29. The message explains itself and I will appreciate any suggestion of a reply which you may make to be communicated to Mr. Morgan.
>
> Very truly yours,

At this point, Mr. Chairman, I would like to introduce several minutes of the Federal Reserve Board, at various dates, January 9, January 14, 15, 28, 28, February 1, February 2, February 6, February 9, February 11, all of which are merely for the purpose of showing that this matter of acceptance regulation was at that time under consideration by the Reserve Board.

(The documents referred to were marked, respectively, "Exhibits Nos. 2390 to 2399", inclusive, and are included in the appendix on pp. 8387 and 8388.)

Mr. **Brown**. I wish next to introduce in the record a letter from Governor Strong to F. A. Delano, of the Federal Reserve Board, in which the following passage occurs, the letter being dated February 8, 1915 [reading]:

> In conclusion, permit me to repeat briefly one portion of the statement which I made to the Board Friday afternoon: Our merchants and manufacturers are now conducting a perfectly lawful trade with foreign customers. A very considerable part of that trade may be with belligerent nations and may consist of articles which are contraband or conditional contraband of war. Commerce of that character is authorized by our own laws and by international law and convention. It seems to me that any different rule applied to the credits which are extended for the purpose of conduct of that commerce should be adopted with great caution, and the objection which I made to the proposed regulation was based upon my belief, first, that the same rule of

neutrality should apply to the credit as does apply to the commercial transaction; second, that any policy to be adopted by our Government in regard to this matter should not be made the subject of regulation by the Federal Reserve Board, but should be determined by the President of the United States.

(The document referred to was marked "Exhibit No. 2400", and is included in the appendix on p. 8389.)

Mr. BROWN. On March 29, 1915, Mr. Davison cabled Mr. Morgan in London, cable no. 1647, in answer to the cable already in the record.

(The document referred to was marked "Exhibit No. 2401" and appears in full in the text.)

Mr. BROWN. That reads as follows:

> 1647. For J. P. Morgan. Your 2632. Strong away. Have had conference Pierre Jay, who states matter is just now having consideration Federal Reserve Board, he having shown me memorandum of subject as being considered. Jay assures me he and Strong, who returns Monday, will do all possible expedite consideration and settlement this subject. H. P. DAVISON.

Mr. BROWN. I wish, Mr. Chairman, at this point, to introduce in the record the minutes of the Federal Reserve Board of April 2, 1915, following the adoption of regulations J and K, the regulations being set out in a letter of Governor Strong to Pierre Jay, of April 7, 1915, which defines the various acceptances. They are both offered for the record.

(The documents referred to were marked "Exhibits Nos. 2402 and 2403" and are included in the appendix on p. 8390.)

Mr. BROWN. The letter of April 7, 1915, reads in part as follows [reading]:

> A bankers' acceptance must be drawn by a commercial, industrial, or agricultural concern (that is, some person, firm, company, or corporation) directly connected with the importation or exportation of the goods involved in the transaction in which the acceptance originated, or by a banker. In the latter case, the goods, the importation or exportation of which is to be financed by the acceptance, must be clearly specified in the agreement with or the letter of advice to the acceptor. The bill must not be drawn or renewed after the goods have been surrendered to the purchaser or consignee.

I take that to mean that the bill may run after the goods have been consigned. And, just as bankers, I would like to have your opinion that that is the correct interpretation.

Senator BARBOUR. I take it that that is the correct interpretation?

Mr. MORGAN. You went along fast, and I have not seen this.

Senator BARBOUR. Perhaps one of the other witnesses could answer the question.

Mr. BROWN. I addressed my question to Mr. Whitney, and he sort of nodded.

Mr. WHITNEY. I think so; but——

Mr. WARDWELL. It permitted one renewal.

Mr. BROWN. It permitted one renewal prior to acceptance of the goods?

Mr. MORGAN. Not necessarily. One acceptance in connection with those goods. Sometimes they are in process of manufacture and do not get ready in time to have the man pay them in 3 months.

Mr. BROWN. It says [reading]:

> The bill must not be drawn or renewed after the goods have been surrendered to the purchaser or consignee.

Mr. MORGAN. All right.

Mr. **Wardwell**. The thing about which you were talking as to the regulation had to do with a banker's acceptance, not the acceptance drawn by the exporting or importing house.

Mr. **Brown**. This is defined as a banker's acceptance, Mr. Wardwell. I do not know.

Mr. **Wardwell**. That is what they were talking about in that letter; and that is, of course, a common practice today.

Mr. **Whitney**. The difference between D and J is that J covered a bill drawn by a banker, and in D the banker was excluded, and just the importing or exporting firm.

Mr. **Wardwell**. That is what they were talking about.

Mr. **Brown**. At this time I wish to enter in the record a letter from Governor Strong to Mr. H. P. Davison, of April 9, 1915, in which copies of circulars J and K were enclosed.

(The document referred to was marked "Exhibit No. 2404" and is included in the appendix on p. 8391.)

Mr. **Brown**. That letter reads in part as follows [reading]:

> By comparison of this regulation with the one which preceded it, possibly you can arrange to cable the changes to Mr. Morgan, and you will note that the important ones are contained in paragraphs (*c*) and (*f*) of article 4. I doubt if this language requires any particular explanation except that I think it is fair to assume that the regulation will be liberally interpreted in the interest of our own commerce and banking.

There is a further cablegram from Mr. Davison to Mr. Morgan of April 10, 1915, which I offer for appropriate number.

(The document referred to was marked "Exhibit No. 2405" and appears in full in the text.)

Mr. **Brown**. That cable reads as follows:

> 1825. For J. P. Morgan. Your 2633. Strong advises us that Federal Reserve Board have now ruled so that, in his opinion, drafts drawn by London bankers or merchants accepted by New York banks or bankers, proceeds of which shall be used in payment for export of goods, may be received by Federal Reserve banks. If this plan should in future receive serious consideration, suggest we be advised in time to take up specifically in order to assure proceeding technically correct.

On April 12, 1915, there is cable no. 2810, which is offered for the record.

(The document referred to was marked "Exhibit No. 2406" and appears in full in the text.)

Mr. **Brown**. That cable reads as follows:

> 2810. For H. P. Davison. Your 1825. Tell Strong glad Federal Reserve Board have made that ruling. Should business materialize will cable full details so you can get his assurance. J. P. Morgan.

Mr. **Brown**. At this point I introduce for the record a letter from Mr. Wolcott to Mr. Tracy, another one of these Bonbright letters. By the way, just to state as a matter of record, the present Bonbright Co. has absolutely no connection with the Bonbright Co. of these times. It is twice removed, I believe, sold and resold.

Mr. **Whitney**. Thank you.

(The document referred to was marked "Exhibit No. 2407", and is included in the appendix on p. 8391.)

Mr. **Brown**. That letter reads in part as follows:

> We may have been remiss in keeping you in touch with the various steps of our development, but we have tried to tell you frankly everything, and we admit that the business, because of the terms we are trying to impose upon the

foreign governments, has come to a practical deadlock, but we all feel that we are only on the eve of a very large and important and comparatively safe business if we keep our heads cool and do not scatter our efforts. We are learning by experience and everyone who comes back from the other side, such men as Mr. Blackall, Captain Hunsiker (from England, and a friend of Lord Fairfax), and others say we must stand by our resolution to insist upon payment cash or satisfactory government securities, f. o. b. New York. Mr. Blackall would not even consider for a moment the question of payment on arrival of documents in France by a concern as unquestionably good as Schneider & Co., although the goods have been inspected and accepted on this side and, although I would not say now that we may not modify our decision somewhat, in the case of Schneider & Co., if we could do a large amount of business with them, allowing them to pay in France if we were protected on exchange, provided the goods were inspected and accepted on this side * * * —

The rest is of no moment.

I take that to be a sample that at this time the American manufacturers were exactly in the attitude expressed by that letter. They insisted upon payment of cash f. o. b. New York, and they had no particular zeal to be paid in sterling or franc drafts to be collected at a rate that they could not exactly determine. Is that correct?

Mr. **Lamont**. I do not think it had been put up to them. They were being paid in cash.

Mr. **Brown**. Undoubtedly they would have declined to have been paid in anything else, would they not?

Mr. **Whitney**. Our own experience is that all our contracts were f. o. b. either at the plant or at New York.

Mr. **Brown**. I will introduce a letter dated June 8, 1915, from James Brown to Benjamin Strong, in which he wants to make certain that acceptances will be rediscountable with the Federal Reserve Bank.

(The document referred to was marked "Exhibit No. 2408" and is included in the appendix on p. 8392.)

Mr. **Brown**. I introduce in the record, Mr. Chairman, a letter from Benjamin Strong to Mr. Warburg, of the Reserve Board, in which he outlines a credit which apparently has been talked about by James Brown, of Brown Bros., and I better read the entire letter, or parts of it [reading]:

The drafts will be drawn at 90 days sight, although the maximum amount of credit, I am informed, will be continued as open credit for a period of 9 months. Drafts will be drawn individually by the members of the French institutions on the individual banks in America, in proportion to their respective interests in the respective syndicates; that is, drawing syndicate in France and accepting syndicate in America. Proceeds of the drafts when discounted are to be held by Brown Bros. & Co. as syndicate managers and paid on orders from the manager of the French group, but only for purchase of American goods for shipment abroad, as evidenced by the shipping documents.

The time drafts will bear on their face the evidence of having been drawn under the above credit. The object of the arrangement is to place dollar exchange at the disposal of the French banks to be sold to their customers as required to make payment for goods purchased in this country. The credit has no relation to orders for war materials, although if any particular customer of any one of the French group should happen to be an importer of such goods, there would be no prohibition against his being furnished with exchange.

This transaction is not undertaken for account of the French Government, but I am advised is strictly a banking transaction between the banks of the two countries.

(The document referred to was marked "Exhibit No. 2409", and is included in the appendix on p, 8392.)

Mr. **Whitney**. That is somewhere along the end of June or July?

Mr. **Brown.** That is dated June 9th, excuse me.

On June 17, 1915, a further letter to the Board, this time from Pierre Jay, describing the credit in similar terms, the only point of interest being [reading]:

> The proceeds of the original drafts go into a special fund and are used only once in financing exports, but the French syndicate is given 9 months within which to cover.

The letter has nothing to say, nothing about any arrangement for repayment of the credit.

(The document referred to was marked "Exhibit No. 2410", and is included in the appendix on p. 8393.)

Mr. **Brown.** I would like to come back to those two letters in a moment.

I introduce in the record at this point the minutes of the Federal Reserve Board of June 10, 1915, June 15, 1915, and July 9, 1915. The only point there of any interest is that at the meeting of June 15 Mr. Warburg expressed the opinion there ought to be a definite time within which the proceeds of drafts drawn by the French bankers could be used.

(The documents referred to were marked "Exhibits 2411, 2412, and 2413", respectively, and are included in the appendix on p. 8394.)

Mr. **Brown.** On July 9, 1915, you received a letter, I believe, from Brown Brothers & Co., outlining this credit, and the first part is substantially identical with the two letters already in the record, and on the second page it says [reading]:

> The performance of these engagements on the part of the French group is to be guaranteed by the Bank of France in a manner satisfactory to us and is further to be secured by deposit with us, with power of rehypothecation and sale, of Bons de la Defense National and/or French Treasury bills, in francs, payable about 1 year hence to an amount at least equal to the face of the drafts as drawn, at approximately the rate of exchange prevailing at the time the agreements are executed in France.

(The document referred to was marked "Exhibit No. 2414", and is included in the appendix on p. 8395.)

Mr. **Brown.** I just wish to note in passing, Mr. Chairman, that this is an item which is not contained in either of the two letters from the Federal Reserve Bank of New York describing that credit to the Federal Reserve Board.

Mr. **Whitney.** That was a letter which you read from Brown Bros. & Co. to J. P. Morgan & Co.?

Mr. **Brown.** That is a letter from Brown Bros. & Co. to J. P. Morgan & Co.

We consider Brown Bros. are advising that the acceptances will be eligible to the Federal Reserve Board.

I merely note that in passing.

I call your attention to a cable from Morgan in New York to Mr. Davison on July 8, 1915, no. 5248, in which substantially the same picture is dispatched to Mr. Davison. I offer that for appropriate number.

(The document referred to was marked "Exhibit No. 2415" and is included in the appendix on p. 8396.)

Mr. **Brown.** That cable, in part, reads as follows [reading]:

> The $20,000,000 is to be covered by French Government treasury bills, and payment of the amount to be guaranteed by Bank of France in gold in New York City at the expiration of the 9 months. Brown Bros. & Co. to be managers of

the syndicate and hold the treasury bills here and receive one-half or three-fourths for their services. They have arranged with Federal Reserve Bank that drafts and both renewals shall be discountable, Brown Bros. & Co. guaranteeing that proceeds of original drafts will be used only in payment for goods exported.

Mr. WHITNEY. That is just paraphrasing Brown Bros.' letter?

Mr. BROWN. That is just paraphrasing Brown Bros.' letter.

Shortly after, on July 20, 1915, I call your attention to cable no. 5490, from Mr. Davison in London—excuse me, that is from Mr. Davison in New York to London, to E. C. Grenfell—which I offer for the record.

(The document referred to was marked "Exhibit No. 2416" and is included in the appendix on p. 8396.)

Mr. BROWN. That cable reads in part as follows:

> Have today had a long talk with Governor, Federal Reserve Bank, who suggests that one way of helping situation would be for joint-stock banks to temporarily arrange with New York banks that acceptance heretofore made by London joint-stock banks on merchandise be made in dollars by New York banks, under the guarantee of London joint-stock banks. You will see that the effect of this would be to take off from the market all bills covering exports of usual produce and merchandise, which in ordinary course are covered by bills.

Lower down it states [reading]:

> Disadvantages would seem to be the possible development of dollar business heretofore sterling business, but as conditions are abnormal, all resources possible must be considered. You understand our interest in this situation is only that of general welfare and in the interest of British credit, as we see it.

Now you realize, I take it, that any real development of the dollar acceptances would be rather unpalatable to the British banks. Is that a correct interpretation to draw from the cable?

Mr. WHITNEY. Of course the acceptance business up to that time had been largely centralized in London.

Mr. BROWN. And they had the feeling, or would have had the feeling, or you thought they would have the feeling, that if the American banks began to develop a large acceptance business, it would be sort of "poaching on their preserves"?

Mr. WHITNEY. Not that, but in handling the various shipments they had done that. Mr. Morgan knows better than I.

Mr. MORGAN. The British 90-day bill was the general thing. Everybody drew bills on London for things they wanted to pay, whether they were shipped from New York, Kamchatka, or wherever it was, and the bills were drawn on London and were taken care of there, and the clients made their connection with London and paid up the bills when they came due.

Mr. BROWN. As I take it, up to the end of July 1915, on this particular type of transaction, you had the feeling that it would be advantageous to England's position to pass a little of that business over to the American banks, and that you also felt that it would be advantageous for the French to do likewise, and you felt that this matter would have to be regulated by the Federal Reserve Board?

Mr. MORGAN. Obviously.

Mr. BROWN. I wish to introduce in the record a letter from Frederic A. Delano to Mr. Strong, dated July 22, 1915, Mr. Delano being a member of the Federal Reserve Board.

(The document referred to was marked "Exhibit No. 2417" and appears in full in the text.)

Mr. **Brown**. That letter reads as follows:

> [Confidential]
>
> My Dear Mr. Strong: I am starting on my vacation on Saturday the 31st and before I go I would like very much to have a talk with Mr. Morgan in regard to foreign credits. I see no objection to your being present but there may be some reasons against it which would deter you. I do not want to go away for several weeks without having a better idea of the situation toward which we are drifting. You know my sympathies and my object is simply to inform myself as an individual member of this Board. I do not want to embarrass Mr. Morgan and I am sure he can trust me to be discreet with any information he may give me.
>
> I do not think anyone here appreciates the gravity of the situation—and unfortunately for the country the sympathies of one of our colleagues makes it impossible to confide in him.
>
> If you could make an appointment for Monday (preferably either morning or afternoon) I should like it very much. No one here knows of this and I would handle it as quietly as possible.
>
> Sincerely yours,

Mr. **Whitney**. What is the date of that letter?

Mr. **Brown**. July 22, 1915. You did not, as a matter of fact, see Mr. Delano, did you, Mr. Morgan?

Mr. **Morgan**. I did not what?

Mr. **Brown**. You did not see Mr. Delano?

Mr. **Morgan**. I do not think I did. I was laid up at that time, from the 3d of July until about the 10th of August.

Mr. **Brown**. Do you recall if Mr. Davison saw Mr. Delano upon that occasion?

Mr. **Lamont**. I do not recall. I was in the Far West at that time, Mr. Brown, and I do not recall whether Mr. Davison did or not.

Mr. **Brown**. This does not elicit any memory or recollection as to what the serious situation was which was concerning Mr. Delano, or why he should turn to Mr. Morgan about it?

Mr. **Lamont**. Not the slightest. I suppose Mr. Delano had been acquainted with Mr. Morgan for quite some time, and thought he might be able to get some information from him. That is all I can think of.

Mr. **Whitney**. He was probably worried about exchange.

Mr. **Morgan**. He was probably worried about exchange, like everybody else.

Mr. **Whitney**. That is July?

Mr. **Brown**. July 22. That was the time you were opposing an unsecured loan, was it not?

Mr. **Lamont**. I beg your pardon?

Mr. **Brown**. That was the time you were opposing an unsecured loan, was it not?

Mr. **Lamont**. I cannot remember exact dates, Mr. Brown, but during July we were not advocating an unsecured loan, and then in August we made a proposition for an unsecured loan.

Senator **Barbour**. For an unsecured loan?

Mr. **Lamont**. Yes, sir; conditions changed, Mr. Chairman, so that it seem to us possible to make an offer for $100,000,000 unsecured.

Mr. **Brown**. I now offer for the record, Mr. Chairman, a letter from Colonel House to President Wilson, dated July 28, 1915, and read only the pertinent passage of it [reading]:

> Delano and Governor Strong of the New York Federal Reserve Bank were here yesterday to see me concerning the serious condition that confronts us

in regard to foreign exchange. They believe that unless the Federal Reserve System broadens its basis of credits that another month or two will bring about a crisis and almost a complete breakdown of our foreign trade.

They told me that three of the Reserve Board are in favor of broadening the credits, but that two are opposed to it. They did not give the names for it was not necessary.

My advice was that while we were living under abnormal conditions we should have the courage to meet them in a way that will redound to the advantage of our country, and that credits should be broadened as far as perfect safety would permit. I hope this view meets with your approval.

Mr. Whitney. What date was that again, Mr. Brown?

Mr. Brown. That was July 28, the next week after Mr. Delano's request for a conference with Mr. Morgan and Mr. Strong.

Mr. Morgan. Where was it dated from?

Mr. Brown. Manchester, Mass., to the President at Cornish, N. H.

Mr. Morgan. Then, probably Delano had seen Strong and gone on there with him.

Mr. Whitney. It is interesting to note, Mr. Chairman, that that letter was Mr. Delano's, and Mr. Strong was written that letter before the British asked us to open a credit for the purpose of purchasing exchange, which was on the 23d of July. Way back there many others than ourselves were concerned about exchange.

Mr. Brown. That is offered for the record.

(The document referred to was marked "Exhibit No. 2418" and is included in the appendix on p. 8397.)

Mr. Brown. Mr. Chairman, I introduce in the record a diary entry from Colonel House, dated August 3, 1915.

(The document referred to was marked "Exhibit No. 2419" and is included in the appendix on p. 8398.)

Mr. Brown. That reads in part as follows [reading]:

Governor Charles Hamlin of the Federal Reserve Board lunched with me today. He gave a full account of the inside workings of the Board. He said Paul Warburg had been perfectly fair and had not injected his feelings into the situation but he was not as broad a man as he had first thought.

[Laughter.]

Further down it states [continuing reading]:

We went into the question of broadening credits and I found he was not impressed with the importance of this as was Delano and Strong. I therefore endeavored to straighten him out in this direction.

Further along the same line is a letter from Colonel House to President Wilson, dated August 27, 1915, which is offered for the record.

(The document referred to was marked "Exhibit No. 2420" and is included in the appendix on p. 8398.)

Mr. Brown. That letter reads in part as follows:

Dear Governor: You know, of course, there is trouble brewing in the Federal Reserve Board.

I sympathize with McAdoo's view in regard to foreign acceptances and I hope there may be some way of bringing it about without a public rupture.

To my mind, the Federal Reserve Act is the most beneficial piece of legislation that has been enacted in this country and I shall be surprised if history does not so regard it. It is unfortunate that any controversy has arisen among the members and, if I were in your place, I would caution McAdoo to go slow.

Miller might be gotten out a little later, and then, perhaps, Warburg would leave of his own volition. I am inclined to think he would.

[Laughter.]

Now the final letter of this series is one dated August 31, 1915, from the White House, signed by Woodrow Wilson, addressed to Colonel House, which is offered for the record.

(The document referred to was marked "Exhibit No. 2421", and is included in the appendix on p. 8398.)

Mr. **Brown**. That letter reads in part as follows:

> You are right about the Reserve Board imbroglio. And I think McAdoo thinks so too, now. Indeed, I think he raised the question about the action of certain members of the Board about that meeting—

That was the meeting which Mr. Davison attended at the subtreasury, which was spoken about this morning [continuing reading]:

> only to get a leverage for something bigger than the proper handling of acceptances and discounts.

Mr. **Whitney**. Where does it say "Mr. Davison"?

Mr. **Brown**. You read into the record the newspaper account at the subtreasury, and that is the meeting to which it refers.

Mr. **Whitney**. How do you know that? Does it say so?

Mr. **Brown**. That is mental checking. I am pretty sure of it. I would not say.

Mr. **Morgan**. May I ask that it be put in the record as a guess, then?

Mr. **Brown**. You are quite right. It is almost impossible to figure out those meetings, but that was the meeting in New York.

Mr. **Lamont**. Nobody accuses us of writing any of these letters for Colonel House, do they?

Mr. **Brown**. No. This shows that the leverage was something greater. That is the time that the clearance on the Anglo-French loan was under consideration, is it not? The record shows, as I recall it, that the British final clearance on that was September 7, in an oral conversation with Secretary Lansing. It is a matter of speculation, so Mr. McAdoo thought, but I wish to call your attention to that date.

Mr. **Lamont**. The Anglo-French mission arrived here September 9 and 10.

Mr. **Brown**. I am talking about the long letter put in the record several days ago, from Secretary Lansing to President Wilson, and the answer referred to Wilson's conversation on the 7th of September.[1]

Senator **Barbour**. This letter is August 31, Mr. Raushenbush.

Mr. **Raushenbush**. I would like to ask a question of Mr. Brown. Can you describe for everybody's benefit, including my own, what the situation about this often-referred-to scrapping in the Federal Reserve Board about acceptances was, and what would have happened if it had come out one way or the other? I do not think it is clear.

Mr. **Brown**. I think that question might almost be addressed to the witnesses, Mr. Raushenbush. What would have happened if the Federal Reserve Board had refused to allow the acceptances drawn up, on the part of the belligerent governments?

---

[1] See "Exhibits Nos. 2236 and 2237", Hearings, Part XXVI, pp. 7882 and 7884.

Mr. Whitney. How many were there altogether?

Mr. Brown. About $135,000,000.

Mr. Whitney. Does that include the Russian 25,000,000, which had been paid off prior to this?

Mr. Brown. No; excluding that.

Mr. Lamont. They would have to take up the slack in some other way, I suppose.

Mr. Whitney. There would be 100,000,000 less financing.

Mr. Raushenbush. Do I get that correct?

Mr. Morgan. There was nothing to prevent the banks owning the acceptances, only they were not rediscountable at the Federal Reserve.

Mr. Brown. Then the result would have been that a certain burden on the Allied financing, that was carried by the Federal Reserve banks, the reserves of the country, a certain burden carried by them, would have had to have been carried by someone else?

Mr. Wardwell. Some portion of it.

Mr. Morgan. Some portion of it.

Senator Barbour. Does that answer the question, Mr. Raushenbush?

Mr. Raushenbush. I am not certain in my own mind. I notice both Mr. Davison and Brown Bros. in some cables put in back there were assuring everybody that they would be accepted by the Federal Reserve banks, and we got along further and there was still a scrap.

Mr. Brown. I think we will clear that up in a short while.

Mr. Whitney. Of course, the cable of Mr. Davison was merely paraphrasing a letter from Brown Bros., Mr. Raushenbush.

Mr. Raushenbush. He reported to Morgan in London that these acceptances may be received by the Federal Reserve bank. That is my notation on it.

Mr. Whitney. That was merely paraphrasing Brown Bros.' letter.

Mr. Brown. Mr. Chairman, I wish to offer for the record copy of the contract on this Brown Bros. credit, in which I wish to note in passing that the guarantee of the Bank of France attached on the document, because the matter became of grave importance afterward. This is the letter [reading]:

> I have the honor of acknowledging receipt of your letter of August 17, which reads as follows:
>
> "We have been informed of negotiations which you have undertaken in the United States with the view of opening a credit having for its object to assure facilities of exchange to the French purchasers of American merchandise and products.
>
> "We are glad to accept the role which you have reserved us in this operation, and we are happy to put our cooperation to the discretion of the Bank of France for the realization of the contract herein prepared under its control and for its account.
>
> "It is understood that the Bank of France will assume repayment either through exchange or, this failing, by shipments of gold, and will assume all risks of the operation."
>
> I have the honor to confirm to you our full agreement upon the contents of this letter.

(The letter and document referred to were marked "Exhibit No. 2422", and are included in the appendix on p. 8399.)

Mr. Whitney. Mr. Brown, this may not be pertinent, but I think it is: Do you happen to know how many of the 100,000,000-odd acceptances, about which we have been talking, were rediscounted with the Federal Reserve banks?

Mr. Brown. There are rough figures on that, Mr. Whitney, which I was coming to later.

Mr. Whitney. Excuse me. We have no record of it, and I wondered if you knew.

Mr. Brown. They varied at different periods.

Mr. Whitney. And different banks.

Mr. Brown. At different periods the amounts held rose because of the disposition of banks who needed funds to sell them in the market or rediscount them, if they were able, and at times there were practically no buyers in the market except the Reserve banks.

The guaranty indicates pretty clearly that the credit was negotiated by the Bank of France, and at that time there was a Government moratorium on the export of gold, so that it really is a de facto government credit.

Mr. Whitney. That is, the Brown Bros.' credit?

Mr. Brown. Yes, sir; although drawn in the name of certain French banks, whose names appear on the contract.

Mr. Chairman, at this point I would like to point out that the Reserve Board negotiated for quite a long period on this, and wrote several letters, to which nobody excepted, and the chief difficulty was apparently difficulty over a question of renewal, and if you will permit me a moment, I will try to bring that out here as clearly and as rapidly as possible.

On July 9, 1915, I offer a letter from Benjamin Strong to Mr. Delano, in which he states [reading]:

> These drafts—

That is the Brown Bros.' drafts—

> are to be negotiated in the market and the holder thereof is under no obligation to extend them after maturity—

I call your attention particularly to the words:

> the holder thereof is under no obligation to extend them after maturity.

(The document referred to was marked "Exhibit No. 2423", and is included in the appendix on p. 8406.)

Mr. Brown. As of July 15, 1915, I offer for the record the draft of a letter prepared by the Federal Reserve Board, signed by Mr. Delano, in which the statement is made——

Mr. Whitney. To whom, Mr. Brown?

Mr. Brown. To Governor Strong.

(The document referred to was marked "Exhibit No. 2424" and is included in the appendix on p. 8407.)

Mr. Brown. That letter reads, in part, as follows [reading]:

> I would also state that it is the opinion of the Board and the Comptroller that no contract could be entered into by the member bank accepting them—

that is, the drafts—

> which would at the time of accepting or offering to accept such drafts, provide for the renewal (by the holder)[1] of (any specific)[1] draft drawn under said letter of credit (beyond a period of 6 months).[1]

---

[1] See complete Exhibit, appendix, p. 8407, for explanation of parenthetical matter.

Personally I would not attach too much importance to that letter, because I think it was a misunderstanding.

It is clear from the interlining on this letter that Warburg considered that letter should read as follows [reading]:

> I would also state that it is the opinion of the Board and of the Comptroller that no contract would be entered into by the member banks accepting them, which would at the time of acceptance or offering to accept such drafts, provide for the renewal by the holder of any specific draft drawn.

I take it that you, as bankers, would subscribe to Mr. Warburg's interpretation rather than to the form as passed?

Mr. **Whitney**. We did not have anything to do with it.

Senator **Barbour**. Is this a corrected letter?

Mr. **Brown**. This is a draft which the Federal Reserve Board prepared at the time, to show the different version of the different members. The first was the one adopted, and the second was the version as Mr. Warburg wished to have it, and which I believe you stated, Mr. Whitney, is, under the law, according to your version, correct banking practice.

Mr. **Morgan**. That is correct.

Mr. **Whitney**. I think so, but I am not sure.

Mr. **Brown**. Pending these negotiations with the Board, Brown Bros. forwarded another letter to Governor Strong, dated July 10, 1915, which I offer for the record.

(The document referred to was marked "Exhibit No. 2425" and is included in the appendix on p. 8408.)

Mr. **Brown**. In that letter the statement is made [reading]:

> The credit is not for the purpose of financing the sale of war materials to the French Government.

Also in the letter of Brown Bros. they point out the importance of such problem as follows [reading]:

> French buyers of American merchandise and other commodities for export from the United States to Europe have found it difficult, owing to the extraordinary conditions now prevailing, to obtain credits or satisfactory exchange to enable them to settle their accounts with American merchants. On the other hand, American merchants have not been willing to sell to French merchants in the usual way because of the extraordinary exchange conditions; in consequence exports of American merchandise and other commodities to Europe have been, and may continue to be seriously curtailed unless adequate credit and exchange facilities are provided.

I wish to offer for the record the minutes of the Federal Reserve Board meeting of July 21, 1915, stating [reading]:

> The question of the terms of a letter to be sent to Governor Strong of New York regarding lines of acceptance credits was considered. No final action was taken.

(The document referred to was marked "Exhibit No. 2426" and appears in full in the text.)

Mr. **Brown**. It appears clear, Mr. Chairman, that Governor Strong opposed the first answer and asked for another.

Senator **Barbour**. I think the committee might feel that the letter under date of August 31, from President Woodrow Wilson, should be withdrawn from the members of the press until at least more members of the committee are here. That is my opinion, gentlemen, in the light of some things which have been said in the letter, which have nothing to do with the paragraph which was read; and on my own responsibility I would not like to turn that letter over to the press at this time.

VOICES. It is already on the wires.

Senator BARBOUR. Then it cannot be helped. I did not know what the other observations were which are in the letter.

Mr. MORGAN. Will it be in the records of the committee?

Senator BARBOUR. Excuse me?

Mr. MORGAN. Will the letter be in the records of the committee, or are you going to remove it from the record?

Senator BARBOUR. Personally, I would like to see it withdrawn from the records of the committee. That would be done, if I had the sole say of what should be done with it. I do not know whether the press can do it or not, but it might be possible to send some sort of check on it and see whether you can recall anything besides the paragraph which was read. I want to make clear that I knew nothing about the letter at all, and the paragraph which was read was perfectly proper. I myself think there are other parts of the letter which are unnecessary to these proceedings.

Mr. BROWN. Having put the letter into the record, perhaps I should apologize because I skimmed through all the irrelevant portions and I did not notice there was anything like that in it.

Senator BARBOUR. I am quite sure it was not intentional on your part, but I think the incident is unfortunate.

Mr. BROWN. Mr. Chairman, on July 28, 1915, the Federal Reserve Board wrote to Governor Strong, over the signature of Mr. Hamlin, in which the following paragraph only is pertinent [reading]:

> In the above paragraph the Board desires to make it clear that a national bank cannot lawfully enter into a contract obligating it at maturity of any specific draft to accept a new draft, which contract would obligate such bank at the time of the original acceptance to renew its credit for a period aggregating more than 6 months. Such an agreement, whether collateral or on the draft itself, would in substance amount to the acceptance of a draft having more than 6 months to run.

(The document referred to was marked "Exhibit No. 2427" and is included in the appendix on p. 8409.)

Mr. WHITNEY. These regulations all have to do with eligibility, do they not?

Mr. BROWN. That is the power of accepting.

Mr. WHITNEY. To make them acceptable.

Mr. BROWN. It says [reading]:

> In the above paragraph the Board desires to make it clear that a national bank cannot lawfully enter into a contract obligating it at maturity of any specific draft to accept a new draft * * *

Sufficient comment on that letter I believe is made by a letter of August 2 from Mr. Warburg to Governor Hamlin, in which he says [reading from "Exhibit No. 2428"]:

> Thank you for sending me the copy of your letter to Governor Strong. I suppose you were joking when you wrote that "you think" it covers the suggestions made by me at the conference in New York. Indeed it does not. It expresses just the contrary, and I am sorry to have to express my emphatic dissent.

He says further along [reading]:

> The doctrine propounded in this paragraph——

that I just read——

> is just the reverse of Mr. Cotton's opinion and of what we agreed upon in New York when four members were present.

He goes on further to state that there is nothing in the law to prevent the agreement on the part of the bank to guarantee the renewal of the acceptances; that the sole point is the question of forcing a holder to renew.

I wish to point out at this point that up to August 8 there is nothing in the record that shows that Mr. Warburg was in any way opposed to these credits.

Mr. Whitney. That letter was August 8?

Mr. Brown. August 2; excuse me.

(The document referred to was marked "Exhibit No. 2428", and is included in the appendix on p. 8410.)

Mr. Brown. I wish to offer, Mr. Chairman, for the record, a letter from Paul M. Warburg to the Federal Reserve Board, date August 8, 1915.

(The document referred to was marked "Exhibit No. 2429", and is included in the appendix on p. 8411.)

Mr. Brown. In that letter he states in part as follows [reading]:

> There are two questions involved: The one is the general question of the power of a member bank to enter into a contract obligation to renew an acceptance credit even for a longer period than 6 months. That is plainly a question of interpretation of law, one upon which there can be hardly any doubt, one upon which counsel has now given an opinion, satisfactory, as I understand, to all members of the Board, and certainly to a majority, and all the Board is about to do in this respect, is to adopt its counsel's opinion [including Mr. Cotton].
>
> The second question involved is the particular application of the ruling to the so-called "Brown credit." Concerning this, I understand, as Harrison states, that you, Dr. Miller, have some apprehension lest a revolving credit might in substance amount to a loan granted to a foreign government.

The letter further states [reading]:

> It was furthermore stated to Mr. Strong that no government must appear as a party to the contract or guarantor, but that the credit was to be given to private concerns. (Finally Browns had assured Mr. Strong that no war materials were to be financed by this credit arrangement.) If the restrictions as here stipulated are adhered to there cannot be any fear that the credit should amount to "a permanent foreign-government loan."

Mr. Lamont. Of course, Mr. Brown, all these internal discussions in the Federal Reserve Board have to do with the Federal Reserve Board and not with us.

Mr. Brown. Absolutely.

Mr. Lamont. We are sitting here as spectators, interested in all you have to say, but there are four members of the Federal Reserve Board at that time still living.

Mr. Brown. The only point is, as I believe the record has already shown, that J. P. Morgan & Co. were interested in setting the wheels in motion, may we say, to have acceptances made available for belligerent financing.

Mr. Lamont. We wanted to be sure that we were not derelict, and you were not expecting any remarks from us.

Mr. Brown. I am trying to direct my remarks to the Chair as much as possible.

Mr. Morgan. I would like to call attention to the fact that we had nothing to do with recommending a suspension of the rules of the Federal Reserve Board in regard to it.

Mr. Brown. Absolutely, Mr. Morgan.

Mr. Morgan. Thank you.

Mr. Raushenbush. Mr. Brown, may we not take it, in answer to the question which the witnesses gave, in response to the question which I asked you and you presented to the witnesses, that if these regulations had not been changed, then something over $100,000,000 would not have been floated here of these acceptances? Do we understand that correctly?

Mr. Brown. I think that is the consensus of what the record shows.

Mr. Whitney. They would have changed the terms of these credits. You must remember, Mr. Raushenbush, that Mr. Brown said we had nothing to do with any commercial credits except——

Mr. Brown. I did not say that.

Mr. Whitney. We did not handle any.

Mr. Brown. You did not handle any.

Mr. Whitney. They might have changed the regulations that come under the regulations of the Federal Reserve Board.

Mr. Raushenbush. Did you participate in any?

Mr. Whitney. We did participate in some but did not handle any.

Mr. Raushenbush. Then your effort in the matter was to secure as much as possible?

Mr. Whitney. We were always interested in providing any legitimate way.

Mr. Raushenbush. Mr. Morgan's cables and everybody's shows it was considered the bankers' job, regardless of whether your name was Morgan or Smith?

Mr. Whitney. Yes.

Mr. Raushenbush. That was one of your functions. Here was something which would and did oppose it. We would have 135 millions of rediscounts, and the evidence which was given in answer to the question was—I think your answer was different from Mr. Brown's. You or Mr. Morgan said that it would have stopped that amount of financing. Mr. Brown said, if I gathered it correctly, that it simply would have been stuck in the hands of the banks and left them unliquid to that extent.

Mr. Whitney. I think what we said, or we certainly meant to say, was that it would have necessitated a change in the terms of credit, and would not have necessarily stopped it, but if it stopped it, it was a matter of 100 million dollars.

Mr. Raushenbush. If it got out of the rediscount market, then it would have gone into the investment market and would be a drag on that, would it not?

Mr. Whitney. You cannot tell what might have happened, if it had not happened the way it did.

Mr. Raushenbush. Perhaps I misunderstood. You were not denying an interest in this whole thing?

Mr. Whitney. No.

Senator **Barbour**. It is the difference between interest and responsibility.

Mr. **Brown**. That is what my statement was, in connection with the responsibility.

I offer at this point, Mr. Chairman, a memorandum, undated, from the Federal Reserve Bank in New York, reading in part as follows [reading]:

> At various conferences with the Federal Reserve Board,, and particularly with Mr. Warburg, it has been informally understood that, while the Board does not care to make any formal ruling, the transaction described in the attached letter of Brown Bros. & Co., dated July 10, would not meet with objection on the part of the Federal Reserve Board.

Mr. Chairman, I wish to call your attention to the fact that Brown Bros.' letter of July 10, already in the record, is one which does not say anything about the guaranty of the Bank of France.

Mr. **Whitney**. That is not an aid to government, of course.

Mr. **Brown**. Mr. Whitney, we could sit down and discuss very long and very exhaustively, could we not, as to whether the Bank of France is a part of the Government, or the Bank of England a part of the English Government. Technically, no, but actually yes. Is not that so?

Senator **Barbour**. I do not think we want to get into matters of opinion on those things. How much more of this material have you got for the record, Mr. Brown?

Mr. **Brown**. It will take considerable time.

(The letter referred to was marked "Exhibit No. 2430", and is included in the appendix on p. 8412.)

Mr. **Brown**. I offer a letter for the record from Mr. Hamlin to Mr. McAdoo, of August 6, 1917, in which a quotation is made of the opinion of Mr. Miller of the Board. It says [reading]:

> He (Mr. Miller) bases his opposition on the ground that the ultimate security for the acceptors will probably be some form of Government notes, which may not be paid at maturity and which may have to be extended until they approach a long-term obligation.

(The document referred to was marked "Exhibit No. 2431", and is included in the appendix on p. 8412.)

Mr. **Brown**. That is in fact what happened, is it not, Mr. Lamont?

Mr. **Lamont**. I apologize, Mr. Brown. I was reading the Woodrow Wilson letter.

Mr. **Brown**. I beg your pardon. This is quoting Mr. Miller's opinion in regard to all these transactions, which were objectionable, which you have stated you had an interest in, although no responsibility. It reads [reading]:

> He bases his opposition on the ground that the ultimate security for the acceptors will probably be some form of Government notes, which may not be paid at maturity and which may have to be extended until they approach a long-term obligation.

Now, let us put the question this way: If the United States had not entered the war, Mr. Miller's opinion would have been correct, would it not?

Mr. **Lamont**. George, can you answer that? Did you follow that through, Mr. Morgan?

Mr. **Morgan**. I understood you to say that the ultimate security, as I understood it, rested on the good faith of the French Government securities, or the Bank of France, rather, and if the Bank of France got people to take a long-time obligation, then, when that obligation came through, it would still be liable for it.

Mr. **Brown**. But these were not supposed to be renewed, were they? They were short-time, liquid credits for the discount market.

Mr. **Morgan**. In some way or other they have got to accumulate exchange over here to pay them, do they not?

Mr. **Brown**. Yes. Do you recall that they were paid, Mr. Morgan?

Mr. **Morgan**. I do not.

Mr. **Whitney**. They were paid.

Mr. **Brown**. By Treasury advances.

Mr. **Whitney**. Were they? Whom?

Mr. **Brown**. The French Government.

Mr. **Whitney**. What Treasury?

Mr. **Brown**. The American Treasury.

Mr. **Whitney**. These matured in 1916, did they not?

Mr. **Brown**. Not these particular ones, the renewals. We will get to that later.

Mr. **Raushenbush**. Now you have mentioned it, Mr. Brown, how many of these acceptances were paid out of the United States Treasury?

Mr. **Brown**. From a rough memory of it, about one hundred and twenty million, Mr. Raushenbush.

Mr. **Whitney**. Excluding the Russians?

Mr. **Brown**. Excluding the Russians.

Mr. **Whitney**. The only ones with which we had anything directly to do.

Mr. **Brown**. That includes three Bonbrights, the second Brown, and the Guaranty-Bankers.

Mr. **Whitney**. So-called industrials.

Mr. **Raushenbush**. Do we get the story correctly, then, that the Federal Reserve regulations were changed to allow the rediscount of a kind of paper that was called acceptances, but which were not really acceptances because they had government securities behind them, and then after that regulation was changed to allow $135,000,000 worth of financing, the United States Treasury had to bail out the people who held them to the extent of $120,000,000?

Mr. **Brown**. That is the story as the documents revealed, Mr. Raushenbush. They are not all introduced. I think we could bring up later the documents substantiating that statement.

Mr. **Raushenbush**. I am interested in one more point, which I do not know whether you will bring out, but as you have been going through these, these things all revealed the same thing, that there were a lot of things about which the Federal Reserve Board were not informed, and there were certain definite omissions of fact.

Mr. **Brown**. I think the record shows that.

Mr. **Raushenbush**. All right.

Mr. **Brown**. I have offered the letter of August 6, 1915, for the record.

The last memorandum preceding that, dated July the 16th, was attached, which is in the record, and the various memoranda and the guarantee of the Bank of France. There are further letters which indicate the Board was very much concerned when it learned that was a credit guaranteed by the Bank of France. I have been showing that the Board was not really opposed to this credit in the beginning, but it was rather uncertain, and that Mr. Warburg particularly was not concerned, and later on when the nature of the credit became clear to the Board, that it was very seriously opposed by certain members.

Mr. RAUSHENBUSH. Do you have any documents showing that at the time the Board let these regulations go through to allow this financing, that it did not know certain essential features concerning the acceptance?

Mr. BROWN. That matter was long in dispute, Mr. Raushenbush, between the Board and Governor Strong, Governor Strong insisting that the Board knew there had been guaranties of discounts.

Mr. RAUSHENBUSH. Do you have documents to back that up?

Mr. BROWN. That I believe comes in on another occasion, but there is nothing in the documents so far offered, or which I have here, except the contract itself, which indicates that the Board was in any way informed that there was a guarantee of discount attached to this arrangement, and that that became a very serious question later, because in the view of the Board, the banks not only guaranteed to accept these acceptances but also guaranteed to discount them, and that that in effect made them a definite loan, because it meant as to the money rates that the borrowers had their money at a fixed rate. There was no possibility of putting a penalty on them at any time the bank wanted to liquidate.

If money gets tight, the banks can unload, and the rate of the borrower goes up in normal times, but where there is a guarantee of discount as well as acceptance, the rate is fixed, no matter where the money market goes.

Mr. MORGAN. Excuse me. The borrower sells the bill or sells the acceptance to someone, the bank, or to the discount market, or whatever it is going to be, and for that he takes a certain discount. If there is any change in the rate, it is in the change in the value of the bill in the hands of the holder, or if you have a fixed rate for renewal, you are quite right. I did not realize that that was undertaken. I do not agree with that as a good policy.

Mr. RAUSHENBUSH. Mr. Brown, one more question. Do you have any documents or anything showing that the Board changed its regulations before it was informed as to the full effect of this contract which changed the acceptance into a sort of guaranty?

Mr. BROWN. No; I do not gather that that is the case, Mr. Raushenbush. I gather that the bitter fight indicated in the documents in the record, going on in the Federal Reserve Board, was as a result of the discovery of the effects of this contract.

Mr. RAUSHENBUSH. Can you not introduce the rest of the documents with a brief summary of what they show?

Mr. LAMONT. You say, however, Mr. Brown, as a matter of interest, that the officials of the Federal Reserve Bank of New York always claimed that these people had given all the information?

Mr. BROWN. That is true.

Senator BARBOUR. None of these things directly involve the witnesses.

Mr. BROWN. This is for the record, as we stated in the beginning.

Senator BARBOUR. If it be agreeable to the members of the committee present, I see no reason why these documents should not be introduced en bloc, and any explanation given by Mr. Brown of what they are that may be appropriate.[1] It is understood that the witnesses have no responsibility for this at all. Is there any objection to that on the part of the witnesses?

Mr. **Whitney**. We are out of it.

Senator **Clark**. I understand these documents do not concern Morgan & Co.?

Mr. **Brown**. No, sir. The only connection, as I stated, Mr. Chairman, was that we have seen that J. P. Morgan & Co. were interested in having the Federal Reserve banks open to these acceptances.

Senator **Clark**. I understand, but I merely asked the question because, if they concern Morgan & Co., I was going to ask they be given an opportunity to pass on them.

Mr. **Brown**. I suggest that the balance of the documents be entered in the record and appropriate numbers given to each.

Senator **Barbour**. That is allowed, unless there is further question on the part of anyone else.

Mr. **Wardwell**. It does not refer to us?

Mr. **Brown**. There are no further Morgan documents there.

Mr. **Lamont**. They do not refer to us?

Mr. **Brown**. No.

(The documents referred to were marked "Exhibits Nos. 2432 to 2451", both inclusive, and are included in the appendix on pp. 8413 to 8427.)

Senator **Barbour**. If there is nothing further now, the committee will stand in recess until 10 o'clock tomorrow morning.

(Thereupon, at 4:45 p. m., the committee recessed until 10 a. m. of the following day, Tuesday, Jan. 14, 1936.)

---

[1] See appendix, p. 8413, for explanatory note.

INVESTIGATION OF MUNITIONS INDUSTRY

TUESDAY, JANUARY 14, 1936

UNITED STATES SENATE,
SPECIAL COMMITTEE TO INVESTIGATE
THE MUNITIONS INDUSTRY,
Washington, D. C.

The hearing was resumed at 10 a. m., in the Caucus Room, Senate Office Building, pursuant to adjournment, Senator Gerald P. Nye presiding.

Present: Senators Nye (chairman), Clark, Vandenberg, and Barbour.

Also present: Stephen Raushenbush, secretary, and Lawrence Brown, financial assistant to Committee, and Robert Wohlforth, assistant to the secretary.

TESTIMONY OF J. P. MORGAN, THOMAS W. LAMONT, AND GEORGE WHITNEY—Resumed

The **CHAIRMAN**. The Committee will be in order.

Mr. Brown, you have a line possibly in view that you may pursue this morning.

Mr. **BROWN**. I would like to offer for the record a "Summary of special loan to Morgan, Grenfell & Co. client, February 20, 1915, to December 18, 1915."

This bears on that exchange situation in the Anglo-French loan, which has been held out so as to be sure that your accountants and ours were in thorough agreement on the figures. Since that has been checked between us, I now offer it for the record.

(The document referred to was marked "Exhibit No. 2452" and is included in the appendix facing p. 8427.)

Mr. **WHITNEY**. This is the summer of 1915, the one that was paid off.

Mr. **BROWN**. Yes, sir.

FEDERAL RESERVE-BANK OF ENGLAND NEGOTIATIONS[1]

Mr. **BROWN**. Mr. Chairman, this morning we take up the negotiations between the Federal Reserve Bank of New York and the Bank of England in regard to appointing the latter as correspondent to the former during the spring and summer of 1916.

The question of neutrality and exchange support was therein involved.

The firm of J. P. Morgan & Co., did not play a very large role in this operation, and insofar as the firm is not involved, there are no questions to the witnesses.

---

[1] See also "Exhibits Nos. 3125 through 3160 and 3218", Hearings, Part XXX; "Exhibits Nos. 3864 through 3882 and 3898", Hearings, Part XXXI.

I would like to offer the documents more or less en bloc, if there is no objection to procedure.

Mr. **Lamont**. Of what do the documents consist?

Mr. **Brown**. They are mostly letters from the files of the Federal Reserve Bank of New York and some from the Federal Reserve Board.

I might point out at this point the negotiations began in the winter of 1916 at about the time when the pressure on the exchange again forced the reopening of the demand loan to the Bank of England, which was used to support sterling in New York.

The object of this establishment was set forth in a memorandum of a later date, which refers back, however, to the earlier negotiations, and I shall offer it in the record.

It is August 29, 1916, by J. F. Curtis, counsel of the New York bank. It sets forth the nature of this transaction.

(The document referred to was marked " Exhibit No. 2453 " and is included in the appendix on p. 8428.)

Mr. **Whitney**. Excuse me, Mr. Chairman, but, Mr. Brown, do you think that is an adequate explanation of what the demand loan was renewed for in the winter of 1916? It was for very many other purposes than exchange. It was for making transfers in the commercial agency, and many other reasons.

Mr. **Brown**. The Bank of England demand loan no. 1 was apparently for the purpose of exchange.

Mr. **Whitney**. Yes; but not no. 2.

Mr. **Brown**. I was trying to simplify it by leaving that out; to let the record be clear on that, there was another loan also for other purposes.

According to this memorandum which I have offered for the record the purpose of the negotiation between the Bank of England and the Federal Reserve Bank of New York was, first, to stabilize exchange.

The mechanics of the transaction were:

First, the establishment of an account with the Bank of England.

Second, to use the Bank of England as an agent for the Reserve Bank of New York to buy drafts and bills of exchange in the London market for account of the Federal Reserve Bank.

This description is put in [reading from "Exhibit No. 2453"]:

> All of the operations above described will be undertaken, if at all, for the purpose of regulating the exchange between England and this country, which regulation will have as its object the assistance of the commerce of the United States.

According to this memorandum, at the outset the question of neutrality was involved. The memorandum reads, on that subject, as follows:

> Are the actions contemplated by the Federal Reserve Bank of New York, under the plan of operations with the Bank of England, unneutral in character, and (2) if they are unneutral, is the Government of the United States involved in such a way as to render the actions of the bank improper?

The memorandum states further:

> As for the Bank of England, it is a private corporation, acting under a charter granted by Parliament, the corporation not being owned in any respect by the Government, etc.

I want to ask the witnesses, just as a matter of opinion, do you consider the Bank of England a private corporation?

Mr. MORGAN. Do I?

Mr. BROWN. Yes.

Mr. MORGAN. Yes. It is a private corporation, but, of course, it acts for the Government many times. It is in close touch with the Government at all times, and they work together. It is privately owned entirely.

Mr. BROWN. It is privately owned, but, as a matter of actual fact, it is a Government bank in effect, is it not?

Mr. MORGAN. It was established originally as a Government bank, yes; and it has a right to issue notes, which is given it by the Government.

Mr. BROWN. Until the war the sole paper money of Great Britain was the Bank of England notes?

Mr. MORGAN. They are now.

Mr. BROWN. Have they withdrawn the Treasury notes?

Mr. MORGAN. There were Treasury 1-pound notes during the first part of the war, yes, and for some years after the war.

Mr. BROWN. But today again the only currency of Great Britain is the Bank of England notes?

Mr. MORGAN. Bank of England notes.

Mr. LAMONT. But the Government has no stock in it whatsoever.

Mr. MORGAN. It has no ownership at all. It does not appoint directors or anything else.

Mr. BROWN. Have you ever known of a conflict between the Bank of England and the British Government?

Mr. MORGAN. I personally do not know of any.

Mr. BROWN. The second question which Mr. Curtis raises in regard to neutrality is the question whether the Federal Reserve Banks are Government banks or not, or quasi-Government banks.

I do not believe that question has ever been settled. It still seems to be open.

I offer for the record a letter from Benjamin Strong to Mr. Treman on March 22, 1917.

(The document referred to was marked "Exhibit No. 2454" and is included in the appendix on p. 8429.)

Mr. BROWN. In this he is pretty emphatic about his contention that the Bank of England is a Government bank.

I offer for the record a letter from Benjamin Strong to Morgan, Harjes & Co., dated February 13, 1916.

(The document referred to was marked "Exhibit No. 2455" and is included in the appendix on p. 8430.)

Mr. BROWN. You crossed on the *Rotterdam* with Mr. Strong on that trip, did you not, Mr. Morgan?

Mr. MORGAN. I went on the *Rotterdam* at that time. I do not remember whether Ben Strong was on board or not.

Mr. BROWN. I think it will come out in the further documents that he was.

Mr. MORGAN. Very probably.

Mr. BROWN. I will read the opening line of this [reading from "Exhibit No. 2455"]:

> Here we are at last, after an uneventful but most enjoyable trip across on the *Rotterdam*. We were held up for examination of passports, etc., at Fal-

> mouth to a degree that was most impressive, and possibly under different conditions would have been exceedingly annoying. Frankly, although my trip is one of business, I am in a frame of mind to submit to almost any degree of annoyance, realizing now as never before how necessary it is that every interest must be laid aside which might interfere with the successful prosecution of this war.

You do not recall any conversations with Mr. Strong on that trip?

Mr. Morgan. I do not recall them especially; no.

Mr. Brown. Here it is in the lower paragraph. It said that you—

> came over on the boat with me, and I must say he is looking exceedingly well, is in excellent spirits, and stands the strain of their very busy organization with apparent ease.

I am glad to hear that.

Mr. Morgan. There does not appear to have been anything very remarkable in regard to the conversation that I ought to remember.

Mr. Brown. I now offer a letter dated May 1, 1916, from Frank L. Polk, that indicates that Governor Strong at that time was considered to occupy at least a semiofficial status, because the letter reads [reading]:

> I received your letter of the 28th ultimo and have directed that all diplomatic correspondence be sent you.

(The document referred to was marked "Exhibit No. 2456" and is included in the appendix on p. 8431.)

Mr. Brown. I offer for the record a group of letters from Mr. Strong to Mr. Jay, dated various dates, from March 8, 1916, in London. The part that is significant in the first letter is [reading from "Exhibit No. 2457"]:

> I had a long talk yesterday with Jack Morgan and Grenfell, and another visit this morning with Jack.

Apparently you were in pretty close touch with Mr. Strong in London at that time.

Mr. Morgan. Strong and I were very great friends. I knew him very well indeed. I saw him constantly when he was in London always; always tried to back up that connection between the Federal Reserve Bank and the Bank of England, which I thought was so important.

Mr. Brown. The other letters simply bear out that statement, Mr. Morgan, and there is no particular point in it except at the end of the letter of March 14, Governor Strong writes [reading from "Exhibit No. 2459"]:

> It will not be possible to make tentative banking arrangements with the joint-stock banks until after discussions are completed with the Bank of England. I wish, on receipt of this letter, you would drop in and see Jack Morgan. He will give you, personally, some information that I am sure you will regard as of value and will indicate my desire to wait here until the work is done. He and his partner, Grenfell, have been most helpful.

(The documents referred to were marked "Exhibits Nos. 2457, 2458, and 2459", respectively, and are included in the appendix on pp. 8431 to 8433.)

Mr. Brown. In the course of those negotiations, Mr. Morgan, did the question ever come up whether this was a neutral transaction to undertake in the spring of 1916?

Mr. Morgan. No; I do not think it ever did.

Mr. **Brown**. You do not ever recall that that question was mentioned at all?

Mr. **Morgan**. No; I do not recall it.

Mr. **Brown**. In another letter, dated March 22, 1916, it says [reading]:

> We—

meaning Mr. Strong and someone else—

> spent about an hour discussing our plans, with which Jack Morgan is fully familiar, and with which Lord Cunliffe is now in accord.

(The document referred to was marked "Exhibit No. 2460" and is included in the appendix on p. 8434.)

Mr. **Brown**. I wish to enter in the record an excerpt from the New York Times, dated February 18, 1916, reading as follows [reading]:

> Denial was made today by the Federal Reserve Board of the published statement that Benjamin Strong, Jr., Governor of the Federal Reserve Bank of New York District, had gone to England on a mission for the Board.
>
> The idea that he would take steps to arrange for the establishment of agencies of the Federal Reserve Bank System in Europe was denied.
>
> The Reserve Board has power to establish such agencies, but it is the policy of the Board, it was stated, to defer action on this matter until after the war when conditions have become normal.

(The document referred to was marked "Exhibit No. 2461" and is included in the appendix on p. 8435.)

Mr. **Brown**. Do you recall, Mr. Morgan, in conversation with Mr. Strong at that time, any mention of a conference with Lord Kitchener and W. Cameron Forbes?

Mr. **Morgan**. No.

Mr. **Brown**. Do you recall his ever mentioning it to you afterward?

Mr. **Morgan**. I do not remember any such conversation at this moment.

Mr. **Brown**. I wish to offer for the record, Mr. Chairman, a newspaper extract from the New York Evening Mail, dated September 20, 1916, of which the relevant part is this:

It points out that a conference was held between W. Cameron Forbes, formerly Governor of the Philippines, and Benjamin Strong, with Lord Kitchener, who was then, I believe, Secretary of State or War, was he not?

Mr. **Morgan**. He was Secretary of War; yes.

(The document referred to was marked "Exhibit No. 2462", and is included in the appendix on p. 8435.)

Mr. **Brown** (reading):

> It was because of this conviction that Lord Kitchener arranged the meeting, to urge Governor Forbes and Mr. Strong to throw the weight of their influence in this country on the side of the Allies.
>
> Governor Forbes and Mr. Strong were expressly invited to confer with Kitchener as quasi official members of the American Government. And Governor Forbes held the diners spellbound.

And so forth.

It goes on [reading]:

> The breaking off of diplomatic relations with Germany was the immediate step he pleaded for.

Mr. **Morgan**. It did not imply that I was present at that conversation, did it?

Mr. **Brown**. Oh, no. The only thing was that noticing from this letter how intimate you had been with Governor Strong's negotiations at that time, whether he had ever mentioned that to you, Mr. Morgan.

Mr. **Morgan**. I do not recall it.

Mr. **Brown**. I offer for the record a letter from Benjamin Strong to Pierre Jay, dated September 29, 1916, in which he is discussing the newspaper extract which was read into the record.

(The document referred to was marked "Exhibit No. 2463", and is included in the appendix on p. 8436.)

Mr. **Brown**. In this he says [reading]:

> The interview with Kitchener was the result of a long talk that Kitchener had with Fred Wolcott who was over there representing the Rockefeller Foundation.

In no way does he deny the essential accuracy of the newspaper account.

I offer for the record, Mr. Chairman, a large group of documents, none of which concern the witnesses. They merely make clear the nature of the negotiations from March up into August.

The only point that needs comment is that as early as March 23, 1916, in the telegram from Benjamin Strong, the New York bank was suggesting changes in the memorandum between the two banks.

It says [reading from "Exhibit No. 2464"]:

> Omit references in opening sentence and in paragraph 12 to conclusion of war as we propose earlier start.

Apparently as early as March 1916 the theory that this should be deferred until after the war had been dropped, at least on the part of Governor Strong.

I am offering this group for the record, if the witnesses have no objection.

There is no mention in any case in here of J. P. Morgan & Co., or you personally, Mr. Morgan.

Mr. **Morgan**. I have no reason to object at all.

(The documents referred to were marked respectively, "Exhibits Nos. 2464 to 2476", inclusive, and are included in the appendix on pp. 8436 to 8445.)

Mr. **Brown**. Then I offer for the record a letter from Benjamin Strong to Mr. J. P. Morgan, dated August 31, 1916.

(The document referred to was marked "Exhibit No. 2477", and is included in the appendix on p. 8446.)

Mr. **Brown** (reading):

> It will soon be 5 months since I was in London discussing the preliminary outline of our proposed arrangements with the Bank of England, and have no doubt that Lord Cunliffe and his associates may now be wondering whether there is any possibility of a final conclusion of the matter, particularly, as they know that I am ill in Colorado. On that account, I am writing to advise you of the status of the matter in case inquiry should be made of you.

Why, Mr. Morgan, should inquiry be made to you? You were not an officer or director of the Reserve Bank of New York, were you?

Mr. **Morgan**. No. At that time I was still a member of the Advisory Council, I think.

Mr. **Brown**. That was of the Reserve Board?

Mr. **Morgan**. Of the Reserve Board; yes.

Mr. **Brown**. It had no organic connection with the Reserve Bank, that is?

Mr. **Morgan**. No; none at all, except that I was extremely friendly with Ben Strong. He knew quite well that I was not cognizant of all that had gone between him and Cunliffe and the Bank of England, and he thought that they might ask me what was doing, therefore he would post me. That was the whole purpose of that letter, as I make it out. I have not heard the letter yet. I have forgotten it.

Mr. **Brown** (continuing reading):

> On my return from Europe, the following things had to be done before it was possible to make any move towards starting the arrangement in operation:

I will brief these, if possible:

First, the Federal Reserve Act had to be amended in certain details.

A second amendment was necessary.

Third, it was necessary to obtain the approval of the directors of the Federal Reserve Bank of New York.

Fourth, it was necessary to obtain the consent of the Federal Reserve Board.

Fifth, it was probably necessary to get some sort of approval or disclaimer of interest from the State Department.

Do you recall that, Mr. Morgan?

Mr. **Morgan**. No. That was part of what he was telling me about his problem.

Mr. **Brown**. Yes, but I wondered if you could elaborate that point.

Mr. **Morgan**. I do not think it requires elaboration; there is no elaboration I could give to it, sir.

Mr. **Brown**. It was, finally, necessary to formulate some plan by which all 12 of the Reserve banks could operate together under the direction of the Federal Reserve Bank of New York.

Then Governor Strong reports to you that "The status of the above matters is at present as follows:

"I am just advised" that one of the amendments is in the Conference Committee of the House.

The second amendment is in.

The directors of the Federal Reserve Bank of New York have approved the plan.

The Federal Reserve Board has unanimously consented to the plan,' and, as we will see from the preceding documents entered, subject to the approval of the State Department.

> No action has as yet been taken by the State Department.

I read the rest of the letter, in which it appears that Governor Strong is discussing the role of this arrangement in the war financing at the time [reading from "Exhibit No. 2477"]:

> As nearly as I can gather, the present import point of gold is somewhere between $4.76 and $4.77, and I am going to give you my best guess as to the present exchange situation, asking you if you will correct it so far as you feel able and willing to do so and give me your own views as to what may transpire this Fall.
>
> I surmise that France now has a total credit in New York unused, created by the recent loan of $100,000,000, and by various commercial credits of which

I have been advised, aggregating possibly $100,000,000 in all. I also surmise that the proceeds of the sale of the English notes, together with the unused $50,000,000 bank credit gives England a total drawing account in New York today of $300,000,000 not counting some of the gold recently imported and which, I judge, has not yet found its way into bank reserves. I would also suppose that England has, unused but available, American and other securities which can be converted and used as collateral in this market, amounting to anywhere from $100,000,000 to $200,000,000. I would, also, assume that Russia had considerable credits here as to the amount of which I would not hazard a guess. In all, let us say that there is $500,000,000 available, possibly more, for us to meet the fall demands. This is, of course, a magnificent preparation but still I have some doubt whether it will be sufficient to meet the enormous demands which will certainly be made upon us during the present period of the offensive movement, and possibly, in preparing for a more extensive movement next year, if, as I surmise, these three nations are to continue to purchase our raw materials, etc., in anything like the volume which the Government reports indicate. It also seems likely that there will be a large movement of cotton this fall and at pretty substantial prices. In view of the above, which I admit is largely supposition, I have not modified my feeling that the interests of our banks and our exporters may require that the arrangements with the Bank of England be put into operation this fall.

The CHAIRMAN. This is a letter to Mr. Morgan from Mr. Strong?

Mr. BROWN. Yes.

The CHAIRMAN. That we may have a better understanding, Mr. Brown, let me ask what the general purport of these exhibits is. Are you merely undertaking to reveal that the policies of the Federal Reserve System were being shaped and reshaped at this time to accommodate more ready financing of Allied purchases in the United States?

Mr. BROWN. I take the documents to have that significance, Mr. Chairman. This is a year later than the financial conditions that we have been discussing heretofore.

A year before, the question was, "A little credit because American exports is in danger." Here is a question of a very serious problem which has now accumulated. The Governor outlines totals; here is $500,000,000 available right on his rough estimate and, if that is not enough for the enormous demands. The war trade is requiring a constantly increasing financing, a constantly increasing strain.

I think the point also is relevant that the Federal Reserve Bank of New York, one would judge from these letters, is a long way from the discretion which was illustrated by Governor Strong's letter to Sir Edward Holden, which was put in the record earlier in the hearing.

There is no consideration here, apparently, that the Federal Reserve Bank has a duty to neutrality to support. Its duty is to support this ever-growing trade, "The enormous demands which will certainly be made upon us during the present period of the offensive movement."

Mr. LAMONT. Would it be fair to repeat the suggestion that Mr. Morgan made yesterday, namely, that the Federal Reserve System having just been organized and that they were feeling their way out toward the formulation of regulations that would affect every part of trade, that would bear upon every part of trade, both domestic and foreign?

Mr. BROWN. I think that is entirely fair, Mr. Lamont. I think it is equally fair to point out the goal toward which the regulations were going.

Mr. LAMONT. Yes; as to the handling to a considerable extent of our export trade, that export trade, of course, being not to the Allies alone but all over the world.

Mr. BROWN. This letter from which I have just been reading discusses nothing but trade to the Allies.

Mr. LAMONT. Yes.

Mr. WHITNEY. Is it not also significant, Mr. Brown, to point out that Governor Strong was $119,000,000 wrong in his calculations, because, as you know, $119,000,000 of that $250,000,000 September 1 issue was used to pay off certain obligations that they had; so it did not leave by that amount that available for the British.

Mr. BROWN. I think that it is entirely proper to point out, Mr. Whitney, and I think we can draw even another conclusion from that. I think we can draw the conclusion that even the Governor of the Federal Reserve Bank of New York was not aware of the enormous strain that was being put on the New York money market.

Mr. WHITNEY. That letter, as you read it, made an inquiry, if you also remember—I do not think you stated it. That letter was written by Governor Strong when he was sick out West in Colorado, I think, or Arizona.

Mr. BROWN. That is correct.

Mr. WHITNEY. He was trying to be posted as to what the status was. That is no implication that the Federal Reserve bank did not know about it.

Mr. BROWN. He was in constant touch with his own office at all times.

Mr. WHITNEY. I suppose so.

Mr. BROWN. He remained governor of the Federal Reserve bank.

Mr WHITNEY. The second point is, if my recollection is correct, there were no so-called commercial credits subsequent to that date, were there?

Mr. BROWN. I believe there were. There were some more Bonbright credits.

Mr. WHITNEY. In October there was one; excuse me.

Mr. BROWN. Then there was the big $50,000,000.

Mr. WHITNEY. That is the one.

Mr. BROWN. There was another $25,000,000, of Bonbright, in January of 1917.

I offer for the record Mr. Morgan's answer to Mr. Strong, dated September 7, 1916, in which Mr. Morgan sets Mr. Strong right, as Mr. Whitney points out, where he was in error.

(The document referred to was marked "Exhibit No. 2478" and is included in the appendix on p. 8447.)

Mr. BROWN. I will read only this line:

> The requirements for raw materials show no signs of falling off, and they evidently expect the war to go on for another year.

Mr. Morgan, at that time, September to December 1916, was a period of a great deal of peace talk, was it not? There were peace offers and peace negotiations of various kinds?

Mr. MORGAN. I do not know that it ever took any very formal shape.

Mr. LAMONT. Just a little later in the autumn, was it not?

Mr. WHITNEY. He said December.

Mr. **Brown**. This is dated September.

Mr. **Lamont**. I think after the election the peace talk became more rife, Mr. Brown.

Mr. **Morgan**. I thought you said December.

Mr. **Brown**. No; September.

Mr. **Morgan**. No; I do not recall it.

Mr. **Brown**. Then, I offer for the record Governor Strong's reply to Mr. Morgan, dated September 12, 1916.

(The document referred to was marked "Exhibit No. 2479" and is included in the appendix on p. 8448.)

Mr. **Brown**. The only significant paragraph is the following:

> Of course, whatever operations we——

That is, the Reserve Bank of New York—

> could undertake under the terms of the proposed account would be very small in total compared to the total requirements, and it would be a very flexible account and could be made one of the means of stabilizing exchange, rather than specifically a drawing credit, and, after all, the proposed account is to create machinery for steadying exchange rates, having an eye to conditions after the war is over, just as much, if not more, than present conditions. It is all in the interest of our exporters, and some day, I guess, that will be fully realized.

Mr. Morgan, at that time one of the most serious strains on the British Government was the support of sterling, was it not?

Mr. **Morgan**. Yes; that was one of the most serious problems they had, of course.

Mr. **Brown**. So that anything of this nature, even though, as Governor Strong says, the amount is small, anything that would stabilize exchange, would be a very great aid to the British financing in America?

Mr. **Morgan**. Yes; and the larger the greater the aid—and to American exports.

Mr. **Brown**. That, of course, is synonymous, according to the record.

Mr. Chairman, I wish to offer for the record a group of letters of various dates for appropriate notation, which in no way concerns J. P. Morgan & Co. or Mr. Morgan personally. They merely cover the negotiations in the late summer of 1916, in which this negotiation is stalled in the Federal Reserve Board because, having been turned over to the State Department, the State Department declined to act until the election was out of the way.

Mr. **Raushenbush**. Mr. Chairman, may I ask a question?

The **Chairman**. Yes.

Mr. **Raushenbush**. I would like to ask a question of Mr. Brown: Is there any document there that shows why this matter, which was apparently turned over to the State Department, was held up until after the election?

Mr. **Brown**. I am just trying to find out.

Mr. **Raushenbush**. Let me ask another question: Was it turned over to the State Department because it involved neutrality?

Mr. **Brown**. Yes, Mr. Raushenbush; very definitely.

Mr. **Raushenbush**. What document shows that?

The **Chairman**. What was the general nature of that document?

Mr. Brown. In the letter already in the record[1] from Benjamin Strong to Mr. Treman, the Deputy Governor, dated August 31, Governor Strong says:

> The things to be urged before the State Department are, first, that the plan is developed for the protection of our foreign commerce and not for any unneutral purpose.

Letter from Pierre Jay to Governor Strong, of October 19, 1916, which is offered for the record.[2] That letter reads in part as follows:

> With regard to the Bank of England matter, I feel personally that it would be inadvisable to try to have Curtis see Polk or to do anything about it until after election. That is only two and a half weeks away. After that time I feel that the subject can probably be discussed on its merits and will be a welcome instead of as at present an unwelcome subject, and that our chances of success will be much greater if we have a little patience.

Another letter from Mr. Curtis to Governor Strong with respect to our foreign business, which states [reading]:[3]

> With respect to our foreign business, I agree with you that some pressure on the Department of State should be exerted, but I don't think there is really any use in attempting anything before election * * *

(The documents referred to were marked, respectively, "Exhibits Nos. 2480 to 2491", inclusive, and are included in the appendix on pp. 8449 to 8453.)

Mr. Brown. Enclosing the permission from the Reserve Board to undertake this arrangement. That letter reads in part as follows:[4]

> I don't altogether agree with you about the Board showing distrust of your intelligence and intentions. I think that they, in common with all Washington, merely had that preelection fear of "rocking the boat." Six weeks before election Harding predicted to me the exact action which Lansing actually took as soon as election was over.

It seems pretty clear, Mr. Morgan, that everyone was aware here of the neutrality aspect of this. It was never discussed with you in any way?

Mr. Morgan. I do not remember at all. I think not.

Mr. Brown. Did you think at the time that it was an entirely neutral transaction for the Reserve banks of the United States to lend money to the Bank of England during a war?

Mr. Morgan. Certainly; like any other bank.

Mr. Brown. Of course, it is unneutral for a government to lend money to a belligerent, is it not?

Mr. Morgan. Is it? I did not know that.

Mr. Whitney. It is what?

Mr. Brown. It is unneutral for a neutral government to loan money to a belligerent, is it not?

Mr. Morgan. It may be. I do not know what the law is.

Mr. Brown. I believe it is.

The Chairman. It was so held by our State Department during the days of controversy over neutrality.

Mr. Morgan. You are not talking about a government loan now?

---

[1] "Exhibit No. 2476", see appendix, p. 7445.
[2] "Exhibit No. 2485", see appendix, p. 8452.
[3] "Exhibit No. 2487", see appendix, p. 8452.
[4] "Exhibit No. 2490", see appendix, p. 8453.

Mr. Brown. I am talking about the loan from the Federal Reserve banks. The Federal Reserve banks occupy quasi-governmental status here, do they not?

Mr. Whitney. Is there any question of the Federal Reserve banks making loans?

Mr. Brown. The first exhibit[1] showed they were to maintain a deposit with the Bank of England, which is a loan.

Mr. Whitney. That is quite right; a deposit is a loan.

Mr. Lamont. Mr. Brown, of course, there had been relations between the commercial banks in America and the commercial banks in England and in the other countries of Europe for generations?

Mr. Brown. Certainly.

Mr. Lamont. Now, the Federal Reserve System was organized and the question very properly arose, it seems to me, whether there should be relations between the Federal Reserve, the chief bank, the largest bank of the Federal Reserve System, and the central banks of other countries. Is not that on the whole the question?

Mr. Brown. Does not that involve the question, Mr. Lamont, of whether the Federal Reserve banks are purely private banks—not in the legal sense but private banks in the sense that commercial banks are, and belong exclusively and are subject to the exclusive control of their stockholders—or whether the Federal Reserve banks occupy a position analogous to the Bank of England and the Bank of France?

Mr. Lamont. I think you can discuss that as long as you like. They are owned by the various member banks of the United States. They do act, and they were designed to act, in cooperation with our own Government.

Mr. Brown. Three of the nine directors of each bank are Government appointees, are they not?

Mr. Lamont. Certainly; three out of the nine.

Mr. Brown. And the Federal Reserve Board is entirely a Government body?

Mr. Lamont. Yes, sir.

Mr. Brown. And the bulk of the currency of the United States is Federal Reserve notes, is it not, guaranteed by the United States?

Mr. Lamont. I do not know all the laws, Mr. Brown, on that.

Mr. Morgan. Mr. Brown, in regard to that, I might say that always my idea and Mr. Strong's, in making a closer connection between the Federal Reserve Bank and the Bank of England, was that the Federal Reserve Bank was a newcomer to the central bank organizations of the world, and that in order to enable it to take its place, it wanted to have close touch with all the central banks everywhere, and the Bank of England was the chief of the central banks, and that is the one I wanted them to begin with.

Mr. Brown. If I might have an opinion on the subject, Mr. Morgan, I would entirely agree with you. The only question which occurs to my mind on that is the propriety of doing it at the time when Great Britain was a belligerent and the United States was neutral.

Mr. Morgan. At that time they were in touch with the State Department. If the State Department authorized it, it was all right.

---

[1] See "Exhibit No. 2453", appendix, p. 8428.

Mr. **Brown**. I would also judge that the State Department's action in delaying a decision until after the election indicated, as the letter says, the preelection fear of "rocking the boat."

Mr. **Morgan**. About that, I do not think that is a matter on which I should concern myself at all. If they took the correct attitude and asked the State Department whether that would be permitted, and the State Department said "Yes", that was "Yes." I would not go further as to what the State Department's reason for making any decision was.

Mr. **Brown**. In the final conclusion of this, to show the connection of J. P. Morgan & Co. with this transaction, I offer for the record a telegram dated December 27, 1916.

Mr. **Morgan**. December 27, 1916?

Mr. **Brown**. Yes, sir; from E. C. Grenfell to J. P. Morgan, no. 28575.

Mr. **Whitney**. What date did you say, Mr. Brown?

Mr. **Brown**. December 27, 1916.

Mr. **Morgan**. To Grenfell; yes, sir.

Mr. **Brown**. That is offered for the record.

(The document referred to was marked "Exhibit No. 2492" and appears in full in the text.)

Mr. **Brown**. That cable reads as follows:

> 28575. For J. P. Morgan. Some prominence given in our newspapers today to announcement by Federal Reserve Bank of New York City.
>
> We presume this is a result of conversation we had with Ben Strong, Jr., year ago, and the announcement at this juncture shows friendly feeling. We should be glad of any comment you have to make. E. C. **Grenfell**.

Mr. **Brown**. Then, I offer for the record a telegram dated December 27, 1916, for E. C. Grenfell, from J. P. Morgan, no. 33815.

(The document referred to was marked "Exhibit No. 2493" and is included in the appendix on p. 8454.)

Mr. **Brown**. That telegram reads, in part, as follows:

> You will have seen that the Federal Reserve Board yesterday published the authority for the Federal Reserve Bank of New York to make an arrangement with the Bank of England. This is simply the formal statement of authority * * *.

I do not think the rest of the cable needs to be read. I offer it for the record.

Mr. **Morgan**. It is worth-while reading, is it not? [Examining cablegram.] I do not know whether it is.

Mr. **Brown**. I offer for the record a cable of December 28, 1916, to J. P. Morgan from Morgan in London, no. 28581.

(The document referred to was marked "Exhibit No. 2494" and is included in the appendix on p. 8455.)

Mr. **Brown**. I offer for the record a number of documents which show that this transaction, the first purpose of this arrangement, was to earmark gold in the Bank of England to the amount of $52,500,000 for account of the Federal Reserve Bank of New York in exchange for which or on account of which the Federal Reserve Bank of New York paid off the British bank credit of November 1915.

The subsequent story of how that gold was released from earmark will come up at another time.[1]

That is all.

(The documents referred to were marked "Exhibits Nos. 2495 to 2501", inclusive, and are included in the appendix on pp. 8455 to 8457.)

The CHAIRMAN. In continuation of the hearings, it is now essential that Senator Clark be present. He has been delayed for a few minutes, and for a short time the committee will be obliged to be in recess. As soon as he returns we shall proceed. The committee is in recess until called.

(Thereupon, at 10:45 a. m., a recess was taken, after which the proceedings were resumed as follows:)

The CHAIRMAN. Senator Clark is detained in the Finance Committee, where the bonus matter is pending, and it seems desirable that the committee recess at this time until 2 o'clock this afternoon.

(Thereupon, at 11:30 a. m., the committee took a recess until 2 o'clock p. m. of the same day.)

AFTER RECESS

(The hearing was resumed at 2 p. m.)

FURTHER TESTIMONY OF J. P. MORGAN, THOMAS W. LAMONT, AND GEORGE WHITNEY

NEUTRALITY—DIPLOMATIC CORRESPONDENCE 1914–1917[2]

The CHAIRMAN. The Committee will be in order.

At this time, the Committee, under the leadership of Senator Clark, is to proceed upon an avenue that may seem to the witnesses to be somewhat removed from the study that has been under way the past week. However, the Committee feels that it will be quickly revealed to the witnesses and to others who may be interested, that this immediate study is one having to do in a decided way with our neutrality of other days, as it may indicate what will need be the case if we will avoid certain experiences of other times.

It is altogether probable that Senator Clark will not be directing questions to the witnesses this afternoon. Yet, I am sure, from what he has said, that he will expect the witnesses to interrupt, if there are things said or entered into the record which you may feel are requiring any enlargement or any explanation whatsoever.

But, except for that, you may, if you wish, understand yourselves to be excused during the afternoon. Yet, I am sure that you are going to find the study that will be laid out before you quite interesting, in light of the general interest in this larger subject.

All right, Senator Clark.

Senator CLARK. Mr. Chairman, it is my purpose to offer for the record this afternoon certain documents as exhibits, some of which have been heretofore published, and many of which have not, with simply enough explanatory matter to connect up.

---

[1] Partly against sterling furnished the American Army and Navy. See "Exhibits Nos. 3879 to 3882", Hearings, Part XXXI.

[2] Discussed further in Hearings, Part XXVIII, p. 8487 et seq. See also "Exhibit No. 4115", Hearings, Part XXXII.

It would be my suggestion that I proceed along that line, and at the conclusion of that study I would be very glad to have any of the witnesses, or anybody else who desires, to express any opinion they desire to.

I believe time will be conserved by putting in these documents with as brief connection as may be.

The first thing I want to do, Mr. Chairman, is this: I am going to take the trouble to read it, although it is rather long, in view of the fact that Mr. Lamont, on behalf of J. P. Morgan & Co. put in a chronological table here having to do with our neutrality during the war; and the first thing I desire to do is to put in a chronological table which has been prepared by the Committee staff under the direction of the Committee, which represents the essential events of the war, from the standpoint of the Committee's study.

As I say, I am not going to take any more time than is necessary, but desire to read this in full:

TIME TABLE OF EVENTS PERTINENT TO THIS STUDY

(August 1914–May 1917)

August 6, 1914.—United States Government attempted to get belligerents to agree to apply provisions of Declaration of London in their naval warfare during the war in order to avoid difficulties which might arise as to relations between belligerents and neutrals.

August 10 and 13, 1914.—Germany and Austria-Hungary agree to abide by rules of Declaration of London provided other belligerents do likewise.

August 15, 1914.—Public circular issued by Department of State regarding neutrality which said in part, "This right to continue to trade with belligerents is upheld by the well-recognized principles of international law."

August 15, 1914.—Department of State announced loans to belligerent nations would be inconsistent with the true spirit of neutrality.

August 22, 1914.—Britain agreed to abide by the Declaration of London with a few modifications. These modifications left her free, virtually, to throttle commerce with Germany.

October 22, 1914.—United States finally gave up effort to get Britain to accept Declaration of London without modifications and decided to reserve its rights under the existing rules of international law.

October 23, 1914.—In a private conversation with Lansing, then Acting Secretary of State, Wilson made a distinction between loans and credits and told Lansing he could convey this information to the appropriate parties but as his own idea, not Wilson's. Lansing conveyed it to Willard Straight, of J. P. Morgan & Co., and R. L. Farnham, of National City Bank.

October 30, 1914.—National City Bank extended a credit of $10,000,000 to France for purchase of war materials.

November 3, 1914.—Britain gave "notice that the whole of the North Sea must be considered a military area", and warned all merchant ships of danger to them in that area unless they proceeded in strict accordance with Admiralty directions.

December 6, 1914.—Working arrangement between United States and Great Britain under negotiation, by which Britain agreed to permit exportation from Britain and her colonies to the United States of rubber, hides, jute, wool, plumbago, manganese, tungsten, etc., on the assurance that neither these nor any article manufactured from them would be sold to enemy countries or even to neutrals from whom Britain had not secured satisfactory guaranties against reexportation of such articles. These articles which Britain had embargoed were absolutely necessary to American manufacturers in order to fill their war orders. Resulting agreements were concluded early in 1915 with practical effect of subjecting the foreign trade of American manufacturers, who needed such raw materials, to British control.

December 7, 1914.—Senator Hitchcock introduced a resolution to prohibit exportation by private firms of munitions to belligerents.

December 14, 1914.—Department of State cabled Page that administration did not support Hitchcock resolution.

December 26, 1914.—United States sent general note of protest to Britain against the illegal seizures and detentions of American cargoes destined to neutral ports.

January 7, 1915, and February 10, 1915.—Britain replied to United States protest of December 26. 1914, refuting American contentions.

January 20, 1915.—Secretary of State wrote to Senator Stone, chairman of Senate Foreign Relations Committee, in reply to Stone's request for information regarding the loan policy of this Government, both as to general loans and credits loans. Department of State did not inform Stone of distinction made between loans and credits on October 24, 1914, and communicated to the appropriate bankers.

February 4, 1915.—Germany declared English Channel and waters surrounding Great Britain and Ireland a war zone and warned neutral vessels of dangers within this zone; proclaimed submarine warfare in this area in retaliation against Britain's illegal interference with trade between neutrals and Germany.

February 10, 1915.—United States Government announced it would hold Germany to strict accountability for acts of naval commanders in Germany's announced war zone.

March 1, 1915.—British and French declarations prohibiting all trade with Germany—in effect a blockade.

March 5, 1915.—Note from British Foreign Office accompanying British order in council of March 11, 1915, notified United States of establishment of so-called "blockade" of German ports.

March 30, 1915.—United States Government protested to British against its illegal blockade measures.

March 30, 1915.—J. P. Morgan & Co., National City Bank, First National Bank, informed Secretary of State they were arranging a $50,000,000 credit for France.

March 31, 1915.—State Department announced publicly that Government could not interpose objections to credit arrangements but had neither approved nor disapproved these.

April 4, 1915.—German Government pointed out to United States the practical unneutrality of the one-sided traffic in arms and munitions with the Allies.

April 21, 1915.—United States Government replied to Germany that any change such as the placing of an embargo on arms would be a change of its own laws of neutrality during the progress of a war and would in itself be a violation of the neutrality of the United States. This is constantly repeated subsequently.

May 7, 1915.—The *Lusitania*, a British liner, carrying almost wholly a contraband cargo, was torpedoed and sunk by a German submarine without warning and with a loss of 124 American lives.

May 8, 1915.—Ambassador Page cabled from London news of secret agreement on basis of which Italy would enter the war.

May 13, 1915.—United States called upon German Government to discontinue submarine attacks against merchantmen, to disavow act of submarine commander, and make reparations.

May 28, 1915.—German Government pointed out it was acting in self-defense against the British method of warfare and asked American Government to consider the realities of the situation—arming of merchantment, etc.

June 8, 1915.—Bryan, Secretary of State, resigned. He thought the second *Lusitania* note to Germany too harsh and wanted this country to warn Americans against traveling on belligerent ships or with cargoes of ammunition, to which Wilson could not agree.

June 9, 1915.—United States again called German Government's attention to its gross responsibility in the *Lusitania* tragedy and renewed the representation in its May 15 note.

July 8, 1915.—German Government said "that American ships will not be hindered in the prosecution of legitimate shipping, and the lives of American citizens on neutral vessels shall not be placed in jeopardy." Repeated that all distinctions between merchantmen and war vessels had been wiped out by the order to British merchantmen to arm themselves and to ram submarines.

July 21, 1915.—United States asked German Government again for a disavowal of "wanton acts of its naval commander in sinking the *Lusitania.*"

July 28, 1915.—Conference of Colonel House, Governor Strong, of Federal Reserve Bank of New York, and Delano, Vice Governor of Federal Reserve Board, on Federal Reserve Board action to broaden its basis of credits to help finance allied purchases of war materials and supplies in the United States.

August 3, 1915.—Conference between House and Hamlin, Governor of Federal Reserve Board, with regard to the necessity of the Board's liberalizing its acceptance regulations to broaden credit facilities.

August 19, 1915.—The British liner *Arabic* torpedoed and sunk without warning and with loss of American lives.

August 21, 1915.—Secretary of the Treasury McAdoo wrote Wilson at length pleading for a change in this Government's policy toward loans in order to permit the flotation of a large allied loan.

September 6, 1915.—Lansing wrote Wilson that this Government's early announced policy that loans were inconsistent with true spirit of neutrality must be changed in view of need for financing large-scale Allied purchases in the United States.

September 11, 1915.—McAdoo wrote Lansing requesting his help to make Anglo-French mission of bankers to negotiate a loan in the United States a success.

October 1915.—Flotation of Anglo-French loan of $500,000,000 by syndicate headed by J. P. Morgan & Co.

October 5, 1915.—German Government told United States that attack by submarine on *Arabic* was contrary to the instructions issued to commanders not to attack passenger liners without warning, etc.; that the Government disavowed the act, regretted the loss of life, and was prepared to pay an indemnity. Also said orders issued to submarine commanders would prevent the recurrence of similar incidents.

October 21, 1915.—United States Government sent another formal protest to Britain against illegal interference with neutral ships and cargoes; declared the blockade of Germany ineffective, illegal, and indefensible.

January 2, 1916.—Lansing wrote Wilson that in view of impossibility of a submarine communicating with an armed merchant ship without exposing itself to the gunfire of the armed merchantman, United States should warn merchant vessels to refrain from carrying an armament, otherwise they would be treated as vessels of war.

January 18, 1916.—United States proposal to Allies of "a modus vivendi for the observance of rules of international law and principles of humanity by submarines and the discontinuance of armament of merchant ships."

February 22 and 25, 1916.—Resolutions introduced in Congress by Representative McLemore and Senator Gore designed to warn Americans against traveling on armed belligerent vessels.

February 22, 1916.—House-Grey agreement providing, under certain circumstances, for American intervention in the war on the side of the Allies.

February 24, 1916.—Wilson letter to Senator Stone, chairman of Senate Foreign Relations Committee, killing the Gore-McLemore movement.

March 23, 1916.—Rejection by Allies of United States modus vivendi of January 18, 1916, regarding armed merchantmen and submarine warfare.

March 24, 1916.—Channel steamer *Sussex*, with Americans on board, torpedoed without warning.

April 13, 1916.—Britain announced she would no longer consider any distinction between absolute and conditional contraband.

April 18, 1916.—United States note to Germany declared that diplomatic relations would be severed unless Germany abandoned her methods of submarine warfare.

April 24, 1916.—Britain replied to United States protest of October 21, 1915, rejecting the American contention and setting forth a general justification of the British interference with neutral trade on the basis of new conditions Britain had to meet.

May 4, 1916.—Germany accepted conditions of American note of April 18 regarding submarine warfare. Pointed out, in effect, that if the United States did nothing effective to force Britain to observe international law Germany might have to revert to her submarine warfare.

May 24, 1916.—United States protested against illegal seizure by British and French of mail between neutral countries.

July 18, 1916.—British Government proclamation blacklisting 85 American firms.

July 23, 1916.—Wilson wrote House of his irritation with the British, and that he was seriously considering asking Congress to authorize him to prohibit loans and restrict exportations to the Allies.

August 1, 1916.—$100,000,000 French Republic loan floated in United States.

September 1, 1916.—$250,000,000 United Kingdom loan floated here.

September 7 and 9, 1916.—Congress approved legislation empowering the President to employ retaliatory action against British interference with our neutral trade.

October 7, 1916.—Acting Ambassador Grew in Berlin cabled Zimmerman statement that resumption of submarine warfare as a political issue would never be ended until the United States should bring pressure on England to abandon the blockade.

October 23, 1916.—A report from the Secretary of Commerce on most effective use of the retaliatory legislation advised against its use on the ground that it would prove too injurious to American trade.

November 1, 1916.—$300,000,000 United Kingdom loan floated here.

November 18, 1916.—Interview of H. P. Davison, of J. P. Morgan & Co., with President Wilson regarding proposed flotation by Morgans of British Treasury bills.

November 24, 1916.—Wilson advised against a loan to Germany under consideration at Kuhn, Loeb & Co.

November 29, 1916.—Federal Reserve Board statement, warning banks and investors against investing in foreign treasury bills. The warning was inspired by Wilson.

December 5 and 7, 1916.—Davison, of J. P. Morgan & Co., cabled Grenfell, of Morgan, Grenfell (London), of his fears regarding further financing of the Allies.

December 12, 1916.—Germany made a peace move.

December 18, 1916.—Wilson suggested that the belligerents communicate their terms of peace.

December 30, 1916.—The Allies rejected the German offer.

January 10, 1917.—The Allies replied jointly to Wilson's note denouncing again the German crimes and setting forth peace terms that would make possible the attainment of their own interests and would be acceptable only to a completely defeated Germany.

January 22, 1917.—Ambassador T. N. Page, in Italy, wrote Lansing and Wilson regarding the secret treaties between Russia and the other Allies.

January 31, 1917.—Germany announced resumption of unrestricted submarine warfare.

February 1, 1917.—$250,000,000 United Kingdom loan floated here.

February 3, 1917.—United States severed diplomatic relations with Germany.

March 5, 1917.—Ambassador Page in London cabled regarding the acute condition of British credit and allied finances and the need for help from the United States.

April 1, 1917.—$100,000,000 French Republic loan floated in the United States.

April 6, 1917.—United States declared a state of war with Germany.

April 30, 1917.—Balfour, British Foreign Secretary, informed Wilson specifically of the terms of the Allies' secret treaties.

May 6, 1917.—Lansing and Balfour discussed the secret treaties.

May 18, 1917.—Balfour transmitted to Lansing a statement on British foreign policy which discussed terms of peace to which Britain was committed by the secret treaties.

Mr. Stenographer, I will put in these exhibits in the order in which I have them numbered today, starting with no. 1, and for my own convenience I desire to have them carried that way today, and you can number them in accord with the general hearings later.

ATTEMPTS BY THE UNITED STATES TO PROTECT NEUTRAL TRADE [1]

Senator CLARK. On August 6, 1914, Secretary of State Bryan wrote to Ambassador Page at London to ask the British Government whether they would agree that the laws of naval warfare, laid down by the Declaration of London in 1909, should be applicable to naval warfare during the then European conflict, providing that Great Britain's enemies also agreed to such an application.

---

[1] See also "Exhibits Nos. 3846 through 3863", Hearings, Part XXXI.

It will be remembered that these rules of naval warfare had been agreed upon by all the principal nations of the earth at the London conference in 1909.

The document, that is, the Declaration of London, represented general agreement on the part of the leading nations with regard to rules regarding naval warfare, setting forth lists of contraband, rules governing search and seizure of cargoes and other details of naval warfare.

It had been signed by the delegates of the leading nations, but remained inoperative due to the fact that the British Government had refused to ratify it.

Its adoption by the belligerent nations at the outbreak of the war in 1914 would have insured respect for neutral rights and probably a minimum of interference with United States commerce.

Germany and Austria-Hungary were ready to accept it, as they clearly indicated, realizing, of course, any guarantees to neutral trade a safeguard to them against interruption of essential implements into those central kingdoms.

England, however, was not disposed to accept any document that would have interfered with her aims and ability, keeping always in mind her naval superiority, to prevent any goods from reaching the Central Powers that would have been of any use whatever to them in their conduct of the war.

I think that statement is without dispute. That was the clearly expressed intention of all the powers.

Great Britain announced her willingness to adopt the declaration, with what was referred to as some drafting of modifications, but which any dispassionate consideration will show virtually left her free to use her superior sea power to absolutely isolate Germany.

The natural result of England's policy and of England's actions, without any criticism one way or the other, was to dry up trade between the United States and Germany and the United States and Austria-Hungary, to control our trade with the northern neutrals, Holland, Denmark, Norway, and Sweden, and to tie up our commerce irretrievably with the Allied cause.

At this point I desire to offer exhibit 1, being a cablegram from the Secretary of State, Bryan, to the British Ambassador, Page, in Great Britain, dated Washington, August 6, 1914, 1 p. m. [reading]:

> You are instructed to inquire of the British Government whether they are willing to agree that the laws of naval warfare laid down by the Declaration of London 1909, shall be applicable to naval warfare during the present European conflict, provided that the governments with whom Great Britain is or may be at war also agree to such application. You will further state that this Government believes that acceptance of these laws by the belligerents would prevent grave misunderstandings which may arise as to the relations between belligerent and neutral powers. It, therefore, earnestly hopes that this inquiry may receive favorable consideration.

(The document referred to was marked "Exhibit No. 2502" and is included in the appendix on p. 8458.)

Senator **Clark**. Then I desire to offer as exhibit 2, a document prepared by Carlton Savage, of the Division of Research and Publication of the State Department, setting forth the essentials of the Declaration of London. It is not necessary to read it in detail. It covers the essentials as to blockade and search and seizure.

(The document referred to was marked "Exhibit No. 2503" and is included in the appendix on p. 8458.)

Senator CLARK. I also desire to offer in evidence, exhibit 3, which is a report from Almeric Fitzroy for the American Ambassador, from London, to the Department of State, undated, but received at the Department of State on August 26, 1914, setting forth the decision of the British in council as to the Declaration of London, in which they indicate, as I have said, that they are willing to adopt the Declaration of London with certain modifications, which practically left the British Government unrestricted in regard to search and seizure and blockade; and pointing out that the developments in modern warfare had made practically any article of human consumption eligible as contraband.

In other words, the British at that time—and I will not take the trouble to read this rather long communication but I will put it in the record—insisted that the developments of modern warfare had changed the former rules of international law both in regard to blockade, in regard to search and seizure, and in regard to absolute and conditional contraband.

(The document referred to was marked "Exhibit No. 2504" and is included in the appendix on p. 8459.)

Senator CLARK. Then from time to time, Great Britain proceeded to extend this contraband list which they had set up in the note which I have just read, and Great Britain's application of the doctrine of ultimate consumption, which was a new doctrine in international law, which was aimed at the prevention of the transshipment of goods imported by the northern neutrals into Germany, led to veritable floods of protest from American manufacturers and shippers against interference with our neutral trade.

Then in October and November 1914, the British Government placed embargoes on the exportation from Great Britain and its colonies, as they had a perfect right to do, of rubber, wool, hides, jute, plumbago, manganese, ferromanganese, chrome, tungsten ore, and other ingredients of steel which were absolutely essential for manufacturing interests in the United States who depend on British colonies for their sources of supply in those materials.

This was immediately followed by a protest from American rubber, steel, and wool interests, which led Secretary Bryan to wire Ambassador Page on November 12, 1914:[1]

> It would not seem to the commercial or other interests of Great Britain to pursue a policy which would cripple American manufacturers and depress British interests in the colonies. If American manufacturers are not to obtain necessary supplies, prices of American goods which British may desire will be greatly increased, if, indeed the exportations from this country be not ultimately prevented.

Then a little later the Secretary says [reading]:[2]

> Department will consider reasonable arrangement by American exporters to secure against reexportation from United States to enemy countries of British Government.

---

[1] See "Exhibit No. 2508", appendix, p. 8463.

[2] Ibid.

The result of it was working arrangements which resulted between the British Government and American manufacturers, whereby the British Government agreed to permit the exportation to the United States of the articles mentioned above and other articles, on being assured that such articles would not be reexported from the United States in crude or manufactured form to countries at war with Great Britain or to neutral European countries from which Great Britain had not secured satisfactory guarantees against the reexportation of such articles.

In working out the general plan for these arrangements, the British managed also to gain "our at least negative support of their demand that cargoes, especially of copper, shall be consigned to some definite consignee and not to the shipper nor to order."

These agreements went into effect in the early months of 1915, and they had the practical effect of subjecting the foreign trade of American manufacturers who needed the raw materials obtained from allied countries, to British control.

It is to be particularly noted in connection with these agreements that the British Government insisted not only on restricting the exports of any articles manufactured from the raw materials imported from the British Empire to such countries as they might designate or approve, but they also managed by their partial control of the sources of this raw material, by wielding that club, to compel American manufacturers who were dealing with them to agree not to export any articles to any except approved countries, no matter where the raw material had been obtained.

In other words, the British not only controlled articles manufactured from the raw materials obtained in the British Empire, but also controlled and exercised the right to control the shipment of manufactures from any raw materials, wherever obtained.

I now desire to offer exhibit 4, being the proposed working agreement with Great Britain, F. R. 1914, supplement pages 356, 357, 358, being a telegram from the American Embassy, London, dated December 6, 1914, 7 p. m., to the Secretary of State.

It is a very long telegram and I will just read one paragraph which seems to be pertinent.

(The document referred to was marked "Exhibit No. 2505" and is included in the appendix on p. 8461.)

Senator CLARK (reading):

> Should the Government of the United States find itself able to act on the lines herein described, the British Government will gladly negotiate for the grant of permits for the exportation from Great Britain and its colonies to the United States, of rubber, hides, jute, plumbago, manganese, ferromanganese, chrome, tungsten ore, and other ingredients of steel, on receiving assurances that these articles will not be reexported from the United States in their waste, crude, or raw form, and that bloom or ingots of steel and manufactured rubber and leather articles (to be limited to a specific list), will not be exported to countries at war with Great Britain or to neutral European countries from which Great Britain has not secured satisfactory guarantees against reexportation of such articles. This limitation would not, however, interfere with exportation of any of these articles to Great Britain for distribution from there to neutral countries under the limitations imposed by British law.
>
> Effect would be given to these proposals by granting licenses to the agents in Great Britain of American steel, rubber, and leather trades; such licenses to contain stipulations and provide for necessary securities. The British Gov-

ernment has already been in communication with trade representatives and finds that such a scheme is feasible and would be satisfactory to them.

The remarks made at the beginning of this memorandum as to the good offices of the American Government would apply equally to the arrangements made in respect of all the articles that become the subject of license to export to America, and which are not to be reexported.

As soon as the British Government hear that the arrangements herein proposed are acceptable to the United States Government, British officials will be instructed to interview applicants for licenses and to grant permits without delay.

I also offer exhibit 4A, being a telegram from the Department of State, signed by Bryan, dated December 9, 1914, to Ambassador Page.

(The document referred to was marked "Exhibit No. 2506" and appears in full in the text.)

Senator **Clark** (reading):

Your 1199, December 6, 7 p. m., is receiving consideration. So far there does not appear any insurmountable obstacle to a common undertaking for a working basis along the lines outlined in the memorandum, the text of which you quote. Meanwhile, Department thinks it important that a note in the sense of Department's no. 683 (680), December 3, should be presented to the Foreign Office. Department hopes to be able soon to make some definite response to the proposed general arrangement.

I also offer exhibit 5, which is sundry telegrams from Secretary Lansing to the Ambassador to Great Britain, covering protests against the British embargo.

(The documents referred to were marked "Exhibit No. 2507" and are included in the appendix on p. 8463.)

Senator **Clark**. I also offer exhibit 6, sundry similar telegrams having to do with the rubber and hides, steel, and other industries, concluding with the telegram of December 2, from Secretary Bryan to Ambassador Page.

(The documents referred to were marked "Exhibit No. 2508" and are included in the appendix on p. 8463.)

Senator **Clark** (reading):

Your November 17, 1908. American interests are greatly exercised over embargoes.

Importers declare their willingness to give guarantees against re-exportation. Situation is urgent and you will urge the British Government to submit proposals for arrangement which will result in so lifting embargoes as to permit export to United States in quantities sufficient for needs of our manufacturers.

Senator **Clark**. I also offer exhibit 7, a telegram from Secretary Bryan, dated December 23, 1914, to Ambassador Page in Great Britain [reading "Exhibit No. 2509"]:

819. Representatives rubber interests furnish Department with form of guaranty they will give where license to export plantation rubber is granted by British Government, guaranteeing, in case of manufacturers of rubber goods, that they will not, during embargo, directly or indirectly export or procure exportation waste or crude rubber to any county at war with Great Britain or neutral European countries which have not given satisfactory assurances against reexportation of waste or crude rubber and manufactured products thereof listed by Great Britain as absolute or conditional contraband. In cases of importers and dealers in rubber, guaranties additional to the above against sale of rubber or manufactured rubber products to any person or concern who has not given guaranty in foregoing form. Department hopes British Government will modify existing embargo to permit American importers obtain needed supply crude rubber from British colonies.

Two-thousand-and-odd tons rubber purchased and paid for by American concerns now held London and Liverpool. Department understands informally British Embassy here is conferring with home Government respecting releasing this rubber. While this would not relieve situation, it would help materially.

(The document referred to was marked "Exhibit No. 2509" and appears in full in the text.)

Senator CLARK. I also offer exhibit 8, which is the form of agreement to be signed by importers of rubber from British dominions and by manufacturers to whom such rubber is sold.

(The document referred to was marked "Exhibit No. 2510" and is included in the appendix on p. 8464.)

Senator CLARK. I also offer exhibit 9, a letter from the British Secretary of State for Foreign Affairs, Sir Edward Grey, to the American Ambassador, Mr. Page [reading]:

Sir E. Grey presents his compliments to the United States Ambassador and in reply to His Excellency's note of the 22d ultimo relative to the issue of licenses for the supply of manganese to the United States Steel Products Co. has the honor to inform His Excellency that his note of December 12 last stating that further licenses would not be issued was based on information received from reliable sources that the three companies mentioned in that note had exported manganese either directly or indirectly to Germany during the latter part of last year. In view of the paramount necessity, for military reasons, of preventing as far as possible the importation of manganese into Germany, it was therefore considered necessary to restrict the issue of licenses.

In view, however, of Mr. Page's note under reply, Sir E. Grey is happy to state that no difficulty will ensue in future with regard to the supply of ferromanganese to the United States Steel Products Co. or the Carnegie Steel Corporation, subject, of course, to the requirements of this country, if these companies respectively will sign the guarantee forms which have now been prepared for shipments of ferro-manganese to the United States in each case in which permission is required.

A copy of the guarantee form in question is enclosed for His Excellency's information.

Then follows a copy of the form.

(The document referred to was marked "Exhibit No. 2511" and is included in the appendix on p. 8465.)

Senator CLARK. I offer also exhibit 10, being a telegram from the Secretary of State to the British Ambassador, Sir Cecil Spring-Rice, dated January 20, 1915.

(The document referred to was marked "Exhibit No. 2512" and appears in full in the text.)

Senator CLARK (reading "Exhibit No. 2512"):

EXCELLENCY: Having reference to your note of January 8, for the receipt of which I have to thank you, relative to the removal of the British embargo on British rubber:

Your Excellency states that manufacturers desiring to obtain supplies of rubber from the British Empire will be required to enter into an undertaking not to export any raw, waste, or reclaimed rubber except to the United Kingdom or British possessions; not to sell rubber now delivered but to use it in their own factories; to execute orders for manufactured goods from neutral European countries from stocks in the United Kingdom; not to sell manufactured goods to any person in the United States without first ascertaining that he has no intention to export same to Europe except through the United Kingdom and to give notice to His Majesty's Consul General of shipment to non-European countries and to put a distinctive mark on all manufactured goods exported or sold for export. The question has arisen whether this proposed undertaking would comprehend the use and disposition of rubber obtained in countries other than British territories. While I am inclined to the view that the proposed guarantee is intended only to apply to rubber obtained from the United Kingdom or British possessions and to products manufactured therefrom, I will be pleased to have you inform me particularly on this point.

Then the British Ambassador replied on February 3, 1915, to Secretary Bryan.

(The document referred to was marked "Exhibit No. 2513" and appears in full in the text.)

Senator CLARK (reading):

> SIR: I have the honor to acknowledge the receipt of your note, no. 626, of the 20th ultimo, in which you inquire as to the scope of the undertaking which is required to be executed by manufacturers desiring to obtain supplies of rubber from the British Empire.
>
> I have the honor to state in reply to this inquiry that, so far as regards the exportation of raw, waste, and reclaimed rubber, and the exportation of manufactured or partly manufactured rubber goods, the undertaking comprehends the use and disposition of rubber obtained from countries other than the United Kingdom or British possessions and to the sale in the United States of goods manufactured therein.

In other words, the British, by this agreement, asserted and obtained control over the manufacturers of countries which imported anything from the British Empire, even as to their own domestic trade.

The CHAIRMAN. Senator Clark, did it not do more than that? Did it not give at once to American manufacturers a direct interest in the success of the Allies in the cause in which they were engaged?

Senator CLARK. I think that is unquestionably true, inasmuch as they could deal with anybody only with the permission of the British Empire.

They could not deal with any neutral country without permission of the British authorities. They could not even deal with domestic concerns in this country in intra- or interstate commerce within the boundaries of the United States without permission of the British Government.

Naturally it gave them an identity of interest.

Interference with American trade with neutral countries brought in so much protest to the Department of State that on September 26, 1914, it sent to the British Government a protest against the seizures and detention of American cargoes destined to neutral ports.

The American Government in that note did not take issue with the central point of British policy, keeping from Germany all materials capable of military use. The essential part of that note, as I see it, was as follows:

> That this Government is reluctantly forced to the conclusion that the present policy of His Majesty's Government toward neutral ships and cargoes exceeds the manifest necessity of a belligerent and constitutes restrictions upon the rights of American citizens on the high seas, which are not justified by the rules of international law or required under the principle of self-preservation.

Then the note goes on [reading]:

> The greater freedom from detention and seizure which was confidently expected to result from consigning shipments to definite consignees rather than "to order" is still awaited * * *.
>
> Not only is the situation a critical one to the commercial interests of the United States, but many of the great industries of this country are suffering because their products are denied long-established markets in European countries which, though neutral, are contiguous to the nations at war. Producers and exporters, steamship and insurance companies are pressing, and not with-

out reason, for relief from the menace to trans-Atlantic trade which is gradually but surely destroying their business and threatening them with financial disaster.

That was the note of September 26, 1914, to the British Government.

To this note the British countered by quoting statistics which showed an increase of American exports to the neutral countries as well as setting forth in their second lengthy note what they considered to be precedents from the American Civil War for every action complained of by the United States.

On October 21, 1915, the United States addressed a lengthy note of protest to Great Britain, contesting the legality of interferences with neutral ships and cargoes and particularly denouncing the so-called "blockade" measures imposed by the British order in council of March 11, 1915, which the American Government contended to be an absolute and violent contravention of international laws established at that time.

This American note of protest contained some rather strong language. I quote:[1]

> I believe it has been conclusively shown that the methods sought to be employed by Great Britain to obtain and use evidence of enemy destination of cargoes bound for neutral ports, and to impose a contraband character upon such cargoes, are without justification; that the blockade, upon which such methods are partly founded, is ineffective, illegal, and indefensible; that the judicial procedure offered as a means of reparation for an international injury is inherently defective for the purpose; and that in many cases jurisdiction is asserted in violation of the law of nations. The United States, therefore, cannot submit to the curtailment of its neutral rights by these measures, which are admittedly retaliatory, and therefore illegal, in conception and in nature, and intended to punish the enemies of Great Britain for alleged illegalities on their part. The United States might not be in a position to object to them if its interests and the interests of all neutrals were unaffected by them, but, being affected, it cannot with complacence suffer further subordination of its rights and interests to the plea that the exceptional geographic position of the enemies of Great Britain require or justify oppressive and illegal practices.

It is perfectly apparent from the record, I think, that the British Government never took the American protest seriously, and that Washington, although stating them very forcibly in various communications, never seriously pressed these protests.

The CHAIRMAN. Is it not fair, in the light of what is now known, to say that the American Government never intended that they should be taken seriously?

Senator CLARK. I think the best evidence of that is the quotation of Secretary Lansing himself, who was in charge of these matters, and wrote these notes.

In his memoirs, at page 23, he summed up very concisely this British-American situation and the policy which he, as the President's chief aide in the conduct of our foreign relations, sought to pursue:

I quote from Secretary Lansing [reading]:

> Many Americans were deeply incensed at the interference of Great Britain with our sea-borne commerce and with the detentions and seizures by British naval ships of American vessels and cargoes destined to neutral ports. Under

---

[1] See 1915 *Supplement of Foreign Relations*, p. 589

the accepted rules of international law these detentions and seizures were illegal and indefensible, as were the lists of contraband issued from time to time by the British Government, which included numerous commodities lacking entirely in the qualities which are usually supposed to impress articles with contraband character. Many more Americans were directly affected by these British practices than were affected by the activities of the German submarines.

Thus, while I was convinced that this country would ultimately become a belligerant because of the peril to the world if autocratic Germany were victor and while my ideas as to foreign policies were based upon this conviction, I, like some other believers in active support of the cause of the Allies, realized that the sensible thing to do was to defer action until, by a gradual process of education and enlightenment, the American people had been brought to a full understanding of the design of the German Government to become overlord of the world.

* * * The notes that were sent (to Britain) were long and exhaustive treaties which opened up new subjects of discussion rather than closing those in controversy. Short and emphatic notes were dangerous. Everything was submerged in verbosity. It was done with a deliberate purpose.

That was several months, more than a year after President Wilson had called on the American people to be neutral in thought as well as deed.

The CHAIRMAN. Further than that, Senator Clark, is it not altogether fair to say that these utterances by Lansing were as of a time when the American public was being led to believe that he as custodian of our neutral policy was truly pursuing a neutral course?

Senator CLARK. I think there can be no possible question about that; I think the uncontradicted record shows that.

The CHAIRMAN. Under, by the way, a discretionary neutrality policy.

Senator CLARK. Yes.

WAR-TIME TRADE IN MUNITIONS AND SUPPLIES [1]

Senator CLARK. Although the American trade with the Allies included all manner of war materials, of which munitions was simply one part, although an extremely important part, the munitions trade as such naturally did more to arouse antagonism between this country and Germany and to sow seeds of hatred than did any other materials of war.

The emotions of the Germans, as well as of a large number of Americans, became excited, naturally enough, over the fact that these munitions were used to kill German soldiers and that these materials of death were being supplied in unlimited quantities to the Allies from the United States, and necessarily Germany and Austria-Hungary were unable to receive any such supplies, because Germany was, of course, cut off from this as well as all other trade from the United States by the Allies superiority on the sea.

On the question of sale of munitions to the belligerents, the Government of the United States took a strictly neutral attitude. I quote from a public circular issued by the Department of State on October 15, 1914. I will insert the whole document in the record, but I will quote only one paragraph at this time. I quote:

In the first place, it should be understood that, generally speaking, a citizen of the United States can sell to a belligerent government or its agent any article of commerce which he pleases. He is not prohibited from doing this by any rule of international law, by any treaty provisions or by any statute of

---

[1] See also "Exhibits Nos. 2156 and 2157", Hearings, Part XXVI, pp. 7941 and 7986.

> the United States. It makes no difference whether the articles sold are exclusively for war purposes, such as firearms, explosives, etc., or are foodstuffs, clothing, horses, etc., for the use of the army or navy of the belligerent.
>
> Furthermore, a neutral government is not compelled by international law, by treaty, or by statute to prevent these sales to a belligerent. Such sales, therefore, by American citizens do not in the least affect the neutrality of the United States.

Then a little further down we find this language [reading]:

> For the Government of the United States itself to sell to a belligerent nation would be an unneutral act, but for a private individual to sell to a belligerent any product of the United States is neither unlawful nor unneutral, nor within the power of the Executive to prevent or control.

Immediately after the outbreak of the war, as has been, I think, already put in the record, trade in all materials which were of use in the conduct of war expanded enormously.

In explosives alone, as a part of the munitions trade, which is here specifically under consideration, the export figures jumped from approximately $10,000,000 on June 30, 1914, to $189,000,000 on June 30, 1915, to $715,000,000 on June 30, 1916.

It is not strange that Germany found it difficult to look upon our policy in this regard as being entirely disinterested and neutral.

Joseph V. Fuller, former chief of the Research Section in the Division of Publications in the Department of State, has pointed out in a very able article:[1]

> Clearly enough, the Germans would not have minded so much the sale of goods clearly contraband of war to the Allies had they themselves been able to obtain freely foodstuffs, cotton, copper, and other materials of debatably contraband character directly or through their neutral neighbors. Conversely, they would not have minded so much the general blockade imposed upon them had it been partly equalized by an American embargo on the shipment of military supplies to their enemies.

On December 4, 1914, Ambassador Gerard telegraphed the Secretary of State from Berlin:

> Universal, very bitter, and increasing feeling in Germany because of reported sale by Americans of munitions of war, etc., to the Allies.

I point this out because as far as any record that I have been able to find discloses, it was at this time that the animosity and friction on the part of Germany and the Central Powers towards the United States developed.

Early in December 1914 Senator Hitchcock, of Nebraska, a leading member of the Senate Committee on Foreign Relations, introduced in the Senate a resolution aimed to prohibit the exportation by private firms of munitions of war to any belligerent.

This caused the British Government some concern. On December 11, 1914, Ambassador Page, from London, telegraphed the Secretary of State:

> Sir Edward Grey unofficially expressed the hope to me that the bill introduced by Mr. Hitchcock in the Senate will not pass, aimed to prohibit the exportation by private firms of munitions of war to any belligerent.

We now have the Secretary of State for Foreign Affairs of the British Government dictating what acts shall be passed by Congress.

The CHAIRMAN. To an American Secretary of State.

Senator CLARK. To an American Secretary of State.

---

[1] *Journal of Modern History*, September, 1934, p. 280.

The CHAIRMAN. Who has since declared that his sympathies were entirely with the British at that stage.

Senator CLARK. He calls attention to the fact that this would be special legislation, passed while war was in progress, making a radical departure from a long-established custom, and that for this reason it would appear an unneutral act toward the belligerents that can profit by it.

To which Mr. Bryan, then Secretary of State, responded on December 14, 1914:

> I have explained to Ambassador Spring-Rice that Mr. Hitchcock did not consult the President or State Department in regard to his resolution. Though from Nebraska, he is not personally friendly to me.

That was the truth, incidentally.

In his memoirs, Lord Grey tells us that the Allies were dependent upon the resources of the United States in order to carry on the war at all or with any chance of success.

Throughout this period Germany found it difficult to reconcile this Government's attitude of strict neturality on this question with its attitude of mild protest against illegal British interferences with American neutral trade.

This is well stated in a note delivered to the Secretary of State by Ambassador Bernstorff on April 4, 1915, on German-American trade and on the question of delivery of arms, in which it is pointed out that since Great Britain had modified the general principles of international law "in a way which arbitrarily stops the commerce of neutral nations with Germany" the German Government had to assume that the United States aquiesced in these violations of international law.

I quote from Von Bernstorff's memorandum:[1]

> Then there is also the attitude of the United States in the question of the exportation of arms. The Imperial Government feels sure that the United States Government will agree that in questions of neutrality it is necessary to take into consideration not only the formal aspect of the case but also the spirit in which the neutrality is carried out.

Then a little later on—

> If it is the will of the American people that there shall be a true neutrality, the United States will find means of preventing this one-sided supply of arms or at least of utilizing it to protect legitimate trade with Germany, especially that in foodstuffs.

The Secretary of State, in his answer to this note, reminded the German Ambassador that[2]—

> In the third place, I note with sincere regret that, in discussing the sale and exportation of arms by citizens of the United States to the enemies of Germany, Your Excellency seems to be under the impression that it was within the choice of the Government of the United States, notwithstanding its professed neutrality and its diligent efforts to maintain it in other particulars, to inhibit this trade and that its failure to do so manifested an unfair attitude toward Germany. This Government holds, as I believe Your Excellency is aware, and as it is constrained to hold in view of the present indisputable doctrines of accepted international law, that any change in its own laws of neutrality during the progress of a war which would affect unequally the relations of the United States with the nations at war would

---

[1] See "Exhibit No. 2514", appendix, p. 8466.
[2] See "Exhibit No. 2515", appendix, p. 8468.

be an unjustifiable departure from the principle of strict neutrality by which it has consistently sought to direct its actions and I respectfully submit that none of the circumstances urged in Your Excellency's memorandum alters the principle involved. The placing of an embargo on the trade in arms at the present time would constitute such a change and be a direct violation of the neutrality of the United States.

Mr. Chairman, I am going to read that last sentence again, in view of its importance in connection with the present controversy as to whether the United States should fix a neutrality policy before the outbreak of a war somewhere else in the world, or after it.

The CHAIRMAN. This is from the letter of the Secretary of State to the German Ambassador, the one dated April 21?

Senator CLARK. Yes [reading]:

This Government holds, as I believe Your Excellency is aware, and as it is constrained to hold in view of the present indisputable doctrines of accepted international law, that any change in its own laws of neutrality during the progress of a war which would affect unequally the relations of the United States with the nations at war would be an unjustifiable departure from the principle of strict neutrality by which it has consistently sought to direct its actions, and I respectfully submit that none of the circumstances urged in Your Excellency's memorandum alters the principle involved. The placing of an embargo on the trade in arms at the present time would constitute such a change and be a direct violation of the neutrality of the United States.

Mr. LAMONT. Is that while Mr. Bryan was Secretary of State or Mr. Lansing?

Senator CLARK. That was Mr. Bryan.

I offer exhibit 12, being the letter of Ambassador von Bernstorff, and exhibit 13, being the answer dated April 21, 1915, from Secretary Bryan; and I desire to offer exhibit 13A, being an article prepared by Prof. Charles Cheney Hyde, submitted to Secretary Lansing, together with a very complimentary note to Secretary Lansing.

I offer this because of the recent testimony of Professor Hyde.

It is a rather long article, which I will offer for the record.

(The documents referred to were marked "Exhibits Nos. 2514 to 2516" inclusive, and are included in the appendix on pp. 8466 to 8469.)

Senator CLARK. Professor Hyde is a well-known authority on international law, who was subsequently solicitor for the Department of State.

I will read merely certain portions of it [reading from "Exhibit No. 2316"]:

Throughout the war the suggestion has come from Germany and Austria-Hungary that if imbued with a spirit of real neutrality the Government of the United States would endeavor to equalize the position of those belligerents with respect to their enemies, by cutting off the access of the allies to its markets, and also possibly by resisting the efforts of Great Britain to cut off food supplies from neutral sources. The response of the United States has been that according to international law as exemplified by the Hague convention above noted a change of rule in the course of the war, favorable to one belligerent and harmful to its enemy, would amount to unneutral conduct.

The only ground justifying a change of the rules expressed in the convention—and one which the convention itself makes note of in its preamble—is the necessity of a neutral power to make the change in order to protect its own rights. As Secretary Lansing has recently said:

Then follows a quotation from Secretary Lansing [continuing reading from "Exhibit No. 2516"]:

That the United States does have the right in case of need for example on grounds of self-defense, to change the rules and to forbid the sale within its territory of arms to belligerent governments, or to prevent the departure from its territory of such arms when sold may prove of inestimable value. Two reasons for the assertion of this right might cause us to exercise it. First, the failure of Great Britain to heed American protests against unlawful restrictions imposed upon American commerce; secondly, belief that the unrestricted exportation of arms to the Allies would cause Germany and Austria-Hungary to take steps both hostile and injurious to the United States.

The most serious aspect of the exportation of arms from the United States today is the magnitude of the business. Its relation to the highest interests of our country cannot be estimated by the experience of neutral states in past wars wherein such activities were on a smaller scale. In probably no war during the past century has the sale of arms to allied belligerent powers attained such vast proportions or threatened to inject so decisive an element into the outcome of the struggle. Purchases and shipments now being made by agents of the Allies are gradually developing to a degree such as to convert them into valuable aids of those belligerents. A portion of the United States is becoming a base of supplies of such magnitude that, unless retarded, the success of armies, possibly the fate of empires, may ultimately rest upon the output of American factories and the exports from American soil. If the part taken by the people of the United States in behalf of the Allies should be deemed by their enemies likely to rob them of the fruits of victory, no effort would be spared to render our people impotent and their aid valueless. It is inconceivable that a powerful state engaged in a war against Russia, France, and England would allow any consideration whatever to deter it from preventing the people of a neutral state, such as our own, from becoming the decisive factor in the struggle. The inhabitants of no neutral state can decide the issues of a war by participation therein, without making their country a party to the conflict. The operation of this principle is believed to be relentless.

Then a little further along Professor Hyde says [reading from "Exhibit No. 2516"]:

It is urged by some that the cause of the Allies is the cause of civilization, and therefore the cause of the United States, that an embargo on arms would mean victory for Germany, defeat for its enemies, and serve to expose the United States itself to ultimate attack whenever the Teutonic Empire turns longing eyes toward the Western Hemisphere. It is contended, therefore, that the United States should furnish all possible aid to Great Britain, France, and Russia, as the best means of weakening a future and probable enemy.

Such advocates commonly assume that active aid by means of American war material can be given to the Allies indefinitely, and to a degree beyond precedent, without necessarily causing the United States to be made a party to the conflict. They ignore the fact that Germany will never permit the people of the United States to become the decisive factor in the war, without stubborn and prolonged resistance. They fail to realize that the elimination of the United States as a base of supplies may be regarded by the Kaiser as vital to Germany as the retention of Alsace or the subjugation of Servia. This grim fact must guide all our reckonings. We cannot in this war turn the scales of victory as we like, because the moment we appear to exert that decisive influence we become ourselves the object of attack, and expose our resources and industries to the danger of destruction. Thus the issue cannot arise whether it is better for the United States on the one hand for the Allies to lose their fight without American aid, or on the other hand for the Allies to win with American aid, even should it drag our country into the war; for as soon as we abandon our neutral status, for whatsoever cause, our impotence becomes apparent, and our assistance insignificant. This fact offers a complete answer to one who urges that the United States should maintain by force the right to supply arms to any belligerent purchaser. The value of that right depends upon the sufferance of the state against whose interests it is exercised. The moment that state, such as Germany, for reasons already observed, becomes our enemy and we oppose force to force, we ourselves expose to destruction the value of what we seek to preserve. It may be observed also that the people of the United States, however willing to fight for certain principles, would hesitate long before fighting for others. Our right as a neutral to sell war material to a belligerent state to enable it to cripple an adversary with which the United States is at peace would never appeal to the American people to a degree such that they would consent to make war for the mere purpose of preserving that commercial privilege.

A little further along, Professor Hyde says:

> It may be urged that under no circumstances could we prevent the sale of supplies to the allied states of Europe without forfeiting their goodwill, and possibly without making them our enemies. It is doubtless true that tremendous pressure would be brought to bear upon the Department of State to prevent any embargo. It will be remembered, however, that the Hague Convention of 1907, above noted, recognizes the right of a neutral to change its policy in the course of a war in order to protect its own rights. Can anyone doubt that to save itself from war with Germany, or to prepare itself from danger of attack, or to secure observance of some violated principle of international law the United States could not reasonably and justly establish such an embargo? It would not be unneutral for the United States, on grounds of self-defense, to prevent its territory from becoming a decisive base of operations of allied belligerent powers. It would not be unneutral, under such circumstances, for the United States to prevent those powers from transforming our Atlantic seaboard into a series of foreign arsenals supplying expeditions against their enemies and our friends.

Then, in the last paragraph of this opinion, Professor Hyde says [reading from "Exhibit No. 2516"]:

> While the exportation of war supplies imposes upon our Government no legal duty of prevention, and while the traffic may not as yet have attained a volume sufficient to produce alarm in Germany, it may, by reason of its increasing proportions and its degree of assistance to nations fighting in alliance, lead us to a position where we may be regarded by their foes as a most dangerous participant and hence as an inevitable enemy. Does it not, therefore, behoove us to be prepared to give the right answer when the time comes, to this final and simple question, which is submitted to your consideration: Is the endeavor to make the resources of the United States win the fight for the Allies worth the price of war with Germany? Or, conversely, is the maintenance of neutrality worth an embargo on munitions of war?

The CHAIRMAN. Then, Senator Clark, there was decided opinion prevalent at that time that the United States could, even while war was on, alter its neutrality policy, was there not?

Senator CLARK. That is perfectly true, from very eminent authority; but the official position of the United States was laid down as an indisputable principle of international law, that the neutrality policy of the United States with regard to the exportation of munitions, or other contraband, could not be altered after the war was in progress without a violation of our neutrality.

The CHAIRMAN. And the administration turned a rather deaf ear to an authority like Mr. Hyde in that hour, did it not?

Senator CLARK. That is apparently true.

It might be pointed out in that connection that, of course, the neutrality policy of the Administration with regard to the loans was apparently changed frequently some time before it was actually announced to the public.

Perhaps the best general résumé of this whole subject is contained in the note to the United States Government from the Austro-Hungarian Government, on June 29, 1915, relative to the shipment of arms and ammunition by citizens of the United States to Great Britain and her Allies, and the reply of the United States Government to that note.

After commenting upon the enormous traffic in munitions of war between the United States and Great Britain while Austria-Hungary and Germany had been absolutely excluded from the American market, the Austro-Hungarian Government wondered whether the attitude of strict neutrality of the American Government did not, under the conditions which had developed during the course of the war, in actuality thwart the very intention to remain strictly neutral, expressed by President Wilson and Secretary Bryan in the early days of the war.

The American reply, which stated most completely and lucidly the attitude of this Government with regard to the munitions trade with the Allies, reiterated the strictly legal ground for this attitude of strict neutrality and refused to admit any of the Austro-Hungarian contentions.

It is worthy of note that prior to the making public of this reply, Secretary Lansing sent the following communication to President Wilson:

THE SECRETARY OF STATE,
Washington, August 2, 1915.

MY DEAR MR. PRESIDENT: In view of the making public of the Austrian statement in regard to the exportation of arms and ammunition, I hasten to send you a draft of reply. I have not had time to review it with the care I should like to give to it.

You will observe in reading it that it is presented in a popular rather than a technical manner because I think it will be more valuable for the public here in the United States than for its effect upon Austria-Hungary.

I hope you can pass upon it speedily because I believe it would, at the present moment, have a very beneficial effect on public opinion. It is our first opportunity to present in a popular way the reasons why we should not restrict the exportation of munitions of war.

So, according to Secretary Lansing, this was more of an appeal to the public than it was an answer to the Austro-Hungarian note [reading]:

If you have noticed in the papers, meetings are being held under various auspices looking to the imposition of an embargo on arms and ammunition. The propaganda is being conducted in various parts of the country and if continued may become very embarrassing.

Faithfully yours,

(Signed) ROBERT LANSING.

To this letter the President replied on August 5, 1915:

MY DEAR MR. SECRETARY: I have gone over this paper very carefully, indeed, and these questions urged themselves upon me:

1. Can this argument not be taken as an argument in sympathy with the Allies and against militarism, which is Germany?
2. Are we not ourselves about to urge the control of the manufacture of arms and munitions by every government in our proposed understandings and undertakings with the Latin American countries; and do we not wish ultimately to strive for the same thing in the final European settlement?

Of course, we are arguing only to the special case, and are absolutely unanswerable in our position that these things cannot be done while a war is in progress as against the parties to it; but how far, do you think, the arguments we urge in this paper will estop us in future deliberations on the peace and security of the world?

Faithfully yours,

(Signed) W. W.

Evidently Germany felt that the United States did not contend for its neutral rights against illegal interference on the part of Britain with the neutral trade of the United States with any considerable force.

There was widespread feeling on the part of many Americans as well as the German Government, that the Allies' interference with what we were asserting as neutral rights might be met by an interference with the duty of allowing them access to American markets.

Either the American Government did not perceive the importance of this bargaining asset, that is, did not perceive the possibility that by insisting upon our neutral rights under a threat of excluding them from American markets, it could have compelled Great Britain to obey international law and recognize our neutral rights, or they ignored it. Lord Grey was, however, far from failing to realize their possibilities, and in his memoirs, as I read the other day, he very clearly emphasized that possibility. I quote again [reading]:[1]

> To return to the question of contraband, blockade of Germany was essential to the victory of the Allies, but the ill will of the United States meant their certain defeat. After Paris had been saved by the Battle of the Marne, the Allies could do no more than hold their own against Germany; sometimes they did not even do that. Germany and Austria were self-supporting in the huge supply of munitions. The Allies soon became dependent for an adequate supply on the United States. If we quarreled with the United States, we could not get that supply. It was better, therefore, to carry on the war without blockade, if need be, than to incur a break with the United States about contraband and thereby deprive the Allies of the resources necessary to carry on the war at all or with any chance of success. The object of diplomacy, therefore, was to secure the maximum of blockade that could be enforced without a rupture with the United States.

This I take to be an explicit declaration by Sir Edward Grey that if the United States had insisted on its contentions as to the rule of blockade and search and seizure, its contention as to the prevailing international law at the moment, England perforce would have been forced to recognize the rights asserted at that time by the United States.

The CHAIRMAN. Lord Grey, of course, had these letters of protest from our State Department during those days. Is it probable that he did not take them seriously?

Senator CLARK. I do not know that Sir Edward Grey is to be blamed for that, when it is in evidence in the memoirs both of Lord Grey and Walter Hines Page one of these notes was delivered to the British Foreign Office by the American Ambassador with the remark, "Now you have read it, how are we going to answer it?" I think the British Secretary would have been rather justified in reading these notes with his tongue in his cheek.

The CHAIRMAN. Secretary Lansing has written that he did not intend that these should be taken seriously. Has there been any evidence indicating that there were any hints or any reasons thrown out to the British that they were not to be taken seriously? If Secretary Lansing in later years was ready to admit that they were not to be taken seriously, is it not altogether probable that the British were given to understand that they were not to be taken seriously?

Senator CLARK. I am unable to say as to Secretary Lansing. Of course, the repeated evidence of Ambassador Page's intervention in the matter, both Ambassador Page's memoirs and Earl Grey's, is that the matter of having the steamer *Dacia* seized by the French Navy instead of the British Navy was actually suggested by the American Ambassador while he was actually delivering a note of protest against the seizure of that ship.

---

[1] Vol. II, *Grey's Memoirs*, p. 103.

This same thing has been recognized by Mr. Ray Stannard Baker, President Wilson's biographer who has possession of his papers, in his most recent volume on Wilson, where he very lucidly and emphatically stated the relationship between tremendous traffic in war materials which so rapidly grew up in the United States and the Allied cause, and the resulting ineffectiveness of the "diplomacy of neutrality."

I quote from Woodrow Wilson, Life and Letters, Neutrality, 1914–15, page 181:

> Thus by the end of the year 1914 the traffic in war materials with the Allies had become deeply entrenched in America's economic organization, and the possibility of keeping out of the war by the diplomacy of neutrality, no matter how skillfully conducted, had reached the vanishing point. By October, perhaps earlier, our case was lost.
>
> While British diplomacy maneuvered with skill to involve American industry and finance in the munitions traffic, it is certain that American business needed no compulsion to take war orders. * * *

A little further on he says:

> However we may repudiate the motive, the intricate business connections with the Allies developed during 1914, 1915, 1916—until the very economic life of the country rested upon the munitions traffic—stimulated a powerful interest in the victory of the Allies. On the other hand, German efforts to break up this relationship, with consequent injury to life and property, tended to provoke our Government to vindication by force. There was a kind of fatality about it all, due on the one hand to the weakness and futility of the political power in such a crisis, with its inadequate legal sanctions, and on the other to the inexorable implications in the realities of a world-encircling economic system.

The CHAIRMAN. Senator Clark, Mr. Baker in his writings has indicated that in his opinion our neutrality cause was lost as early as the fall of 1914. Was there up to this point any question arising by reason of submarine warfare? Had the conduct of Germany with her submarines at that time entered the picture at all?

Senator CLARK. As to whether the Germans were using submarines in the fall of 1914, I am not certain. Certainly there had been no protest, no infringement of American rights by the use of submarines, and no protest on behalf of the American Government to the use of submarines at that time. That is, there had been no loss of life. I am not quite certain in making that statement whether they had used submarines. I am not quite certain, but I believe that they had begun to use submarines to some extent prior to the end of 1914.

The CHAIRMAN. Yes; but there had not been acts by the submarines that challenged international law?

Senator CLARK. There had been no question in international law involved prior to the end of 1914.

The CHAIRMAN. Exactly.

ARMED MERCHANTMEN

Senator CLARK. We come now to the consideration of a matter which is very intimately involved in my mind with the question of submarines. That was the policy of the Allied governments, particularly Great Britain, with regard to the arming of merchant ships, which was contended by the Germans was for offensive purposes as against submarines as well as for defensive purposes, which had been heretofore the practice in international law.

Germany's answer to Britain's control of the high seas, to her alleged illegal blockade measures was the submarine. Of course, we all know that it was this weapon which produced and kept alive the bitter tension between the United States and Germany, and it was submarine warfare which became, eventually, the immediate *casus belli* for the entrance of the United States into the war.

Involved in the submarine controversy were two main issues from the American point of view—the status of armed merchantmen and the right of Americans to travel on belligerent ships carrying contraband of war or munitions of war.

In the German note of July 8, 1915, on the *Lusitania*, Germany contended that her only effective weapon against Britain's paralyzation of Germany's neutral trade was the submarine, and that the submarine could not apply the accepted principles of international law regarding visit and search without exposing itself to attack by merchantmen's so-called "defensive guns"; such merchantmen were in effect armed for offensive purposes and were, therefore, auxiliary cruisers, according to the contention of Germany and of some neutral countries. Nor could she recognize the immunity from submarine attack of enemy ships carrying munitions of war because Americans were present on them.

In other words, just as the British had contended at the beginning of the war that the development of warfare had caused a change in international law as it existed up to that time and made articles contraband which had not hitherto been considered contraband, and had changed the effective rules of blockade and of search and seizure, so the Germans later contended that the development of warfare, particularly the new British contentions as to contraband and as to blockade, had brought into effect and legalized a new weapon, namely, the submarine, which had changed the hitherto existing rules of international law as to visit and search. Each side in effect was claiming that there had been an advance in the methods of warfare which changed the hitherto existing international law on the subject.

The problem of armed merchantmen was admittedly an extremely difficult one.

In the summer of 1915 the German Government pointed out that distinctions between merchantmen and war vessels were no longer true, since British merchantmen had been ordered to arm themselves and also ordered to ram submarines on sight without waiting for an attack.

The problem thus raised began to cause the administration in Washington some very considerable worry. When merchantmen carry arms and sink the submarines that are trying to search them, the question was whether the ships remained merchantmen with all the privileges of such freedom of the seas and access to American ports, or did they become warships subject to regulation as warships on their entrance into American ports and departure from American ports.

On October 2, 1915, Colonel House recorded in his dairy a conversation with Lord Reading, who was at that time in the United States as head of the commission to negotiate the $500,000,000 Anglo-

French loan to which we have referred, in regard to the armed merchantmen issue:

> What the British Government desires is that on the one hand we shall demand of Germany that no merchantman shall be sunk without warning, and on the other hand, that merchantmen shall, as in times gone by, have the right to arm. I mentioned my conference with Lansing on this subject, in which Lansing did most of the arguing, holding that they could not have their cake and eat it too; that it was manifestly unjust to the submarine to give merchantmen warning and then permit them to fire upon the submarine and sink it while she was giving the warning.

I offer exhibit 14, being the complete diary entry from which I have just read a portion, and also the letter of October 4, 1915, from President Wilson to Mr. E. M. House, 115 East Fifty-third Street, New York, in which he says:

> Dear Friend: The idea about a main issue for the campaign next year seems to me a fine one; it is indeed the one that has been vaguely in my own mind for some time. I am to greet the D. A. R. within a week or so; what would you think of my using that occasion, when the natural theme would be patriotism, to develop the idea?
>
> I read the letters from Plunkett and Balfour—

to which House has referred in the diary to which I have just referred—

> with the greatest interest. The matter of armed merchantmen is not so simple as Balfour would make it. It is hardly fair to ask submarine commanders to give warning by summons if, when they approach as near as they must for that purpose they are to be fired upon, as Balfour would evidently have them fired upon. It is a question of many sides and is giving Lansing and me some perplexed moments.

(The document referred to was marked "Exhibit No. 2517" and is included in the appendix on p. 8474.)

Senator Clark. Now, by January 1916, which is right after the sinking of the *Persia*, Secretary Lansing had become sufficiently aroused to the danger on our part of continuing to treat British armed merchantmen purely as commercial vessels to bring the subject directly to the attention of the President, in a letter which presented the problem clearly and comprehensively. I will read the letter in part [reading from "Exhibit No. 2518"]:

> Three or four days ago I forwarded to the Italian Ambassador at his request the statement in regard to armed merchant vessels, which we issued in September 1914. I had discussed the question some 4 or 5 years before with Mr. Barclay, of the British Embassy, and told him that, in view of the development of submarines as commerce destroyers, which had been unknown when our statement was issued, I felt that the arming of merchant vessels with any gun of sufficient caliber to attack a submarine would make it very difficult, if not impossible, to insist that a submarine should expose itself to attack by coming to the surface and hailing a vessel so armed; and that, while the armament might be termed "defensive", it was capable of being used offensively against a submarine and so, I thought, that a merchant ship carrying a gun or guns would have to be considered and treated as a vessel of war if it entered our ports. * * *
>
> Since we issued the statement of September 1914, formally, it appears to me advisable to issue a new statement setting forth the new conditions resulting from the successful employment of submarines in interrupting and destroying commercial vessels, the impossibility of the submarine's communicating with armed merchant ships without exposing itself to the gravest danger of being sunk by gunfire because of its weakness defensively, the unreasonableness of requiring a submarine to run the danger of being almost certainly destroyed by giving warning to a vessel carrying an armament, and that, therefore, merchant vessels should refrain from mounting guns large enough

to sink a submarine, and that, if they do, they become vessels of war and liable to treatment as such by both belligerents and neutrals.

The chief difficulty with the situation seems to me to lie in this: If some merchant vessels carry arms and others do not, how can a submarine determine this fact without exposing itself to great risk of being sunk? Unless the Entente Allies positively agree not to arm any of their merchant vessels and notify the Central Powers to that effect, is there not strong reason why a submarine should not warn a vessel before launching an attack?

You will recall the case of the *Baralong*, where a German submarine was bombarding a vessel from which the crew had escaped in boats, when a tramp steamer approached flying the American flag. The submarine remained on the surface and awaited the steamer, which, on nearing the submarine, lowered the American flag, hoisted the British colors, and with a gun mounted on the stern (a defensive armament according to our early definition), opened fire and sank the German vessel, killing all the crew. The British Government would urge that this was merely a ruse de guerre and entirely allowable, and so it would have been under old conditions, but under the new conditions it presents a strong argument in favor of submarine attack without warning.

Not only, therefore, should we, in my judgment, rewrite our statement as to the status of armed merchant vessels, but show that if any vessel of that class is armed, all merchant vessels are in danger of sudden attack without warning. As to the use of the American flag on any merchant ship converted into an armed vessel, it might be well also to make representations to the British Government.

To which Mr. Wilson replied on January 10, 1916, as follows [reading]:

My Dear Mr. Secretary: This seems to me reasonable and thoroughly worth trying.

Senator **Clark**. I offer exhibit 15, being the letter of Secretary Lansing, from which I have just read a part, and also no. 16, the note from President Wilson, which I have just read.

(The letters referred to were marked "Exhibits Nos. 2518 and 2519" and are included in the appendix on pp. 8474 and 8475.)

On those instructions from President Wilson contained in the note, Secretary Lansing proceeded to draft a proposal which he sent to the President, with the following covering letter of January 17, 1916 [reading]:

My Dear Mr. President: I enclose for your consideration a draft of a letter to the British Ambassador dealing with the submarine question, and suggesting a method by which future loss of life on merchant vessels might be avoided.

My first inclination was to send letters to the German Ambassador and Austrian Chargé, but two reasons prevented: First, I was convinced that the German and Austrian Governments would assent to the proposal, as it only required them to conform to the rules of international law, while it required their enemies to modify a present practice which might be construed into the relinquishment of a legal right; and second, if Germany and Austria acceded promptly to the suggestion, any demurrer by Great Britain, France, Italy, or Belgium would, if it became known (as it would undoubtedly through the German or Austrian Embassies), arouse adverse criticism in the press of this country and excite public resentment against the Entente Powers, which appears to be increasing from day to day.

By adopting this method of approach, the proposal can be kept secret if it is refused by the Entente Governments and if it is considered inexpedient to make it public.

(The document referred to was marked "Exhibit No. 2520" and is included in the appendix on p. 8476.)

Senator **Clark**. So that, having set out to the President with great force and clarity the contention as to the treatment of these armed merchantmen, the Secretary of State now proposes in a letter to the President that the message be not conveyed to the powers which he thought would accept it as being in conformity with the principles of international law, but first be tried out on the patries to which it was directed and be kept secret, unless they would indicate their willingness to it in advance.

President Wilson's approval of this course was more or less enthusiastic.

On January 17, 1916, he directed a letter to Mr. Lansing, reading as follows [reading from "Exhibit No. 2520"]:

> My Dear Mr. Secretary: This draft has my entire approval. I hope that you will send it to the governments you have indicated to me; and I most sincerely hope that they will feel that we are right in our argument and suggestions and will be willing to cooperate with us in attaining the object we have in view, an object which they must surely wish to accomplish as earnestly as we do, and which this seems in the circumstances the only feasible way of reaching.

The proposal itself from Secretary Lansing to the Allied Governments went forward on January 18, 1916, and the *modus vivendi*, as Secretary Lansing says for the observance of rules of international law and principles of humanity by submarines and the discontinuance of armament of merchant ships. It pointed out that the use of the submarine had changed the situation regarding so-called defensively armed merchant vessels, that a submarine could not stop and search a merchant vessel on the high seas without exposing itself to almost certain destruction by the guns on board the merchant vessel.

It goes on to say [reading from "Exhibit No. 2521"]:

> It would, therefore, appear to be a reasonable and reciprocally just arrangement if this could be agreed by the opposing belligerents that submarines should be caused to adhere strictly to the rules of international law in the matter of stopping and searching merchant vessels, determining their belligerent nationality, and removing the crews and passengers to places of safety before sinking the vessels as prizes of war, and that merchant vessels of belligerent nationality should be prohibited and prevented from carrying any armament whatsoever. * * *

A little later on he says [continuing reading from "Exhibit No. 2521"]:

> I should add that my Government is impressed with the reasonableness of the argument that a merchant vessel carrying an armament of any sort, in view of the character of submarine warfare and the defensive weakness of undersea craft, should be held to be an auxiliary cruiser and so treated by a neutral as well as by a belligerent government, and is seriously considering instructing its officials accordingly.

I may add that that was precisely the policy adopted by the Government of Holland from the beginning of the war to the end, treating an armed merchantman as a ship of war, and accorded the same treatment in its ports as accorded ships of war, and by that means Holland was able to maintain its neutrality throughout the war.

I offer Committee exhibit 17, being the letter from Secretary Lansing to President Wilson dated January 17, 1916, to which I have just referred, and also the draft of the proposed note to the British Ambassador; and also the answer of President Wilson, dated January 17, 1916.[1] Likewise I offer Committee exhibit 18, being the formal note from the Secretary of State to the British Ambassador dated January 18, 1916.

---

[1] Previously entered as "Exhibit No. 2520."

(The letter referred to was marked "Exhibit No. 2521" and is included in the appendix on p. 8478.)

Senator **Clark**. Now, we find that the British—this appears from many sources—that the British were quite overcome by this proposal on the part of the United States. It is shown that Sir Edward Grey was grave and disappointed by Ambassador Page. On January 27, 1916, Secretary Lansing wrote to President Wilson regarding the British attitude as revealed by the reports from London of Secretary Page, and I will read the whole letter because it is not very long (reading "Exhibit No. 2522"):

> (Personal and confidential.)
>
> My Dear Mr. President: The British Ambassador called upon me this morning and handed me the enclosed paper which is the substance of a telegram received by him from Sir Edward Grey in regard to our proposition as to a modus vivendi in connection with submarine warfare. I also enclose a telegram upon the same subject, deciphered late yesterday, received from Ambassador Page at London.
>
> It seems to me that the British Government expected us to denounce submarine warfare as inhuman and to deny the right to use submarines in attacking commercial vessels; and that these statements by Sir Edward Grey evidence his great disappointment that we have failed to be the instrument to save British commerce from attack by Germany.
>
> I must say that I am very considerably disturbed as to Mr. Page's attitude on all subjects which in any way affect the policies of Great Britain.

He well might be—

> He certainly is influenced very strongly by the atmosphere in which he is and I frequently doubt whether he urges the cases involving American rights with the force and vigor which he should as American Ambassador.
>
> In regard to the submarine matter I think there is nothing to be done until we have heard from the allies of Great Britain, but I presume in view of these telegrams that they will be opposed to any arrangement. I do not think it is necessary for us to act immediately upon such refusal but we should consider what course we are going to take with regard to Americans traveling on vessels carrying arms which can be used offensively against submarines. I doubt whether we can insist that vessels so armed can be considered other than as auxiliary cruisers of the respective navies of the Allies.
>
> I would be very much gratified if you could give me your views on this subject.
>
> Faithfully yours,

(The document referred to was marked "Exhibit No. 2522" and appears in full in the text.)

Senator **Clark**. Now, chronologically, it should be remembered that it was precisely at this time that Colonel House was acting as a sort of super-Secretary of State of the United States, without formal appointment or confirmation by the Senate, and peace emissary to Europe at large, and that he was in London laying the groundwork for the famous gentlemen's agreement, which has been known as the Grey-House amendment.

Colonel House evidently saw that this policy just enunciated by the Secretary of State, with the approval of the President, with regard to armed merchantmen would jeopardize the success of his careful negotiations and plans for the President to intervene to bring the war to a close.

On February 2, 1916, 5 p. m., committee exhibit 20, which I offer, Secretary Lansing cabled Colonel House as follows:

> Call your attention to confidential telegram January 26, 4 p. m., addressed to Embassy, Paris. Page cables that Grey is seriously disturbed over proposal as he claims it is wholly in favor of Central Powers and against Allies. Page fears that this proposal will be considered German victory and that all our influence with Allies will be lost. I feel strongly that the proposal is fair and only humane solution of submarine warfare for the future. If merchant ships are armed and guns used to sink attacking submarines as has been done and as merchant ships are now instructed to do then it is unreasonable to insist that submarines should take risk of coming to surface to give warning. Feel that Allies' refusal to consider proposal calmly will strengthen German's position. This proposal has no relation to Lusitania settlement and not yet mentioned to Germany but made necessary by conditions in Mediterranean and as merchant ships are arriving here carrying guns. Gerard cables that you feel we are asking too much of Germany in Lusitania case. Please cable fully your views. We feel any settlement without a disavowal or admission of illegality would not be acceptable to our people. Payment of damages incidental and not the material question.

(The document referred to was marked "Exhibit No. 2523" and appears in full in the text.)

Senator Clark. Then Colonel House, who, as I say, at that particular period was negotiating the famous Grey agreement, which did not become public until after the war, cabled back to the Secretary of State from London, under date of February 14, 1916, 6:35 p. m., as follows:

> Thanks for your information concerning the latest phase of the L settlement. Germany should, and I think will, agree to German Ambassador's latest proposal. There are so many other issues involved in the controversy concerning armed merchantmen that I sincerely hope you will leave it in abeyance until I return. I cannot emphasize too strongly the importance of this.

(The document referred to was marked "Exhibit No. 2524" and appears in full in the text.)

The Chairman. Senator Clark, have you given thought to what those many other issues involved might have been?

Senator Clark. I took it to be the negotiation of the House-Grey gentlemen's agreement, by which Colonel House committed the United States, under certain contingencies, to enter the war.

Senator Vandenberg. What is the date of that agreement, Senator?

Senator Clark. You mean the House-Grey agreement?

Senator Vandenberg. Yes.

Senator Clark. I think it was February 22, 1916. The negotiations had been going on for some time, with exchange of interviews between Sir Edward Grey and Colonel House, and after Sir Edward Grey accepted this gentlemen's agreement in principle, he sent Colonel House over to try to line up the Allies of Great Britain.

Now, following this message from Colonel House, the *modus vivendi* was tacitly dropped. President Wilson was undoubtedly aware of the negotiations which Colonel House had in progress, and, following the protest of Colonel House, the matter seems to have just been dropped entirely, in spite of the thought and consideration that Secretary Lansing and the President had previously given it and in spite of their expressed convictions that the suggestion was eminently reasonable and just. So that the United States withdrew to its old position, a position which both Secretary Lansing and President Wilson had considered unreasonable and unjust, as was pointed out in the *modus vivendi*, in this agreement, but one which met with the approval of the Allies.

I offer as committee exhibit 22 a draft letter from Secretary Lansing to Sir Cecil Spring-Rice, British Ambassador, which was submitted to the President for his approval, after the receipt of Colonel House's cablegram. Here is the draft which was submitted to the President by the Secretary of State [reading]:

> My Dear Mr. Ambassador: I have received your courteous letter of the 23d instant and given careful consideration to the memorandum enclosed relating to proposal for an agreement to disarm merchant vessels by the Entente Powers, which I unofficially submitted to you in my letter of January 18, 1916.
>
> "The proposal was made with a humane purpose of removing the principle reason given by the German and Austro-Hungarian Governments for the failure of their submarines to comply strictly with the rules of naval warfare and intercepting the merchant vessels of their enemies on the high seas, a practice which has resulted in an appalling loss of life among the passengers and crews of vessels which have been attacked without warning.
>
> Believing an arrangement, such as I have the honor to propose, would have resulted in the discontinuance by Germany and Austria-Hungary of a method of attack on merchant vessels which puts in jeopardy the lives of hundreds of men, women, and children of neutral as well as belligerent nationality, I cannot but regret that the governments of the Entente Powers (have rejected[1]) could not see their way to accede to the proposal (and have declared their unwillingness to agree to refrain from the use of armament in protecting their property on the high seas[1]).
>
> The Entente Governments having, however, reached a decision to decline the proposed arrangement, it becomes my duty to accept their decision as final (although I can assure Your Excellency that I do so with the greatest reluctance and with great apprehension for the future[1]), and in the spirit in which they have made it.

This was the draft submitted to the President, to which the President replied on March 30, 1916.

> My Dear Secretary: There are several reasons why I think it would not be wise to send a reply of exactly this sort to these governments; but it would be very unsatisfactory to set them forth in a letter. I would like the pleasure of an early conference with you, on this and one or two other pending matters. No doubt we can agree upon a time when I see you at the meeting of the Cabinet tomorrow.

To which Mr. Lansing replied on April 3, 1916—this is not a reply, but on April 3 Mr. Lansing wrote the President as follows [reading]:

> My Dear Mr. President: I enclose a proposed letter in reply to the rejection of our proposal of January 18, relative to the disarmament of merchant vessels.
>
> I have already sent you a draft of a letter on this subject, and in the enclosed I have sought to meet your views on the previous draft.

Which apparently was the end of any suggestion on the part of the United States trying to end the submarine warfare in that way.

(The letters referred to were marked "Exhibit No. 2525" and are included in the appendix on p. 8480.)

Senator Clark. To sum up, in his war memoirs, Mr. Lansing has made some rather revealing statements concerning his attempt to make submarine warfare more humane. At page 110 of Secretary Lansing's book I quote:

> As I review the record of submarine warfare subsequent to March 1, 1916, I am more than ever convinced that the decision of the allied governments to decline to enter into the proposed arrangement was unwise from the humani-

---

[1] Scratched out.

> tarian point of view and resulted in the sacrifice of hundreds of lives which might otherwise have been spared. It seemed to me at the time that they lost a great opportunity, because, if the Germans performed their part of the modus, the lives of crews and passengers on commercial vessels of the Allies and neutrals would not have been in constant danger from surprise attacks by submarines. * * * However, with the short-sightedness which it is hard to comprehend, and with a stubborness in insisting on neutral rights which were in their exercise open to possible question in view of the new conditions which prevailed, the British rejected the modus vivendi proposed by this Government, and the attempt to lessen the certainty of future horrors failed. The British Government in refusing to consider any deviation from the strict letter of the law even by agreement, was not only blind to the strategic advantage to be gained but was utterly inconsistent in its own practice, for the British naval authorities had violated more rules of international law than the Germans, though their violations were not attended by such dreadful results. For a year and a half we had made protest after protest to London because of the illegal practices of the British authorities in their treatment of American commerce and in their disregard of American rights on the high seas, and these controversies were in progress at the very time that the proposal of the United States in regard to submarine warfare was rejected.

TRAVEL ON ARMED BELLIGERENT VESSELS

Senator CLARK. Now, of course, very closely linked to the armed merchantmen's issue was the problem of Americans traveling on armed belligerent vessels, of Americans traveling on belligerent vessels carrying contraband of war.

In a memorandum of July 16, 1915, Cone Johnson, the Solicitor of the Department of State, pointed out that it was hardly correct to insist that neutrals possess the unlimited right to travel on merchant ships of belligerents carrying contraband and munitions of war.

I will quote some paragraphs from this memorandum and insert the whole memorandum in the record [reading from "Exhibit No. 2526"]:

> It is hardly correct to say that the neutral has the right, unlimited, of traveling on merchant ships of belligerents carrying contraband and munitions of war. A neutral does not have the right to afford, by his presence, protection to such a ship or its cargo, as we see from the admitted principle by which he is required to abandon the ship when it is overtaken by the enemy—if afforded opportunity to do so with reasonable safety; his right consists in the opportunity to leave the ship in safety before it is sunk. His presence affords no legal protection to the ship or its cargo.

A little further down the memorandum states [reading]:

> Is it of the essence of the right of an American citizen to travel in European waters that he be allowed to take passage on any and all of the ships of the belligerents, whatever may be their cargo or destination? I hardly think so. If abundant facilities are furnished for the safe conveyance of our people in European waters within the zone of hostilities, it seems to me there would be no ground for complaint on the part of any American citizens who might prefer a ship of the enemy carrying munitions of war in the zone of hostilities.

I offer committee exhibit 23, being the opinion of Solicitor Johnson.

(The document referred to was marked "Exhibit No. 2526" and is included in the appendix on p. 8481.)

Senator CLARK. President Wilson always maintained the position, with respect to our relations with Germany, that we could do nothing to surrender or compromise in any way the rights of the United States or its citizens.

However, the Congress of the United Sates felt quite differently about such a defense of American rights.

A large group in Congress wondered whether the desire of a comparatively few Americans to travel on belligerent ships through war zones should be permitted to risk the involvment of the United States in a bloody war. Congressional disturbance with regard to the United States relations with the belligerents is reflected in a letter from Secretary Lansing to President Wilson of December 21, 1915, which I will offer as committee exhibit 24.

(The document referred to was marked "Exhibit No. 2527 and is included in the appendix on p. 8483.)

The CHAIRMAN. Senator Clark, will you permit an interruption at this time?

Senator CLARK. Yes, sir.

The CHAIRMAN. Has the House-Grey agreement been offered for the record.

Senator CLARK. Not yet.

The CHAIRMAN. It will be during the day?

Senator CLARK. I do not know whether we will get to it during the day.

The CHAIRMAN. It will be offered, however?

Senator CLARK. We will put it in now, if you like.

The CHAIRMAN. Is there any objection to its being offered?

Senator CLARK. Not at all.

(The document referred to was marked "Exhibit No. 2528" and is included in the appendix on p. 8483.)

Senator CLARK. I will read a portion of this letter from Secretary Lansing to President Wilson, dated December 21, 1915 [reading from "Exhibit No. 2527"]:

> MY DEAR MR. PRESIDENT: I had a long conversation this afternoon with Senator Stone in regard to our relations with the belligerent countries, and I am disturbed at his attitude. He clearly indicated after we had talked a while that he thought that we were bearing too severely upon the Teutonic Allies and were not pressing Great Britain as strongly as we should in insisting upon observance of our trade rights. When I suggested that loss of life seemed to me to require more drastic treatment than loss of property, he replied that they both involved rights. I said to him that the right of life was an inherent right, the loss of which could never be indemnified, but that the right of property was a legal right, which could be fully remedied by an indemnity. I could see, however, that this in no way satisfied him, for he then referred to German babies dying because Great Britain would not allow us to send them condensed milk, and followed it up with dyes, potash, etc., etc.

A little further down in the letter he states [reading]:

> I hope that you will find it possible as soon as you return to Washington to ask Senator Stone to come and see you and see if something cannot be done to change his attitude, as it will otherwise make the situation one which will be hard to handle. I do not think the case one which permits of much delay.

The CHAIRMAN. Senator Clark, this note by the President speaks of Senator Stone's attitude being a rather distressing and alarming one, and he suggests that his attitude may come from other quarters than the Senator's own personal thinking. This letter was dated December 24, 1915. What is the relationship of that date to the date of Mr. Davison's communication or cable, insinuating as much that perhaps——

Mr. WHITNEY. It is nearly a year later.

The CHAIRMAN (continuing). Senator Stone was not really speaking his own mind.

Mr. WHITNEY. This is December 24, 1915, and Mr. Davison's cable was January 1915.

The CHAIRMAN. Very well.

Senator CLARK. The letter of the President under date of December 24, 1915, is offered as committee exhibit 25.

(The document referred to was marked "Exhibit No. 2529" and is included in the appendix on p. 8484.)

Senator CLARK. At about this time a tremendously powerful movement in favor of warning American citizens against taking passage on these belligerent ships developed in both Houses of Congress, based on the assumption that if Americans did not insist on traveling on belligerent ships in the war zone "they would not be drowned and the submarine dispute with Germany would lapse", as Colonel House said.

Senator Gore and Representative McLemore, in the House, introduced resolutions in February of 1916 designed to warn American citizens against traveling on armed belligerent vessels, and a very ardent battle was waged in Congress over those resolutions.

It was at that time, as you will recall again, that Colonel House was just completing the negotiation of the House-Grey agreement. In fact, that agreement was concluded, such as it was, during the period of greatest agitation for the Gore-McLemore resolution.

The Lansing appointment books in the Library of Congress contain this very significant entry on February 25, 1916 [reading]:

> Monday night many Members of the House were informed that the President desired war with Germany. This followed an interview between the President, Senators Stone and Kern, and Representative Flood.

Representative Flood was chairman of the Foreign Relations Committee of the House, and Senator Stone was chairman of the Foreign Relations Committee of the Senate, and Senator Kern, of the Finance Committee of the Senate [continuing reading]:

> On Tuesday the House was seething. Wednesday and Thursday it was the same. Opposition to war developed considerable strength. Thursday night the President sent a letter to Senator Stone. Friday the conditions were less hysterical.

President Wilson evidently realized that he must deal a death blow to the Gore-McLemore movement and the powerful sentiment which it represented. So that under date of February 24, 1916, he wrote Senator Stone a letter in which he pointed out that the honor and self-respect of the Nation would not permit any abridgement or denial of American rights.

That letter will also be included in the record.

This assertion of American rights apparently did not apply to American rights, that is, freedom of the seas or the rights of trade, which the British had so insistently disregarded, concerning which this Government had mildly and deliberately, according to Secretary Lansing's statement, which I just read, protested, but in respect to which it actually contented itself with reserving its rights in the matter.

To have warned Americans against traveling on armed belligerent vessels in order thereby to lessen, perhaps remove, the danger of war on the United States from the German submarine menace would not have been any more fundamental temporary suspension of American rights, that is, the right to travel freely, than was the accepted suspension of American rights of trade which the British flagrantly violated on the grounds of the exigencies of war.

However, Colonel House wrote to President Wilson as early as May 25, 1915, as follows [reading]:

> * * * but I feel that our position with the Allies is somewhat different, for we are bound up more or less in their success.

A letter of February 29, 1916, from Ambassador Gerard, in Berlin, to Secretary Lansing and Colonel House, expresses succinctly the German reaction to the United States' attitude on these two important issues—armed merchantmen and warning Americans to keep off armed belligerent ships.

I will insert the whole letter in the record. It is only necessary to read this paragraph [reading]:

> I think Germany was about to offer to sink no merchant ships without notice and putting crews and so forth in safety, if England would disarm merchant ships; but now, since the President's letter to Stone, both the Chancellor and von Jagow say they are convinced that America has a secret understanding with England and that nothing can be arranged.

And as we know now, the Chancellor and von Jagow were absolutely right in assuming that there had been a secret agreement with England, which was comprehended in the House-Grey agreement.

(The document referred to was marked "Exhibit No. 2530" and is included in the appendix on p. 8484.)

The CHAIRMAN. Unless the witnesses are wanting to offer any comment at this particular time, the Committee will recess until 10 o'clock tomorrow morning, when it will continue with this study of these State Department documents. Until 10 o'clock tomorrow morning, then, the committee is in recess.

(Thereupon, at 4:12 p. m., the Committee took a recess until 10 a. m. of the following day, Wednesday, Jan. 15, 1936.)

APPENDIX

EXHIBIT NO. 2279

[N. Y. American, August 10, 1915]

McADOO CONFERS WITH FINANCIERS

WALL STREET DEEPLY INTERESTED IN REPORTS THAT FUNDS ARE SOUGHT TO BUILD UP MEXICO

Wall Street was deeply interested yesterday in the visit to the financial district of Secretary McAdoo and W. P. G. Harding, of the Federal Reserve Board, who, it was said, were here to confer with local bankers on the financing of a new government in Mexico.

Secretary McAdoo made his headquarters at the Sub-Treasury, where he conferred with Henry P. Davison, of J. P. Morgan & Co. Although the two conferred for an hour, Mr. Davison would not throw any light on the subject discussed.

Asked about the report that he was here to confer with bankers regarding the financing of a new government in Mexico, Secretary McAdoo said that was untrue. He declared he was here on Department matters which have no significance.

Mr. Harding said he was here on routine matters.

Local bankers declared yesterday that they would not advance any money to Mexico unless every cent was guaranteed by the United States Government.

Secretary McAdoo said he did not expect any difficulty in the financing, collection, and transportation of crops this year, and that everything that could be done in this direction was suggested in the recent letters sent out by the Federal Reserve Board to the different Federal Reserve Banks telling them to take time by the forelock.

Secretary McAdoo said reports received from the Federal Reserve Board and the Treasury Department indicated that trade is doing well all over the country.

EXHIBIT NO. 2280

[N. Y. Telegram, August 9, 1915]

McADOO CONFERS WITH "STREET'S" LEADING BANKERS

SECRETARY OF TREASURY MEETS WALL STREET MEN AT THE SUB-TREASURY—OPTIMISTIC OVER FUTURE BUSINESS CONDITIONS

Speculation is rife in Wall Street today over the purpose of the flying trip made from Washington here by Mr. William McAdoo, Secretary of the Treasury. Mr. McAdoo was in the financial district for several hours and saw several of the important bankers. The reported excessive issue of Federal Reserve notes and the Mexican situation are mentioned as possible causes.

One of the principal financiers with whom he was in conference was Henry P. Davison, of the firm of J. P. Morgan & Co. Mr. McAdoo invited Mr. Davison to call on him at the Sub-Treasury. The two were in consultation for more than one hour. After leaving the Sub-Treasury Mr. Davison declined to say a word about his talk with the Secretary.

In some financial circles it was believed Mr. McAdoo had been discussing with bankers the action of the Federal Reserve banks, but particularly that of New York, in issuing Federal Reserve notes in amounts entirely out of proportion to the amount of commercial paper they held, and consequently accumulating gold at what some financiers declare "inordinate rates."

Strength was lent to that belief by the fact that Benjamin Strong, Jr., governor of the New York Federal Reserve Bank, and W. P. G. Harding, of the Federal Reserve Board, were two of the first men to confer with the Secretary.

In other quarters, however, it was believed Mr. McAdoo conferred with bankers here on the subject of financing any steps the Government of the United States might take with respect to Mexico.

In the office of Martin Vogel, head of the Sub-Treasury, Mr. McAdoo said the object of his visit was "special departmental matters." He denied he had come to New York for the purpose of sounding bankers in connection with any financing which might be necessary in respect to Mexico.

The Secretary was very optimistic over the outlook for business all over the United States.

So far as Mexico is concerned, bankers here said, none would lend a cent to Mexico or have anything to do with Mexico financing unless under a guarantee by the United States.

Exhibit No. 2281

[The New York Times, Thursday, July 29, 1915]

Financial Markets

INDUSTRIALS AGAIN TAKE LEADERSHIP IN BROADER MARKET—STEEL TRADE'S CHANGE

The railroad stocks did not continue far yesterday their advance of Tuesday afternoon—some of them even fell back—but that noteworthy rise in these shares was not without its favorable effect upon market sentiment yesterday. Of even more effect was the very favorable showing made in the quarterly statement of the Steel Corporation, whose market effect was reserved until yesterday. The statement was taken as proving more than past improvement in the steel trade. It was taken as proof of oncoming prosperity in that industry and its effect thus extended not alone to the stock of the company directly concerned, but to other steel shares as well. The Steel Corporation's earnings statement was effectively supplemented to this end by the weekly summaries of conditions by the oragns of the steel trade.

The demand for the finished product has worked all the way down and is now manifesting itself strongly in the demand for pig iron for future delivery; prices are advancing, and in some instances difficulty is being encountered in supplying the more pressing demands which are reaching the trade. Incidentally, more light is thrown on the extent to which war orders are responsible for this change in condition. The Iron Age points out that it is now estimated that between 20 and 25 per cent of the current output of the leading steel companies consists of war materials—the range of products is wide, for modern war consumes almost as wide a variety of things as enters into modern industry.

Trading was more active than on any day since May 10 and for the first time since that day the dealings rose to a million shares. This volume was attained both by an increase in the transactions in the stocks previously dealt in and by an increase in the number of issues sharing in the day's market. The industrials far outran the railroads in strength and in activity, but activity in the former was not confined to the war stocks unless all steel stocks be looked upon as war stocks in view of the large demands which the war makes on the products of the steel industry. But the steel trade has not been returning to prosperity solely on the basis of orders received from the European belligerents. Accepting the larger estimate of 25 per cent as the proportion of steel trade output which represents war orders and deducting that from the 87 per cent of capacity at which the Steel Corporation blast furnaces are operating, there is left an output far in excess of the output for all purposes at the beginning of this year. Home trade is improving along with the trade which comes to us from the nations at war.

The further expansion in our steel export business comes at the season when agriculture begins afresh to contribute material for export, and, as by way of fitting reminder of the enormous excess of exports which agricultural exports were instrumental in bringing about last fall, the excess of exports over imports for the latest week reported exceeds by far the figures of recent weeks. It is a movement which will accentuate the need of Europe's safeguarding her exchange rates with this country and specifically the need of England's entering into some credit arrangement with this market. This is a topic which is now receiving very earnest consideration in London, and one which is likely before very long to be dealt with practically. England may succeed in gathering together a large amount of American securities to be pledged for a loan here. In no other way probably could England borrow as readily in this market.

The market for railroad stocks showed a good deal of absorbing power notwithstanding the abruptness of the advance the previous afternoon and notwithstanding the absence from the morning's news of any confirmation of the previous day's rumor that the Western roads were about to be granted an increase in freight rates. With very little loss in prices more stock was taken yesterday in some of the railroad issues than had figured in the dealings which brought about the advances of three to five points in Tuesday afternoon's trading.

[N. Y. Times 7/19/15]

WAR LOAN PAYMENTS DUE

LONDON EXPECTS $1,000,000,000 TO BE TURNED OVER ON TUESDAY

[Special cable to the New York Times]

LONDON, July 18.—Chancellor McKenna's announcement that £570,000,000 had been subscribed to the big war loan through the Bank of England exceeded conservative expectations. In addition, £24,000,000 has been subscribed so far through post offices, where lists are still kept open for small amounts. All of this means new money, as the conversion of older loans will not begin until August.

The success of the loan helped the markets early in the week, but dullness followed later, owing to the rise in money rates, which was due to the enormous payments to be made to the Government on account of the war loan on Tuesday. The 10 percent payment due then requires £57,000,000, but with the amounts which will be paid up in full under the discount privilege it is expected that the day's payments may reach £200,000,000. Calling of loans by the banks on this expectation drove the discount rate to 5 percent. Bill brokers have been borrowing in substantial amount at the Bank of England.

No real dislocation of our finances is likely on July 20, but with dealings in the new war loan still to be begun, the stock exchange became nervous over the uncertainty. Selling of American issues was small all week, but the new loan has absorbed nearly all of the money supply, so that it is difficult to see at this time whence buyers for any securities are to come.

The weakness in New York exchange on London creates general uneasiness here, and any action to relieve that situation would be welcomed by most of the bankers.

EXHIBIT NO. 2283

[N. Y. Times, 8/13/15]

NEW BRITISH GOLD NO AID TO EXCHANGE

DEMAND STERLING DROPS TO $4.72¾, THE LOWEST PRICE EVER RECORDED HERE—SITUATION DISTURBS BANKS—MOST SERIOUS PROBLEM CONNECTED WITH EXPORTS TO THE ALLIES—CREDIT SCHEME SOUGHT

The arrival of nearly $20,000,000 in gold besides British-owned American securities of an estimated value of more than $30,000,000 had no apparent effect toward checking the downward movement of sterling exchange, which yesterday went to a low level never seen before in modern times. Demand sterling, which sells ordinarily at $4.865 for the pound, sold at $4.72¾. At this figure there is a loss of 2.8 percent on transactions settled by the buyer in demand sterling.

Yesterday's decline, according to international bankers, will be only a start on the downward movement if steps are not taken to provide for the settlement of obligations here through credit facilities rather than through exchange. The situation was disturbing to the banks and brought forward what was characterized as the most serious problem that confronts this country in connection with its enormous exports to the Allies. A suggestion that more gold might be brought here from London or South Africa was dismissed as a restorative of normal rates.

"We don't want gold", said an international banker who is taking an active part in negotiations with financiers in London and Paris. "The gold is of no use to us and might better stay in London. If our export trade is not to receive a serious check a way must soon be found to extend credit for the settlement of the bills that are falling due.

"The banks in this country have unprecedented cash reserves, which are not doing any good. What is needed is a credit arrangement under which this money can be paid out on behalf of foreign nations. Either through the sale here of foreign securities or the establishment of a credit, means must be provided for paying the war bills maturing in this country or it will become increasingly difficult to place additional orders."

It was learned yesterday that the securities received by J. P. Morgan & Co. from the Bank of England in connection with the gold, are American bonds, and that they are to be used as security for temporary advances. It was said that they were not a part of collateral for a large credit, but that they would be deposited with banks to secure the release of cash to meet bills. Whether further consignments of securities are sent depends entirely upon London.

On most of the war contracts, 20 percent or 25 percent of the price called for has been paid at the time of placing the orders. So far only a relatively small part of the munitions contracted for has been delivered, and the unsettlement caused by the preliminary advances has brought up the question of what may be expected to happen when the remaining 75 percent or 80 percent is called for. To date there are no unpaid items, the Allies having settled in cash for everything delivered.

There was a report which seemed to be borne out by facts yesterday that a large volume of war business has been held up by the refusal of manufacturers to take new orders calling for payment in notes running for a year or more, Russia has offered a large amount of new business on condition that the contractors accept bonds in payment, but little of this business has been taken. One industrial company has had under consideration for several days a big Russian order which was delayed by inability to reach an understanding as to payment.

It is regarded as entirely possible that Great Britain will eventually try out the investment market here with an offering of notes payable in New York in dollars, to secure investors against loss in exchange. Bond men said yesterday that the reception which such an issue would get could not be foretold, but that a maximum estimate of $100,000,000 should be placed upon the amount of such securities that could be absorbed in this market.

Until recently most financiers have taken the stand that the exchange problem is of no direct concern to the United States, and that Great Britain must find her own way to pay the obligations incurred here. Now it is recognized that the future industrial prosperity of this country depends upon cooperation which will make it possible for the Allies to finance their purchases without exhausting their supplies of gold. Large war orders for Italy are hanging fire pending action on that country's inquiry for a loan of $50,000,000.

EXHIBIT No. 2284

[The Chronicle, July 3, 1915, page 11.]

The sterling exchanges during the earlier part of the week showed complete demoralization in the absence of sustained buying power. On Monday, after a quiet day on Saturday, there was a decline of about 1¼ cents to the pound to a new low record of 4 75 15-16 for demand bills. This minimum was further reduced on Tuesday to 4 75⅞ and on Wednesday to 4 75¾, after which a rather steadier tone developed, due chiefly to buying by local bankers and by Canadian institutions. The weakness was all the more surprising in view of the conceded active selling of American securities by foreign holders that has followed the British requirements for funds to subscribe to the new war loan. On Saturday a shipment of $2,500,000 from Ottawa to New York was announced by J. P. Morgan & Co. No further announcements were made during the week. It is believed that the stock of the precious metal at Ottawa has been drawn down so severely that further large importations from that source are not probable. Indefinite reports of pending shipments direct from France are current. In the past, however, positive information of this character has been withheld until the metal has safely arrived. The transportation facilities for trans-Atlantic shipments of gold are limited and it will be a difficult matter to bring the metal forward in sufficient volume to correct the demoralization in exchanges in the event of that being considered by the British Government a solution of the problem.

The point has been reached, apparently, where recourse will have to be had to a definite form of credit to Great Britain by American bankers. E. F. Davies, Chairman of the Committee of English and Foreign Bankers on Exchange Problems, is quoted by a press dispatch as saying on Tuesday: "I consider the best way for American exchange to be righted will be by Americans subscribing liberally to the new war loan, exchange being at present something like 2% in favor of America on such an operation; or by Americans granting about $500,000,000 of credit to Great Britain. The former way is much the better one, but either is in the best interest of both countries, and America thereby would pay herself for her shipments to this country. Paris depends solely on London and any payments for munitions or food must be made through London." There seems slight expectation that the volume of American subscriptions to the British war loan will assume really important proportions unless some provision should be made in the terms of the offering to provide exemption from the British income tax. The subscriptions in a broad sense may be expected to be governed by the patriotism of British subjects here rather than by out-and-out business considerations.

Despite the arrangement of the loan based upon French holdings of American securities, exchange on Paris has still again reached a new low figure, both in New York and London. Sterling exchange in Paris has declined to 27.22½ francs, comparing with 26 36 francs a week ago. In New York checks on Paris closed at 5 68 francs, against 5 50 a week ago, while cable transfers finished at 5 67¼, against 5 49½; commercial sight on Paris, including three-day sight bills, finished at 5 70, against 5 51½. Bankers' checks on Berlin are quoted at 81⅛ and cable transfers at 81 3-16. Last week the corresponding figures were 81 13-16 and 81⅞, respectively. Swiss exchange finished at 5 44 for bankers' sight and 5 43½ for cables, against 5 35½ and 5 34½ last week. Italian lire at 6 16 for checks and 6 15 for cables, compare with last week's final figures of 5 98 and 5 97½. Bankers' checks on Amsterdam are 39 15-16, unchanged for the week, while bankers' cables are quoted at 40, against 40 plus 1-32 a week ago. Greek exchange is slightly firmer at 5 26 and 5 25 for checks and cables, respectively, against 5 27 and 5 26½ at the close of last week. Checks on Copenhagen are 26 35, against 26 33; on Sweden and Norway, 26 40, against 26 38 last week. Russian roubles closed 37¾@38 for checks, against 38¼@38½ a week ago.

Compared with Friday of last week, sterling exchange on Saturday was steady, with rates practically unchanged from the high of the previous day, at 4 77¼@4 77⅜ for demand, 4 78 3-16@4 78¼ for cable transfers and 4 74@4 74½ for sixty days. On Monday sterling suffered another sudden and severe break and demand bills again reached a new low level, namely 4 75 15-16—a decline of 1¼c.—with the high 4 77⅛; cable transfers ranged between 4 76 15-16@4 78 and sixty days 4 72¾@4 72⅞; this fresh demoralization was attributed largely to a heavy accumulation of bills over the week-end, together with a lack of demand, while the late rally was due to active buying by Canadian institutions. The foreign exchange market continued its downward swing on Tuesday, and after a fairly steady opening weakened and rates declined fractionally, to 4 75⅞@4 76⅛ for demand, 4 76⅞@4 77⅛ for cable transfers and 4 72½@4 72⅝ for sixty days. On Wednesday further weakness developed in the initial transactions—demand receding to 4 75¾—the lowest figure yet touched; later, however, liberal buying by an international banking concern and renewed foreign selling of Americans induced a sharp rallying movement and the range was 4 76¼@4 77½ for cable transfers, 4 75¾@4 76⅜ for demand and 4 72¼@4 73½ for sixty days. July 1 requirements having been satisfied, trading in exchange on Thursday was quiet and the opening weak, although before the close selling of American securities by Europeans caused a firm tone; demand was quoted at 4 76¼@4 76⅜, cable transfers 4 77 1-16@4 77¼; sixty days was unchanged at 4 72¼@4 72½. On Friday the market ruled in the main steady. Closing quotations were 4 72¼@4 72½ for sixty days, 4 76¼@4 76½ for demand and 4 77 3-16@4 77⅜ for cable transfers. Commercial on banks, nominal; documents for payment, nominal. Seven-day bills at 4 75⅛@4 75⅜. Cotton for payment, nominal; grain for payment, nominal.

[The Chronicle, August 14, 1915, page 483]

Once again this week has the sterling exchange market established a new low record, notwithstanding that the British Government has forwarded from London to Messrs. J. P. Morgan & Co., its financial agents in this country, a total of $19,534,200 in United States gold coin. The rate for demand bills on London has declined to the unexampled figure of 4 70½, which compares with 4 76⅛ @ 4 76¼, the closing price a week ago. The shipment in question, it may be stated, is to be followed by others, including substantial amounts from both South Africa and Australia; a total of $15,000,000 is understood to be already on the way from Australia to a Pacific port, of which $5,000,000 is due next week. The British Government not unnaturally is maintaining secrecy as to the movement of the metal while it is on the seas. In fact the importation of the $19,534,200 was not announced either in New York or London until it had safely arrived at Halifax. Accompanying the shipment was a considerable volume of securities estimated at something over $30,000,000, though there is excellent reason to believe that this figure is an overstatement. It is understood that the Bank of England has a gold reserve of about £20,000,000 at Cape Town. The inference in respect of the importation of securities is that they represent American bonds purchased by the British Treasury out of the proceeds of the war loan, and that the gold that already has come, and that which is to come, will in connection with these securities form the basis for the large English credit at this center, which, in the very nature of things, must soon be established unless a gold movement of extraordinary and also of unnecessary proportions is to take place to New York. While money rates in London are a shade easier this week, they remain attractive and indicate that the Bank of England still has the English money situation well under control. Meanwhile, however, the fact must be faced that the season is approaching when the favorable export balance which has already been established will most probably be increased by large shipments of grain and provisions, and that it is necessary to make preparations accordingly. There are some reports that the only hitch in establishing the English credit is a difference of opinion between England and American bankers as to some of the minor details. One point is the indisposition, it is reported, of London bankers to encourage the drawing of bills in dollars against the American credit. The Department of Commerce in its regular report of our foreign trade (through the 13 principal customs districts) shows an export balance for the week ending Aug. 7 of $13,945,455, the imports having amounted to $34,294,282 and the exports to $48,239,737. The current weakness in exchange is due to the pressure of bills. Cotton bills are making their appearance in substantial volume. One banker yesterday estimated that about $50,000,000 of bills on London are available in the market, and that large offerings also are available of bills on Paris and Rome. The close was demoralized with rates wholly nominal.

Treasury Department,
Comptroller of the Currency,
Washington, September 29, 1915.

Mechanics and Metals National Bank,
New York, N. Y.

Sirs: Your telegram of even date reached this office this afternoon about four o'clock. I understand your inquiry to be whether national banks will be limited in taking Government loans by the provisions of section 5200, U. S. R. S., which limit the "total liabilities" to any national bank of "any person or of any company, corporation, or firm for money borrowed, including in the liabilities of a company or firm the liabilities of the several members thereof" to one-tenth of the capital and surplus of the bank—such liabilities in no event to exceed thirty percent of the capital stock of the bank—the aforesaid limitation, however, not to apply to discounts of bills of exchange drawn in good faith against actually existing values and the discount of commercial or business paper actually owned by the person negotiating the same.

In reply you are informed that this office has been advised by counsel that governments are not "corporations" or "persons" within the meaning of section 5200, and that investments made by national banking associations in Government securities, such as Government bonds, in excess of ten percent of the unimpaired capital and surplus of the association, would not be in violation of that section.

Respectfully,

(Signed) Jno. Skelton Williams,
Comptroller.

September 29, 1915.

Hon. John Skelton Williams,
Comptroller of the Currency, Washington, D. C.

Sir: I hereby confirm the telegram just sent to you for our enlightenment, as follows:

"It is our understanding that there is no legal limitation on the right of a national bank to invest in loans of governments. Is this correct?"

This telegram was prompted by the prospective consideration by our executive committee at its meeting this afternoon of our participation in the loan under consideration to the English and French Governments, and I might add, by our desire to be in perfect harmony with your Department and at the same time be as helpful to the general business of this country as is prudent.

Anticipating your early reply, I am,

Yours truly,

——— ———, *Vice-President.*

ANGLO-FRENCH LOAN

Things are boiling on the big credit loan to England and France. At a meeting yesterday of representatives of about forty distributing houses at Morgan's office, Mr. Forbes was appointed chairman of a committee to work out the details of both the underwriting and the public offering.

After exhaustive discussions of the various suggestions that were made the committee reported back to the issuing houses at a meeting that was held at one o'clock to-day recommending that everybody be given an opportunity to participate in the underwriting. By that is meant private investors as well as corporations, dealers, banks, and other institutions.

The commissioners stipulated particularly that the bonds should not be sold to anybody at less than 98 and interest, yielding just under 5½%. And to fix in the minds of the public the price of 98 it has been decided to allow withdrawals by syndicate participants at 98, less a rebate after the syndicate is closed of 1¾%. The syndicate members so withdrawing will be relieved of any further liability. The underwriting price is 96, but ¼% is taken off of the rebate on withdrawals to cover the expenses of advertising, etc. It is possible that it may not be quite as much as this, and if not those who withdraw may perhaps receive a little more than 1¾%.

What we want to do especially is to encourage withdrawals. Bonds withdrawn must be held for sixty days—the life of the syndicate. If any withdrawn bonds come back into the market within sixty days the numbers will be traced and the bonds sent back to the seller. This will be included in the syndicate agreement.

The syndicate managers have the right to repurchase in support of the market up to 10% of the bonds which are not withdrawn. It is expected that at least half of the issue will be withdrawn for investment.

You will at once see that it is distinctly for the best interests of the flotation to make the underwriting a great big success. It must be quick and snappy, and the more withdrawals the better. Then when the remainder of the issue is offered for subscription at 98, dealers and banks everywhere can jump in and push the final distribution with great enthusiasm. As Mr. Morgan said to-day, this loan is going to be a tremendous success, and a whole lot of people will wake up and find themselves about eight days too late.

Just think of an interest return of 5⅞% to an institution or investor who goes into the syndicate and withdraws his bonds. Why, nothing like it was ever heard of before—a five-year obligation of the two greatest governments in the world—next to the United States—on close to a 6% basis.

Confidentially, one withdrawn bond subscription was turned in to-day for $35,000,000. We are getting requests for participations from all directions. Every clearing house bank in Pittsburgh has subscribed, and enthusiasm is at a high pitch in Philadelphia, Baltimore, Boston, and all the other financial centers of the East as well as here in New York.

To-night a wire is going to the most important banks in the Middle West and out on the Pacific coast over signatures like Mr. Wiggins, president of the Chase National; Mr. Prosser, president of the Bankers Trust; Mr. Sabin, president of the Guaranty; and Mr. Vanderlip, president of the National City, strongly recommending the loan both as to security and price and asking these few carefully chosen banks in each city to form a group and take charge of the distribution in their locality. As the telegram reads—"We are forming a countrywide syndicate, etc."

It's too late to attempt to give you all the little details to-night. Call us up in the morning and ask any questions that are on your mind. As you, of course, know the bonds will be payable in dollars in New York, and there will be various denominations from $100 up. Even without the conversion privilege the loan would be by all odds the most attractive investment in the market, but when you take into consideration the fact that the holder of these bonds has a five-year "call" on a 15–25-year 4½% bond of Great Britain and France, the writer personally doesn't see how any of your clients who are not prejudiced can fail to take advantage of this wonderful opportunity.

Call us up in the morning and talk it over; we will be right here waiting to hear from you.

C & B. E. B. S.

Exhibit No. 2288

New York, *Sept. 30, 1915.*

Daily letter, C. & B.

Requests for an interest in the underwriting of the Anglo-French five per cent five-year external gold loan of 1915 have poured in on the syndicate managers from every direction to-day and the subscriptions now aggregate a very large proportion of the issue. Just to give you an idea of how they are going we can mention in a semi-confidential way that one large industrial concern subscribed for $50,000,000 of the bonds to be withdrawn for investment; another industrial concern $20,000,000; one of the big banks here in New York turned in a subscription for one individual customer amounting to $3,000,000; one of the trust companies reported an individual subscription of $2,000,000; Boston has already turned in more than $25,000,000; Pittsburgh $15,000,000, and the Twin Cities—St. Paul and Minneapolis—have asked for $10,000,000, although it was not expected that they would take more than $2,000,000. We turned in a subscription for $50,000,000 and N. W. Harris & Co., Boston about $2,000,000.

We hear that large subscriptions are coming in from sections that had previously indicated an attitude of lukewarmness toward the loan, and just as a little sidelight we might mention that Robert Lee has turned in an application from a bank cashier who is about as thoroughly German as anyone this side of the Atlantic; and we might add further that this particular man thinks he does not like us very well—in other words, we have an application from a German who is not influenced by any partiality toward us and therefore must be convinced that the invitation to come into the syndicate is an opportunity that he cannot afford to pass by.

Here are a few details by the issue—bonds are to be dated Oct. 1st; interest payable semi-annually; underwriters may pay in full or on about Oct. 15th or in instalments, the details to be advised later; when the public offering is made bonds sold to investors may, if desired, be paid for in instalments, the first payment to be made around November 1st.

It is mighty interesting and in every way desirable to be identified in a prominent way with the handling of what is by far the most important financing ever done in this country. The opportunity to invite our customers to share in the underwritings on the same terms as the most inside insider is valuable in many ways and will strengthen our relations with some extremely important investors.

Some one has asked to whom bonds will be sold on the public offering if everyone is invited to enter into the syndicate and that prompts the suggestion that generally speaking there is no occasion to approach small investors in connection with the information of the syndicate. Let's save a few of them to buy the bonds on the public sale.

W. E. B.

P. S. Here is the latest word from Morgan's office: Mr. Anderson says they have eight men working on the tabulation of subscriptions and as nearly as they can now estimate the total is an excess of $300,000,000. Among the subscriptions are:

1 for $50,000,000.
1 for $20,000,000.
1 for $13,000,000.
1 for $10,000,000.
1 for $6,000,000.
6 for $5,000,000.
1 for $2,500,000.

and a huge pile of smaller ones.

W. E. B.

EXHIBIT No. 2289

ADDRESSES DELIVERED TO THE REPRESENTATIVES OF BOND HOUSES ASSEMBLED IN THE ASTOR GALLERY OF THE WALDORF ASTORIA

NEW YORK CITY, *October 8, 1915.*

The meeting was called to order by Mr. J. P. Morgan at 4:30 p. m.

Mr. MORGAN. I am going to speak sitting down, if you gentlemen don't mind, it is easier and less formal.

What we are here for today is to find out about these bonds. You are the gentlemen who have got to sell them, and we want you to know what we know about them.

The other day we were talking this matter over and somebody said to me, "You may know something about these bonds, but there is not one of us who knows anything about them at all." So I thought we had better get together and talk about them.

It is such a simple story it is rather difficult to tell at length.

The bond is a perfectly directly straightforward obligation of the two greatest countries, financially, that the world has ever known. There are two or three questions that come up about it.

In the first place, the safety of it. Now, my answer as to the safety—perhaps before we begin on the safety we had better begin on the neutrality of it. This bond, in my opinion, is not a war bond. It is giving America's customers time; the best customers that America has and has had for years, ask for time to pay what they are buying here. They are buying much more than they usually do, and they are selling much less than they usually do. It seems to me that a country which is starting out to be a world power in trade, must learn that it must give its customers time, wisely, properly, when their credit deserves it, as a bank has to do, and, therefore, this is not a pro-ally affair or an anti-German affair, or anything else; it is a pro-American affair, and that only.

As to the safety of the bond, the revenues of Great Britain and France, the taxation revenues this year are about two thousand million dollars for England, and something about a thousand million dollars for France—I haven't got those figures.

The bond being the only external debt of those two countries is substantially, as is always understood with external debts in countries that have them, the first charge on the revenues of the country. It is absolutely imperative for the country to make good the external bonds, no matter what arrangements it has to make as to internal affairs, because it may want to come again, and without incurring the worst form of bankruptcy and disgrace, it cannot abandon its external debts; not that there is any thought of doing so or of coming again.

The total income of England and France are figures which we are trying to get which we will contribute to you as soon as we do get them.

The total income of the people of Great Britain is supposed to be about two thousand four hundred million pounds a year, that is about twelve billion dollars, and of that they could collect by taxation a considerable part, so it looks like pretty good security for a loan of five hundred million dollars, the interest on this loan being only twenty-five million dollars a year.

Of course, it is absurd to talk about national incomes and taxation of a large part of them and all that sort of thing—all I want to show is that the countries are real things and very big earning properties themselves, and that you are getting what amounts to a first charge on the income of them.

Now, the next thing is the question of the price. When we came to these negotations, the Commission, in discussing the matter, as they did with us with great frankness, began by stating a certain few things that they could not do. Among other things they did not think they could do was to pay over five percent for the money, and the question was how much could they get at that. Of course, we did not know how much they could get at that, but we found that they wanted to secure five hundred millions of dollars, and finally, after a couple of weeks of conversation, we told them that we believed the bond would be good to go to a syndicate at 96 and the public at 98.

The syndicate is made, that is out of the way. The public, at 98, gets the bond, which is a five-year bond, on very nearly a five and one-half percent basis.

They realized that sentiment would not move people to buy any such quantity of bonds as that, that they had to meet the market conditions in this country, or they could not get anything, and they finally came to the point that 98 to the public would be satisfactory to them.

Now, no such yield has ever been made on government bonds since the Civil War, except the French bond put out in 1871, only to the extent of ten million pounds, merely to give the new government a chance to start. For that they paid more. English and French government bonds have been sold on two and three-quarters and two and a half and two percent basis for many years. This is five and one-half percent.

Of course, the countries are at war, and they had to compete with good American bonds at five percent to make it attractive. The more I hear of it, the more I am convinced that before many months the American public is going to realize that this is a premier security with a very attractive return. Now, there is another feature of it [the Anglo-French loan], and that is the convertible feature. Five years from now this war, please God, will be over and well over. Whichever side has won, these bonds are good; nobody is going to extinguish any great nation. The reconstruction period may be a little prolonged, but on the whole a British-French four and a half percent bond with ten years to run, at the end of these five years, is going to be a premier security, and that is going to be at a premium, unless something very strange happens to the world. If the French and British credit is back in their own countries at a three and a half percent basis, and it suits those countries to buy these bonds, there ought to be a premium for them. It looks to me that is the feature that ought to be talked to people as the selling feature.

Now, the question is: Is the country ready for a foreign loan? You, of course, know about that better than I do. I believe it is or in a short time will be. Trade is spreading out, there is an enormous amount of selling of our materials that has been done, and there is a great amount of cash in the country to be invested. The investible surplus is much larger than usual, and with all that before us, I believe that the people will be glad for a chance to make a variety in their form of investments; that they will feel that they have got this much in railroads and this much in city bonds and American securities of other kinds, and perhaps something outside the country, which is based on a perfectly good credit and pays a handsome return will be very desirable to mix in with some of the other securities.

The security being good I believe the bond is safe and right and desirable.

I don't want to bore you by sitting talking about this thing—I don't know how to make a speech—but I want Mr. Morrow to tell you a little bit more. He has got more of the points in his mind in regard to the thing than I have. I am going to ask him to talk to you about it. (Applause.)

Mr. Morrow. Mr. Morgan and gentlemen! I am sure that Mr. Morgan's statement that I have more of the points in my mind than Mr. Morgan is not accurate, and I do not feel prepared to make a speech. I am sure that all of you are so familiar with this general subject that you would have little patience with speech-making. When we break up into a social meeting—and I gather that the primary purpose of this meeting is to get together in a social meeting all of us who are going to be responsible for this great piece of work—we want to have a full interchange of views and learn something from each other.

In going over the various statistics that have been gathered together about the Anglo-French loan by the various houses which have been studying the subject—some of which statistics have been put in the envelopes that were handed to you as you came in the door—I have been very much impressed by one sheet, the sheet which shows the range of prices, and range of yield, of British consols and French rentes, during practically a period of one hundred years.

One hundred years is a very long period commercially. One hundred years in this country has witnessed practically all our railroad development. It covers the period during which all of our railroad bonds have been created. It covers the reorganization periods that have come at stated intervals. Much less than one hundred years, in fact, a quarter of a century, will cover practically the period of electrical development. During that time the electrical seucrities have become popular and have been sold to investors and now are looked upon as among the most conservative investments that can be made. This hundred years which has witnessed the development of two new industries, two new lines of investment for capital, this period is but a very brief span in the life of a nation. That one hundred years is a very small part of the life of France or the life of England. By looking at the range of the price of consols and of rentes during the last hundred years, I think we get a little away from the point of view that we are apt to have from reading the headlines in the daily papers.

To get a fair perspective on any security ,or any investment, or anything else important in the world, a man should lift himself a little above the impressions he gets at the moment, and try to fasten his mind upon those things that have been permanent. After all, the only way we can do that is by recalling history to ourselves. We are all saying now that this war is unheard of in the history of the world, and in a sense it is, but men have said that before during various other wars. We are all apt, in the midst of a panic, to think there has never been anything but a panic. Likewise, in times of prosperity, we are apt to think that times are always going to be prosperous and that there is never going to be a panic again. The wise man is he who is not too much affected by his momentary environment; the farseeing man is he who keep his mind poised in times of excitement.

Take England, for instance, and take this table of the price of consols, and see how truly it marks the current history of the country in other lines.

The Napoleonic wars which ended in 1815 ended a period of twenty-five years in which all the countries of Europe were torn, in which dynasties and empires were changed and maps made over. At that time—a time that cannot be compared in disorganization to the present day—at that time the British consol, already an old security, was selling on a basis, when it got at its lowest price, to yield 5.97 to the investor.

Come down to the period of the Crimean War. At that time the people of England looked upon that war with its mistakes as one of the darkest periods in English history. We have heard a great deal of the terrible loss of life among British officers this year. But you will recall that John Bright, during the Crimean War, used the expression that the Angel of Death was hovering over England, and that you could almost hear the beating of its wings. At that time, shells were thrown into Sebastopol at a rate comparable to the shell expenditure to-day. I believe the figures are that over a million and a half shells were poured into Sebastopol in the last thirty days of the siege. If you consider how much more expensive shells were at that time than they are to-day, the scale of expenditure must have been then staggering to the people who had to bear it. Yet British consols never sold on a basis that gave a higher yield than about five percent. Come down to the period of the Boer War, when there was a tremendous increase in the British debt. When you trace the history of governments which have gone on through these changes, through these periods of heavy expense and struggle and try to fasten your mind upon how a government security goes on, I think you get a little better picture of the relation of the government bond to a railroad bond or an electric bond or a mortgage on real estate. Changing industries, changing inventions, in one single century have made a startling difference in commercial investments. What a small difference it has made in the fundamental position of government securities!

Is this not a new thought to us all? The French peasant has bought bonds of foreign governments for a long time. For the simple reason that the people of old and wealthy countries, like France and England, could not find investment at home for their own surplus funds. We have heretofore been a borrowing nation. We are about to become, for a while at least, a creditor nation; and becoming a creditor nation is there any higher form of credit then the government obligations of the two richest nations in the world?

Now, take the situation in France for the last century. There has been one period after another that might had led men, affected very much by the moment or who did not keep their historical perspective, to say: "This is the end of things." The Napoleonic era with its revolution and anarchy, and then after that the restoration in 1814, the revolution under Louis Phillippe, in 1830; then another revolution in 1848 followed by a republic which soon changed into an empire; then the costly and disastrous defeat by Germany in 1870, followed by another revolution and the Third Republic.

Through it all the French rentes have given a not much higher yield to the investor than the yield offered to the American investor to-day.

Those facts are interesting not in themselves alone, but because of the different point of view that they compel us to take in looking at a government obligation as opposed to an obligation that depends merely upon the skill and ability and foresight of men, however wise they may be. A new invention may do away with prosperous sailing vessels. A change in a form of machinery may do away with this mill or that mill, however wise the people may be who have tried to foresee all the contingencies. Railroad investments and electrical investments have their vogue. But back of it all, in order to give any value to that type of investment, stand governments, and government obligations have been and will continue to be—if there is to be any order in the world—will continue to be the premier security into which investment money can go.

Now, I had not meant to talk this long, and I am only going to say one thing more. I think that all of us who are engaged in this work, in bringing to the American investor this kind of an investment, in trying to get him to diversify his risk by putting a portion of his surplus into a premier government security. I think all of us are engaged in a work of which we are going to be very proud when we look back upon it in later years. When this war is over we are going to be proud that we have had a part in helping to make the United States of America a creditor nation, we are going to be proud that this nation, which has had to go for so much of its investment money, in large affairs, to the other side, is having the other side come to it and ask for credit.

This country which has really been built up in this century that I have spoken about, this country is now in a position when its investors have a chance to get a "back log" in the obligations of two governments like England and France—I believe thoroughly in Mr. Morgan's statement that we all see clearly two or three years from now that this war cannot end in such a way as to involve the repudiation of the external debt of any first-class nation. Nations that depend so much on foreign trade must keep their external debt good as a basis for a continuation of their business. Holland, with its comparatively small military power, has had the highest credit. It may take very heavy taxation to take care of the service of England's debt, although not so heavy as after the Napoleonic wars, unless the war continues for five or six years. The ratio of England's debt to the income of its people, as estimated by Sir George Paish, will, after five years of war, still be less than the ratio of its debt to the income of its people at the end of the Napoleonic era. But remember that England to-day has investments all over the world. In Australia alone, in obligations representing railroads, public utilities, etc., England has an investment of some five hundred million dollars. The taxation at the end of this war is not apt to be as hard a burden on the country as it was at the end of the Napoleonic era, because it is much more likely to be, and ought to be, imposed upon the rich, who have accumulated property, rather than on the poor, as was the case at the end of the Napoleonic era.

This is all I have to say. I thank you very much for listening to me so long. I do not know when I have had the high privilege of having four or five hundred men who are as busy as you are and as important in the affairs of this country as one of you, to listen to me as long as you very graciously have done. I thank you. [Applause.]

Mr. MORGAN. To-day at luncheon Lord Reading was in the office—he is the chairman of the Commission—and he said, "You know, I think the most extraordinary thing about this whole negotiation has been the fact that you all came together, you all have been working together so that we are dealing with the united front of American business." I do not think that Lord Reading felt that he could get that done at home. The co-operation that has been secured in this country by everybody—everybody has turned to on this thing and helped every way they could, encouragingly, unseemingly giving of their time and trouble and all for no pay, so far. Now, we hope to get some.

I want to thank you all for myself personally and my partners as well as the house, that you have played up so splendidly with us. It has all been of the greatest help to us.

Now, I hope the meeting will become informal and we will get around and meet each other. [Applause.]

(The formal meeting was then closed.)

7972. For E. C. Grenfell. Matter entirely accomplished, expect to close underwriting Monday. Will make issue as soon as possible thereafter. We are more delighted than can say at loyal and gratuitous support we have received everywhere. Thing so much of a success am thinking more keenly of holding. Please disregard any former cables regarding aid from your side, as, of course, prefer to have our record clear as having done whole thing here. In case you desire any participation we will assign you from our own subscription. Cable for our opening Monday morning how much, if any, you would like.—J. P. MORGAN.

9202. 8862. For E. C. Grenfell. We have from start put ourselves down for minimum of $10,000,000, but among ourselves have agreed to hold ourselves further in reserve up to a total of $25,000,000, if that should be necessary. We have all thought it wise to make our amount somewhat elastic so as to be able to take up slack if necessary at last moment. We have also thought it to advantage in quoting figures to associates to intimate that such figures did not include our own subscription, leaving them to infer as favorable things as they might desire from such a statement. For your confidential information, amount of underwriting, outside our own subscription, $508,000,000. You can readily see, therefore, how near right we were when we declined to undertake formation of syndicate for over amount mentioned. Two weeks ago, just after agreement had been reached, Lord Reading asked us pointedly what our firm's subscription was going to be. At that time we declined to tell him and, in fact, did not relish the inquiry, but have since said to him substantially as above.

9296. 8952. The enormous amount of detail work in taking care of first payment from the underwriters on the fifteenth, and arranging for deposit of that payment in the subscribing banks all over the United States has made it impossible to even estimate the situation with reference to the public offering. We will try on Monday to give you the situation. Bear in mind, however, that most of the people who could be expected to buy the bonds for investment came in as underwriters and it will be only by hard personal work of the one hundred or more distributing houses that we have enlisted that the loan will be placed with the small investors.

9334. 9202. For E. C. Grenfell. For your information, when it became necessary last Friday [Oct. 15] evening to sign the contract with the Commission or delay their sailing next morning, we had failed to receive signed syndicate agreements for an amount upwards of $162,000,000 and therefore in order to have the contract cover the full amount of $500,000,000, this firm took the responsibility of $162,000,000. In doing so, of course, we undertook a very large technical risk because in case of some disaster it might be that these participants who had signified their acceptance by informal letter, telegram or telephone, might decline to sign agreement on technical ground that some part of its phraseology was not satisfactory. We should have greatly preferred, of course, to have delayed signing until agreements were all in, and perhaps it might not be amiss for you to point out to your friends that this was only one of several gaps that we filled in order to consummate the transaction. There has been no undue delay in securing signed agreements, such delay being due to the long distances, agreements having to be posted as far as California and return, and also to fact that many particpants had never before taken part in any syndicate, and sometimes would take several days to scan form of agreement. Response to public subscription is as yet very slow and frankly we do not look to see syndicate materially relieved under 90 days.

MORGAN.

EXHIBIT No. 2294

[Excerpt of letter]

BANK OF ENGLAND,
15th January, 1917.

DEAR MR. STRONG: The premature announcement of your authorization to appoint us as agents did not really do the faintest harm. The Governor particularly wishes me to thank you for your courteous telegram on the subject and to say that he quite realized what must have happened. As a matter of fact the announcement, though premature, was probably useful as it tended to allay the feeling of soreness which had been caused by the Federal Reserve Board's warning against taking either long or short loans of the belligerents. We ourselves, while declining to regard that warning as intentionally unfriendly, are still somewhat at a loss to divine its real purpose. I almost wonder that the Board, when it saw that millions of money were being invested in ephemeral works to supply the enormous temporary requirements of the Allies did not issue a warning in time to check such dangerous expansion. And if it had done so a year or two years ago it would have benefited not only the United States but also perhaps, indirectly, ourselves by forcing us to become more self-supporting. When however the huge outlay had been incurred and the gigantic orders placed, it did seem rather odd that a warning should have been given against facilitating the raising of funds with which to pay for them. However, we realize that, as the Spaniards say, everyone is master in his own house, and that we have no right to enquire the motive for your internal warnings and regulations.

Fortunately the American exchange position, which has given us plenty of anxious thought, seems easier now, and I hope that if money rates keep low on your side it may continue so. We have still a fair amount of gold to spare in case of need and our good friends the Japanese are helping us to a good many American dollars. But the war is not over yet, in spite of all the peace talk.

Yours sincerely,

(Signed) BRIEN COKAYNE.

BENJAMIN STRONG, Esq.

EXHIBIT No. 2295

FEBRUARY 27, 1918.

MY DEAR ADRIAN: In asking me to dictate the substance of what I stated last Friday to Mr. Root, you have imposed upon me a considerable undertaking which, in fact, I have not the time just now to carry out in full.

This letter will supplement the article which I sent you.

It is my belief that the country faces the choice of two courses: The first is to rely upon educating 100,000,000 people by strictly educational methods to practice thrift by denying themselves the purchase of luxuries, and in fact, anything and everything that they can get along without during the period of the war, so that materials and labor may be released from supplying those things and in place thereof be employed in the production of things essential to the prosecution of the war. The alternative is to abandon the educational means of accomplishing this and actually exercise control by legal methods over production and consumption in such a way as to produce the same results in a much shorter time

Failure to produce the result desired; that is, reduce consumption, means that the materials required for the war, both by this country and by our Allies, must be produced as an addition to the normal production of the country in peace time, thereby causing a tremendous expansion of credit, a shortage of labor and materials, constantly rising prices for labor and materials, a much more expensive war, domestic discontent with living hardships, and a mortgage upon the production of future generations that may prove to be a staggering load. The goods now produced and consumed in war, without the germ of reproduction in them, will be paid for partly by taxes and partly by bonds sold to those who have incomes in excess of their present needs. Those who buy the bonds must some day have their loans repaid by taxes collected from others in the future. The loans are mortgages upon the productive efforts of all the people.

Assuming, therefore, that either by educational or compulsory methods consumption must be curtailed, what means can be employed with safety and without disorganizing the country's affairs to get prompt results?

This is too big a question to answer offhand and without getting advice of men familiar with many branches of our business and financial life. My own ideas are rather crude, but may be expressed roughly as follows:

First, as to credit: Our banks should be organized and their officers educated, or in time required, to discriminate in the loans they make to their customers so that no credit will be wasted for purposes not essential to the war. If the 25,000 banks of the country could each curtail their credit $10,000 on the average, the loan and deposit accounts of the bank would be reduced by $2,500,000,000. The bank reserves would increase. Money would flow to the money centers. Interest rates would be reduced. The consumption of material and employment of labor which would have resulted from granting these loans would be saved, with, of course, some influence upon the prices both of materials and of labor.

Second, as to raw materials essential to war industries, feeding and clothing the people and other industries contributory thereto: The Government's policy in fixing prices operated either to restrain production or to divert the application of labor on farms and elsewhere to changing the production in form so as to escape the operation of the price-fixing policy. A farmer who may have ten or twelve ways of employing his soil or of applying his labor to it, might find wheat much less profitable at $2.20 than some other product of his farm, which might even nvolve feeding his wheat to stock. Unless all economic laws can be suspended or repealed by act of Congress I feel that it would be sounder to fix maximum prices for luxuries and let the prices of essential raw materials that enter into the production of these luxuries find their natural level. The consequence would be the widening of the margin of profit on the production of esxential raw materials and the diminishing of the margin of profit to the producer of non-essentials, which might, in fact, release labor and material and plants for Government use. This may not be the way to deal with the price question, but it illustrates the ineffectiveness of price fixing for some of our production with no control of other things.

Third. Whether consumption is restrained either by control of credit, control of raw materials, or by any other means, one consequence is to throw labor out of employment and make factories idle. Such a policy brings discontent and might, in fact, make the war unpopular. To deal with this makes it necessary for our Government to organize the industries of the country for war work just as rapidly as they are released from other work as a result of some uniform policy of restraint of consumption. To illustrate this point, let us assume the case of a shoe manufacturer whose normal production is 30,000 pairs of shoes per month. The Government, needing shoes very badly, asks him to increase his output so that he can deliver 90,000 pairs of shoes a month to the Army. This manufacturer finds it necessary to add to his plant, to vastly increase his purchase of raw material, to buy more machinery, to attract more labor to his plant and train it, to furnish housing for it. Nor is that all. It becomes necessary to provide expanded bank facilities; to enlarge trade and transit facilities in the town where his plant is located, and generally to reorganize the community to take care of an establishment three times as large as normally. How much better it would be for the Government to take over some existing plants, even located disadvantageously in some respects, and avoid all of this disorganization. If a plant manufacturing some other article could be converted into a shoe factory to produce 60,000 paits of shoes a month, buildings could be used; existing power plants could be used; labor already located there could be trained; banking, mercantile, and transportation facilities will be adequate, and no disorganization would result. The sole requirement would be to have the original manufacturer furnish supervision and a nucleus of men to train existing labor in the reorganized plant, and new machinery would need to be purchased and possibly the plant somewhat rearranged for its new production. The one notable exception necessary for such a program is shipbuilding, where absolutely new plants must be built at tidewater, and, of course, labor attracted there to operate them. Existing plants employed for other purposes cannot easily be converted into shipyards.

Fourth: Taxation forms just as important a part of the program for the conservation of resources as the first three named. If prices are to be fixed for raw materials under the policy now adopted, wasteful consumption must be restrained in order to insure a well-balanced price level so that the maximum prices fixed will not operate to restrain production. Probably consumption taxes, skillfully employed, particularly to articles of luxury which contain raw material elements which are essential for war purposes, are the only effective means of enforcing economy of consumption.

These few suggestions are really intended to point out what I believe is the conviction of many thoughtful people, that our present policy is not well-balanced either as regards credit, raw material, labor, industrial plants, and taxation. The whole program of organizing the Nation for war should be revised so that the maximum pressure can be applied to the one elementary and fundamentally national need at the present time to reduce unnecessary consumption and stimulate the production of essentials.

Beyond the economic problems there is an equally important social or political problem. We can lose the war just as promptly by failure of popular support of the war as we can by military defeat or exhaustion of resources. If the Nation's activities are not reorganized concurrently and by a well-balanced program, hardship is bound to result, caused in the one extreme by unemployment, or in the other extreme by inflated prices and consequent living hardships. So that it must always be borne in mind that one of the principal objects of a well-balanced program is to keep people employed and contented and enthusiastic about the war, rather than discontented and sullen and reactionary.

Very truly yours,

——— ———, *Governor.*

[Copy of telegram received from Morgan, London] (Dated 11/2/15)

10255. Denkbar for T. W. Lamont. As soon as if ever you have a little leisure, will you write me fully history of Anglo-French loan 1915 negotiations, plots and counterplots, and attitude of Commissioners. This would greatly help me as there has been considerable amount of underground work here, possibly begun in New York. Sir Edward Holden has returned with very swelled head and has been forming committee and making arrangements on his own authority. He has been always very jealous of Morgan houses and practically gave out here that he was going to work through other parties, from a committee of National City Bank, New York, Guaranty Trust Co., New York, and Bankers Trust Co. in New York, to your exclusion, hence some of the operations mentioned in 9583, 9638.

I hope, without my joining committee, that it will be formed tomorrow on lines entirely satisfactory to you. Lord Reading returned enthusiastic about J. P. Morgan & Co.'s treatment, but he has of course gone back to his legal duties, whilst Sir Edward Holden strutted about and said that he had done it all.

I hope this will give you our side of the picture, and we shall welcome yours.—E. C. G.

MORGAN.

[Copy of telegram despatched to Morgan, London]

9658. 10255. Denkbar for E. C. Grenfell. Two weeks ago dictated memorandum for you covering this matter, but because it contained pretty drastic criticism hesitated to send same. Am now transmitting to you tomorrow. For your further information remaining British and French Commissioners here express bitter disappointment over slow sales of loan, total sales to public being less than $10,000,000 over and above the $260,000,000 withdrawn by participants thus leaving $230,000,000 to be sold to the public. Sales proceeding so slowly that practically no chance before dissolution of syndicate December 15th of being able to dispose of any large amount. Believe syndicate will, in addition to amount withdrawn, have thrown back on its hands $150,000,000 or $200,000,000 resulting in probable decline in issue price. This depresses and alarms the Commissioners here greatly and they will probably communicate their views to Governments resulting in impression that we are not doing all that can be done to effect sales, which is the only method by which price can be legitimately maintained, and loss of credit not suffered by Governments. Lord Reading, however, will remember that throughout the negotiations we adhered to the position that the best possible plan for enhancing the credit of the Governments here and for eventually obtaining the largest possible credit was to authorize our forming initial syndicate $250,000,000, have same oversubscribed, with the result that the underwriting would be considered as very choice, bonds would be handled quickly, go to premium, etc., and put us in early position for repeated operation. Commission would not listen to this and insisted upon our conducting an operation which we plainly foretold them would surfeit everybody and, in the long run, prove nothing like as creditable to Governments. We are doing everything in our power to disprove our own prophecy, but the circumstances are too much for us, for in order to accomplish the $500,000,000 underwriting, we were obliged to throw it open to all investors of any size and even at that barely squeezed by the necessary mark. The result is that investing public came in largely on underwriting and on our offering we have limited public to appeal to until educational work throughout country has had opportunity to take effect, which will be a matter of not of weeks but of months.—THOS. W. LAMONT.

NOVEMBER 4, 1915.

[Pencil notation: "Bank of Montreal."]

R. Y. HEBDEN, Esq.,
64 Wall Street, New York, N. Y.

DEAR MR. HEBDEN: We haven't made any statement as to the amount of sales of Anglo-French bonds and, for tactical reasons, I would rather prefer to be in a position where we could make the statement that we hadn't given the figures to anyone. For your own information, however, the sales, while slow for the first few days, have been increasing in a very satisfactory way. It is too early yet to make a guess as to the total result of the sales by the time the syndicate is dissolved and I wouldn't want, at this time, to hazard an opinion on the subject.

There is one feature in connection with the business which is helping all the time and that is that people are requesting the privilege of withdrawing additional amounts of bonds and, while we have made no general agreement to permit withdrawals after October 15th, we have, as a matter of practice, been glad to encourage it and this has amounted to a very substantial total since that time.

Yours very truly,

——— ———.

New York, Nov. 11, 1915.

[Copy of telegram despatched to Morgan, London]

9832. 10366. For your information J. P. Morgan & Co. and Drexel & Co., Philadelphia, jointly signed for about $30,000,000 on the final syndicate list' This includes not only our own subscription, but that of our customers and the individual partners as well as Philadelphia houses and banks for whom Drexel & Co. took responsibility and signed up.

Final adjustment has not yet been made, but if our final commitment is reduced even to $5,000,000 as may be possible, we shall be quite content for the following reason which was not apparent at the time we had decided upon $10,000,000 as our minimum commitment see 9202, reason being that with bonds going as slowly as they are, it is increasingly manifest that upon dissolution of syndicate next month market price is practically certain to decline and we are anxious to be in a position ourselves to protect the market as far as may be feasible. After dissolution of syndicate there are really no members of group that we can ask to assist in this, it being quite a thankless operation. The figures may be so large that we shall be able to accomplish little, but we all think it wise to keep ourselves in reserve as much as possible. This explanation is made so that you may understand picture completely.

Morgan.

December 9, 1915.

Harris Trust and Savings Bank,
Chicago, Ill.

ANGLO FRENCH 5-S

Dear Sirs: We have all expected that when the Anglo-French syndicate agreement expired by limitation on December 15th the price of the bonds would fall off temporarily, at least, and most of us have been convinced that the market position of the bonds would be greatly improved by going through a period of readjustment. Undoubtedly there are a great many prospective buyers who have anticipated a break in price and were unwilling to buy until after the expiration of the syndicate agreement. There have been a good many indications that some important buying would take place whenever it appeared to the prospective purchasers that the bonds were being traded in at a natural price in an absolutely free market.

While, as stated above, we expected the price to decline with the closing of the syndicate, the break culminated a little sooner than we anticipated through some heavy selling of bonds on the exchange yesterday in the form of "seller contracts" at around 95. There were a few sales of bonds for regular delivery at 97½, but the bulk of the business was done for future delivery at the lower price.

We have this morning discussed the matter with J. P. Morgan & Co. and they have authorized us to trade the "seller contracts" at the market. This puts us in a position to fill orders from customers at a close market price and is in every way to the advantage of this deal in particular as well as the general market situation. We have just wired you briefly so that you may understand that we no longer feel obliged to confine our dealings to sales at the agreed syndicate price of 98.

As intimated above, we are quite confident that unrestricted trading for the time being "at the market" is all that is needed to stimulate the demand for these bonds and that any turn may reasonably be expected to put the bonds back within a short time to a point more nearly in keeping with their actual investment value.

It seems to the writer that we have here the peculiar situation of a bond which on any basis of comparative value is undoubtedly worth 98—the regular syndicate price—but which because of the unusual quantity and other special factors, could not be kept at that price long enough to complete the distribution of the entire issue and put the bonds in the hands of permanent holders.

We shall be glad to execute orders for the bonds at the market.

Very truly yours,

(Signed) Harris, Forbes & Co.

October 29, 1915.

Messrs. Lazard Freres & Co.,
Paris.

Dear Friends: We have to thank you, Mr. Michel Lazard, for your private letter of October 8th. We were glad to hear that friend Thibault stood the operation well & we hope that by this time he has fully recovered.

We overlooked to mention to you that we took a participation of $1,000M in the Anglo-French loan of which we gave away about $300M to private clients. Not very much interest is taken by the general public in these bonds & it is therefore difficult to predict whether the syndicate will be able to uphold the quotation at anywhere near the issue price when the syndicate is once dissolved. The synd. will, however, not expire before the middle of December.

The so-called war stocks have a considerable decline this week on rumors of peace, but the general market has ignored this weakness in specialties & today's market is firmer than ever with large speculation in a wide range of stocks most of which are at the highest prices so far reached.

Yours very truly,

(Signed) Lazard Freres.

EXHIBIT No. 2303

[Pencil notation: Mr. Anderson answered this letter; regular file]

HEAD OFFICE,
BANK OF MONTREAL,
Montreal, 28th April, 1916.

G. L. 22.

MY DEAR MR. LAMONT: I wonder, if you are at liberty, if you would be good enough to tell me, for our own information only, how the absorption of the Anglo-French loan is going on.

I am asking this as a possible investor. It is so very difficult to employ our funds that I feel tempted to put a few millions into the Anglo-French loan, as the yield is so highly attractive. I should not like, however, to do so unless the process of absorption is well under way, in which event the price should presently rise.

The seeming apathy of America towards this loan as reflected in the price seems to us as interested onlookers almost inexplicable. No matter how the tide of battle may ebb and flow England must and will repay to any holder who wants his money the principal sum when it falls due in the year of grace 1920.

By the way, will you also let me know what sort of a market there is in the bonds and if it is likely to become more free or less free.

With kind regards and thanks in anticipation, believe me, my dear Mr. Lamont,

Yours very truly,

F. W. TAYLOR.

T. W. LAMONT, Esq.,
Messrs. J. P. Morgan & Company,
23 Wall Street, New York.

MAY 1ST, 1916.

SIR FREDERICK WILLIAMS TAYLOR,
Bank of Montreal,
Montreal, P. Q., Canada.

MY DEAR SIR FREDERICK: I returned this afternoon from my brief holiday in the South and find upon my desk your letter of April 28th, to which Mr. Anderson has very carefully and intelligently prepared the enclosed reply, which I have signed.

I could not myself have stated my own views more explicitly than Mr. Anderson, in anticipation, has done for me.

My guess upon the course of any particular security usually turns out wrong; but, if I were obliged to guess in regard to the Anglo-French bonds, I should be inclined to think that, even with the steady absorption which is going on, it would be some little time yet before we should see a material advance in the security. The reason, aside from possible war with Germany or anything of that kind, is that undoubtedly a good many American manufacturers still have on hand considerable holdings of this security, and, while, as Mr. Anderson points out, we know of no particular orders that are hanging over the market, the chances are that some of these manufacturers, as they require cash for their business, are likely to liquidate their holdings.

For the long pull, we have never had and haven't now the slightest misgiving as to the course of this security. With the handsome convertible clause that it possesses, we cannot see how it can possibly fail, in due time, to show a handsome advance.

Yours very truly,

——— ———.

MAY 1ST, 1916.

SIR FREDERICK WILLIAMS TAYLOR,
Bank of Montreal,
Montreal, P. Q., Canada.

MY DEAR SIR FREDERICK: This answer to your letter of the 28th April has been delayed a few days as I have been taking a week's holiday.

Regarding the market for Anglo-French bonds, I can easily understand the attraction of the bonds at their present level to anyone who realizes, as of course we both do, that the loan is perfectly good under any circumstances. We have, of course, bonds of our own, which remain from the original syndicate, and we consider the bonds very cheap at their present level. There has been, so far as we can tell from the action of the market and the inquiries which come to us, a good bit of outside buying on the part of people who, like yourself, feel that the bonds are good and, at the going price, attractive on a money basis. One of the big insurance companies recently bought a substantial block of the bonds and other purchases which have happened to come to our notice have indicated that the same process is going on elsewhere. We are not so closely in touch with the buying by small, individual investors, but, from the reports that come to us, it seems to be clear that a steady absorption in small-denomination bonds is going on all the time. As against this, some of the larger interests—notably the manufacturing concerns who subscribed to the loan from business reasons when it was first arranged—have found it advisable to convert some of their bonds into cash, and the selling of one or two large amounts of this sort is probably the reason for the market's having failed to advance more from the recent low. So far as I know, there are no amounts of this sort overhanging the market at the present time, the only selling order of which we have happened to be advised being a small one with less than $200,000 bonds remaining to be sold. As a matter of curiosity, I have had tabulated the transactions on the stock exchange since the active trading began, a few days prior to the dissolution of the syndicate, and it aggregates approximately $89,132,000.

I think you will find the market an entirely free one, if you mean by that phrase the existance of any "peg." I believe the market is one which is responding to the natural laws of supply and demand and I don't see any reason why it should not continue to be governed by the same influence.

With kind regards, my dear Sir Frederick, believe me,

Yours very truly,

——— ———

[Mr. Sweezy]

NOVEMBER 4 1915.

N. W. HARRIS & CO., INC.,
Boston, Mass.

DEAR SIRS: If you have not already received a letter from the Guaranty Trust Company giving the details of the proposed advertising campaign on the Anglo-French bonds you will probably receive such a letter in a day or two. We are writing you this letter so that you will have fuller information regarding this advertising campaign than is given in this letter.

At a conference about a week ago it was decided to discontinue the large syndicate advertisement and in place of this large advertisement to run a number of single, double, and triple-column advertisements. These advertisements are to appear under the name of different houses; and while they are to be paid for by the syndicate, the idea is to make them appear to be the individual advertisement of the different houses. It is proposed to give every member of the underwriting syndicate the opportunity of running a number of these advertisements. A committee composed of a representative of the Guaranty Trust Company; White, Weld & Co.; Lee, Higginson & Co.; William A. Read & Co.; and Harris, Forbes & Co., has been working on this proposed advertising campaign for the last ten days. It is proposed to spend about $80,000 in advertising in the New York territory, which sum it is estimated will be sufficient to run at least three advertisements of each of the houses in about fifteen different newspapers.

Messrs. J. P. Morgan & Co. have written to the seven central cities, including Boston, suggesting that they carry out a similar advertising campaign in their territory, the expense to be met out of the funds of the syndicate. Each house is to be allowed to prepare its own advertisements and place them through their own advertising agents. We have prepared in New York and have had set up about fifty different advertisements, which advertisements will be available for the other central cities if desired.

Chicago and St. Louis have already indicated their willingness to cooperate in this advertising campaign. At the request of the Central Trust Company of Illinois we are sending a member of this committee out to Chicago to help them get their advertising campaign started.

Yours very truly,

——— ———.

HCN-GB.

EXHIBIT No. 2307-A

DECEMBER 17, 1915.

Messrs. J. P. MORGAN & COMPANY,

GENTLEMEN: We desire to submit the following report covering the special advertising of the Anglo-French bonds. The campaign began on November 8th and was concluded on December 10th. It will be noted from the comparative figures that the amount actually expended was very much less than the amount originally appropriated. This was due to three facts:

1. The total number of houses participating in the advertising was considerably less than had been estimated;
2. Most houses decided to use none of the 3-column copy that had been prepared;
3. During the last 10 days the campaign, instead of running at full strength, was greatly reduced.

The principal facts in regard to this campaign are as follows:

1. Total number of New York houses participating	58
2. Total number of lines used in New York newspapers	37, 454
3. Total number of cities represented in campaign	41
4. Total number of New York houses using out-of-town papers	11
5. Total expense of New York committee	$21, 402. 82
6. Total expenditure of the 6 "central committees" (Richmond decided not to advertise)	$41, 277. 95

	Appropriated	Expended		Appropriated	Expended
New York	$80,000	$21,402.82	Baltimore	$3,000	$1,647.23
Chicago	15,400	8,809.19	Pittsburgh	5,500	567.74
Philadelphia	25,000	1,733.05			
Boston	23,000	7,117.92		151,900	41,277.95

Yours very truly,

SPECIAL ADVERTISING COMMITTEE,
ANGLO-FRENCH LOAN SYNDICATE.

FWE:F.

EXHIBIT No. 2308

NEW YORK, *December 21, 1915.*

Messrs. J. P. MORGAN & Co.,
Wall & Broad Streets, New York City.
(Attention of Mr. Lamont.)

GENTLEMEN: The special committee on advertising of Anglo-French bonds held a meeting today and discussed very thoroughly the subject of future advertising. As a result of the meeting we desire to submit the following recommendations:

1. That for the present there be no advertising whatsoever.
2. That the question of time for beginning a campaign for advertising be considered about January 5th, at which time the market conditions then prevailing can serve as a basis for a more intelligent determination of the date on which advertising should begin.
3. That subject to modifications at that time, campaign consist of advertisements of standard magazine page size to run regularly for ten weeks in all the leading weekly periodicals.
4. That the advertising consist of a series, say 10 advertisements, written by the very best editorial talent that can be secured and that the advertisements shall be exclusively educational in their character, and with the exception of perhaps the last two or three advertisements, make no reference to selling.
5. That each advertisement bear the signature of J. P. Morgan & Co. in such capacity as you may determine. In our judgment an advertisement unsigned would not only be useless but positively harmful.

In this connection we feel that a series of advertisements over the names of individual houses participating in the recent syndicate would result in so many complications as to be impracticable.

The committee would be glad to hold itself in readiness to discuss this matter fully with you at any time convenient to you.

Yours very truly,

———— ————.

EXHIBIT No. 2309

JANUARY 6, 1916.

Messrs. J. P. MORGAN & COMPANY,
New York City.
(Attention of Mr. Lamont.)

GENTLEMEN: In accordance with your recent suggestion, the special advertising committee of the Anglo-French Loan Syndicate has discussed very thoroughly the subject of future advertising of this issue.

The committee feels that any advertising which may be done, in order to be effective, must carry some signature; but that there are insurmountable difficulties to any plan of advertising over the signatures of syndicate participants.

The committee believes that possibly a limited amount of advertising of a broad educational character and bearing the signature of J. P. Morgan & Company, in such capacity as you may determine, might be of value.

The committee holds itself in readiness to discuss this matter fully at your convenience, if you so desire.

Yours very truly,

CHAIRMAN, SPECIAL ADVERTISING COMMITTEE
ANGLO-FRENCH LOAN SYNDICATE.

FAIRFAX HARRISON, ESQ.,
1300 Pennsylvania Avenue, Washington, D. C.

DEAR MR. HARRISON: Attached hereto is a statement which a number of eminent gentlemen in this country have expressed their desire to sign and which, if you approve, we should be very glad to have your name added to. The Anglo-French loan is of such great importance to the country and the opinions of its leading citizens are at this juncture of such moment that it has been deemed wise to gather up various opinions, put them in the form of one concise statement and then have that statement signed by various leading men.

Those who have already expressed a desire to sign are James J. Hill, Howard Elliott, Henry L. Higginson, Theodore N. Vail, Robert T. Lincoln, Seth Law, and others. The matter is, of course, very confidential in its present stage, but we shall be very happy if you can wire us tomorrow morning as to how you feel about being added to the list of signatories.

Mr. Morgan started tonight for his camp in the Adirondacks for a little rest or he would have written this letter himself. It carries with it the best regards of himself and Mr. Steele and their earnest hope that your views may coincide with these other gentlemen and that you may be willing to sign this statement, which probably would be given out sometime early next week.

Very truly yours,

T. W. L.

TWL-Dt.

NEW YORK, *October 28, 1915.*

MR. JOE MCKINNON,
1967 Lowell Avenue, Butte, Mont.

SIR: Following a discussion with Mr. Thomas R. Gibbs, of Boston, Secretary of the Scottish Clans, and Mr. Walter Scott, of Butler Brothers of New York, and at their suggestion, we are sending you by express, one hundred envelopes, each containing a circular letter, prospectus, and statement referring to the Anglo-French External Loan, with the request that they be distributed among the members of your organization. Both of the gentlemen referred to consider this plan of distribution the one which will be most agreeable to you and most satisfactory in all respects.

We shall appreciate it if you will forward a statement of expense incurred in addressing and distributing these letters.

Very truly yours,

J. P. MORGAN & CO.,
Agents for Syndicate Managers.

[Confidential]

BONBRIGHT & CO.,
Paris, 20th July 1915.

[Pencil note: Ans'd 8/9/15.]

WILLIAM P. BONBRIGHT, Esq.
N. Y.

MY DEAR MR. BONBRIGHT: I wrote you last on July 19th. Yesterday I dined with a friend of mine who is well posted on the financial situation here and particularly on the Franco-American situation. He has been the last three years director of the Banque Privee and has lately joined Messrs. Morgan, Harjes & Co.

I gathered from him that the Banque Suisse & Francaise, whose directors he knows very well, has formed a syndicate of influential Paris bankers who nave jointly drawn on bankers of your country (I believe particularly upon Brown Bros.). Those drawings have been rediscounted by the American bankers at your National Bank; and thus a credit has been provided for the French Bank, which I am told amounts to about 20 million dollars, more being expected to be added as time goes on.

I suppose these drawings have influenced the exchange situation and this is probably the operation which I mentioned to you in my letter of July the 8th.

Speaking in a general way of the Franco-American financial situation my friend was of the opinion that you will in America come by and by to the idea of financing European requirements with much greater facility than now.

He mentioned a possible operation of England and France jointly, operation which has not taken place yet because the English find money easily on much cheaper terms and conditions in their own country.

I understand that the Banque Suisse et Francaise had a representative of their own, Mr. Rossier, in America for the last three or four months.

I am telling you all this to show you know everybody is following with the keenest interest this financial situation and how the largest banks in France are trying to decide their American connections to finance European requirements. It is certain that American financiers have not yet taken a decided position in this war, which is no doubt particularly due, besides commercial reasons, to the attitude of your Government, and I therefore understand why you have not been able up to now to make use some proposition which would carry the approval of financial interests here.

What your politics will do, it is difficult to guess; but everybody here believes that you will slowly come if not to war, to take more and more morally and practically the side of the Allies—then your capital will flow much more easily to Europe. But I am afraid that, by that time, there will be so much competition in the market that your own case will not stand clear as it stands now, and we shall not anyhow draw out of it the advantages which we can secure at the present time.

I have often regretted that you did not see your way to come over to Paris during all these months because you would have been able to judge the present situation, take advantage of it, and also discuss how this house out to be organized to take advantage in the future of certain requirements in French industrial, financial, and commercial services.

I do not want to look discouraged and I believe there will be ample work for all, but at the same time I cannot help being afraid sometimes that we shall miss this opportunity of getting widely known and establishing ourselves here and in England in the manner you had in mind when you opened the London and Paris offices.

The Societes de Credit here have such bad name that there are good chances, particularly for houses with foreign connections; but we must go impressively into the field. I know that your field has been America up to now, and naturally a very satisfactory field, but I am afraid that the competition of European borrowings will be so heavy during the next years that you will not be able to sell any American securities here and therefore turn to other fields, which are:

First.—Participation in European financings.

Second.—Participation in the reconstruction period, principally through the medium of F. P. E. C. organized in such a way as to meet quickly the requirements here.

I had gone so far in this letter when I received your most interesting letter of July 8th and the letter signed by Mr. Rodgers of July 9th commenting upon the financial arrangement related above. Here, we are under the impression that this business was not done with Morgan, but particularly with Brown Bros., the French bankers who drew being guaranteed by the Bank of France.

To answer Mr. Rodgers' remark I wish to say that this business is a private business done between banks, and that the French State has nothing whatever to do with it. In such arrangements it is possible to get the guarantee of the Bank of France, but when you are dealing direct with the French State, as we have been trying to do, the bank of France cannot be used.

I have read your letter of July 8th with a great deal of interest and I can but approve all of the suggestions you make to reach the small investors, I do not know how cheap metal-pins and buttons with the Arms of France will be received in America, but an acknowledgment signed by the French Ambassador might not be a bad idea at all as it is very similar to the one made by the Bank of France of which we have sent you a proof.

I have written you why that proposal did not and could not succeed in France; it was much too small and the repayment clause in France during the time of the loan was particularly disliked, wrongly perhaps, it is true.

I had again this morning a long interview with Mr. Pechadre. It is a pity to know what amount of business we are missing through not being able to make a financial proposition to France. The Chemins de Fer de l'Etat, for example, have made important purchases in America and are going to make some more, and I suppose there are many similar cases.

I gave Mr. Pechadre an "apercu" of the situation in New York and I think I will decide him to go and see Mr. Ribot to ask him to send him, Pechadre, to the U. S., possibly with me, to discuss a loan to France with you. You will realize that, if Mr. Pechadre goes over in such capacity, it will not be to find 20 or 40 million dollars for France; it must mean big business, an actual national loan placed in the U. S. in small denominations, just the very ideas you have.

I am still expecting an answer to our cable no. 59 and naturally I will only try to decide both Mr. Pechadre and Mr. Ribot to send such a mission to the U. S. if you can give me the moral assurance that it will not remain without results.

We have been talking on the subject of collateral and have been wondering if you would accept as collateral for an issue any such securities as: Bons du Credit Foncier, or Obligations of the State Railways of France, or similar.

We think that the money loaned to France, whether it is coupled or not with a purchase privilege, should not cost more than 8 to 8.50 percent. In fact I know that Mr. Ribot if you could at least give us 50 million dollars would give you the sale of French notes in the U. S., one year, special issue, in small denominations, at somewhere round 95, 94.50, 94, with a placing commission for you and the syndicate.

Now, I am ready to work on that idea of a mission to the U. S. with the fullest powers if I get some encouragement from you. That encouragement means that, when Mr. Pechadre arrives to N. Y. he is to meet all members of your syndicate and that you and your syndicate are willing to undertake the placing of the national loan to France at acceptable terms and in a large amount. Mr. Pechadre has promised me, and I am sure of his promise, that he will go to the U. S. after having gotten all power needed here, if I can give him the assurance that he will not have to come back with empty hands. The decision remains in your hands.

This national loan will certainly be placed once in America; I think we have the best of chance that the business can be done through us if we act now. If we wait too long it will again go to others.

It would have been a great moral help for me to know something about your syndicate.

You write that the terms you have offered for the Italian and French business are only made practicable by the willingness of F. P. E. C. to give one-half of their well-earned fees to the bankers. I was under the impression that we controlled that F. P. E. C. and can only hope that they have not too much saying in this business. They should be perfectly satisfied with a purchase commission of 1 percent or even a smaller share. I am sure that you would find it cheaper to go direct yourselves to the manufacturers in the U. S. and interest the said manufacturers in your loan.

We are all disappointed that you cannot use the proposed shipment of gold and we shall try, if this is acceptable, to find some actual collateral. What an awful blow that Morgan-Rothschild business is, but do you not think that its effect can now be considered as discounted once for all.

Until I hear again from you I shall not approach private banks to perhaps try smaller business as that done with Brown Bros., as I still consider it a great deal better to do business with the French State direct. I shall not see Mr. Ribot until I have something new to tell him.

You may rest assured that I will never say anything reflecting upon the Morgan house, as I feel anyhow, as you do, that they are and have always been a great honest power in your country.

Thanking you sincerely for your wishes for my brother whom, I am sorry to say does not show any sign of recovering, I am, dear Mr. Bonbright,

Yours very sincerely,

(Signed) FISCHER.

[Pen written: I am leaving tonight for Berne to see my mother and will investigate Swiss national loan conditions.]

362A/146

J. P. MORGAN & CO.,
EXPORT DEPT.,
New York, March 28, 1916.

[Telegram from Morgan, London, 9:32 a. m.]

14974. 15971. For G. W. Bacon. Appreciate your prompt reply which was discussed with authorities yesterday morning. Price of $30,500 each for 100 howitzers which Midvale Steel Company now ask is considered exorbitant, particularly as their former price of $27,500, as Corey will recall, was regarded by Sir H. F. Donaldson as excessive.

There is possibility Midvale Steel Company might secure order for 100 British 8-inch howitzers, carriages, and limbers, British inspection, if they are prepared submit reasonable offer, and I suggest you advise them put forward their best proposal if they are really serious.

Confidential, for your information only, manufacturing facilities have increased enormously here and under system of controlled factories prices have been and are being greatly reduced.

If American manufacturers desire secure further orders, it will be necessary for them to work on much closer margin than heretofore.

At conference yesterday morning, price of $24,000 was suggested as fair, and $26,000 as liberal. It is my guess that Midvale Steel Company could secure order for 100 howitzers at latter price possibly with a bonus of, say, $500 or 750 per howitzer on all deliveries within 10 months from date of order. Please see Corey and/or Dinkey again, discuss situation, and cable results.—E. R. S.

MORGAN.

Exhibit No. 2318

146/362a

J. P. Morgan & Company,
Export Dept.,
New York, March 29, 1916.

[Telegram to Morgan, London, 12:30 p. m.]

17110. 14974. 15971. For E. R. Stettinius. 8-inch howitzers: Have conferred fully with officials Midvale Steel Co., who state it is impossible for them accept suggestion of $26,000 per gun, including bonus of $750 for deliveries within ten months from date of order. The reasons for declining this suggestion are as follows:

(1) The actual shop cost of gun, including carriage and limber and amortization of plant, they estimate under most favorable manufacturing conditions at $26,000.

(2) Any price now accepted from British Government would necessarily form price basis for future manufacture for United States Government.

(3) United States Government have recently purchased 6-inch howitzers, including carriage and limber, comparable with the 8-inch guns in every way except as to size, at $30,425 each.

Therefore, Midvale Steel Co. insist, while they desire meet views of Ministry of Munitions of War and of doing this business, they cannot meet suggestion contained your 14974, and if this insisted upon would have to drop whole matter. They now offer, however, as final concession in this matter to manufacture 100 8-inch howitzers with carriage and limber, at price of $27,500 each, stated our 15971, for 200 such guns. Delivered your cable in entirety to W. E. Corey, yesterday, who then stated very frankly would meet your views even though he did not make a dollar on the order, provided on investigation he did not find this would jeopardize future relations between Midvale Steel Co. and U. S. Government. He now finds, as above outlined, that such relations would be seriously affected by accepting your suggestion and therefore states you may regard their offer herein as Midvale Steel Co.'s last word. We would add for your information that, in hearing before Committee on Naval Affairs, United States Senate, last week, strong pressure was brought to bear on American manufacturers, charging discrimination against United States Government in favor of foreign governments for whom work had been done at lower prices. Midvale Steel Co. state, if offer herein contained accepted, Ministry of Munitions of War should take immediate steps to facilitate prompt initiating of manufacturing processes insuring earliest practicable deliveries by detailing competent shopmen or Army officers, or both, to cooperate with its officials.

Morgan.

333. Your 673. Amounts involved so large that we are almost at entire loss how proceed. No hope of arranging even double tentative amount suggested by us without enlisting co-operation leading institutions outside cities, which for moment we are unwilling attempt. If that party requires, as you indicate, 150 as total for past, present, and near future operations, it is then clear she must export gold on large scale or enter into some joint undertaking with British Government, or give us time confer here with all chief interests looking towards acceptance proposition on a very large scale, in which we should be obliged seek open approval of Federal Reserve Board at Washington inasmuch as such steps would involve co-operation of many national banks and adoption of a policy by Administration towards all belligerents alike.

We shall await your further comments meanwhile conferring privately with associates like G. F. Baker.

[Copy of telegram despatched to Morgan, Harjes & Co., Paris]

J. P. MORGAN & Co.,
New York, Mar. 15, 1915.

491. Your 759. Duration option not very material to us. These friends seem wish money so earnestly that we have no misgivings as to our being able secure second lot at same prices as first. We talked of selling three and five year maturities at 5.90 interest basis. Whole operation including bankers' commission would cost 6.40%. We are now, however, somewhat more dubious as to our ability form syndicate on basis mentioned, even if your friends request it.

EXHIBIT No. 2329

J. P. MORGAN & Co.,
New York, Mar. 17, 1915.

[Copy of telegram despatched to Messrs. Morgan, Harjes & Co., Paris]

496. Your 761. Our 486, 491. Figures given your 761 exactly correct. We also should have preferred straight commission transaction but thought that such form of transaction might be more difficult politically for your friends. Therefore we devised this special exchange transaction in which our commission included. If transaction had gone through along lines suggested we should have planned subject alteration on account market conditions to offer yearlings 5% discount basis, three years and five years both 5.90% basis which would mean approximate commission for our group as follows: One year 1%, three years 1½%, five years 2%. Trust this explanation makes clear exact nature original suggestion. Since that was made security market here has gone decidedly flat. Are therefore convinced impossible form group underwrite firm amount and terms mentioned. If terms are altered so as permit us offer one year at 5½% straight three and five years 6% with commissions to group as just stated above we might be able to do something.

We realize these rates are high and should not for moment urge France consider them, but we must face investment conditions here as they are at present. No belligerent country's securities are popular and while faith in France undoubted, investors will not be attracted by her securities except at high interest rates. As conditions are today they regard your securities as no whit better than Switzerland not at war.

For your information, in recent Swiss offering which was virtually without commitment on part of banking group, commission paid ran up to 2½%.

Suggestion which we made last week was due urgent request Jusserand and Leon that we should try work out some suggestion on behalf your friends, our own advice being that owing to necessarily high rates interest involved, it might be more creditable for France do nothing at present although we must point out to you that proposed basis to investor not materially above what your new ten-year bonds will cost Government if they are redeemed end five-year period.

(Rec'd. Mar. 19th).

[Copy of telegram received from Morgan, Harjes & Co.]

765. Thanks for your clear 496. Your efforts much appreciated by French Government which, however, considers operation still too complicated and expensive. Can you not make them a tentative and somewhat more advantageous offer for one category of notes, say one year at a fixed price in dollars, perhaps including your commission, or two- or three-year notes with a straight commission. Failing this, can you not make arrangements for some form of commercial credit, say for six months which would not cost more than, say about 6% in all. What French Government wants is apparently not so much financial accommodation as to secure dollars and thus overcome present exchange situation.

EXHIBIT No. 2331

J. P. MORGAN & Co.,
New York, Mar. 18, 1915.
(Rec'd. Mar. 19th).

[Copy of telegram received from Morgan, Harjes & Co.]

766. Refer our 765. As another suggestion, could you, for instance, make proposition that you would attend to all payments of purchases up to a certain amount and up to given period and be willing receive in exchange therefor six months Treasury notes at present rate of exchange on basis of, say 5½% plus commission of say ½%?

Exhibit No. 2332

J. P. Morgan & Co.,
New York, Mar. 19th, 1915.

[Copy of telegram despatched to Morgan, Harjes & Co., Paris]

504. Your 765. For your private information. We are now working on question issuing for account your friends up to $50,000,000. One year notes on 5½% basis, our commission, about which we are as yet undecided, to be in addition. Hope to be able have our ideas in definite shape by Monday. Until then prefer not take up question commercial credits.

Your 766. This plan impracticable because it is necessary for us re-sell these notes to investors and it would be impossible do so when amount which we might have for sale would vary so from day to day.

Will keep you informed as to developments.

Jack sailed on steamship "Philadelphia" yesterday for England.

Exhibit No. 2333

J. P. Morgan & Co.,
New York, Mar. 22, 1915.

[Copy of telegram despatched to H. H. Harjes, Esq., Paris]

510. Our 504. Are suggesting to Leon, who is transmitting to Washington, that we form group to offer twenty-five or fifty million dollars, as we may mutually decide after testing market, one year 5% notes at 99½. Of this amount we take firm $10,000,000, charging an inclusive commission on total sales of ¾%, out of which we shall pay for employment of distributing houses throughout country, expenses of advertising, etc. For your own information, we should expect retain only ½% for group which includes McRoberts and Baker.

We believe in present state of investment opinion, which rather adverse to any belligerent note, it would be exceedingly wise for your friends readily accede to this small extra commission payment for purpose of securing interest and active co-operation banking institutions of leading cities throughout country, in hope of thus establishing these French notes and paving way for later more extensive operations. Opportunity for doing this apparent, because no one of belligerents has yet undertaken similar operation.

Total inclusive cost this proposed one year operation 6¼% as contrasted with 6% which they might agree to on six months operation as per your 766. In our judgment, extra ¼% more than offset by advantages yearlings and of proposed wide distribution. These are points which we explain fully to you because as banker you will appreciate them, whereas Leon and his chief do not understand them. Further, your friends must lay down dollars in New York, and if they fail pay rate that will result in creditable loan operation, then they must pay as much or more in exchange.

Your 767. Exceedingly difficult make alternative proposition as requested, for, in order secure helpful co-operation banking community, we must be clear cut in our propositions and not confuse by offering alternatives. Our judgment is, suggestion as outlined will be more effective for your friends than trying work out your 766, 767.

Exhibit No. 2335

[Memorandum as submitted to M. Leon on March 23rd, and initialled by him; superseding the one dated March 22d, which was canceled]

M. L.

MEMORANDUM

The following memorandum is submitted for the benefit of the French Republic:

1. An amount of $25,000,000 or $50,000,000, as may later be determined, of French one-year 5% notes to be offered upon a 5½% basis.
2. Of the total issue, whatever it may be, Messrs. J. P. Morgan & Co., National City Bank, First National Bank, and such, if any, associates as they may elect, to take firm $10,000,000.

3. An inclusive commission of three-quarters of 1% to be paid, out of which the group mentioned must arrange for its own compensation, for the compensation of associated banks and trust companies where these securities may be offered throughout the country, for expenses of advertising, etc.

4. The following clauses to be embodied as to the issue:

The notes to be of the denomination of $1,000, or Fcs. 5,181.25.

The notes to be payable in francs or dollars, at the option of the holder, at Paris or in New York, at the office of J. P. Morgan & Co., at the par of exchange, or Fcs. 5,181.25 per $1,000.

This obligation is exempt from all present and future French taxes, including any income tax.

Payment of interest on the notes and payment of the principal thereof shall be made in time of war as well as of peace without consideration of the holder's nationality being that of a friendly or hostile state, and without proof being required in that regard.

Provisions for the registration, and place of registration, in New York, of the principal of the notes, should be made.

The group may see fit to attach hereto other provisions such as are usual in the issuance of notes, and such as are of value in indicating to the investor the merits of the security.

The proceeds after conversion into dollars to remain on deposit with such Institutions as Messrs. J. P. Morgan & Co. may indicate, and to be expended only for purchases made by the French Republic in this country.

MAURICE LÉON,
COUNSELLOR AT LAW,
New York, March 31st, 1915.

Messrs. J. P. MORGAN & CO.,
National City Bank of New York.
First National Bank of New York.

GENTLEMEN: In accordance with your message received through Messrs. J. P. Morgan & Co. your letter under date of the 29th addressed to His Excellency, Mr. Jusserand, the Ambassador of France to the United States and which I handed to the Ambassador yesterday morning was corrected as follows:

> YOUR EXCELLENCY: We, the undersigned, J. P. Morgan & Co., National City Bank and First National Bank, of New York City, propose to offer at 99½% of par, and interest, such amount as you and we may hereafter agree upon, up to $50,000,000, of five percent *Treasury* ~~gold~~ *bonds* ~~notes~~ of the French Republic, to be dated April 1st, 1915, to mature April 1st, 1916, and to bear interest coupons payable respectively on October 1st, 1915, and April 1st, 1916.
>
> Of the total issue of such ~~notes~~ *bonds* we propose, in behalf of ourselves and associates, to buy outright at the price of 99½ and interest, $10,000,000.
>
> For the compensation of ourselves and our associates we propose to charge a commission of three-quarters of one percent upon the par value of the total amount of ~~notes~~ *bonds* bought or sold by us; such commission to be paid simultaneously with the credits we may give you resulting from the proceeds of these ~~notes~~ *bonds*. This commission shall be inclusive, and the expenses of advertising and offering shall be for the account of ourselves and our associates.
>
> The proceeds resulting from the sale of this issue of ~~notes~~ *bonds* are to be credited to the account of the French Republic in such institutions as we may indicate, and to be expended only for purchases made by the Republic in this country.
>
> The form of the ~~notes~~ *bonds* is to be mutually agreed upon by us, but the following general conditions are to apply to their issue:
>
> The ~~notes~~ *bonds* are to be designated as French Treasury bonds, and are to be of the denomination of $1,000 or fcs. 5,181.25.
>
> The ~~notes~~ *bonds* are to be payable, at the option of the holder in dollars in New York at the office of Messrs. J. P. Morgan & Co., or in francs in Paris at the French Public Treasury, at the rate of fcs. 5,181.25 per $1,000.
>
> The obligation represented by this ~~note~~ *bond*, and all payments in discharge thereof, are and shall be exempt from all present and future French taxes, including any income tax.
>
> Payment of interest on the ~~notes~~ *bonds* and payment of the principal thereof shall be made in time of war as well as of peace without consideration of the holder's nationality being that of a friendly or hostile state, and without proof being required in that regard.
>
> Proper provisions for the registration, and place of registration, in New York of the principal of the ~~notes~~ *bonds* to be made; usual charges in the payment of coupons not exceeding ⅛% upon the amount of interest disbursed, to be made.

Your acceptance in behalf of the French Republic of our proposal as set forth in this letter, upon the terms specified, will constitute the agreement between us and the French Republic.

Yours very truly,

(Sgd.) J. P. MORGAN & Co.,
(Sgd.) THE NATIONAL CITY BANK OF NEW YORK,
By F. A. VANDERLIP, *P't.*
(Sgd.) FIRST NATIONAL BANK OF NEW YORK,
By F. L. HINE, *Pres't.*

His Excellency, JULES J. JUSSERAND,
French Ambassador.

I have handed each of you a triplicate acceptance subscribed by the Ambassador as follows:

AMBASSADE DE LA REPUBLIQUE FRANCAISE
AUX ÉTATS-UNIS,
Washington, le March 30th, 1915.

GENTLEMEN: I beg to acknowledge receipt of the letter of the 29th inst. simultaneously signed by J. P. Morgan & Co., the National City Bank, and the First National Bank of New York, concerning the issue of five per cent French Treasury bonds to be offered at 99½% of par, to be dated April 1st, 1915, and mature April 1st, 1916, and the total amount of which may reach 50 million dollars.

In accordance with the instructions received from my Government, I have the honor to state that I accept, on its behalf, the clauses and conditions stated by you with the only exceptions of:

1st. The word *gold* notes, which I gather from your telegram of to-day's date, is to be considered as duly erased from your said letter; the bonds will, therefore, be called, like those issued in November last, French Treasury bonds ("Bons du Trésor Public Francais").

2nd. The statement, new to me and to which no allusion had been made before, concerning "the usual charges in the payment of coupons not exceeding ⅛% upon the amount of interest disbursed, to be made." As I was unaware of this request before this morning, I am without instructions as to its being considered acceptable or not by my Government, to whom I have cabled.

Availing myself of the powers I have received, I have appointed to sign the bonds, on behalf of the "Contrôleur Central du Trésor Public", Mr. Heilmann, Commercial Attaché to this Embassy; and on behalf of the "Caissier Payeur Central", Mr. d'Halewyn a member of the personnel of the French Consulate General, New York.

The same letter is being sent to the three signatory banks.

I have the honor to be, Gentlemen,

Sincerely yours,

(Sgd.) JUSSERAND.

Will you be good enough to confirm the receipt from me of such acceptance?

Yours very truly,

MAURICE LÉON.

("EXHIBIT No. 2342" appears in text on p. 8198.)

EXHIBIT No. 2343

MAURICE LÉON, COUNSELLOR AT LAW,
New York, April 1st, 1915.

MESSRS. J. P. MORGAN & Co.,
NATIONAL CITY BANK OF NEW YORK,
FIRST NATIONAL BANK OF NEW YORK.

GENTLEMEN: I beg to confirm the information which I gave Messrs. J. P. Morgan & Co. yesterday at the direction of His Excellency, the Ambassador of France to the United States, namely:

1st: That the French law of March 27th, 1915, provides for an increase of the authorized amount of French Public Treasury bonds to four and a half billion francs and that said law was promulgated and published in yesterday's issue of the Official Journal of the French Republic. A copy of the Official Journal of March 31st containing said law will be furnished to you on its receipt in due course by the Embassy.

2nd: That the French Government approves the clause in your letter under date of the 29th ult. to His Excellency relating to a banker's charge not exceeding one-eighth of one percent on the amount of interest paid on the presentation in New York of coupons belonging to the issue of dollar and franc one year French Public Treasury bonds dated April 1, 1915.

In accordance with instructions received this morning from the Ambassador I have made final corrections in the proof of bonds with coupons, talon and stub attached furnished by the American Bank Note Company, the text of said proof as corrected being approved by the Ambassador.

Very truly yours,

MAURICE LÉON.

[Confidential]

New York, *June 16th, 1915.*

[Stamped: Answered Jun 16, 1915, F. B. B.]

F. L. Hine, Esq.,
President, First National Bank,
New York City.

Dear Sir: We beg to advise that under the contract dated March 29th between the French Ambassador, on the one part, and ourselves, yourselves, and the National City Bank on the other part, we have disposed of a total of $26,200,000 French Republic One-Year 5% Treasury bonds (including the $10,000,000 purchased firm).

After deducting from the compensation of ¾% received such expenses as were incurred in connection with the issue and sale of these bonds, there remains

$104,370.65; and for your one-quarter share of this amount we enclose check to your order for $26,092.66, receipt of which please acknowledge in final settlement of your interest in this business.

Yours very truly,

J. P. MORGAN & Co.

Enclosure.

J. P. MORGAN & COMPANY,
EXPORT DEPT.,
New York, May 28, 1915.

[To Ministere des Finances, Pour Harjes, Paris]

10047. Referring latter part our 10046. It is, of course, most unfortunate that French notes should sell so soon after issue on any such basis, particularly in view of no untoward event having occurred. Naturally this detrimental to French credit and would certainly make extremely difficult any further French financing. Of course, it would be very beneficial to entire Allies' situation if the market could be supported. We venture to suggest for your consideration the question of our buying in market for account of French Government notes up to £1,000,000, drawing on London therefor. We appreciate this suggestion may be shocking in view of urgent need of funds by French Government this market.

MORGAN.

[Copy of telegram received from Harjes, Ministere Finances]

15057. Your 10046. Will answer first part concerning St. Paul and Pennsylvania loan tomorrow, Monday. In the meantime, however, will be glad if you can reconsider exact proportion of mixture, as proportion you require will be hard to establish, especially as about 90% of Pennsylvania issue supposed to be held in France and only 60% of St. Paul. Hope therefore you can give us more latitude.

As regards last paragraph and also your 10047, concerning French notes, we are all greatly shocked and upset, and unable to understand what is the reason sudden fall. Please give us your full views in detail to permit us to appreciate as comprehensively as possible exact causes and situation. In the meantime French Government authorize you to support market by buying for their account up to £500,000. Before drawing on London, advise us in time.

HARJES, *Ministere Finances.*

EXHIBIT No. 2349

LOAN TO DE ROTHSCHILD FRERES

May 28, 1915: The First National Bank, National City Company, and J. P. Morgan & Co. agreed to lend de Rothschild Freres, Paris, up to $30,000,000 on their prommissory notes maturing July 1, 1916, with interest at 5%; compensation was a commission of 1¼%. The notes were secured by deposit of Pennsylvania Railroad Company 3¾% French franc loan certificates due 1921, and Chicago, Milwaukee and St. Paul Railroad Company French 4% debenture due 1925.

June 15, 1915: It was agreed to increase the loan to $40,000,000.

1915	Amounts loaned	Pennsylvania collateral	St. Paul collateral	Commission of 1¼%
		Fcs.	*Fcs.*	
June 19	$23, 335, 562. 50	80, 427, 500	72, 462, 000	$291, 694. 53
June 26	6, 664, 437. 50	19, 322, 500	24, 463, 000	
June 26	10, 000, 000. 00	33, 713, 000	34, 090, 000	
June 26	2, 102, 632. 50	7, 987, 000	6, 238, 500	234, 588. 38
July 12	88, 147. 50	287, 500	310, 500	1, 101. 83
Sept. 25	2, 175, 000. 00		15, 000, 000	
Oct. 12	70, 615. 00		487, 000	
Total	44, 436, 395. 00	141, 737, 500	153, 051, 000	527, 384. 74

1¼% commission on the loan was received from French Commercial Agency account and applied as follows:

Expenses for cables, etc	$1, 000. 00
Morgan, Harjes & Co	105, 476. 95
First National Bank	105, 006. 58
National City Company	105, 006. 58
J. P. Morgan & Co	210, 894. 63
Total	527, 384. 74

August 20, 1915: Arrangements were made with Kuhn, Loeb & Co. whereby they agreed to buy all Pennsylvania bonds pledged under the loan, and such additional Pennsylvania bonds as might be acquired.

January 17, 1916: An arrangement was made for the sale to Kuhn, Loeb & Co. and the National City Company of the Chicago, Milwaukee and St. Paul Railway Company bonds pledged under the loan, and also such additional bonds as might be acquired by the French Government for whom de Rothschild Freres were acting.

The total amount of St. Paul bonds sold under the arrangement with Kuhn, Loeb & Co. and the National City Company was Fcs. 182,143,000 bonds and the total amount of Pennsylvania bonds was Fcs. 194,411,500.

J. P. Morgan & Co. underwrote one-quarter of the National City Company's purchase and sale of the Fcs. 182,143,000 St. Paul bonds and received profits on the sales as follows:

February 11, 1916	$162, 750. 00
January 2, 1917	18, 600. 00
March 4, 1919	577. 40
Total	181, 927. 40

New York, April 22, '15.

[Copy of telegram received from Morgan, Grenfell & Co., London]

2985. For H. P. Davison. Both Herman and I inexpressibly sad over the situation of French business in New York. There is one method suggested which seems to me might be considered. Rothschild told me they could probably send back to United States nearly the whole of the $25,000,000 Chicago, Milwaukee and St. Paul franc bonds, also the $25,000,000 Pennsylvania Railroad franc bonds. Both of these are due within few years. Rothschild suggested getting a loan on them. It occurs to me that possibly the U. S. railway companies concerned might like to buy them, issuing therefor other securities, which seems to me would be easier handled than a loan on franc bonds. Chief difficulty I see is that Pennsylvania Railroad business being in hands Kuhn, Loeb & Co. and they having considerable to say in regard to Chicago, Milwaukee & St. Paul, they might endeavor to prevent such a transaction taking place, but should be glad your opinion whether something could not be struck out of this idea. The French Government would acquire the bonds by giving new national defence bonds which pay better rate of interest. The United States railroad bonds could then be sold to parties in New York, if those parties could dispose of the securities; or possibly the railroads would take them up with other securities which could be disposed of in United States market. Please cable your views about this.—J. P. Morgan.

[Copy of telegram despatched to Morgan, Grenfell & Co., London]

3036. For J. P. Morgan. Your 2985 most interesting and hopeful of working out something. Total issues of two securities mentioned each $50,000,000, not $25,000,000. Hardly possible that railway companies concerned would consider, repurchase for the reason that they now feel securities are nicely tucked away, but there is possibility might consider purchase small amount for sinking funds, especially Pennsylvania Railroad early maturities. Probably only way to handle that end would be to include Kuhn, Loeb & Co. in business, explaining this being attractive business on its merits and not taken up as accommodation to France. Meanwhile some plan of group loan with these securities as collateral strikes us as feasible. Is it your idea that Rothschild and leading institutions would make separate loans or that Banque de France would make time loan analogous to Bank of England demand loan? If matter ought to be handled promptly, then we should get loan proposition in shape for final consideration here by ourselves and associates and leave question of actual sale of securities until little later to be taken up discreetly. Your more complete views as to form of loan, promisor, et cetera, will be welcome. For your information, in reply Herman's request, are offering advance Government up to $10,000,000 at 4½ percent, against gold in transit or gold deposited with Herman for immediate shipment to us.—H. P. DAVISON. THOS. W. LAMONT.

MORGAN.

[Copy of telegram received from Morgan, Grenfell & Co., London]

4122. For H. P. Davison. Your 3036. Group loan you speak of would be made either to French Government or to Rothschild, whichever you prefer. French Government would not consider operation worthwhile unless it could be done for, say $50,000,000 or $60,000,000. Think form of loan should be time loan on the securities for a year, possibly two. What would be your idea as to margin required? Loan made this way would enable us to take up the question later of exchange of securities, and Kuhn, Loeb & Co. would not have to be taken into consultation at present. Communicate your answer in this matter to H. H. Harjes who will be in Paris Monday.—J. P. M.

[Copy of telegram despatched to Harjes, Paris]

619. Jack's cable. After careful consideration with trio suggest following:

That we can probably take firm say thirty Rothschild and thirty Bank of France one year at 6%, to be secured by mixture in each of St. Pauls and Pennsylvanias, also very desirable if possible to have in addition some other American standard securities, in order to, perhaps lessen the amount of Pennsylvanias, which are of course first class, but in view payable in francs only, might raise question, whereas St. Pauls payable francs or sterling. Therefore mixture would go much better.

Loan should have margin of 20% upon New York value of securities, taking exchange into consideration. Securities agreed upon should be shipped to us to be held during life of the loan. It is our idea that we would issue certificates against the loan and in part place them with our friends, and perhaps a little more generally.

As to rate we would have been glad to have reduced below 6%, but after careful consideration are convinced that rate is fair and proper.

Suggestion that Bank of France make half the issue made as on account of legal limit, institutions could take twice as much in aggregate of two makers as of one. If for any reason bank cannot join, we could probably handle Rothschild issue, but perhaps for somewhat lesser amount.

While not a condition, we would suggest an option should be given us on the securities, which after loan is negotiated might be handled to decided advantage of owners. We think, however, would be most unwise from political standpoint prior to making of loan to raise question of sale or exchange of securities.

Please keep us posted any developments.

DAVISON.

[Copy of telegram received from Harjes, Paris]

826. In view of recent events Minister of Finance suggests that public opinion in U. S. A. likely more favourable to belligerents obligations than few weeks ago and that consequently some financial arrangement with France might now have better chance of success. Have you been able to ascertain general feeling and could you tell us whether in your estimation something could be done on the lines we discussed in London of a loan against St. Paul and Pennsylvania bonds or a commercial credit or preferably both, or any other method. Although recognizing lack of urgency, Minister of Finance naturally desirous of takingadvantage of any good opportunity. Even if something very big could not be done he feels as we do that the mere moral effect of additional financial assistance on your part would be of great help. Understand from Rothschild Freres, Paris, that original issuing banks consider they would be able to secure French bonds of Chicago Milwaukee & St. Paul and Pennsylvania up to a considerable amount. Refer to H. P. D.'s cable 619: In addition to objections referred to in my letter to you of fifth, consider margin asked too big. Now that you control future purchases, could you not arrange for these that sellers accept payment by means of renewable six months drawings on groups of U. S. A. banks to be arranged by you, drawings to be discounted at once. Anything that you can do in assisting financial future requirements of our friends will be much appreciated.

[Copy of telegram despatched to Ministre des Finances pour Harjes, Paris]

10016. Your 826. In view President's note to Germany, situation here not at all clear. Therefore this inopportune time to reconsider general financing plan. However, we undoubtedly could arrange for loan on bonds along lines our 619. Before receipt your 826, we had contemplated and now propose that if considerable amount of Chicago, Milwaukee & St. Paul and Pennsylvania Railroad bonds could be bought on basis around existing quoted prices on Bourse, we might arrange some scheme of financing whereby we could induce companies to exchange or in some other way handle securities so that proceeds of purchase in dollars computed at exchange rate to be determined, say 5.35, would be credited here to French account. If loan proposition not now interesting, advise us whether you believe we could buy bonds. If so, about what amount and upon what basis. On receipt of information, we will give matter further consideration.

[Copy of telegram despatched to Ministre des Finances, pour Harjes, Paris]

10046. 15047. We make following proposal to you, good until close of business June 18th: Trio will make loan to Rothschild Freres, Paris, any amount up to $30,000,000 for one year from date of loan, all loan to bear same date and to be payable in dollars at office of J. P. Morgan & Co. Loan to bear 5 percent interest, payable semiannually, to be sold to us at 98¾ percent, to be secured by mixture of St. Paul 4% franc debentures due 1925, and Pennsylvania 3¾% franc loan due 1921, but not more than half Pennsylvania bonds. This discrimination not due to credit of companies, but is due to fact that St. Paul bonds are sterling as well as franc bonds. St. Paul bonds to be put in at $75 per 500-franc bond, which allows about 7 points margin based upon present price exchange, and $77.50 on 500-franc Pennsylvania bonds, which allows about same margin. Bonds to be deposited with J. P. Morgan & Co., New York City. We hope both Minister of Finance and Rothschild Freres, Paris, will appreciate that we wish to avoid being technical, but that strong prejudice prevails against loaning upon securities held in belligerent countries; that while we greatly regret annoyance and expense incident to shipment, it is necessary in order to handle loan. We would not wish guarantee of French Government upon notes, but would like an official letter from French Government guaranteeing payment of loan in dollars in New York City at maturity, which guarantee we would not expect to make public. Please answer promptly if this option accepted and steps taken to put matter through. We greatly regret to inform you that French notes recently sold by us here have been sold in this market today at 96¼, or about 10% basis.

MORGAN.

EXHIBIT No. 2357

J. P. MORGAN & Co.,
EXPORT DEPARTMENT,
New York, June 7, 1915.
(Dated June 6, 1915.)

[Copy of telegram received from Harjes. Paris]

15086. Following is translation of a letter which we have handed to Minister of Finance today. Please cable promptly your confirmation. Translation begins:

As representatives of J. P. Morgan & Co., New York, we have the honor to confirm to you in their name the following agreement arrived at between the French Treasury, J. P. Morgan & Co., New York, and de Rothschild Freres, Paris.

Our New York house undertakes to allow to de Rothschild Freres, Paris, an advance in dollars up to $30,000,000, secured by Chicago, Milwaukee & St. Paul 4% 1925 bonds, and Pennsylvania R. R. 3¾% 1921 bonds, which will be accepted as guarantee upon the basis of 77½ dollars per bond for the Pennsylvania R. R. 3¾%, and $75 per bond for the Chicago, Milwaukee & St. Paul 4%.

This advance will be made in one lump for one year from a date which will be fixed later at the expiration of the option referred to hereafter.

This advance will bear interest at the rate of 5% per annum, payable half-yearly.

In addition, a fixed commission of 1¼% on the amount of the advance will be allowed to J. P. Morgan & Co.

In order to give the necessary time to secure the Chicago, Milwaukee & St. Paul and Pennsylvania R. R. bonds, a time option is given up to the 18th June inclusive, at the expiration of which the French Treasury will be called upon to take a definite decision, refusing or accepting the operation, and in the latter case fixing the amount for which it accepts.

This reply must be given to us in Paris in due course.

J. P. Morgan & Company not desiring to make an advance exclusively secured by the Pennsylvania R. R. bonds, would have wished in the deposit of the bonds a proportion of one-half of each category. However, desiring to facilitate in every way possible the realization of this operation, they do not insist upon this condition, but it is undertook that until the expiration of the option which they have given, they will be kept advised by cable, in due course, of the proportion of each category of bonds which becomes available as security, so that they may be able to judge if the proportion of each category does not exceed that acceptable by them, eventuality which they do not anticipate.

The French Treasury undertakes the transportation of the bonds to New York City, and will have them delivered to J. P. Morgan & Co., who will take delivery of same and hold them at the disposal of de Rothschild Frères, Paris. This latter house will have to arrange with J. P. Morgan & Co. for the bonds to be set aside as guarantee for the advance made to the French Treasury through the intermediary and under the name of de Rothschild Frères, Paris.

J. P. Morgan & Co. will credit de Rothschild Frères', Paris, account with them upon the date which will be fixed as that upon which the operation commences, of the amount of the advance, and that same day J. P. Morgan & Co. will transfer at once to the *credit of the French Treasury*, in an account on their books, this same amount, of which the French Treasury alone will have the right to dispose.

On the other hand, it is understood that the French Treasury considers itself entirely responsible, not only for the payment of the commission and interest, but for the payment of the capital, to J. P. Morgan & Co., resulting from the conclusion of the present operation.

Against the reimbursement of the amounts due to J. P. Morgan & Co., the bonds given as security will be liberated from their appropriation, and becoming liberated they will be at the disposal in New York, of the French Treasury.

We request you to be good enough to confirm to us that you are in accord with the foregoing, and remain, et cetera.

HARJES.

EXHIBIT NO. 2358

PARIS, *le 18 Juin 1915.*

Messieurs J. P. MORGAN & Co.,
New York.

MESSIEURS: Conformément aux accords intervenus entre le Trésor Français, votre Maison et la nôtre, d'après lesquels vous consentez à nous faire une avance en dollars pour le compte du Gouvernement Français destinée à être transférée le même jour au crédit du compte chez vous du Trésor Français, d'un montant de: $30,000,000 (trente millions de dollars) gagée par des Obligations 3¾% 1921 Pennsylvania et des Obligations 4% 1925 Chicago Milwaukee & Saint-Paul acceptées respectivement en garantie, sur les bases de $77.50 pour les premières et $75 pour les secondes, nous venons, par la présente, vous confirmer les engagements que nous prenons dans cette opération.

Nous acceptons, comme intermédiaires entre le Gouvernement Français et votre Maison, de figurer en nom pour l'avance.

Nous devrons, en conséquence, recevoir de vous toutes les sommes provenant de ladite avance. Il est entendu que toutes les sommes que nous recevrons ainsi de vous, dans ces conditions, seront transférées immédiatement au crédit du compte du Trésor Français dans votre Maison, lequel en disposera à sa convenance.

Par contre, nous prenons tous les engagements qui découlent du fait de cette opération, c'est-à-diré que nous nous engageons aux diverses échéances de cette opération d'avances, à vous rembourser les sommes qui vous seront dues tant en intérêts qu'en capital.

Vous recevrez directement du Gouvernement Français les Obligations Pennsylvania et Chicago Milwaukee and Saint-Paul qui servent de garantie a l'opération. Vous les conserverez entre vos mains comme gage et il est entendu que ces titres ne redeviendront libres que contre les payements que nous nous engageons à vous faire, aux échéances fixées, des sommes qui vous seront dues.

Il va de soi que dans le cas de non exécution de ces engagements vous êtes autorisés à réaliser le gage ci-dessus spécifié, conformément aux lois en vigueur de l'Etat de New York.

Recevez, Messieurs, l'assurance de nos sentiments distingués.

se Ruturinily.

J. P. MORGAN & Co.,
EXPORT DEPARTMENT,
New York, June 21, 1915.

[Copy of telegram despatched to Morgan, Harjes & Co., Paris]

10143, 15139. Form of note as submitted is unsatisfactory, not being sufficiently clean-cut and specifically referring to other documents which, in order to make the records complete, would have to be attached. Furthermore, might be read as if de Rothschild Freres, Paris, were simply acting as agents, whereas they are principals in the instrument so far as lenders are concerned. Form of note should read as follows:

"On July 1st, 1916, for value received, we promise to pay J. P. M. & Co., N. Y., or order, $23,335,562.50, with interest at the rate of 5% per annum, payable semi-annually, principal and interest payable at the office of J. P. M. & Co., N. Y., there having been pledged with and delivered to J. P. M. & Co., N. Y., as collateral security for the payment of the principal and interest of this note Fcs. 80,427,500. S¾% Penn. R. R. 1921 bonds, and Fcs. 72,462,000. 4% Chicago, Milwaukee & 3t. Paul 1925 bonds."

As to date, this first note should be June 19th, other notes for succeeding amounts as of dates when we make several credits. You will note that we have suggested making them all payable July 1st, 1916, thinking that this is more clean-cut and will please your friends.

If you can arrange note in this form signed by de Rothschild Freres, Paris, without any reference French Government, we will waive any change in the loan agreement and also any specific provision in the note with reference default and power of sale.

Greatly hope French stamp matter can be arranged, otherwise we should be at a loss as to procedure.

MORGAN.

10126. 15123. Arrangements as stated perfectly clear and satisfactory. Government revenue stamps here necessary to make note legal amount to two cents per $100, invariably paid by borrower. Will you arrange this or is it too late? If so can charge it pro rata to any joint profit which accrues to us.

In view of fact this loan certain to leak out in garbled form, do you not regard it as wise for us announce briefly that Rothschild de Freres, Paris, have arranged to borrow in this market considerable amount, sum not to be mentioned, for year against satisfactory American Railroad securities, the proceeds having been placed here to credit French Republic.

Kindly cable promptly on this point.

MORGAN.

[File copy]

AUGUST 20TH, 1915.

Messrs. KUHN, LOEB & Co.,
Corner William & Pine Sts., New York City.

DEAR SIRS: We beg to confirm our agreement with you for the sale to you of certificates forming part of the Pennsylvania Company 3¾% French franc loan of 1906, under the following conditions:

(1) Subject to our obtaining, within twenty days, assurances satisfactory to the Pennsylvania Company on the points indicated below and subject to the completion of arrangements between you and the Pennsylvania Company for the issue of new certificates in exchange for said 3¾% certificates of the French franc loan of 1906, and for the stamping of the 3¾% certificates as payable in dollars only, we agree to sell to you and you agree to purchase from us 283,475 3¾% certificates of the face value of Fcs. 500 each at a price of Fcs. 486 per certificate plus accrued interest to the date of your payment therefor, such purchase price to be payable in dollars at the fixed rate of exchange of Fcs. 5.65 to the dollar. You are further to pay to us an amount which, allowing for the interest thereon at the rate of 3% per annum, will discharge interest at the rate of 2% per annum, payable on January 1st, 1916, and July 1st, 1916, on $77.50 per certificate of Fcs. 500 from the date when you pay for the same.

(2) Subject as aforesaid, we further agree to sell to you and you agree to purchase from us, at the price of Fcs. 485 per certificate of Fcs. 500, together with accrued interest to the date of payment, plus Fcs. 5 commission on each certificate of Fcs. 500, any and all additional 3¾% certificates of said issue of 1906 purchased for your account and delivered to Messrs. Morgan, Harjes & Co.; payment to be made to us in dollars at the fixed rate of exchange of Fcs. 5.65 per dollar. Messrs. Morgan, Harjes & Co. will cable us daily of the amounts of any certificates so purchased for your account and delivered to Messrs. Morgan, Harjes & Co., which amounts we will communicate to you daily.

Your agreement to purchase such additional certificates is, however, to be subject to termination at any time, upon three days' notice in writing to us at our office in New York City, provided that you are to accept and pay for all certificates which may have been acquired for the purpose of resale to you until the expiration in France of the third day after the receipt by us of such notice in New York. All certificates sold by us under either of the foregoing paragraphs are to be delivered to you against payment of the purchase price; the certificates actually in New York City to be delivered to you at our office and the certificates already purchased and not yet in New York or not yet purchased to be covered by delivery to you of our certificate in the form hereto attached, marked "Exhibit A."

(3) Payment for the 283,475 certificates of Fcs. 500 each is to be made to us, at our office in New York, within two weeks from the final consummation of the transaction upon six days' notice in writing to us of the date upon which payment is to be made. On additional purchases payment is to be made to us on the next business day following advices to you that the bonds have been deposited with Messrs. Morgan, Harjes & Co. At the time of such payments for the additional purchases we agree to deliver to you a certificate evidencing the deposit with Messrs. Morgan, Harjes & Co., the form of such certificate being in the form hereto annexed marked "Exhibit A." All certificates are to be delivered when received by us free of expense to you.

(4) It is a condition of your and our obligation under this agreement that we obtain within twenty days from this date assurances satisfactory to the Pennsylvania Company to the effect—

(a) That all certificates stamped as payable in dollars only in the United States shall be exempt and released from all French duties and taxes.

(b) That the Pennsylvania Company and the Pennsylvania Railroad Company shall be released in manner satisfactory to them from all obligations to remit to France funds for the payment of interest and of principal in respect of any certificates stamped as payable in dollars only in the United States or for the payment of any commissions on such funds.

(5) Upon the completion of your arrangements with the Pennsylvania Company for the issue of the proposed new certificates, you are to notify us to that effect and to proceed with the purchase, as above stated, of the certificates now deposited with us and such additional certificates as may be purchased. In case you have not completed arrangements with the Pennsylvania Company, as above

outlined, within twenty-five days of the date hereof, our agreement to sell 3¾% certificates as evidenced by this letter shall, at our option, terminate and neither you nor we shall be under any further obligations by reason of anything herein contained.

Yours very truly,

——— ———.

Exhibit No. 2367

561

PENNSYLVANIA LINES WEST OF PITTSBURGH,
GENERAL OFFICE,
Union Station, Pittsburgh, Pa., August 25, 1915.

Messrs. KUHN, LOEB & CO.,
New York, N. Y.

DEAR SIRS: In order to arrange for the issue, against the deposit of all or any part of the certificates and obligations constituting this company's 3¾% French franc loan of 1906 of the aggregate amount of Fcs. 250,000,000 (hereinafter referred to as the "old certificates") of certificates of a new issue, payable in the United States in dollars, this company has agreed with you as follows:

I. It has taken corporate action approving, and has made the necessary arrangements with the Girard Trust Company of Philadelphia for, the creation and issue from time to time, as hereinafter stated, of a new issue of certificates (hereinafter referred to as the new certificates) payable only in New York and Philadelphia and only in United States gold coin and in denominations of $1,000 each. The new certificates are to be limited to the aggregate amount of $48,262,500 at any time outstanding, are to mature June 15, 1921, are to bear interest at the rate of 4½% per annum, payable semiannually on June 15th and December 15th in each year, and are to be subject to redemption as an entirety, but not in part, on any semiannual interest date, on or after June 15, 1918, at par and accrued interest on sixty days' notice. The new certificates are to be secured by the deposit with the trustee of an equal face amount of the outstanding old certificates (Fcs. 500 being figured as $96.52½).

II. The trust agreement securing the new certificates, except as herein provided, is to contain generally the same provisions as the trust agreement of May 25, 1906, securing the old certificates. It shall provide that the principal and interest of the new certificates are to be payable only in the United States, in dollars, and neither the trust agreement nor said new certificates shall contain any provision in reference to French duties or taxes, and it shall provide for the issuance of temporary certificates. It shall provide that in the event of default in the payment of the principal or interest of the new certificates, the old certificates shall not be sold, but the trustee under the new agreement shall be entitled to exercise for the benefit of the holders of the new certificates all rights which as a holder of the old certificates it may be entitled to assert under the French franc loan agreement. It shall further provide that in case this company shall elect to redeem the old certificates, which by the terms of the trust agreement of May 25, 1906, it can do only as an entirety, a proportionate amount of each class of collateral pledged under said trust agreement of 1906, to secure the old certificates shall be substituted for such of the old certificates as may at that time be deposited under the new trust agreement to secure the new certificates. It shall further provide that pending the actual deposit with the Girard Trust Company, trustee, in the United States of any of the old certificates, new certificates are to be issued upon the receipt by the said trustee under the new trust agreement of a certificate in the form attached hereto, marked "Exhibit A", or upon the receipt by the trustee of any other assurances satisfactory to it that old certificates have been acquired and will be deposited with it. The new trust agreement shall also contain such other modifications as counsel may advise to be appropriate to effectuate the purposes hereby intended to be provided for relating to the issue of new certificates. This company and the Pennsylvania Railroad Company are to assume the same obligations in regard to the payment of the new certificates as they have assumed in regard to the payment of the old certificates.

III. Every old certificate acquired and deposited under the new trust agreement shall be so stamped by this company and the Pennsylvania Railroad Company as to impose on these companies the obligation to pay as principal and guarantor, respectively, the principal and interest thereof in gold coin of the United States in New York or Philadelphia, $96.52½ to be treated as the equivalent of the face value of each certificate of Fcs. 500; and also, if required by you, said old certificates shall be further endorsed with the statement that they have been withdrawn from circulation in France. They may also, at the option of this company, be endorsed to the effect that they are not negotiable but held only as security for the new certificates.

IV. This company will issue and deliver to you or upon your order new certificates, dollar for dollar, at the rate of $96.525 for Fcs. 500, above stated, in exchange for old certificates delivered by you for deposit under the new trust agreement, and will issue such new certificates only upon your request. Upon the consummation of any such exchange the old certificates shall become the absolute property of this company, but they shall be forthwith deposited and pledged under the new agreement. Any net profit realized by you in the acquisition of the old certificates and the sale of the new certificates delivered to you in exchange therefor, after setting aside certificates as provided in clause V, subdiv. b hereof, shall be divided equally between this company and yourselves, but this company shall not participate in any loss which you may incur in the transaction. It is understood that you may sell said new certificates or any of them to a syndicate or otherwise, or may procure the sale of the same to be underwritten, and in case you do so, the profit to be divided between us shall be based upon the price at which the certificates shall be sold to such syndicate or otherwise or underwritten, but you may participate in any such sale to a syndicate or otherwise or underwriting without accounting to us for any profit upon such participation.

V. Such issue and delivery of the new certificates shall be further subject to the following conditions:

(a) Prior to the issuance of any of the new certificates, this company is to be furnished with a letter or a certified copy of a letter from the French Minister of Finance (or assurance satisfactory to it from Messrs. J. P. Morgan & Co., that such a letter has been delivered to Messrs. Morgan, Harjes & Co. in Paris) in substance as follows: "I beg to inform you that in view of the circumstances I have decided quite exceptionally that the bonds of the Pennsylvania Railroad 3¾%, 1906, loan, which have been bought in France and sent to the United States under the conditions to which you refer, will cease to be subject to the French stamp and transmission taxes and to the revenue tax of 4% on securities. In order to avail of this exemption the securities must be as indicated by you stamped to the effect that capital and interest are hereafter payable in dollars in the United States" and is to receive similar assurances as to any old certificates which may be hereafter acquired and stamped as aforesaid; and also with an agreement, or a contract from parties satisfactory to it to procure an agreement, from the Credit Lyonnais and the Banque de Paris et des Pays-Bas, irrevocably releasing this company from all obligations assumed by it under the trust agreement dated May 25, 1906, to remit to France funds for the payment of the principal and interest of any of the old certificates which may be stamped as payable in dollars only or any commission on such funds.

(b) For the purpose of providing a fund to reimburse this company for the difference of ¾% per annum between the 3¾% per annum interest payable on the old certificates and the 4½% per annum interest payable on the new certificates, there shall be set aside in the hands of this company out of the new certificates deliverable to you in exchange for the old certificates deposited, an amount of new certificates sufficient, if sold on a 5% interest basis semiannually as the funds are required, to provide the difference of said ¾% per annum. In case there shall at any time be a deficiency in the said fund by reason of such reserved certificates being sold on a higher interest basis or otherwise, such deficiency shall be made good by this company and yourselves in equal shares, and if upon the maturity or prior redemption of the new certificates any surplus shall remain in such funds, it shall be divided equally between this company and yourselves.

(c) All expenses of this company in connection with the issuance of the new certificates, as well as your expenses in connection with the acquisition of the old certificates and the sale of the new certificates, shall be a charge upon the profits hereinabove in paragraph IV referred to.

Kindly confirm that the above is in accordance with your understanding.

Yours very truly,

(Signed) Edward B. Taylor,
Second Vice President.

THE PENNSYLVANIA RAILROAD COMPANY,
GENERAL OFFICE,
Broad Street Station, Philadelphia, September 23rd, 1915.

Messrs. KUHN, LOEB & Co.,
William & Pine Streets, New York, N. Y.

GENTLEMEN: The question that I wish to ask is: Do you think that we should have a sufficient number of copies of the new agreement between the Pennsylvania Company, Girard Trust Company, and ourself, to supply the demands that naturally will be made for them, not only by those who invest in the certificates, but for the statistical departments of most of the bankers of the country? If we do attempt to supply them, we think it would require about five hundred copies. Ordinarily I would not ask the question but simply have this many copies printed, but the circumstances surrounding this case are unusual: The original French franc loan agreement of 1906, you know, was carefully filed away in our vaults and never circulated. You are fully aware of the reason for doing this, and the question in my mind is, does not the same reason exist now, seeing that quite a proportion of the French certificates are likely to continue in circulation in France, and will not the distribution of copies of the new agreement call attention to the very situation that the French banks desire to avoid the publicity of, and will you be able longer to withhold giving to bona fide holders of new certificates and practically through them to the public, a list of the securities that are held by the trustee as collateral for the French franc loan?

Probably this is a question that we should ask Mr. Cromwell his views upon as he was the one that originally made the request that we should not circulate copies of the agreement of 1906.

Very truly yours,

(Signed) H. TATNALL,
Vice President.

[Confidential]

HENRY TATNALL, Esq.,
Vice President, Pennsylvania Railroad Co.,
Philadelphia, Pa.

DEAR SIR: We beg to acknowledge receipt of your favor of the 23rd inst., and to thank you for consulting us in reference to the advisability of printing for distribution copies of the trust agreement covering the new issue of Pennsylvania Company 4½% notes.

Purchasers of securities in the United States have become so accustomed to be able to obtain the agreements under which the same have been issued that it might be misunderstood if this were refused in this case, and we should, therefore, recommend that the usual course be followed in the case of the new indenture, but we believe that it will not be necessary to furnish copies of the French trust indenture or to publish a list of the collateral thereof, although it may become advisable to state this collateral privately in a few cases.

Yours very truly,

——— ———.

Exhibit No. 2372 564–2

J. P. Morgan & Co.,
Wall St. corner Broad, New York, January 17. 1916.

Messrs. Kuhn, Leob & Co. and National City Company,
New York, N. Y.

Dear Sirs: We beg to confirm our arrangement with you for the sale to you of bonds forming part of the Chicago, Milwaukee & St. Paul Railway Company 4% 15-year European loan of 1910, under the following conditions:

1. We agree to sell to you and you agree to purchase from us Fcs. 153,051,000 4% bonds of the above loan at a price of Fcs. 476.50 per Fcs. 500 princpial amount, plus accrued interest to the date of your payment therefor, such purchase price to be payable in dollars to us at the fixed rate of exchange of Fcs. 5.90 to the dollar. You are further to pay to us an amount which, allowing for interest thereon at the rate of 2½% per annum, will discharge interest at the rate of 2½% per annum payable on July 1, 1916, on $75 per Fcs. 500 principal amount from the date that you pay for same.

2. We further agree to sell to you and you agree to purchase from us at the price of Fcs. 483.50 flat per Fcs. 500 principal amount, any and all additional 4% bonds of said Chicago, Milwaukee & St. Paul Railway Company 4% 15-year loan of 1910 delivered to Messrs. Morgan, Harjes & Co. for sale by us to you, payment to be made by you to us in dollars at the fixed rate of exchange of Fcs. 5.90 per dollar. Messrs. Morgan, Harjes & Co. will cable us daily of the amounts of any bonds so delivered to them, which amounts we will communicate to you daily.

Your agreement to purchase such additional bonds is, however, to be subject to termination at any time upon three days' notice delivered by you to us at our office, in New York City, provided that you are to accept and pay for all bonds which may have been acquired for the purpose of re-sale to you until the expiration in France of the three-day period after receipt by us of such notice in New York. All bonds sold by us, under either of the foregoing paragraphs, are to be delivered to you against payment of the purchase price, the bonds actually in New York City to be delivered to you at our office, and the bonds already purchased and not yet in New York or not yet purchased, to be covered by delivery to you of our certificate, in the form hereto attached, marked "Exhibit A." It is agreed that title to such bonds shall pass upon delivery of such certificates, and that neither Messrs. Morgan, Harjes & Co. nor ourselves shall be under any liability or obligation in case of the loss of said bonds in transportation.

3. Payment for the Fcs. 153,051,000 bonds is to be made at our office in New York, on January 24, 1916. For additional purchases payment is to be made to us on the next business day following advices to you that the bonds have been deposited with Messrs. Morgan, Harjes & Co., but not before January 25, 1916. At the time of such payments for additional purchases, we agree to deliver to you a certificate evidencing the deposit with Messrs. Morgan, Harjes & Co., the form of such certificate being in the form hereto annexed, marked "Exhibit A." All bonds are to be delivered when received by us in New York free of expense to you.

Yours very truly,

J. P. Morgan & Co.

[Confidential]

MY DEAR ROCKEFELLER: I enclose herewith a confidential memorandum outlining the proposed French transaction, which we have drafted in accordance with your request received through Mr. McRoberts. Of course, the figures are somewhat tentative, but we believe that something substantially on these lines could be accomplished, if advantage is taken of the present favorable opportunity. It is impossible to tell exactly in advance just on what terms the French bonds could be purchased and just how the dollar bonds can be sold, and it would therefore be necessary to let us have some leeway in dealing with the situation. As stated in the memorandum, the bankers take all the risk, and the company is held absolutely harmless against any loss or expense.

I would also call to your attention that while the company carries on its books the French debt at $96.3533 per Fc. 500 bond, it would doubtless cost the company more than this to re-pay them after the war is over.

Yours faithfully,

——— ———.

PERCY A. ROCKEFELLER, Esq.,
26 Broadway, City.

S.

EXHIBIT No. 2374

OCTOBER 29, 1915.

[Confidential memorandum]

It is proposed that the Chicago, Milwaukee & St. Paul Railway Company make a transaction in reference to its French loan bonds in the same manner in which the Pennsylvania Railroad Company recently consummated a transaction covering its French loan.

This proposition entails no risk of any kind to the St. Paul, but will enable it to make a large saving in taxes and further share in the profits, as hereafter stated. All expenses of the company, including any taxes on new bonds, are to be paid by the bankers and charged against the profits. The only action necessary on the part of the company is to stamp the French bonds as payable in dollars only at the rate of exchange at which the bonds are now carried on the books of the St. Paul ($96.3533 per Fc. 500 bond), and, as these bonds cannot be sold readily here in uneven denominations of small size, to issue new bonds in $1,000 denominations, secured by the pledge of a like face amount of the French bonds acquired, stamped payable in dollars, as above stated.

The consent of the company would be dependent upon the French Finance Minister releasing the French bonds acquired from French taxes and of the French banks releasing the company from remitting to France the interest and principal of bonds acquired, which in the case of the Pennsylvania was readily obtained. The consent of the company would be given subject to its obtaining consents, if necessary, from commission and the company would be under no obligation in case such consents were not given.

In the first instance, the company would save the share of French taxes on bonds acquired, now payable by it, being 75% of such taxes. This saving of taxes amounts to about 3/10 of 1% per annum, the present value of which, on a 3% basis, is about 2½%.

The bankers take the entire risk of purchasing the bonds and of liquidating the transaction and hold the railway company harmless against any loss or expense. It is suggested, in consideration of this, that out of any net profit realized in the transaction, there be set aside as compensation for the bankers an amount equal to the taxes saved by the company, say 2½%, and that the balance be equally divided between the company and the bankers.

While the profit, partly to the company, and entirely to the bankers, would be dependent upon the price at which the old French bonds could be acquired and the price at which the new bonds could be syndicated, a fair estimate is as follows:

Present value of tax saving, 2.50%.

Profit between purchase price and syndicate price, less expenses, 5.50%.

of which the company would be entitled to the tax saving and 1.50% in cash.

As a minimum of about $26,500,000 bonds will be acquired, these being already pledged for the Morgan loan [to de Rothschild Frères] in New York, the minimum profit on the above basis to the company would be $662,500 tax saving and $397,500 cash profit, or a total profit of $1,060,000. To the extent that additional bonds could be acquired, an additional profit would be made.

As stated above, it is not possible to determine exactly at what price the French bonds can be acquired or the dollar bonds sold, but assuming, as an example, that the French bonds could be acquired at approximate cost to the French Government (Fcs. 476 per Fcs. 500 bond) and paid for at approximately the present rate of exchange, and the dollar bonds syndicated here, on say a 5¼% basis, the figures would be as follows: Fcs. 500 bond ($95.3533) at 476 at 5.90, $80.68; 2% interest for 8 months on $75 to cover interest loss on Morgan loan, $1; or $81.68 per bond of $95.3533 face value or 84.78% per $1,000 bond.

A bond having a maturity of June 1925, if sold on a 5¼% basis would realize 90.68% per $1,000 bond, leaving a gross profit against the above cost of $5.90% from which expenses would have to be deducted.

NOTE.—Pencil notation enclosed in brackets.

EXHIBIT No. 2375

[Official]

52–54 WILLIAM STREET—55 WALL STREET,
New York, December 13, 1915.

CHICAGO, MILWAUKEE & ST. PAUL RAILWAY COMPANY,
42 Broadway, New York City.

DEAR SIRS: In order to enable your company to take advantage of the unusual conditions now prevailing in the exchange situation between the United States and France, we propose that it arrange for the issue, against the deposit of all or any part of its bonds constituting the 4% fifteen-year European loan of 1910, to the aggregate amount of Fcs. 250,000,000 (hereinafter referred to as the old bonds), of bonds of a new issue, payable in the United States in dollars, and in respect thereof that it agree with us as follows:

I. Your company is to take the necessary corporate action authorizing the creation and issue from time to time, as hereinafter stated, of a new issue of bonds (hereinafter referred to as the new bonds) payable only in New York and only in United States gold coins and in denomination of $1,000 each, and the text of which shall be in the English language. The new bonds are to be limited to the aggregate amount of $48,176,654.66 at any time outstanding, are to be dated December 1, 1915, mature June 1st, 1925, redeemable at the election of the company on sixty days' notice, to be given as provided in the trust indenture under which said bonds are to be issued and secured, at par and accrued interest, on June 1st, 1922, or on any interest payment date thereafter, and are to bear interest at the rate of 4% per annum from their date, payable semiannually on June 1st and December 1st in each year. The new bonds are to be issued under a trust debenture to the United States Mortgage and Trust Company as trustee and are to be secured by the deposit with the trustee of an equal face amount of the outstanding old bonds (Fcs. 500 being figured at $96.3533).

II. The trust indenture securing the same, are to be substantially in the form of the drafts attached hereto, and the new bonds are to be substantially in the form set forth in the said draft of said trust indenture.

III. Every old bond acquired and deposited under the trust indenture shall be so stamped by your company as to impose on it the obligation to pay the principal and interest thereof in gold coin of the United States of America in New York City, $96.3533, to be treated as the equivalent of the face value of each Fcs. 500 of old bonds, and also, if required by us, said old bonds shall be further endorsed with the statement that they have been withdrawn from circulation in France. They may also, at the option of your company, be endorsed to the effect that they are not negotiable but held only as security for the new bonds.

IV. Your company from time to time is to issue and deliver to us or upon our order, new bonds, dollar for dollar, at the rate of $96.3533 for Fcs. 500 above stated, in exchange for old bonds delivered by us for deposit under the new trust agreement, and will issue such new bonds only upon our request. Your company is to retain the full amount derived from the saving of the French taxes as provided for hereinafter in clause V, subdivision (a). Any profit realized by us in the excahnge of old bonds for new bonds, or in the acquisition of old bonds and the sale of the new bonds issued in exchange therefor, is to be equally divided between your company and ourselves, but your company shall not be liable for or participate in any losses we may incur in the transaction. The price to be paid by us from time to time for old bonds acquired for exchange for new bonds shall not be more than $85 per bond of fcs. 500 and the accrued interest thereon, unless with the approval in writing of the president or a vice president of your company.

V. Such issue and delivery of the new bonds shall be further subject to the following conditions:

(a) Prior to the issuance of any of the new bonds, your company is to be furnished with a letter or a certified copy of a letter from the French Minister of Finance (or assurances satisfactory to it that such a letter has been delivered in Paris), stating in substance that the bonds of your company's four percent fifteen-year European loan of 1910 which have been or shall hereafter be bought and sent to the United States and stamped to the effect that the principal and interest thereof shall thereafter be payable only in dollars in the United States, will, from the day of deposit thereof in France for shipment to the United States, cease to be subject to the French stamp, transmission, and revenue taxes on securities, and also with an agreement, or a contract from parties satisfactory to it to procure an agreement, from the European bankers who are parties to the agreement of May 26, 1910, between your company, our firm, and said European bankers, irrevocably releasing your company from all obligations assumed by it under said agreement dated May 26, 1910, to remit funds to France for the payment of the principal and interest of any of the old bonds which may be stamped as payable in United States dollars only and from the payment of any commission in respect of such funds, or the distribution thereof.

(b) All expenses of your company in connection with the issuance of the new bonds, as well as our expenses in connection with the acquisition of the old bonds, their exchange for new bonds and the sale of the new bonds, shall be a charge upon the profits hereinabove in paragraph IV referred to.

(c) Your company will promptly apply for the approval of the Public Service Commissions of Illinois and Wisconsin for the issue of the new bonds, as herein provided, and unless and until such approval be granted, your company shall be under no obligation whatever by reason of anything contained herein.

(d) Your company may, at its election on July 1, 1916, or at any time thereafter, on sixty days' notice in writing to us, terminate the agreement with us as to the issue or exchange of further or additional new bonds and the division of profits in respect thereof.

Kindly advise us whether you desire to accept the proposition above set forth and we shall then endeavor to promptly proceed to perfect the arrangement with the French banks.

Yours very truly,

——— ———.

DEAR SIRS: Referring to our letter to you, dated December 13th, 1915, in reference to the exchange of bonds of your company's 4% 15-year European loan of 1910 for dollar bonds, it is understood that we may sell the new bonds or any part of them to a syndicate or otherwise, or may procure the sale of the same to be underwritten, and in case we do so, the profit to be divided between your company and ourselves shall be based upon the price at which the bonds shall be sold by us to such syndicate or otherwise or underwritten, and we may participate in any such purchase by a syndicate, or otherwise, or underwriting without accounting to your company for any profit resulting from such participation.

Kindly confirm that this is in accordance with your understanding, and believe us,

Very truly yours,

Messrs. KUHN, LOEB & CO. and NATIONAL CITY BANK.

DEAR SIRS: Referring to your letter of December 13, 1915, and to our reply thereto, dated December 16, 1915, covering the issuance of new bonds of this company payable in the United States against the deposit of the bonds constituting its 15-year European loan of 1910, we beg to advise you that we have now received assurance satisfactory to us that a letter from the French Minister of Finance has been delivered in Paris, in substantially the form referred to in subparagraph (a) of paragraph V of your said letter, and that we have also received an agreement satisfactory to us from the European bankers who are parties to the agreement of May 28, 1910, between this company, yourselves and said European bankers, as provided in said subparagraph (a) of paragraph V. We are, therefore, now prepared to proceed with the issuance of the new bonds on the terms set forth in your letter.

Yours truly,

CHICAGO, MILWAUKEE & ST. PAUL RAILWAY CO.,
By (Sgd) H. R. WILLIAMS, *Vice President.*

Exhibit No. 2380

564-3

[Confidential]

JANUARY 19, 1916.

Messrs. CLARK, DODGE & CO.,
51 Wall Street, City.

DEAR SIRS: We beg to advise you that jointly with the National City Company, we have agreed to purchase Fcs. 153,051,000 of the four percent 15-year European loan of 1910 of the Chicago, Milwaukee & St. Paul Railway Company, and any additional amounts of said loan acquired until the expiration of three days' notice to be given by us.

We have arranged with the railway company that these bonds be stamped as payable only in United States gold coin (Fcs. 500 being figured at $96.3533), the acquired bonds then to be deposited as security for the issuance by the company of an equal face amount of its four percent gold loan due June 1, 1925, to be issued in denomination of $1,000 each, and have also agreed that any profit realized in the transaction is to be divided equally with the company.

We have reserved for you on behalf of the National City Company and ourselves, an interest of Fcs. 5,000,000 bonds in the firm purchase, with a proportionate amount in any additional purchases, subject to a commission of one percent on the face value of bonds purchased, for the services of the National City Company and ourselves.

The new bonds are to be held together for sale under the management of the National City Company and ourselves, and all expenses in connection with the purchase of French franc bonds, their stamping as payable in dollars only and the issuing of the new bonds, are to be a charge on the business.

Kindly advise us whether you desire to accept the participation reserved for you, and believe us,

Yours very truly,

——— ———.

NEW YORK, NEW HAVEN & HARTFORD R. R. CO. 4% DOLLAR DEBENTURES, DUE APRIL 1, 1922, RECEIVED IN EXCHANGE FOR FRANC BONDS

On November 12, 1915, a group was formed to purchase from the French Government any part of the issue of Fcs. 145,000,000 the New York, New Haven & Hartford Railroad Co. French franc loan of 1907 debentures at approximately $79 per Fcs. 500 debenture. The group consisted of:

Lazard Freres	10/150
First National Bank	35/150
National City Bank	35/150
J. P. Morgan & Co	70/150

Such debentures as were purchased up to July 1, 1917, were stamped by the company "Payable in Dollars at the Mint Parity of Exchange (5.18 to the dollar)", making the value of a Fcs. 500 debenture $96.50 and coupon $1.93. The railroad company received a commission of 2½% on the face value of the debentures so stamped.

From November 12, 1915, to July 18, 1917, 150,475 franc loan debentures of Fcs. 500 each were purchased (Fcs. 75,237,500).

The company accepted 4,169 debentures of Fcs. 500 each as compensation for stamping, leaving 146,306 debentures, for which $14,118,529 par value in 4% dollar debentures were delivered by the railroad company in exchange.

While some of the bonds acquired were sold in block for the account of the group, a large portion was carried by each individual member of the group. J. P. Morgan & Co. did not finally dispose of all of its bonds until 1919. J. P. Morgan & Co.'s commitment in the underwriting totalled approximately $7,000,000 and the net result showed a profit to them of $273,192.74.

Exhibit No. 2386

J. P. Morgan & Co.,
New York, Dec. 9, 1914.

[Copy of telegram received from H. P. Davison, London, to J. P. Morgan & Co.]

No. 9. Morgan, Grenfell together with Lazards have formed accepting syndicate for Hudson who are acting as purchasing agents for French Government here and in Canada to amount £3,500,000 sterling. They suggest it might be possible make similar arrangement for us, that is to say if we were to act as purchasing agents for Russia and or France they might arrange for acceptance bills of well known, responsible American houses from whom goods purchased, and from others less well known with our guarantee, for perhaps £3,000,000. How much do you suppose our market would take of like acceptances, say 90 days with one renewal? This suggestion sent for your consideration, as yet matter entirely indefinite this side. Hope Russian negotiations can be kept in hand until visit Paris when matter should be better understood.

Exhibit No. 2387

[Copy]

Washington, *February 6, 1915.*

In writing its acceptance regulation, the Board had of necessity to bear in mind the problem of what attitude Federal Reserve banks should take in case they should be offered acceptances drawn for the purpose of financing transactions involving the importation or exportation of goods but drawn for account of foreign governments.

The question had to be considered from several points of view—one the broad economic basis, involving the question of whether foreign governments shall be permitted to finance their requirements by using the rediscount facilities of the Federal Reserve Bank System or whether they should not be forced to do their financing in the security market by selling their long-term bonds or short-term treasury notes. In the latter case, the appeal is to the investor, while if permitted to rediscount their bills of exchange drawn on American banks they would absorb the funds of the bill market; that is to say, the facilities which properly should be reserved for the requirements of commerce and trade and for the individual borrower. One might say, for the "smaller" borrower, because what applies to a government would apply with equal force to the large corporations, for their requirements go into hundreds of millions and, for this same reason, they should not be permitted to absorb the commercial-credit facilities of the banks of the country. They have at their disposal the broad security market, which is not available for the individual borrower. The scope of the operations of such large corporations and governments is such that, if permitted to borrow on a large scale by using short-term banking credits, they would be apt to absorb the bulk of the credit facilities of note-issuing institutions, and the consequence would be that whatever would be left for the individual borrower would be available for him only at so much higher price.

If, to illustrate, a government wanted to sell six months' treasury notes on its own credit, it might be able to do so only upon an eight to ten percent basis if it appealed to the investor direct. If a banker steps in between, and for a sufficient compensation, is willing to take the risk and substituted his own credit by giving his acceptance, the investor puts up his money at, let us say, three percent. The difference has gone to the government and to the guaranteeing banker. As a matter of fact, the transaction results in the foreign government selling its six months' warrant with the guaranty of the American banker and selling it in the bill market instead of the security market at three percent instead of eight percent.

To further illustrate, if the Reserve banks would buy $25,000,000 of these acceptances at three percent, it is probable that they would have to put up the rate at once for their further purchases of acceptances as they may be offered by others for the financing of importations and exportations, for their means available for this purpose would have been largely absorbed, and it is easy to see that the transactions might well take a larger scope and seriously interfere with the program outlined for the Federal Reserve banks. Furthermore, it should be considered that the law struck out the power of Federal Reserve banks to invest in foreign warrants. The Federal Reserve banks are permitted only to buy warrants issued by States and municipalities of the United States. The financing of foreign governments was advisedly eliminated from the act.

Foreign government banks have adopted very definite methods to rule out from their transactions what they call "finance bills"; that is to say, bills that are not based strictly on commercial transactions but such that are drawn for account of banks or brokers for the purpose of carrying bonds or stocks or so-called "financing." There is no doubt that the Federal Reserve banks will have to adopt a similar policy of self protection in this respect. The Federal Reserve Board for this reason included in its regulations a clause (IIc) providing that a banker's acceptance must be "a bill drawn for account of and by a commercial, industrial, or agricultural concern (that is, some company, firm, corporation, or individual) directly connected with the importation or exportation of the goods involved in the transaction out of which the acceptance has originated." This would bar such transactions as would be drawn for account of a foreign government or a finance institution.

If this broad view be adopted, it would dispose of the second angle from which the problem will have to be viewed; that is, the question of whether Federal Reserve banks should purchase bills drawn by or for account of foreign governments which are belligerents. One particular case is actual: it is the question of Russian bills drawn, as the Board has been informed, by the Russian Ambassador, on certain banking firms for the purpose of financing goods to be exported. The question involved in this case offers a very simple proposition. These bills show on their face that they are drawn for account of a foreign government at war, and the question is shall these bills be purchased by a bank which is operating under government auspices and issuing notes which are direct obligations of the United States, banks which, furthermore, by the law, will be the only fiscal agents of the Government and which may hold large Government deposits which might directly be used in the purchase of such bills.

The question if put in this form would have been one not to be disposed of by the Federal Reserve Board but rather by those in charge of our national policy. As long as the Federal Reserve Board covered the entire question by the broad provision as outlined under II (c), the question of belligerency and neutrality was not involved. If, however, this clause should be omitted, the banks would have to be prepared to act upon the question of whether or not they should refuse to buy these bills or any bills because they would have been drawn for account of a belligerent.

The Board in its deliberations also touched upon the question of contraband articles, but it was felt that it was not the Federal Reserve banks' duty to follow the proceeds of the rediscount operation to this extent and that it might properly be considered as a step of superarrogation of power if the Board attempted any regulation in this respect.

It is felt, however, that the Board should be certain that, in outlining its plan of procedure, it should act in harmony with the Government. It is to be expected that whichever way the Board acts in this matter criticism and innuendoes will be directed against it, and it is important, therefore, that the Board should be certain of its ground and sure that it is carrying out a policy which is in entire harmony with that of the administration.

It was the general opinion that if, as planned, the Board regulated on the broad lines of sound and well recognized economic principles, the question could be handled without giving offence to any particular side.

The question which is being discussed by the Board in this connection is, should Clause Ii (c) read "Such acceptance must be drawn for account of *and* by a commercial firm, etc." In the first case, a bank could not make its acceptance eligible for rediscount with a Federal reserve bank if the acceptance was made for account of a government for a government is not a commercial firm or manufacturer or producer. In the second case a commercial firm by drawing the bill for account of a foreign government would comply with the requirement of the regulation. It ought to be added that the vast majority of such import an export transactions is not done directly for account of foreign governments but by some foreign firms acting as contractors. Any foreign government, by charging a commercial firm with the purchase of the goods, could secure the articles and they could be financed through American acceptances eligible for rediscount. It is only when the foreign government wants to use its own credit in our market and secures accommodation, not as a direct borrower selling its own treasury notes, but by the subterfuge of letting the banker accept and when it secures such credit from the bill market instead of from the investor, that the regulation would act as a preventive.

P. M. W.
2–6–15.

[Excerpt from minutes of the Federal Reserve Board, February 11, 1915]

The draft of a proposed circular on acceptances was taken up and after further revision was approved.

EXHIBIT NO. 2400

February 8th, 1915.

DEAR MR. DELANO: Referring to our telephone conversation, I enclose draft of a clause suggested as a substitute for paragraph C of section 2 of the proposed regulation covering the discount or purchase of acceptances.

Your attention is directed to the last paragraph of section 13 of the Federal Reserve Act which contemplates that the Federal Reserve Board shall make regulations restricting the discount of bills receivable (notes), and of bills of exchange and acceptances, but no such clause appears in section 14 of the act.

To the extent that acceptances and bills of exchange are dealt with under the provisions of section 14, it seems to me that considerable freedom should be permitted unless it is contemplated that the last paragraph of section 13 referred to, should also, be made to apply to section 14.

You will, also, notice that I have omitted the language "and drawn for an amount not exceeding the approximate value of the goods to be transported." As the regulation is drawn, the burden of determining the value of the goods would rest upon the reserve banks and the procedure to obtain this information would be difficult and cumbersome. On the other hand, it is more likely that this admonition will be ignored by the banks and certainly it will not be wise to include a provision in the regulation which it is anticipated will not be regarded. The purchase of acceptances is based upon the credit of the acceptor, and I hope the Board will be willing to omit this limitation which it seems to me is not a practicable one.

Your attention is, also, directed to paragraph D of section 2 of the regulation which would preclude the purchase of bills of exchange and acceptances growing out of commerce between the United States and its dependencies, that is, Porto Rico, Hawaii, and the Philippines. If the phraseology of paragraph 99 of the act reading "based on the importation and exportation of goods" can be construed to include commerce between the United States and these dependencies, it might be desirable to make clear in this regulation that bills growing out of imports and exports of that character might be purchased by the Federal Reserve banks.

Mr. Curtis calls my attention to the fact that the Supreme Court of the United States has rendered a number of decisions known as the "Insular Cases," reported in volumes 182 and 183 of the Supreme Court reports, which can probably be taken to indicate that commerce between the United States and its insular possessions may be construed as imports and exports. Inasmuch as the words "importation" and "exportation" are used in the Federal Reserve Act, this might afford ground for the inclusion of bills growing out of such commerce within the scope of the proposed regulation.

Your attention is also directed to paragraph F of section 2, which it seems to me does not make entirely clear what kind of bill is referred to. Ordinarily, a documentary bill when presented to the drawee is accepted and handed back to the party presenting it, minus the documents which originally accompanied the bill, and the acceptance of the banker or of the drawee is substituted for the specific bills of lading or other collateral. Without getting a legal opinion on the point, it seems to me possible to construe the clause so that the acceptance, minus the documents, would no longer be secured by the lien or transfer of title, thereby subjecting it automatically to the limitations of paragraph G. Might it not be possible to change that paragraph so as to read as follows: "A bill of exchange may be considered as drawn in good faith against 'actually existing values' as under 1 (c) hereof, when it is secured by a lien on or by transfer of title to the goods to be transported or when the character of the bill indicates that the document representing such lien or title, originally accompanied the bill prior to acceptance."

In conclusion, permit me to repeat briefly one portion of the statement which I made to the Board Friday afternoon: Our merchants and manufacturers are now conducting a perfectly lawful trade with foreign customers. A very considerable part of that trade may be with belligerent nations and may consist of articles which are contraband or conditional contraband of war. Commerce of that character is authorized by our own laws and by international law and convention. It seems to me that any different rule applied to the credits which are extended for the purpose of conduct of that commerce should be adopted with great caution and the objection which I made to the proposed regulation was based upon my belief, first that the same rule of neutrality should apply to the credit as does apply to the commercial transaction; second, that any policy to be adopted by our government in regard to this matter should not be made the subject of regulation by the Federal Reserve Board, but should be determined by the President of the United States.

Of course, it goes without saying, as I stated in Washington, that this bank will will observe whatever rules are adopted by our Government in this matter.

Verry truly yours,

——— ———, *Governor.*

F. A. DELANO, Esq.,
Federal Reserve Board,
Washington, D. C.

BS Jr/VCM.

("EXHIBIT No. 2401" appears in text on p. 8220.)

EXHIBIT No. 2402

BANKERS' ACCEPTANCES

REGULATION—OPEN MARKET REGULATION—GENERAL

[Excerpt from minutes of the Federal Reserve Board, April 2, 1915]

The Secretary of the Board presented the proof of a revised circular relating to acceptances. On motion this was ordered printed as circular 11, and regulation J.

On motion, the regulation relating to acceptances by member banks up to 100% of capital and surplus, was approved and ordered printed as circular 12 and regulation K. It was agreed that the signature of the Governor of the Board should be affixed to both circulars and that both be submitted to Counsel for his approval.

EXHIBIT No. 2403

[Excerpt of letter]

APRIL 7, 1915.

DEAR MR. JAY: I hope your trip will be as beneficial as mine was, for I succeeded in shaking my cold almost entirely with a lot of exercise and fresh air and feel immensely better than when I went away.

There is little news from the office of importance. The acceptance regulation has been finally adopted in substantially the form reported just before you left. While it is not altogether satisfactory, I think it will do. Paragraph c, the one in which we are most interested, reads as follows:

"A bankers' acceptance must be drawn by a commercial, industrial or agricultural concern (that is, some person, firm, company or corporation), directly connected with the importation or exportation of the goods involved in the transaction in which the acceptance originated, or by a 'banker.' In the latter case, the goods, the importation or exportation of which is to be financed by the acceptance, must be clearly specified in the agreement with or the letter of advice to the acceptor. The bill must not be drawn or renewed after the goods have been surrendered to the purchaser or consignee."

The first paragraph is substantially as it was in the first regulation; the last two paragraphs raise the possible objection that the Federal Reserve bank is put on inquiry to determine whether the bill conforms to the requirements or not, as paragraph d, which provides for the affixing of a certificate by the acceptor affords no representation that the goods have been clearly specified or that the bill is not a renewal. Warburg telephones me that he would be willing to have us send out a little letter of interpretation of this section to our members, in case we find it necessary to do so. Paragraph f, which was the other principal point under debate, reads as follows:

"A bill of exchange accepted by a 'banker' may be considered as drawn in good faith against 'actually existing values' under 21 (c) hereof when the acceptor is secured by a lien on or by transfer of title to the goods to be transported; or in the case of release of the goods before payment of the acceptance by the substitution of other adequate security."

* * * * * * *

Sincerely yours,

——— ———, *Governor.*

PIERRE JAY, Esq.
Hampton School, Hampton Va.

EXHIBIT No. 2404

APRIL 9, 1915.

DEAR HARRY: Thank you for yours of this date, enclosing copy of Mr. Morgan's message. I enclose two copies of circulars 11 and 12, to which are attached regulations J and K.

Paragraph (c) of article 4 bears on the matter we discussed. By comparison of this regulation with the one which preceded it, possibly you can arrange to cable the changes to Mr. Morgan, and you will note that the important ones are contained in paragraphs (c) and (f) of article 4. I doubt if this language requires any particular explanation except that I think it is fair to assume that the regulation will be liberally interpreted in the interest of our own commerce and banking.

Very truly yours,

——— ———, *Governor.*

George Woolsey, Mr. Bonbright, Mr. Pierson, and I have read your various letters with a great deal of interest. I think I can appreciate how and why you feel as you do. The cause of all these misunderstandings is the usual one of attempting to do difficult and untried business three thousand miles away. We may have been remiss in keeping you in touch with the various steps of our development but we have tried to tell you frankly everything, and we admit that the business, because of the terms we are trying to impose upon the foreign governments, has come to a practical deadlock but we all feel that we are only on the eve of a very large and important and comparatively safe business if we keep our heads cool and do not scatter our efforts. We are learning by experience and everyone who comes back from the other side such men as, Mr. Blackall, Capt. Hunsiker (from England, and a friend of Lord Fairfax), and others say we must stand by our resolution to insist upon payment cash or satisfactory Government securities, f. o. b. New York. Mr. Blackall would not even consider for a moment the question of payment on arrival of documents in France by a concern as unequestionably good as Schneider & Company although the goods have been inspected and accepted on this side and, although I would not say now that we may not modify our decision somewhat, in the case of Schneider & Company if we could do a large amount of business with them, allowing them to pay in France if we were protected on exchange, provided the goods were inspected and accepted on this side, and we could get our money on cable advices from this side, not on arrival of the goods however. We realize the force of your argument and know that you attempt to do what you believe is perfectly safe business on a c. i. f. basis, but it is a waste of time to argue this question further and while we do not know as much about your end of it as you do, by a long way, the report we received from Mr. Blackall is, that the business can be done along our lines, and a great deal of it. In fact, all the best, most reliable, business can be done this way if we insist upon it and he thinks that Schneider & Company, who know these are the usual terms will meet them if we firmly request them to. I have just finished reading Mr. Bonbright's letter to you dictated yesterday and this letter is, in a sense, a repetition, Louis Stoddard had a cable from De Saulles yesterday, and I understand that you are coming over with him. I rather hope you are not because you are the one we depend on to run the business end of the foreign organizations. M.. Blackall has given his consent to become a director of this corporation and take entire charge of the metals and ordnance end of it. He seems very sound and a man of excellent judgment and a great deal of force. I expect Louis Stoddard to become president.

Now, as to the question of taking contracts in the name of Bonbright & Company. That is a much more difficult matter to decide chiefly because we want you, in every case, as far as you possibly can, to have the contract run from the Government to the manufacturer, which we supposed was what the Government wanted, and while we realize it is good advertising for Bonbright & Company, in France, it is also a risk. We have just learned that the contract for the 300,000 brass shell cases runs to Bonbright & Company. Bonbright & Company have made a contract with Mr. Blackall. Mr. Blackall now turns this whole thing over to a contract between Bonbright & Company and Sturges & Burn Manufacturing Company of Illinois, on whom we get very good reports, but you see how all this increases the risk, and we must get Sturges & Burn to put up a bond of $60,000 to indemnify us for our advance payment on May 1st of that amount. In this way the Factory Products Export Corporation become side-tracked, Bonbright & Company taking all the risk, ought to be getting all the profits. We have done practically all the business so far and have turned over one-half of the profit through the Factory Products Export Corporation to Austin, Nichols & Company. Austin, Nichols & Company thus far have only been half-hearted about the business, not willing to take the slightest risk and unless they are willing to pull their full weight of the boat, which I think they will be, as we get better acquainted, we will not be gaining much by having them along.

We are furthermore convinced, as you have fortunately pointed out, that it is a waste of time to look into anything or consider any offers of anything excepting that, for which you make inquiry from abroad.

Exhibit No. 2408

James Brown,
59 Wall Street, New York, June 8, 1915.

Dear Ben: The reason I telephoned this afternoon to know if you would be in town tomorrow is because it is most important that I should see you in connection with certain acceptance business originating on the other side. I want to make certain that the acceptance will be rediscountable with the Federal Reserve bank.

I have a meeting at eleven o'clock, but should like very much to have a few moments with you before that hour, if possible. Will you telephone to me?

Yours very truly,

(Signed) James Brown.

Benj. Strong, Jr., Esq.,
Governor, Federal Reserve Bank of New York,
New York City.

Exhibit No. 2409

334.1–1915

[Copy]

June 9th, 1915.

Dear Mr. Warburg: The matter I mentioned by telephone this afternoon is, briefly, as follows:

Messrs. Brown Brothers, of this city, are negotiating as syndicate managers with a group of French banks with a view to opening a credit of considerable size under the usual revolving commercial letter of credit, and they expect that the American group of banks that will accept drafts drawn by the French banks under this arrangement will be members of the Federal Reserve System.

The drafts will be drawn at 90 days' sight, although the maximum amount of credit, I am informed, will be continued as open credit for a period of nine months. Drafts will be drawn individually by the members of the French institutions on the individual banks in America in proportion to their respective interests in the respective syndicates; that is, drawing syndicate in France and accepting syndicate in America. Proceeds of the drafts when discounted are to be held by Brown Brothers & Company as syndicate managers and paid on order from the manager of the French group, but only for purchase of American goods for shipment abroad, as evidenced by the shipping documents.

The time drafts will bear on their face the evidence of having been drawn under the above credit. The object of the arrangement is to place dollar exchange at the disposal of the French banks to be sold to their customers as required to make payment for goods purchased in this country. The credit has no relation to orders for war materials, although if any particular customer of any one of the French group should happen to be an importer of such goods, there would be no prohibition against his being furnished with exchange.

This transaction is not undertaken for account of the French Government, but I am advised is strictly a banking transaction between the banks of the two countries.

The above is the substance of a statements made to me today by Mr. James Brown, of the banking firm of Brown Brothers & Company, who states that in the interests of the member banks, by whom some of these drafts will likely be accepted, he is anxious that the terms of the arrangements will be such as will comply with the terms of the Federal Reserve Act and the regulations of your Board, and that the drafts, when accepted by the member banks, will be of a character which might be purchased by this bank.

Considering the responsibility of the parties to the transaction and the obvious necessity for an arrangement of this character being perfected at this time, I would recommend a ruling by your Board that these drafts may be considered eligible for purchase by the Federal Reserve banks. Mr. Brown will write stating specifically the terms of the arrangement if you desire, but I have advised him that we have uniformly replied to inquiries of this character that we would prefer not to take any action which would appear to make us an original party to the arrangement.

Very truly yours,

/s/ STRONG, *Governor*.

Hon. PAUL M. WARBURG,
Federal Reserve Board,
Washington, D. C.

EXHIBIT NO. 2410

JUNE 17, 1915.

DEAR MR. WARBURG: Your letter of June 11th to Governor Strong relative to the matter referred to in Governor Strong's letter to you of June 9th was received by us yesterday morning.

I have had further talks with Mr. James Brown yesterday afternoon and this morning concerning the questions raised in your letter. According to my understanding, the credit, when arranged, is to be operated as follows:

The drafts all will be drawn at 90 days' sight. The proceeds will be placed with Brown Brothers to the credit of the French syndicate and will be paid out only against the exportation of goods. Assuming, for example, that the total proceeds lodged with Brown Brothers were twenty-five million dollars, an aggregate of only twenty-five million dollars of disbursements to finance exports would be made against it. Instead of making 270 day drafts at the outset they make three 90 day drafts, with the object of making the drafts, when accepted, eligible for purchase by Federal Reserve banks. But no portion of the proceeds of the original drafts is to be used in connection with renewals, and the proceeds of any cover remitted by the French syndicate to Brown Brothers will be placed in a separate account to be used in taking care of the acceptances as they mature. No part of the proceeds of such cover will go into the original account opened for the purpose of financing exports, but will be used in reducing the total amount of the acceptances.

It would not be practicable for Brown Brothers to write to the A B C bank, as you suggest on page 3 of your letter, because that would require drawing and accepting to cover specific shipments. The purpose of the plan is, in brief, to place in this country a large fund to be available for the double purpose of stabilizing exchange and financing exports, whether to France or other countries. The proceeds of the original drafts go into a special fund and are used only once in financing exports, but the French syndicate is given nine months within which to cover either the original drafts or such renewals, not exceeding two, as may be required. Provided you agree that the original draft need not apply to a specific shipment then about to be shipped, the question of renewals or extensions does not seem of vital importance. If it were possible for the banks to accept at 270 days at the outset, there would be no renewal question at all. Under the proposed plan the use of the proceeds of the original drafts is completely segregated from the financing of renewals and the ultimate payment of the obligation.

If the war should stop with the credit not entirely expended, there would be in time ample exports of various sorts to consume it, and the agreement would provide that the credit should be extinguished only in this manner.

Very truly yours,

—— ——, *Chairman.*

Honorable PAUL M. WARBURG,
Federal Reserve Board,
Washington, D. C.

PJ/RAH.

EXHIBIT NO. 2411

[Excerpt from minutes of the Federal Reserve Board, June 10, 1915]

A letter from Governor Strong of the Federal Reserve Bank of New York relative to the establishment of foreign credits in behalf of a group of French bankers, was referred to Mr. Warburg and Mr. Harding for report.

EXHIBIT NO. 2412

[Excerpt from minutes of the Federal Reserve Board, June 15, 1915]

Mr. Warburg presented a report with reference to the proposed plan of operation by a syndicate of French bankers, which had been presented by Brown Brothers, saying that he thought the proposal went in some respects rather too far, and suggesting that there ought to be a definite time within which the proceeds of drafts drawn by the French bankers could be used. Discussion ensued and the documents relating to the matter were placed in the hands of Mr. Hamlin for further study, it being understood that a letter drafted by Mr. Warburg, and included among these documents, should be transmitted without further action by the Board, unless some objection appeared.

EXHIBIT NO. 2413

[Excerpt from minutes of the Federal Reserve Board, July 9, 1915]

The opinion of counsel of the Board with reference to the question whether bankers' acceptances may be renewed on expiration was read to the board, and after discussion the secretary was directed to say to Governor Strong that the Board would like to have him present in writing a precise case involving the issues he had in mind respecting the renewal of acceptances. The secretary was also directed to say that the Board would be happy to see him in person, but that Tuesday, July 13, would be the first day available for that purpose.

[Confidential]

$20,000,000 French commercial export acceptance credit.

Messrs. J. P. Morgan & Co.,
New York.

Dear Sirs: For the purpose of enabling French purchasers of American merchandise and other commodities for export to Europe to settle their accounts with American merchants, and at the request and on behalf of a group of strong institutions and private bankers in France, represented by Credit Lyonnais and Messrs. Heine & Company, of Paris, France, managers of the French group, we are arranging for an export commercial credit to be extended by a group of American banks, trust companies, and bankers. The individual members of the French group will draw ninety-day sight drafts to an amount in the aggregate of twenty million dollars ($20,000,000) upon the members of the American group, severally and in proportion to their respective interests in the credit, drawings to begin as soon as the necessary agreements have been executed in France. The drafts are to be forwarded by the French managers to us for acceptance and discount in two instalments of ten million dollars ($10,000,000) each, not less than ten nor more than fourteen days apart. The names of the French group and the amounts of their participations are enumerated at foot.

The credit is to be for a period measured by the terms of the ninety day drafts and two renewals thereof, approximately nine months. At maturity of the last renewal the members of the French group severally guarantee the payment in New York exchange or in gold coin of their respective drafts. The performance of these engagements on the part of the French group is to be guaranteed by the Bank of France in a manner satisfactory to us and is further to be secured by deposit with us, with power of rehypothecation and sale, of Bons de la Defense National and/or French Treasury bills, in francs, payable about one year hence to an amount at least equal to the face of the drafts as drawn, at approximately the rate of exchange prevailing at the time the agreements are executed in France.

A commission of one-quarter of one percent (¼%) is to be paid each American drawee upon the acceptance of each ninety days sight draft and upon each renewal thereof. The discount rate is fixed at five per cent (5%) per annum.

The proceeds of the drafts under the credit, when discounted, are to be held by us, to be used exclusively in payment for merchandise and other commodities to be exported from the United States to Europe.

The undertaking of each member of the American group is to accept his pro rata of the drafts drawn by the members of the French group and two renewals thereof and to guarantee discount to the extent of his participation at the agreed rate of five per cent.

All the business is to be transacted between the managers of the French group and ourselves as managers of the American group. All drafts will be presented for acceptance by us and will be discounted at best obtainable rates either at the Federal Reserve bank or in the open market. The difference between the actual proceeds of discount of each installment of all the acceptances which are discounted through us, and the face of such drafts less the agreed discount, is to be immediately remitted by us to or paid to us by those members of the American group whose acceptances are discounted through us and in proportion to their respective acceptances. Each acceptor, however, is to have the option of withdrawing his acceptance on paying forthwith the proceeds of it to us at the agreed discount rate of five per cent (5%), provided he notifies us of his election to do so at the time of his acceptance of each draft.

Our compensation is paid by the French managers and all legal and other expenses are provided for. We are advised that the acceptances will be "eligible" with the Federal Reserve bank.

In due course we will advise you of the execution of the necessary agreements in France and send you copy of the form of guaranty of the Bank of France.

We have allotted you a participation of two million five hundred thousand dollars ($2,500,000) in the above commercial export credit, and will thank you to advise us promptly whether you accept the participation and agree to the above term.

Yours very truly,

Brown Brothers & Co.

J. P. Morgan & Co.,
Export Department,
New York, July 8, '15.

[Copy of telegram despatched to Morgan, London]

5248. For H. P. Davison. For your information, Brown Bros. & Co., N. Y., have formed syndicate of leading banks and bankers here to accept 90 days' drafts drawn by various banks and bankers in Paris to the extent of $20,000,000. They call it a commercial export credit to enable merchants in France to pay for commodities of all kinds to be purchased here and exported to France. Drawers of drafts will be de Rothschild Freres, $4,000,000; Credit Lyonnais, Paris, $4,000,000; Comptoir National d'Escompte de Paris, $4,000,000; Heine & Co., $2,000,000; Hottinguer & Co., Paris, $2,000,000; and various houses for smaller amounts.

Drawings will be arranged upon scale, that is to say, each drawer will draw proportionate amount upon each acceptor. Plan provides for two renewals, 90 days each, accepting commission ¼% for each period and 5% interest. The $20,000,000 is to be covered by French Government Treasury bills and payment of the amount to be guaranteed by Bank of France in gold in New York City at the expiration of the 9 months.

Brown Bros. & Co. to be managers of the syndicate and hold the Treasury bills here and receive ½ or ¾ for their services. They have arranged with Federal Reserve bank that drafts and both renewals shall be discountable, Brown Bros. & Co. guaranteeing that proceeds of original drafts will be used only in payment for goods exported. Brown Bros. & Co. planned to sell all drafts in this market and thus practically start an open discount market, but is willing to give acceptors privilege withdrawing their own acceptances or other of like amount if desired. J. P. Morgan progressing so splendidly we mentioned matter to him. He is delighted with it and urged that we participate to the extent of $3,000,000, which we will do if we can get it.

Morgan.

Exhibit No. 2416

[Excerpt from cable #5490, for E. C. Grenfell from Morgan]

July 20, 1915.

Have today had a long talk with *Governor, Federal Reserve bank*, who suggests that one way of helping situation would be for *joint-stock banks* to temporarily arrange with *New York* banks that acceptance heretofore made by *London joint-stock banks* on merchandise be made in dollars by New York banks, under the guarantee of London joint-stock banks. You will see that the effect of this would be to take off from the market all bills covering exports of usual produce and merchandise which in ordinary course are covered by bills. This plan would involve replacements on the part of New York banks, for which it is believed arrangements could be made, as this business is high-class and desirable business. Disadvantages would seem to be the possible development of dollar business heretofore sterling business, but as conditions are abnormal, all resources [possible] must be considered. You understand our interest in this situation is only that of general welfare and in the interest of British credit, as we see it.

We regret sending such pessimistic report, but cannot too strongly urge upon you your serious and immediate consideration of this situation.—H. P. DAVISON.

NOTE.—Pencil notation enclosed in brackets.

("Exhibit No. 2417" appears in text on p. 8225)

EXHIBIT No. 2418

[From the House collection; custody of Prof. Charles Seymour, Yale University, New Haven, Conn.]

The PRESIDENT,
Cornish, New Hampshire.

DEAR GOVERNOR: I am enclosing you a copy of a letter I have just received from Bernstorff.

I did not arrange to see him as I first planned because he was conferring with Lansing and I did not think it necessary, in these circumstances, to do so. I am trying to plan a way to see him without it becoming known.

* * * * * * *

Your autograph note, enclosing memorandum from Page, came this morning, but not the other letter of which you speak. The postmaster assorted the mail himself and he says there was but one letter in a White House envelope. If it comes during the day I will add a line to this.

I think the time has come for me to get in touch with Sir Edward direct, and I shall do so at once. I have a feeling that, as far as the cotton producer is concerned, the proposal to purchase it would be more to our advantage than the present arrangement. This though would not satisfy the people that are creating this situation. I see evidences of a systematic and well-financed campaign in the South. Papers that formerly took one view have turned almost in a night to a contrary one, and I notice one after the other joining the cry.

There are some curious things going on in this country and I received some information the other day that may give us some light. I also have some information concerning the leakage in the State Department, and the names of two men (both of them, by the way, Bryan men) are given. I am arranging to let Lansing have this information so he may run it down.

* * * * * * *

Delano and Governor Strong of the New York Federal Reserve bank, were here yesterday to see me concerning the serious condition that confronts us in regard to foreign exchange. They believe that unless the Federal Reserve System broadens its basis of credits that another month or two will bring about a crisis and almost a complete breakdown of our foreign trade.

They told me that three of the Reserve Board are in favor of broadening the credits but that two are opposed to it. They did not give the names for it was not necessary.

My advice was that while we were living under abnormal conditions we should have the courage to meet them in a way that will redound to the advantage of our country, and that credits should be broadened as far as perfect safety would permit. I hope this view meets with your approval.

Affectionately yours,

——— ———.

MANCHESTER, MASSACHUSETTS, *July 28, 1915.*

Exhibit No. 2419

[From the House collection; custody of Prof. Charles Seymour, Yale University, New Haven, Conn.]

(386—Diary—August 3, 1915—200, 201)

Governor Charles Hamlin of the Federal Reserve Board lunched with me today. He gave a full account of the inside workings of the Board. He said Paul Warburg had been perfectly fair and had not injected his feelings into the situation but he was not as broad a man as he had first thought. He knew commercial banking and its niceties as well as it could be known, but he did not grasp the bigger questions of policy, although he thought his appointment had been justified.

Harding and Delano were doing their work well. Miller, he thought least of, and yet he, too, had justified his appointment. He was satisfied with conditions, although it was difficult to work with Comptroller Williams.

We went into the question of broadening credits and I found he was not impressed with the importance of this as was Delano and Strong. I, therefore, endeavored to straighten him out in this direction. He said the Board's counsel thought acceptances could not be made for longer than six months and the Comptroller agreed with this decision. I pointed out the actual wording of the law and said the Board's ruling prevented it but the law itself did not. Therefore, in my opinion, all that was necessary was for the Board to rescind their former action and make a new ruling. He promised it should be done in a way not to restrict credits and so our foreign trade should go on uninterrupted.

Exhibit No. 2420

[From the House collection; custody of Prof. Charles Seymour, Yale University]

The President,
The White House, Washington.

Dear Governor: You know, of course, there is trouble brewing in the Federal Reserve Board.

I sympathize with McAdoo's view in regard to foreign acceptances, and I hope there may be some way of bringing it about without a public rupture.

To my mind, the Federal Reserve Act is the most beneficial piece of legislation that has been enacted in this country, and I shall be surprised if history does not so regard it. It is unfortunate that any controversy has arisen among the members, and, if I were in your place, I would caution McAdoo to go slow.

Miller might be gotten out a little later, and then, perhaps, Warburg would leave of his own volition. I am inclined to think he would.

I am enclosing you a part of a letter I have written McAdoo on the subject, which I hope you will approve.

Affectionately yours,

——— ———.

Manchester, Mass., *August 27, 1915.*

Exhibit No. 2421

[From the House collection; custody of Prof. Charles Seymour, Yale University, New Haven, Conn.]

The White House,
Washington, Aug. 31, 1915.

Dearest Friend: I have your letter of the thirtieth of August, enclosing copies of letters from Sir Edward Grey and Bernstorff.

Of course, our reply to Germany's overtures of conciliation will have to depend a great deal on the terms in which they are actually made. Bernstorff has only stated the principle which will be accepted, and you know I trust neither his accuracy nor his sincerity. But it certainly does look as if a ray were opened out of our difficulties, so far as Germany is concerned.

That only makes more perplexing our questions as to how to deal with England, for apparently we have no choice now but to demand that she respect our rights a good deal better than she has been doing. Shall we insist that she open the door to neutral trade, to Rotterdam and Scandinavia, for example, which she is quite right in believing is in effect trade with Germany? Bernstorff is now demanding of us, in a note from his Government, that we insist on Germany's getting our cotton "for the use of her civilian population." Germany has at last come to her senses and is playing intelligent politics. She is seeking to put us into a position where we shall have to play to some extent the role of cat's-paw for her in opening trade to her.

* * * * * * *

You are right about the Reserve Board imbroglio. And I think McAdoo thinks so too, now. Indeed, I think he raised the question about the action of certain members of the Board about that meeting only to get a leverage for something bigger than the proper handling of acceptances and discounts.

* * * * * * *

If this cool weather takes a notion to stay, it would be jolly to have you come down some time next week, after your lease at Manchester has expired.

Always,
Affectionately yours,

(Signed) WOODROW WILSON.

Mr. EDWARD M. HOUSE,
Manchester, Mass.

[Translation from]

SCHEDULE "C"

GUARANTY OF BANK OF FRANCE

Text of letter addressed by the Bank of France to the French Syndicate Manager:

LA DIRECTION GENERALE
DU CREDIT LYONNAISE,
Paris.

I have the honor of acknowledging receipt of your letter of August 17th, which reads as follows:

"We have been informed of negotiations which you have undertaken in the United States with the view of opening a credit having for its object to assure facilities of exchange to the French purchasers of American merchandise and products.

"We are glad to accept the role which you have reserved us in this operation and we are happy to put our cooperation to the disposition of the Bank of France for the realization of the contract herein prepared under its control and for its account.

"It is understood that the Bank of France will assume repayment either through exchange or this failing, by shipments of gold, and will assume all risks of the operation."

I have the honor to confirm to you our full agreement upon the contents of this letter.

Very truly yours,

G. PALLAIN, *Governor.*

[Memorandum]

FRENCH COMMERCIAL ACCEPTANCE CREDIT "A" $20,000,000

This credit was arranged under an agreement dated August 21, 1915, between Brown Brothers & Co. (the American managers) and 17 American banks and banking houses (the American syndicate) and the Credit Lyonnais (the French managers) and 10 French banks and banking houses (the French syndicate), under the guarantee of the Banque de France. The credit was arranged to provide dollar exchange to enable payments to be made to American exporters of merchandise. Under the terms of the credit, the 10 French banks drew a series of 90 day drafts on the American syndicate, totalling $20,000,000, these drafts being renewed three times, thus making the term of the credit one year. Each of the members of the American syndicate received commission at the rate of ¼% on the drafts accepted by them, and the agreement provided that the drafts were to be discounted at the rate of 4½%. Brown Brothers & Co., as the American managers received a management commission of ⅛%, out of which they were to assume the legal and other expenses of the American syndicate. The credit was secured by the deposit with the Farmers Loan & Trust Co., Paris, of French national bonds (Bons de la Defense Nationale).

The proceeds of the original series of drafts, totalling approximately $20,000,000, were credited on the books of Brown Brothers & Co. to Banque de France special account commercial export credit "A," Upon instructions of the Banque de France, either by cable or by letter through its representative in America, Brown Brothers & Co. made disbursements to other banks to put them in funds to pay suppliers of merchandise, and in some instances payments were made by Brown Brothers & Co. direct to the suppliers of merchandise against shipping documents, and in some instances merely against certification that they covered exports. The third renewal series of the accepted drafts matured on varying dates between September 5, 1916, and October 30, 1916, on which dates they were paid and retired.

AGREEMENT—COMMERCIAL EXPORT CREDIT "A"—$20,000,000—DATED NEW YORK, U. S. A., AND PARIS, FRANCE, AUGUST 21, 1915—BROWN BROTHERS & CO., NEW YORK, AMERICAN MANAGERS; CRÉDIT LYONNAIS, PARIS, FRENCH MANAGERS

$20,000,000 FRENCH COMMERCIAL EXPORT ACCEPTANCE CREDIT

Agreement made this twenty-first day of August, one thousand nine hundred and fifteen, between Brown Brothers & Company, of New York (hereinafter called the American managers), and J. P. Morgan & Company, National Bank of Commerce in New York, Guaranty Trust Company, American Exchange National Bank, Bank of New York, N. B. A., Bankers Trust Company, Brown Brothers & Company, Central Trust Company, Chase National Bank, Columbia Trust Company, Farmers Loan & Trust Company, Hanover National Bank, Mechanics & Metals National Bank, New York Trust Company, J. & W. Seligman & Company, Bank of America, all of New York; the Franklin National Bank, the Philadelphia National Bank of Philadelphia, and the Merchants National Bank of Boston (hereinafter called the American syndicate), the Credit Lyonnais, of Paris (hereinafter called the French managers), and Messieurs de Rothchild Frères, Crédit Lyonnais, Comptoir National d'Escompte de Paris, Heine & Cie, Hottinguer & Cie, Mallet Frères & Cie, de Neuflize & Cie, Mirabaud & Cie, Vernes & Cie and Banque Suisse et Française, all of Paris (hereinafter called the French syndicate).

Whereas French buyers of American merchandise and other commodities for export from the United States to Europe have found it difficult, owing to the extraordinary conditions now prevailing, to obtain satisfactory exchange to enable them to settle their accounts with the American merchants; and

Whereas the export of American merchandise and other commodities to Europe may be seriously curtailed unless adequate exchange facilities are provided; and

Whereas in order to provide additional exchange facilities for such French purchasers of American merchandise and other commodities, the French managers have formed said French syndicate, whose respective participations therein are more particularly enumerated in "schedule A" hereto annexed and made a part of this contract; and

Whereas in order to facilitate payments to American merchants, the American managers have formed the said American syndicate, whose respective participations therein are more particularly enumerated in "schedule B" hereto annexed and made part of this contract; and

Whereas it has been agreed that the American syndicate through the American managers shall open a commercial export credit for account of the French syndicate for the amount of the twenty million dollars ($20,000,000.00) upon the terms hereinafter stated; and

Whereas each member of the American syndicate, severally, and in proportion to its and their respective participations in the commercial export credit, has agreed to accept drafts drawn severally by the individual members of the French syndicate in proportion to their respective participations in said credit, and each said member of the American syndicate has further agreed to guarantee discount of said drafts to the extent of its and their participation at an agreed rate of four and one-half percent (4½%) per annum; and

Whereas letters have been exchanged between the French syndicate and the Bank of France, constituting a guaranty of payment in gold, if necessary, on the part of the latter, copies of which letters are hereto annexed, marked "schedule C";

Now, therefore, in consideration of the premises and of the mutual covenants and agreements herein contained, it is agreed as follows:

First. The commercial export credit hereinabove provided for, to be designated as "commercial export credit A", shall be for the aggregate amount of twenty million dollars ($20,000,000.00) for a period of approximately one year, and shall be availed of by drafts to be drawn at ninety (90) days' sight (with three (3) renewals thereof for like periods), by the several members of the French syndicate upon the several members of the American syndicate, such drafts to be forwarded to the American managers in eight (8) successive weekly installments of two and one-half million dollars ($2,500,000.00) each. The amounts of the drafts to be drawn by the members of the French syndicate, and the designation of the respective drawers and drawees shall be determined by the French managers, and a schedule of such drawings shall be forwarded to the American managers. Each member of the French syndicate shall draw by one or several drafts in such amounts respectively as the French managers shall determine, upon the members of the American syndicate severally to an aggregate amount in each installment in proportion to the participation of such members of the French Syndicate respectively in the total commercial export credit as specified in "schedule A" hereto annexed. The amounts of the drafts in each installment upon the several members of the American syndicate shall be in proportion to the participations of such members respectively, as specified in "schedule B" hereto annexed, in the said total commercial export credit. All drafts so drawn shall be forwarded by the French managers to the American managers, who shall, in due course, present the same for acceptance by the drawees therein named, and said drafts shall be accepted by said drawees as hereinafter provided. The first installment of said drafts shall be forwarded or delivered immediately after the execution hereof, and the following installments shall be forwarded or delivered weekly in like manner.

Second. Each member of the American syndicate severally and in proportion to its or their respective participation in said commercial export credit hereby agrees to and with each member of the French syndicate severally and to and with each other party hereto, to accept said drafts so drawn severally by the individual members of the French syndicate in proportion to their said respective participations in said credit forthwith upon presentation of such drafts as aforesaid; and also each member of the American syndicate severally to the extent of its or their participation covenants and guarantees with and to each other party hereto that the said several drafts so to be accepted shall be forthwith discounted in lawful money of the United States equivalent to gold coin of the United States of the present standard of weight and fineness, at the agreed rate of four and one-half per centum (4½%) per annum and that the proceeds of such discount shall be forthwith paid to the American managers.

Third. The American managers will place the proceeds of such discounts to the credit of the Bank of France in a special account to be kept by the American managers. Such funds shall be paid out from time to time upon written or cabled order, to be addressed to the American managers by the Bank of France, or by its designated agent or agents, but only in payment of American merchandise and goods, manufactured or not, as well as all produce, livestock, and other commodities of whatsoever nature to be exported and upon presentation of shipping documents or contracts for shipments or other American evidences of exportation to be delivered to the American managers at the time of payment and to be forwarded in due course by the American managers to the Bank of France. It is understood and agreed that the American managers shall be obligated to make such payments only against cash in hand. Therefore, no cheques, drafts, or cabled orders shall be drawn against the proceeds of any such drafts discounted and held upon such special account, until at least three (3) business days after the receipt by the American managers from the French managers of such drafts forwarded for acceptance and discount.

Fourth. Each member of the French syndicate, at least five (5) days prior to the maturity of each of the ninety-day drafts originally drawn hereunder, shall cause first renewal ninety-day drafts, drawn by the same drawers upon the same drawees, and for amounts identical with those of the drafts so maturing, to be delivered to the American managers through the French managers, and the American managers shall present the same in due course for acceptance to the drawees therein named.

Each member of the American syndicate severally hereby agrees to and with each member of the French syndicate severally and to and with each other party hereto, to accept such first renewal drafts so drawn severally by the individual members of the French syndicate forthwith upon presentation of such first renewal drafts as aforesaid; and each member of the American syndicate severally to the extent of its or their participation covenants and guarantees with and to each other party hereto that the said first renewal drafts so to be accepted shall be forthwith discounted in lawful money of the United States equivalent to gold coin of the United States of the present standard of weight and fineness, at the agreed rate of four and one-half per centum (4½%) per annum, and that the proceeds of such discount shall be forthwith paid to the American managers; and upon receiving the proceeds of such discount the American managers shall apply the proceeds towards the payment of the maturing drafts.

Each member of the French syndicate at least five days prior to the maturity of the first renewal drafts shall cause second renewal ninety-day drafts drawn by the same drawers upon the same drawees and for the identical amounts so maturing, to be likewise delivered to the American managers; and the American managers shall present such renewal drafts for acceptance in like manner; and each member of the American syndicate severally to the extent of its or their participation agrees likewise to accept said second renewal drafts and covenants and guarantees with and to each other party hereto that the said several second renewal drafts so to be accepted shall be forthwith discounted in lawful money of the United States equivalent to gold coin of the United States of the present standard of weight and fineness, at the agreed rate of four and one-half per centum (4½%) per annum and that the proceeds of such discount shall be forthwith paid to the American managers; and the American managers, upon receiving the proceeds of such discount will apply the proceeds thereof to the payment of the said first renewal drafts.

Each member of the French syndicate at least five days prior to the maturity of the second renewal drafts, shall cause third renewal ninety-day drafts, drawn by the same drawers upon the same drawees and for the identical amounts so maturing to be likewise delivered to the American managers; and the American managers shall present such renewal drafts for acceptance in like manner, and each member of the American syndicate severally to the extent of its or their participation agrees likewise to accept said third renewal drafts and covenants and guarantees with and to each other party hereto that the said third renewal drafts so to be accepted shall be forthwith discounted in lawful money of the United States equivalent to gold coin of the United States of the present standard of weight and fineness, at the agreed rate of four and one-half per centum (4½%) per annum, and that the proceeds of such discount shall be forthwith paid to the American managers; and the American managers upon receiving the proceeds of such discount will apply the proceeds thereof to the payment of the said second renewal drafts.

Fifth. It is further agreed that at the maturity of each third renewal draft, each member of the French syndicate shall respectively arrange that remittances through the Bank of France or otherwise shall be received by the American managers at least five (5) days prior to the maturity of each third renewal draft drawn by it hereunder of the equivalent of each maturity. Such remittances may be made by forwarding to the American managers drafts or cheques upon responsible American drawees, or by foreign exchange devices, provided an agreement as to price thereof can be reached, but all remittances so made shall be at the risk of the members of the French syndicate, respectively, and without responsibility to the American managers. In case exchange shall not be available for remittance, payment shall be made in New York to the American managers for account of the American syndicate of all maturing acceptances in gold coin of the United States or other bullion or gold coin equivalent in value to gold coin of the United States of America equal to the present standard of weight and fineness.

Sixth. It is mutually agreed between the American managers and the American syndicate, and between said parties alone, that each member of the American syndicate is to have the option of withdrawing its or their acceptance on paying forthwith to the American managers the proceeds of it at the agreed discount rate of four and one-half per cent (4½%) per annum, provided such member notifies the American managers of his election to do so at the time of his acceptance of each draft. The difference between the actual proceeds of discount of each installment of all the acceptances which are discounted through the American managers and the face of such drafts, less the agreed discount, is to be immediately remitted by the American managers, or paid by those members of the American syndicate to the American managers, whose acceptances are discounted through the American managers, and in proportion to their respective acceptances. All drafts discounted by the American managers will be at the best obtainable rates either at the Federal Reserve bank or in the open market.

Seventh. As security for the due performance of the covenants of this agreement, Bons de la Défense Nationale to the order of Brown Brothers & Co., American managers, in francs, payable in Paris on or about fifteen months from the date hereof shall be deposited with the nominee of the American managers in Paris for the account and subject to the instructions of the American managers to an amount equal to the face of this credit, the equivalent being ascertained by conversion of francs into dollars at the rate of five francs ninety centimes (fcs. 5.90) per dollar. Such deposit shall be made from time to time in installments at or before the forwarding of the drafts by the French managers to the American managers, and in amounts at least equal, at said rate of exchange, of five francs ninety centimes (fcs. 5.90) per dollar, to the amount of the drafts so drawn.

Upon full payment of all acceptances given under this contract all said bonds, save such as shall have been otherwise lawfully disposed of under this agreement, shall be returned to the French managers.

In case of the default by any member of the French syndicate in the execution of any of the clauses of this contract, the American managers shall have power of rehypothecation or sale of such and so many of the said Bons de la Défense Nationale as shall be approximately necessary to make good such default, applying the net proceeds of any such sale or rehypothecation to the payment of any acceptance then due, and upon final settlement hereunder, accounting to the French managers for any surplus so arising, provided that no sale of any of said Bons de la Défense Nationale shall be made either by the American managers or under or by reason of any rehypothecation of said bonds except at public sale in the cities of Paris, London, or New York, and upon ten days' previous notice to the French managers; such period of ten days to begin upon deposit of notice with a cable company in New York for transmission by them to the French managers and by delivery of said notice addressed to the French managers at the office of any person in the city of New York previously designated by the French managers to receive the same; and in any case of notice of sale for default as aforesaid, or under any rehypothecation the French managers or any member of the French syndicate shall have the right to pay the indebtedness for which any of the said bonds are rehypothecated or to make good such default and redeem such bonds at any time before such sale. The American managers or any members of the American syndicate may become the purchaser or purchasers of such Bons de la Défense Nationale, or any part thereof, at any such sale.

And provided further, that if any case of default under article fifth hereof shall be due to the nonarrival for any cause in New York of drafts, remittances, gold, or bullion, which have been seasonably forwarded by the French managers for transmission in the ordinary course to the American managers and notice of the forwarding of which shall have been given by the French managers by cable or otherwise, then no action for the sale of any of said bonds shall be taken until the expiration of twenty days from such default, except that ten days' notice of sale, expiring on or after the termination of said period of twenty days, may be given by the American managers to the French managers in the manner above provided.

If any member or members of the American syndicate shall default in the performance of any act which, by the terms of this agreement, it or they are required to do, then, in addition to any other remedies which the French syndicate or any of them or the French managers may have on account of such default, and if the drawer of the draft on which such default shall occur shall take up the same, the American managers shall forthwith, upon request of the French managers, return to the French managers so many of the Bons de la Défense Nationale then in their hands as shall bear the same proportion of the total amount then held by the American managers which the draft so taken up bears to the total amount of the acceptances then outstanding.

Eighth. Each member of the French syndicate will severally remit through the French managers to the American managers with all its original ninety (90) day drafts drawn hereunder, an acceptance commission amounting to one-fourth (¼) of one percent (1%) of the face of such drafts, and a like commission on each renewal draft, as well as the agreed discount at the rate of four and one-half per cent (4½%) per annum on such renewal drafts for payment by the American managers to the member of the American syndicate to whom the same may be payable by the member of the French syndicate remitting the same.

Ninth. The French managers and the members of the French syndicate hereby expressly waive the benefit of any moratorium or law of the Republic of France postponing or affecting in any way the obligation of the members of the French syndicate to provide at maturity for the full payment of each and every acceptance drawn hereunder in accordance with the terms of this agreement.

Tenth. It is expressly understood and agreed that all liabilities of and undertakings by the parties to this agreement are several and not joint, and that the several members of the American syndicate and of the French syndicate, respectively, shall none of them be answerable for any obligation, act, or default of any other member of said syndicate, nor except for its or their own obligation, act, or default, and nothing herein contained shall be construed as constituting a partnership between the members of said syndicates, respectively; and it is expressly declared that the French managers and the American managers shall not be answerable or responsible to any member of their respective syndicates for or on account of any act or omission of any agent or employee selected in good faith, nor for any error of judgment or mistake of law nor in any case except for its or their own individual wilful malfeasance or neglect.

Eleventh. It is understood and agreed that the French syndicate shall by a contract executed contemporaneously with these presents provide for payment to the American managers of the compensation for their services, and that the American managers shall and will assume and discharge all legal and other expenses of themselves and of the American syndicate arising under this contract.

Twelfth. This agreement may be executed severally by any of the parties in as many counterparts as desired, each of which so executed shall be deemed to be an original; and such counterparts, although separately signed, shall together constitute but one and the same instrument.

In witness whereof the copartnership parties hereto have signed these presents; and the corporate parties hereto have caused these presents to be signed by their respective officers thereunto duly authorized the day and year first above written.

Brown Brothers & Co.
(Hereinabove called the American managers).

Schedule "A".—*Names and participations of French syndicate*

AGREEMENT—COMMERCIAL EXPORT CREDIT "A"—$20,000,000—DATED NEW YORK, U. S. A., AND PARIS, FRANCE, AUGUST 21, 1915—BROWN BROTHERS & CO., NEW YORK, AMERICAN MANAGERS; CRÉDIT LYONNAIS, PARIS, FRENCH MANAGERS

Agreement made this twenty-first day of August 1915, between Brown Brothers & Company, of New York (hereinafter called the American managers), and Credit Lyonnais of Paris (hereinafter called the French managers), and Messieurs de Rothschild Frères, Crédit Lyonnais, Comptoir National d'Escompte de Paris, Heine & Cie, Hottinguer & Cie, Mallet Frères & Cie, de Neuflize & Cie, Mirabaud & Cie, Vernes & Cie, and Banque Suisse et Française, all of Paris (hereinafter called the French syndicate).

Whereas the parties hereto have (together with the American syndicate) contemporaneously herewith entered into an agreement concerning a commercial export credit for the amount of twenty million dollars ($20,000,000) and to be designated as "commercial export credit A"; and it is provided by article eleventh thereof that the French syndicate shall agree to pay compensation of the American managers under said agreement, as herein set forth; and it is desirable also to arrange and agree concerning the other subjects herein contained.

Now, therefore, in consideration of the premises and of the mutual covenants and agreements herein contained, it is agreed as follows:

First. For the services of the American managers in forming the American syndicate, procuring the acceptance of drafts, making payments against documents and other services hereunder, each member of the French syndicate shall pay or cause to be paid to the American managers through the French managers a commission at the rate of one-eighth of one per centum on the face amount of the said respective drafts. Such payments shall be made on each installment of drafts simultaneously with the payment of the acceptance commission. In consideration of this commission, the American managers will also pay the legal and other expenses of the American managers and the American syndicate.

In case Brown Brothers & Co. are requested by the French managers to issue confirmed commercial credits, Brown Brothers & Co. shall be paid one-quarter (¼) of one per cent (1%) additional on all such credits issued.

Second. If the French managers from time to time before maturity of the credit, shall purchase American exchange in Europe, they may remit the same to the American managers in current account, all such remittances to be at the risk of the French syndicate. The proceeds of such remittances shall be subject to the order of the French managers by cheque or otherwise, and without any restriction or limitation as to use or otherwise. It is expected by the American managers that the French managers will wish to conduct all exchange operations in relation to the credit with the American managers through this account, but it is expressly understood and agreed, however, that the opening, conducting, and continuance of such current account is entirely optional upon the part of the French managers and is not a condition or consideration for said credit, and that said credit is in nowise dependent thereon; and, further, that no lien, security, trust, or pledge shall be created or exist upon or in respect of said current account, or any moneys or property covered thereby under or by reason of the said credit or of any obligations arising thereunder.

Third. Interest shall be allowed by the American managers on all balances in their hands, whether under this agreement or under said contemporaneous agreement covering said commercial export credit, at the rate of one-half (½) of one per cent (1%) below the official minimum discount rate of the New York Federal Reserve Bank for prime bank acceptances, with a minimum of one per cent (1%) and a maximum of three per cent (3%) per annum.

Fourth. This agreement may be executed severally by any of the parties in as many counterparts as desired, each of which so executed shall be deemed to be an original; and such counterparts, although separately signed, shall together constitute but one and the same instrument.

In witness whereof the copartnership parties hereto have signed these presents; and the corporate parties hereto have caused these presents to be signed by their respective officers thereunto duly authorized the day and year first above written.

BROWN BROTHERS CO.,
(Hereinabove called the American managers).

EXHIBIT NO. 2423

334.1–1915

FEDERAL RESERVE BANK OF NEW YORK,
July 9th, 1915.

MY DEAR MR. DELANO: Referring to our conversation of this afternoon in regard to a ruling by the Board as to the power of national banks to open a revolving credit, permit me to submit the following as illustrating the character of the transaction as explained to me by the bankers who are interested:

A, a New York bank, enters into a contract, either directly or through an agent, with a French bank, B, by the terms of which the French bank B is permitted to make drafts on the New York bank, payable at 90 days' sight, up to a total amount specified in the contract or letter of credit. The credit continues for its total amount for a period of 9 months and, therefore, the French bank is authorized to draw three drafts or three sets of drafts for the total amount of the credit before the eventual expiration of the credit and final payment of all drafts.

These drafts are to be negotiated in the market and the holder thereof is under no obligation to extend them after maturity. It is, in fact, a revolving commercial credit, as the proceeds of the drafts are to be used to pay for exports from this country against delivery of documents representing actual commodities, although security will be given for the payment of the drafts during the entire life of the credit.

You will observe that, as to the holders of the drafts, no obligation exists for renewal. As to the drawer and acceptor of the drafts, the credit extends for 9 months, and in this respect I believe a ruling should distinguish between the period for which the credit is to run and the statutory prohibition as to the length of time for which a national bank may accept. The contract might be construed as involving an arrangement for renewal between the drawer and the acceptor, but could not be construed as imposing any obligation to renew upon the holder of the draft or involve any violation of the Federal Reserve Act as to the length of time for which a national bank may accept any specific draft.

I should also call your attention to the custom which now generally prevails of opening commercial credits for a period of a year or for an indefinite period, subject to termination by either party. Such an arrangement is necessary in the case of business conducted with the East, where distances would not permit of opening special credits for special transactions. In my own experience in the exportation of copper from Chili, importation of potash from Germany, and other like commodities, these credits must be opened for periods of a year or even longer in order to enable a bank to meet the reasonable requirements of its customers.

In the case under discussion I understand the credit is to be used for the purpose of paying for all sorts of merchandise and goods exported from this country to France, and the fact that the proceeds will be used to take up the documents evidencing the actual shipment of goods would seem to involve a necessary compliance with the statute and regulations of your Board, although the shipper does not draw the bill, which is drawn by a banker in behalf of the importer of the goods.

Thanking you for your consideration of this matter, I beg to remain,

Very truly yours,

/s/ Benj. Strong, Jr., *Governor.*

Hon. F. A. Delano,
Federal Reserve Board,
Washington, D. C.

BSJr/VCM-12.

334.1-1915

[Note.—The roman type represents the letter as originally written. The italic type in parenthesis represents the proposed inserts by Mr. Warburg. The linetype represents words, sentences, or letters stricken out by Mr. Warburg.]

July 15, 1915.

Mr. Benjamin Strong, Jr.,
Governor, Federal Reserve Bank,
New York City.

My Dear Mr. Strong: The Federal Reserve Board and the Comptroller of the Currency have considered your letter of July 9th in which you ask whether a national bank can enter into an arrangement by which a line of acceptance credit may be given for a period of nine months, and individual drafts to be drawn upon the accepting bank payable at 90 days sight up to the total amount specified in the letter of credit.

Assuming that the drafts drawn are to be used to take up the documents evidencing an actual shipment of goods from the United States to foreign countries, the Board and the Comptroller find no prohibition of law against such an arrangement being entered into. It is, of course, to be understood that each bill accepted shall be subject to the terms and conditions of the National Bank Act, and section 13 of the Federal Reserve Act, as amended, and, further, to section 5200 of the Revised Statutes, with relation to the 10% limitation.

I would also state that it is the opinion of the Board and the Comptroller that no contract could be entered into by the member bank accepting them, which would at the time of accepting or offering to accept such drafts, provide for the renewal [*by the holder*] of ~~the~~ [*any specific*] drafts drawn under said letter of credit [*beyond a period of six months*]. Should, however, the accepting bank subsequently decide to arrange with the drawer for ~~a renewal of any such drafts~~ [*the acceptance of new drafts at or*] before the time of payment, [*of the old draft*] no legal objection is perceived to their doing so, it being understood, of course, that when the drafts have once been negotiated in the market, the holder, ~~other than the drawer or acceptor,~~ will be under no obligations to extend them after maturity.

~~It is understood that your letter is confined to the question of power in a National bank to enter into such credit arrangements, and that it does not involve a determination of the question whether such acceptances could be rediscounted for the holder at a Federal Reserve Bank. The Board naturally prefers to give no expression of opinion on this question until and unless it is brought before it for determination, but it may be assumed that the Board will not apply conditions substantially different in requirements from those now in force. Such an application, however, might involve not only questions of law, but of policy as well.~~

Very truly yours,

(Signed) F. A. Delano, *Vice Governor.*

The foregoing letter was prepared by Governor Hamlin but he left before it was ready for his signature.—F. A. D.

Exhibit No. 2425

[Private]

July 10, 1915.

Benj. Strong, Jr., Esq.,
Governor, Federal Reserve Bank of New York,
New York, N. Y.

Dear Ben: In further references to our conversation with regard to a proposed commercial export credit which my firm is negotiating at the request of a number of the strongest private banks and institutions in France, and, in reply to your inquiry, I advise you as follows:

French buyers of American merchandise and other commodities for export from the United States to Europe have found it difficult, owing to the extraordinary conditions now prevailing, to obtain credits or satisfactory exchange to enable them to settle their accounts with American merchants. On the other hand, American merchants have not been willing to sell to French merchants in the usual way because of the extraordinary exchange conditions; in consequence, exports of American merchandise and other commodities to Europe have been, and may continue to be, seriously curtailed unless adequate credit and exchange facilities are provided.

Therefore, in order to facilitate payments to American merchants we have undertaken to form a syndicate of banks, bankers, and trust companies in this country to open a commercial export credit for a round amount.

Each member of the American syndicate, severally and in proportion to his respective participation in the commercial export credit, agrees to accept drafts drawn severally by the individual members of the French group, and my firm undertakes, when the proceeds of these drafts have been received, to hold it on deposit upon special account and to disburse it only in payment for American merchandise and other commodities to be shipped abroad against shipping documents and other satisfactory evidences to be delivered to us at the time of payment, and thereafter forward in due course to the drawers of the drafts. We undertake that no part of the proceeds of the acceptances shall be used for the payment of the acceptances at maturity. The credit is not for the purpose of financing the sale of war materials to the French Government.

The credit is for a full period of two hundred and seventy days, but, because of the greater availability for discount of ninety day sight drafts, the credit is to be availed of in three drawings of ninety days sight each. At the maturity of each of these ninety day sight drawings, the acceptances will be paid in cash from funds provided from the discount of new ninety day sight drafts, which, in turn, will be discounted in the open market. At the maturity of the credit the acceptances will be paid in New York in gold or in New York funds. The above machinery is customary in the issue of commercial credits. It is in terms a revolving credit for two hundred and seventy days. The holder of an accepted draft is under no obligation to renew or extend the draft he holds. It will be paid in cash.

Yours very truly,

(Signed) BROWN BROTHERS CO.

("Exhibit No. 2426" appears in text on p. 8230)

EXHIBIT No. 2427

FEDERAL RESERVE BOARD,
Washington, July 28th, 1915.

MY DEAR MR. STRONG: At the informal conference held in New York at the Federal Reserve bank on Friday, July 17th, at which Messrs. Delano, Harding, Warburg, and myself were present, the letter addressed to you by Vice Governor Delano under date of July 15th, on the subject of arrangements by national banks for lines of acceptance credit against which drafts are to be drawn, was considered; and in view of the discussion then held, this letter is sent to you as stating a little more clearly and fully the views of the Board.

Assuming that the drafts are to be used to take up documents evidencing an actual shipment of goods from the United States to foreign countries, the Board and the Comptroller find no prohibition of law against such an arrangement being entered into. It is, of course, to be understood that each bill accepted shall be subject to the terms and conditions of the National Bank Act and section 13 of the Federal Reserve Act, as amended, and, further, to section 5200 of the Revised Statutes in relation to the 10% limitation.

The reference to the 10% limitation under section 5200 of the United States Revised Statutes is not intended to apply to the mere acceptance of a bill of exchange drawn under such credit arrangements; on the contrary, the reference is solely to the case of a bill duly accepted and actually paid by the acceptor, to whom the drawer has failed to furnish funds before the date of maturity. We are advised by our counsel that acceptances do not fall within the limitations of section 5200 but that when paid by the accepting bank, assuming that funds have not been furnished by the drawer, the bank is then put in the position of having made a loan to the drawer, which loan would fall within the limitations of said section 5200.

In this connection I would state that it is the opinion of the Board and of the Comptroller that no contracts could be entered into by any member bank accepting drafts which would at the time of acceptance obligate such bank to accept a new draft against the same transaction if the date of maturity of the new acceptance is more than six months from the time of the original acceptance. Should, however, the accepting bank decide to make independent arrangements with the drawer for the acceptance of new drafts at or before the time of payment of the old drafts no legal objection is perceived to their doing so, provided such arrangement is made subsequent to and independent of the original contract of acceptance; it being understood, of course, that when drafts have once been negotiated in the market the holder will be under no obligation to extend them or to take new acceptances for them after maturity.

In the above paragraph the Board desires to make it clear that a national bank cannot lawfully enter into a contract obligating it at maturity of any specific draft to accept a new draft, which contract would obligate such bank at the time of the original acceptance to renew its credit for a period aggregating more than six months. Such an agreement, whether collateral or on the draft itself, would *in substance* amount to the acceptance of a draft having more than six months to run.

It is understood that your letter of July 9th is confined to the question of the power of a national bank to enter into the credit arrangements described therein, and that it does not involve the determination of the question whether the resulting acceptances could be rediscounted for the holder at a Federal Reserve bank. That is a question primarily for determination by the officers and directors of the Federal Reserve banks under the general instructions or regulations imposed by law and the administrative orders of the Federal Reserve Board. It goes almost without saying that the Board expects these officers and directors to act with proper caution and discretion in this as well as in other matters. Regulations, which possibly may not be sufficiently complete to cover all cases, have already been issued by he Federal Reserve Board, but it may be assumed that should it be necessary to issue new or supplementary regulations, the Board will not, without previous notice, apply conditions substantially different in requirements from those now in force.

Yours very truly,

(Signed) C. S. HAMLIN, *Governor.*

Mr. BENJAMIN STRONG, Jr.,
Governor, Federal Reserve Bank,
New York City.

EXHIBIT No. 2428

Memo for Governor Hamlin.

Attached are copies of Mr. Warburg's letter. The fourth copy I send, thinking you may wish it for Governor Strong.

L. G. WATERS.

[Copy]

[In pencil: Dr. Miller.]

AUGUST 2, 1915.

DEAR GOV. HAMLIN: Thank you very much for your letter of the 29th.

I am sorry to see from the papers that you are subjected to a pretty tough spell of heat. But you told me that you are thriving when the thermometer shows a temperature of 105½ degrees in the shade. I hope you will take a short holiday and cool off a little. Give my best regards to the Governess.

Thank you for sending me the copy of your letter to Gov. Strong. I suppose you were joking when you wrote that "you think" it covers the suggestions made by me at the conference in New York. Indeed, it does not! It expresses just the contrary, and I am sorry to have to express my emphatic dissent.

For simplicity's sake I return the copy of the letter to Gov. Strong and shall mark by numbers the paragraphs I intend to discuss.

(1) "Assuming the drafts are to be used *to take up documents*"—they need not take up documents, but the proceeds must be used for the shipment of certain goods. This, however, is not important.

(2) If section 5200 does not apply to "acceptances", the reference to it is most confusing. You say, "It is to be understood that each bill accepted shall be subject to * * * section 5200", and then you proceed to state that the section does not apply to "acceptances" but only to loans (if the drawer does not cover the acceptor at maturity, the acceptance must be paid all the same by the drawee and, therefore, the acceptance is dead and converted into a cash advance). The "acceptance" is, therefore, *not* subject to 5200. The bank, in case the acceptance should not be covered by the drawee, would be in the position of a natl. bank having acquired mortgages on stocks by the foreclosure of a loan. It has to take prompt steps to dispose of these assets, and so has the ex-accepting bank the duty to reduce the loan as speedily as possible. But, to my mind, it is confusing to say that the "accepted bill" is subject to section 5200. Has Mr. Cotton seen the letter? He was originally consulted, and I think it might have been done to advantage.

(3) The doctrine propounded in this paragraph is just the reverse of Mr. Cotton's opinion and of what we agreed upon in New York when four members were present.

A-Shing in China wants to send silk to New York, the goods to go by sailing vessel and to be warehoused in New York upon arrival and, in case they should not be sold at maturity of acceptance, the bill to be renewed for another 90 days. A-Shing may not dare to make the consignment unless he had a contract for the renewal. A bank may make a loan for any time, a bank could agree to accept for six months and then carry the loan as a cash advance for another six months. *So there is nothing to prevent the commitment*, and it is only the question of form. The law says "any member bank may accept drafts or bills of exchange drawn upon it having not more than six months sight to run." That is as plain as can be. The draft or bill of exchange (the specific piece of paper!) must not have more than six months to run. But there is not a word in the act that a bank must not contract to accept a renewal draft. The discount market was to be kept clear of anything in excess of six months, because banks are to remain liquid and acceptances ought to have the character of the most liqiud assets. But that has nothing to do with the contract between drawer and drawee. Moreover, you say they may renew, but they must not say so in advance. That looks weak, does not help anybody, and hurts business. Moreover, there is no warrant for this restriction, and State banks would again have the advantage against national banks.

(4) It looks to me as if a most important principle was involved here. Do we want to throw away our right to holding a F. R. bk. to account if it takes acceptances that it should not take? If we want to retain that right, we must answer questions of general principle. I should think the F. R. bks. would eagerly accept this portion of your ruling!

I cannot help feeling that this letter to Gov. Strong must represent some unfortunate compromise of colliding opinions. I think it a very unsatisfactory document and hope some way may be found to substitute *one* clear letter for the two so far written. Why not get Mr. Cotton to help the Board in this matter?

Pardon my frankness, but I deem it the duty of members to give each other their real thoughts, and I trust you will never hesitate to write me with equal brutal frankness.

I read your letter to Mr. Fowler and am in entire accord with the same.

* * * * * * *

Always faithfully yours,

(Signed) Paul M. Warburg.

Hon. Charles S. Hamlin.

Exhibit No. 2429

334.1–1915
[Notation in ink: Dr. Willis.]
[Notation in pencil: Warburg.]

Sunday, Aug. 8, 1915.

Dear Friends: I just received Dr. Willis' notice of the meeting called for the 16th to act upon counsel's opinion covering revolving letters of credit.

Yesterday I received a letter from Mr. Harrison sending me a copy of this opinion and I wrote him at once that I am in the fullest accord with it. Inasmuch as Harrison states that the Board unanimously approved the letter—and inasmuch as I voted already on the very same question at the informal meeting at New York and have since expressed my views in writing—I take it that I am notified of this meeting as a matter of form, in accordance with the wish expressed by Secretary McAdoo, but that there is no necessity for me to be present. If I am mistaken in this, may I ask to be informed by wire?

There are two questions involved: The one is the general question of the power of a member bank to enter into a contract obligation to renew an acceptance credit even for a longer period than six months. That is plainly a question of interpretation of law, one upon which there can be hardly any doubt, one upon which counsel has now given an opinion, satisfactory, as I understand, to all members of the Board, and certainly to a majority, and all the Board is about to do in this respect is to adopt its counsel's opinion (including Mr. Cotton).

The second question involved is the particular application of the ruling to the so-called Brown credit. Concerning this I understand, as Harrison states, that you, Dr. Miller, have some apprehension lest a revolving credit might in substance amount to a loan granted to a foreign government.

This, however, has nothing to do with the first question, viz, the broad power of renewing a credit, but only with the question of whether the proceeds of the drafts are bona fide employed for the purpose of financing the importation or exportation of goods. In this connection it was stated to Mr. Strong that the Board thought it necessary, in view of the existing regulation, that the accepting banks before actually accepting should be notified (by the managers of the syndicate) of the goods to be purchased with the proceeds of the draft and that the drafts must not be renewed after the goods have been shipped. This would ensure the legitimate use of the credit. It was furthermore stated to Mr. Strong that no government must appear as a party to the contract or guarantor, but that the credit was to be given to private concerns. (Finally Browns had assured Mr. Strong that no war materials were to be financed by this credit arrangement.) If the restrictions as here stipulated are adhered to, there cannot be any fear that the credit should amount to "a permanent foreign government loan." However, the second question is one of application and has nothing to do with the *broad question of interpretation* on which the Board will act on the 16th, and which, I am sure, will be dealt with quite independently.

As to the particular Brown question, the Board had not been asked to give a ruling, but quite the contrary, Mr. Strong had suggested that this question be left within the New York bank's discretion upon his assurance that he fully understood our views.

If there is a necessity for my presence, I shall of course come, and as stated above, in that case I shall be grateful for a wire from you. If I do not hear from you I shall take it that Mr. Willis' letter is to be considered only as a formal notification.

With kindest regards for the entire Federal Reserve family, and hoping that the heat has subsided, I am

Always faithfully yours,

(Signed) PAUL M. WARBURG.

EXHIBIT No. 2430

[Memorandum]

At various conferences with the Federal Reserve Board, and particularly with Mr. Warburg, it has been informally understood that, while the Board does not care to make any formal ruling, the transaction described in the attached letter of Brown Brothers & Co., dated July 10th, would not meet with objection on the part of the Federal Reserve Board. They advised us, however, that it would be necessary to confer with the Comptroller of the Currency, so as to ascertain definitely whether he found any objection to a national bank accepting drafts under a revolving credit of this character, which continued for a period of nine months.

I had a long talk with the Comptroller on this subject yesterday, Deputy Comptroller Kane being present at the time. After explaining the importance of developing this character of credit in order that our crops and other exports might move promptly to foreign markets, the Comptroller said that while he was, also, unwilling to make a definite and fixed ruling on this point, he did not propose to raise any objection to this transaction. He was inclined to chaff a bit and avoided making any definite commitment; as he expressed it, "he felt assured that neither I nor any of the officers of the member banks would go to jail if the business was transacted", and I told him, therefore, that without any formal ruling being made, which I thought at this time would be inadvisable, we would inform member banks that inquired, that there seemed to be no objection to their doing this business. The conclusion arrived at by the Federal Reserve Board when I met with them on the 28th of June was, that while they did not care to make any definite ruling at that time, they would informally regard these transactions as eligible for our purchase in our open-market transactions.

EXHIBIT No. 2431

334.1–1915

AUGUST 6, 1915.

DEAR MR. SECRETARY: After a long discussion, the Board, this morning, voted to send to you and to Mr. Warburg the enclosed tentative draft of letter for you to comment on and criticise. I also enclose a copy of the opinion given by Mr. Harrison. I feel that this is now in proper shape. Mr. Miller does not agree with us and he feels, I am inclined to think, that neither the national banks nor the Federal Reserve banks should finance any of those war material exports, or any other exports which are ultimately destined to a foreign government as purchaser. He bases his opposition on the ground that the ultimate security for the acceptors will probably be some form of government notes, which may not be paid at maturity and which may have to be extended until they approach a long-term obligation. He also apparently is inclined to the belief that we ought not finance any transaction which does not liquidate itself, that is, which does not turn into money which can be given by the drawer to the acceptor to meet his obligation. I asked him to consider this case:

Suppose I go to a manufacturer of guns and buy a gun intending to shoot someone with it. I think there is no doubt that my note given to the manufacturer for that gun would be held to be commercial paper under the Federal Reserve Act. This shows that although the gun may not go into further process of manufacture, and might be consumed or destroyed, that fact does not necessarily tend to make the paper based upon it ineligible, either in domestic or foreign transactions.

I think, at the same time, that it might be well to point out, as I have done in this suggested letter, that the bank should be cautious not to overextend in these acceptances.

Mr. Miller also says that he feels that you ought to come to Washington when this matter is finally voted upon, as also Mr. Warburg. If, however, you agree in principle, I do not see any necessity of your coming on. I think Mr. Warburg will surely agree with this note, because he severely criticised our note of July 28th for not going far enough on the lines now covered by the new tentative letter.

I enclose a copy of his letter to me on this subject, and also a copy of Mr. Harrison's opinion.

Very sincerely yours,

(Signed) C. S. Hamlin.

Hon. William G. McAdoo,
North Haven, Maine.

[In pencil: Documents referred to above were sent by Dr. Willis.]

The following documents (Exhibits Nos. 2432 to 2451) complete the record in regard to acceptance transactions during 1915. It will be observed from Exhibit No. 2439 that Mr. Warburg's opposition was neither to acceptances as such nor to belligerent financing, but to the disguising of finance drafts as acceptances. Exhibit No. 2451 cast an interesting light upon how difficult it was to develop American acceptances for legitimate business not connected with the military financing of the Allies or in conflict with established British financial practice. Further documents bearing upon this point will be found among Exhibits No. 3639 to 3644. The documents dealing with acceptances during 1916 and 1917 will be found among Exhibits Nos. 3557 to 3658 and Exhibits Nos. 3864 to 3899. No testimony was taken on either subject. (See text, p. 8237.)

Exhibit No. 2432

Federal Reserve Board,
Washington, August 11, 1915.

Mr. Benjamin Strong, Jr.,
Governor, Federal Reserve Bank of New York,
New York City.

Dear Sir: The Federal Reserve Board and the Comptroller of the Currency have further considered the question propounded in your letters of July 1st and July 9th and elaborated in your memorandum submitted at their conference with you on the 4th instant, in which an answer is requested as to whether a national bank can enter into an agreement under which a line of acceptance credit may be given by such bank, the credit extending for a period of nine months, but the individual drafts to be drawn upon the accepting bank, to be payable at ninety days' sight, and not to exceed the total amount specified in the letter of credit.

It is the opinion of the Board and of the Comptroller that a national bank is authorized by section 13 of the Federal Reserve Act to enter into an agreement having more than six months to run, by the terms of which it obligates itself for a period of time specified in the agreement, to accept drafts drawn upon it, provided such drafts grow out of transactions involving the importation or exportation of goods and that the individual drafts have not more than six months' sight to run.

The restrictions of section 13 of the Federal Reserve Act would, of course, limit the total amount of acceptances made by any one bank, including those described, to an amount equal in the aggregate to not more than one-half of the paid up and unimpaired capital stock and surplus of the member bank except that by authority of the Federal Reserve Board, under general regulation of the Board, a member bank may accept for an amount not to exceed the amount of its capital stock and surplus.

It is, of course, understood that the ten per cent limitation imposed by section 5200 of the United States Revised Statutes is not intended to apply to the mere acceptance of a bill of exchange drawn under credit arrangements authorized by section 13 of the Federal Reserve Act, but the Board is of the opinion that the provisions of section 5200 of the United States Revised Statutes would apply to the indebtedness arising between the drawer of the bill and the accepting bank in case the drawer failed to furnish funds with which to meet the acceptance at maturity.

It should also be understood that the limitation of six months specified under section 13 of the Federal Reserve Act applies to the draft but is not construed by the Board as applying to the agreement or letter of credit under which the draft is drawn. This limitation of six months does, however, apply to specific drafts drawn under such agreements or letters of credit, and consequently, if the terms of the agreement or letter of credit imposed upon the holder for value of the draft any obligation to renew such draft at maturity so that the original draft with the renewal thereof would remain an obligation of the accepting bank for a period exceeding six months, such agreement would be ultra vires.

You will observe the distinction which the Board desires to emphasize in connection with this ruling, to wit: While a letter of credit or credit agreement may lawfully be made by a national bank which will extend by its terms for a period exceeding six months, such agreement must not be of a character as will impose upon the holders of drafts accepted thereunder any obligation to renew such drafts so that the period of acceptance shall exceed six months in duration as to any specified draft.

So far as the answer to this question is concerned, this letter will be considered as a modification of our letter of July 28th.

Very truly yours,

(Signed) C. S. HAMLIN, *Governor.*
(Signed) SHERMAN ALLEN, *Assistant Secretary.*

EXHIBIT No. 2433

AUGUST 27, 1915.

MY DEAR GOVERNOR HAMLIN: You will receive with this our separate letter in respect of regulation J, and possible amendments that may be considered desirable in view of the existing foreign exchange situation.

As bearing upon this matter, I now write to advise you that we have been requested to advise certain New York bankers whether acceptances drawn under commercial export credit A, negotiated by Messrs. Brown Brothers & Company of this city, are eligible for rediscount with this institution and whether they are eligible for purchase by this bank under section 14 of the Federal Reserve Act.

After the transaction was concluded, Messrs. Brown Brothers & Company furnished me with a copy of the agreement for our confidential information and I have obtained another copy to send you for examination in connection with the question of eligibility.

I am also advised that a further credit amounting to about $23,000,000 is now in the course of negotiation and it becomes highly important that the member banks of this district be advised as promptly as possible whether drafts drawn under credits of this character will, in fact, be eligible for rediscount or purchase under sections 13 and 14. May I, therefore request that this matter be given the early consideration of the Board and should there be any doubt of the eligibility of these drafts or the wisdom of modifying regulation J so as to remove any doubt as to their eligibility, I trust you will permit me to meet with the Board and discuss the matter.

Very truly yours,

——— ———, *Governor.*

Hon. C. S. Hamlin,
Governor, Federal Reserve Board,
Washington, D. C.

BS Jr/VCM-3.

Exhibit No. 2434

Federal Reserve Bank of New York,
Aug. 11, 1915.

My Dear Counselor: Please accept this as a belated but nevertheless very hearty expression of my appreciation of your hospitality, and will you not also pay my respects to your mother and sisters and tell them I enjoyed my brief visit with them very much indeed?

There was not a great deal of news at the office until yesterday, which developed a number of interesting matters. The proposed action by the Federal Reserve Board on the French transaction—in other words, the ruling as to revolving credits—did not come forward, but Harding turned up here the day before yesterday having been summoned by Secretary McAdoo to a meeting at New York. The Secretary was very insistent about the necessity for an immediate ruling and, as the result of a brief meeting I had with him and with Harding Monday noon, a special meeting of the Federal Reserve Board was called to be held at this office yesterday. They were all here, including Willis, with the exception of McAdoo and Delano. It took all day to have action but, finally, the enclosed letter was agreed upon, and is to be finally signed and sent to me at once from Washington. I shall be glad to have your observations; in fact, I missed your counsel in this matter very much as Mr. Harding wanted me to draft the letter, which I did without the benefit of your skill in the use of language.

I am sorry to say that two members of the Board were sternly and positively opposed to this action and one of them undertook to introduce every objection that could be raised, technical and otherwise. Finally the letter was delivered to me in this form in advance of final advice from Washington and I was authorized to read it to Mr. Brown, which I have done. I advised Mr. Brown that this does not dispose of the question of eligibility, and I have verbally notified the Board that, having now disposed of the question of the right of a member bank to accept renewal drafts, I was proposing to take a fresh hitch and go to the mat with them on the question of eligibility. We have got to have the question settled, and Governor Hamlin is disposed to call a special meeting of the Board, to be held in Washington when Secretary McAdoo returns, and have the matter out. I don't want to bring matters to this crisis, however, until we are more fully prepared. We should have a careful and conservative brief covering the law on this point, and I think we should make sure that Mr. Cotton entertains the same view that we do on this subject of eligibility.

Lest you may think me very careless in money matters, I write now to remind you that I owe you some money which will be promptly paid whenever you advise me of the amount.

I hope you have a bully holiday.

Very sincerely,

(Signed) Benj. Strong, Jr.

James F. Curtis, Esq.,
% Mrs. G. S. Curtis,
Manchester, Mass.

EXHIBIT No. 2435

[Excerpt from the minutes of the Federal Reserve Board, meeting of September 1, 1915]

The Governor of the Board presented a letter from Governor Strong of New York asking for a definite ruling as to the eligibility of bankers' acceptances taken under special contract involving the renewal of such acceptances, and also presented a proposed amendment to regulation J. The matter was taken under advisement, pending a later meeting.

EXHIBIT No. 2436

BANKERS' ACCEPTANCES

REGULATION—OPEN MARKET REGULATION—GENERAL

[Excerpt from the minutes of the Federal Reserve Board, meeting of September 2, 1915]

Discussion of the proposed regulation with reference to the establishment of a special rate for commodity paper and the issuance of a regulation relating thereto was begun. Mr. Warburg expressed the view that it would be to the advantage of the Federal Reserve System if it were permitted to develop its facilities of rediscounting between districts. Some of the Federal Reserve banks had difficulty in earning their operating expenses and would welcome an opportunity of rediscounting this commodity paper for the southern banks. He was confident that at 3% these rediscounts could be made (possibly even lower) and that thus there was an ample margin for the southern producer to receive credit facilities at 6%, the member bank receiving rediscounts at 3½% or 4%, whatever rate the southern Federal Reserve banks would decide upon. The result to the producer would be the same but the free development of the Federal Reserve System would not be interfered with. If the desired result would not be achieved it would be time for the Secretary then to deposit his funds. Of course, it was desirable to have fiscal relations established with the Treasury in all the Federal Reserve banks, but that was not the question involved here, but a deposit of large sums for a particular purpose. He urged this view upon the Secretary of the Treasury.

After the subject had been further fully canvassed, Mr. Williams offered the following revised draft of the proposed regulation:

REGULATION J, SERIES OF 1915 (SUPERSEDING REGULATION D OF 1915)

* * * * * * *

Mr. Warburg offered as an amendment to the draft of Mr. Williams, the same to take the place of provision (b) therein, the following:

The maximum rate on the original discount of commodity paper as a condition of eligibility of rediscount at the special rate herein authorized, shall be established by the Federal Reserve banks subject to the review and determination of the Federal Reserve Board."

On being put to a vote, Mr. Warburg's amendment was declared lost.

The question recurring on the original proposal of Mr. Williams, the revised draft of the regulation was declared adopted, Mr. Warburg voting in the negative.

The secretary of the Board was directed to telegraph to the Federal Reserve banks of Atlanta, Dallas, and Richmond, giving the substance of the regulation as thus adopted and asking that they make any suggestions that might occur to them, especially inquiring of Atlanta whether that bank adhered to the rate of 3½% on commodity paper proposed by it in its regular discount rate notice for the week. It was agreed that the replies of the several banks, and the text of the regulation as tentatively adopted, should be taken up for consideration at a meeting to be held on the morning of September 3, the whole matter to be disposed of, if possible, at that time.

The secretary prepared telegrams in accordance with the instructions thus conveyed, submitted them for approval, and ordered them sent.

The revision of regulation J, relating to bankers' acceptances, was taken up for consideration and amendment, and the Secretary of the Treasury presented a proposed revision of the Board's existing regulation prepared by Governor Strong, of the Federal Reserve Bank of New York. Mr. Warburg stated that it would be advisable that the whole question of the relationship of the Board and the Federal Reserve banks on the one hand, and foreign governments or governmental institutions or those acting for them on the other, should be referred to the State Department in order to obtain a clear expression with reference to the attitude of the Government on any questions that might involve the neutrality of the United States.

Commenting on the suggestions of Mr. Warburg the Secretary of the Treasury said that he did not think any questions of neutrality were involved in the proposed regulations concerning bankers' acceptances; that whatever action the Board might take would have reference to the carrying out the purposes and objects of the Federal Reserve Act; that the Board had no right to adopt regulations which discriminate against or in favor of any part of the lawful commerce of the United States, and that counsel of the Board had so advised. That the financing of our lawful commerce was one of the purposes of the Federal Reserve Act; that if any questions of neutrality should be raised, they would relate to specific transactions in which the Federal Reserve banks or member banks proposed to engage; that it seemed to him that in all such cases the proper course for the banks would be to apply to the State Department, whose function it was to pass upon questions involving neutrality.

Governor Hamlin offered and Mr. Williams seconded a motion that the Strong revision, or draft, of the acceptance regulation be adopted as it stood, with the exception of the proposed changes in the last paragraph on page 4, making the proposed draft read as follows:

"Federal Reserve banks may under section 14 of the act purchase acceptances in the open market without regard to the requirements and limitations hereinbefore stated, provided, however, that no Federal Reserve bank shall purchase the acceptance of a 'banker' other than a member bank which does not bear the indorsement of a member bank, unless a Federal Reserve bank has first secured a satisfactory statement of the financial condition of the acceptor in form to be approved by the Federal Reserve Board."

Without further discussion the motion was tabled until the next meeting of the Board.

Exhibit No. 2437

Bankers Acceptances

REGULATION—OPEN MARKET REGULATION—GENERAL

[Excerpt from the minutes of the Federal Reserve Board meeting of September 3, 1915]

Mr. McAdoo called up for further discussion regulation J, which had been made a special order at the meeting of Thursday afternoon, September 2d, there being before the Board the motion of Governor Hamlin for the general adoption of Governor Strong's proposed changes in the regulation. Mr. Warburg laid before the Board a memorandum in which he discussed the proposed changes put forward by Mr. Strong as follows:

"MEMORANDUM COVERING GOVERNOR STRONG'S PROPOSED AMENDMENT

"There is no objection to striking out the word 'banking' under IV (b).

"IV (c) The proposed amendment, particularly when considered in connection with the amendment of IV (f), goes much further than appears to be required for the Brown transaction. This is the case in two respects: first, by eliminating the words 'commercial, industrial, or agricultural concern' and substituting therefor the words 'purchaser or seller or other person' directly connected with the importation or exportation, the door is thrown open to drafts drawn by foreign governments or their representatives. Paper of this kind has generally been held as not desirable paper for banks of the character of a Federal Reserve bank. It would particularly be the case where the right is given to renew these bills indefinitely and where, as proposed under (f), other securities—that is to say Government bonds or other stocks and bonds—may be deposited as *collateral*, not as substitution for the original shipping documents but as collateral right from the beginning. In other words, the Argentine Government might deposit its Government bonds with some American bank and draw upon the American bank for three months, continuing this transaction indefinitely, the proceeds of the first draft having been sold in the market by someone who used these proceeds for the payment of goods to be exported. Second, by striking out the paragraph following the word 'banker', clause (c) a similar situation is being created with respect to a bank which is drawing the bill. As Mr. Strong words this paragraph, the banker need not have any connection at all with the purchaser of the goods or with the transaction involved. Just as outlined in the case of the Argentine Government, any banker in the United States or in a foreign country could draw upon an American banker, depositing any kind of collateral and renewing the bills indefinitely, provided the original proceeds had been used by someone in payment of goods to be imported or exported.

"I think it is most important that the Board should clearly recognize the bearing of the amendments here proposed.

"The amendment as proposed by me provides for all necessities of the Brown credit, but its purpose is to preserve the connection with the original transaction of importation or exportation so that plain finance drafts secured by bonds and stocks be eliminated, as to my mind this was the intention of the act.

"As to Government credits, the amendment as proposed by me would enable any foreign government to buy whatever it pleased by using the instrument of some commercial firm or of its banks, as in the case of the Brown credit. It is to be borne in mind that if an accepting bank fail, the Federal Reserve banks would be in the somewhat difficult position of having to sue a foreign government in case the draft had been issued by a government direct, a situation which can easily be avoided without the least interference with the fullest development of our commerce and trade. If the Board should decide, however, that it wishes to open the door for such drafts by foreign governments, it is suggested that the following wording should be preferable to that proposed by Governor Strong, inasmuch as it establishes the connection of the banker with the importation or exportation of goods:

" 'A banker's acceptance must be drawn by the purchaser or seller of the goods, upon the importation or exportation of which is based the transaction from which the acceptance originated, or by some person, firm, company, or corporation directly connected with said transactions or acting or as banker for the purchaser or seller.'

"If, as suggested by Mr. Strong, the last two sentences of clause (c) be stricken out, our regulations contain nothing about renewals, and it will be necessary, of course, upon request of the banks in that case, to give a separate ruling about these renewals. I would suggest, therefore, for the consideration of the Board, whether it would not be preferable to add at the end of this clause after the clause herein suggested, as follows:'

" 'The bill must not be renewed after the goods have been surrendered to the purchaser or consignee except for such reasonable period as may have been agreed upon at the time of the opening of the credit as a condition incidental to the importation or exportation involved.

"There is no objection to the changes proposed in (g) and (h) except that it is my belief that if the Board makes unnecessary changes in this regulation, it will be said by one side or the other that these changes have been made for the purpose of being of assistance to certain parties, and the Board is certain to be attacked on these lines. The more closely we adhere to the lines originally adopted, the stronger our position will be, provided that the Board does not, by anything that it does or leaves undone, interfere with the legitimate requirements of the situation.

"This is one of the reasons why I should think they would be in favor of the policy outlined by me.

"The change in the last paragraph of IV is so radical that it needs no further elaboration on my part. It means that the Federal Reserve banks may buy any acceptance they please; also those made by non-member banks, for the financing of domestic transactions. While it may be well that the ultimate development may lead us in this direction, I believe it is well worth while carefully to consider whether this radical step should be taken at this time."

General discussion ensued, Mr, Strong being asked to explain his reasons for the proposed changes. Mr. Strong stated that, in general, he considered the whole regulation of the Board unduly restrictive upon operations of the Federal Reserve banks. Commenting upon Mr. Warburg's memorandum, he said it was true that the proposed changes would open the way to the undertaking of business with foreign governments, but he thought there was nothing in the act inconsistent with such transactions. If the member banks have the right to accept paper of any character, he said, they would also have a right to rediscount acceptanes thus taken, otherwise member banks would soon be filled up with paper which was non-rediscountable. In the same way governments ought to be allowed to draw, and to use the same kind of commercial instruments that are used by private citizens in conducting trade. Otherwise they would have to do business on a basis different from that which had already been developed in the course of private business experience.

Secretary McAdoo broadly endorsed this view and expressed himself in favor of anything that would help to finance export trade.

Mr. Miller said that he desired to finance all trade on a sound business basis. He thought, however, that the Board would have a serious cause for regret should it allow itself to be governed in its general policies by conditions that were purely temporary and would before long pass away. He was willing to provide for the renewal of acceptances if necessary and for the rediscount of such acceptances with Reserve banks, but he would not go further than was absolutely necessary to meet the present situation. He would not be willing to take any action that would commit the Board to a future policy.

The Board should be careful at all times not to allow itself to be misled into the adoption of questionable policies, particularly those out of harmony with the spirit of the Federal Reserve Act under the plea of necessity. The present proposals, Mr. Miller added, seem to be inconsistent with the policies and principles laid down by the Board in its first report and in its subsequent regulations.

Mr. Harding thought that it was fundamentally necessary to keep the export trade of the country up to as high a level as possible and in order to accomplish this end, some form of credit must be arranged to sustain it. As to drafts of foreign governments he said that it was a fact that such governments were assisting private concerns in their own countries; they were helping to finance given industries. This was really the same in essence as the government's giving its endorsement to its own importers. Conditions had changed since the act was drawn and even since the existing regulation had been drafted. That made it necessary to adapt the rules to the changed conditions.

Mr. Strong in closing said that it seemed to be the fear of some that the acceptance power would be abused. He could assure the Board that there was no danger of such result. The banks of New York had had the unrestricted right to accept for some months, very few having abused it. Even where such abuse had occurred, it very quickly corrected itself because no one would buy acceptances that were unwisely made.

Governor Hamlin discussed the question of prime bills and asked Mr. Strong his view with reference to the different classes of bills in use abroad. Mr. Strong outlined the different classes in use and emphasized the view that all classes of bills, except accommodation paper, whether documentary or not, if they were "prime" were currently accepted by English banks and taken by the Bank of England.

At this point Mr. Strong and Mr. Curtis withdrew from the meeting.

After further discussion a vote was called for on the amendment provision (c) reading as follows:

"(c) A banker's acceptance must be drawn by a commercial, industrial, or agricultural concern (that is, some person, firm, company, or corporation) directly connected with the importation of exportation of the goods involved in the transaction in which the acceptance originated, or by a 'banker.' In the latter case the goods, the importation or exportation of which is to be financed by the acceptance, must be clearly specified in the agreement with or the letter of advice to the acceptor. The bill must not be drawn or renewed after the goods have been surrendered to the purchaser or consigneee."

On motion it was agreed to accept the amendment as thus provided with an addition making it read as follows:

"A banker's acceptance must be drawn by a purchaser or seller or other person (firm, company, or corporation), directly connected with the importation or exportation of the goods involved in the transaction in which the acceptance originated, or by a 'banker.' The bill must not be renewed after the bills have been surrendered to the purchaser or consignee except for such renewal period as may have been agreed upon at the time of the opening of the credit as a condition incidental to the importation or exportation involved, provided that the bill must not contain or be subject to any agreement whereby the holder thereof is obligated to renew the same at maturity."

Mr. Strong's amendment to sub-section (d) with somewhat further modification was adopted so as to make the sub-section read as follows:

"(d) A banker's acceptance must bear on its face or be accompanied by evidence in form satisfactory to a Federal Reserve bank that it originated in or is based upon a transaction or transactions involving the importation or exportation of goods. Such evidence may consist of a certificate on or accompanying the acceptance to the following effect:

"This acceptance is based upon a transaction involving the importation or exportation of goods. Reference no. —. Name of acceptor ———."

The other amendments proposed by Governor Strong in sub-section (e), (f), (g), and (h) were on motion all adopted as proposed. The subsequent amendment proposed by Mr. Strong in the text of the regulation were defeated, so that the revised text of the regulation as agreed upon read as follows:

REGULATION R, SERIES OF 1915 (SUPERSEDING REGULATION J OF 1915)

WASHINGTON, *September 7, 1915.*

BANKERS' ACCEPTANCES

* * * * * * *

The precise form to be given to the circular accompanying the regulation was referred to a special committee consisting of Mr. Harding and Mr. Miller, and the same action was taken with reference to the circular to accompany the commodity rate regulation.

The secretary of the Board was directed to give the commodity paper circular and regulation to the press for publication in the papers of Saturday morning, with an accompanying statement.

On motion it was voted to approve a commodity paper rate of 3% for Atlanta, the same having been proposed by the Atlanta bank by telegraph. The secretary was also authorized to inform the Federal Reserve banks of Dallas and Richmond of the action taken and it was agreed that in the event that these two banks should apply for a 3% commodity rate, it should be extended to them.

EXHIBIT No. 2438

[Excerpt from the minutes of the Federal Reserve Board, meeting of September 3, 1915]

The Governor of the Board presented a letter from Governor Strong of New York making specific inquiry as to the eligibility of certain acceptances made under a certain contract of Brown Brothers providing for a credit of $20,000,000 in the United States. It was agreed that in reply the Board should simply say that the new regulation, copy of which should be enclosed, would answer the question.

EXHIBIT No. 2439

FEDERAL RESERVE BOARD,
Washington, September 8, 1915.

DEAR GOVERNOR STRONG: I have your letter of September second, enclosing copy of the memorandum which you prepared for Secretary McAdoo last July. I have read this memorandum with great interest.

We are in full accord as to almost every point. As a matter of fact, if you will pull out again the copy of the paper that I wrote at the time with respect to measures that should be taken by the United States in order to prepare for emergencies, you will find that we are proceeding on the same lines.

The only point on which we differ is the question of finance drafts and Goverment drafts. Your argument is that you want these in order to take care of the regular commercial business of the country, fearing that all available credit facilities might be absorbed by the war industries. My conviction is that you are bringing about just the reverse of what you want to achieve in this respect. We both agree that everything should be done to facilitate transactions like the Brown credit and other commercial credits to assist the business of the country, but I am convinced that if you would permit plain finance drafts (provided this could be done under the law, which I doubt) the conseqeunce would be that, with the lack of enterprise shown by the American bankers in this resepct, all their acceptances, and, in any case, a very large percentage, would go to finance drafts which could easily be arranged in groups and what we really want—the substitution of the dollar acceptance to finance the regular commercial transactions—would remain in the hands of Europe as in the past. My own feeling is that if we do not encourage the finance drafts we will be in a position to force Europe to turn over to us their regular acceptance business for the financing of commercial transatcions, and that, by doing that, our banks will be gradually forced and trained to build up the necessary machinery, even though, in the beginning, I expect that these transactions would be done almost exclusively for account of foreign banks. But the difference is that the commercial importer or exporter in that case would draw on the American bank while, in your case—like the Brown credit—the foreign banks would draw on American banks but the commercial world at large would never know of these transactions, the immediate commercial business being carried on, as in the past, by European banks with our money. When the war will be over, we shall have missed the one great opportunity which is now at hand.

As to direct government drafts, I think (as I expressed to you) it is bad banking policy to have governments draw direct instead of using their commercial or banking machinery. By using the latter, you have some guaranty that the transactions that are being financed are of a commercial nature. If you eliminate the latter, you are apt to have government drafts which ultimately have no connection with the original purchase but are based on the taxing power and the ability of the foreign countries to pay off their loans. There is no end to such loans. If allowed, they would be issued to the very limit up to which banks are willing to accept and are able to discount the same, and, therefore, they are apt to unsettle a system which is based on commercial requirements. I do not for a minute believe that the trade of our country would have suffered by maintaining the original principle in this respect for, as I said to you, the limit is not what the European banks can draw but what the American banks can accept, and the American banks can accept less than the European commercial houses and banking firms can draw. I do not believe that one cent of trade would have been lost by maintaining the form of the commercial draft or bankers' draft.

You see that we do not differ as to the results we want to bring about. The only difference between us is, as I stated before, that I see in the present constellation a rare opportunity which will never return of establishing our dollar acceptance in the world market, while your preference for the easier way is bound to interfere with this development. You know that nobody has been more consistent than I in working for the broadening of our acceptance market and acceptance regulations. There are only two restriction which I think we should observe—the one is, as I stated before, that our system should develop in the right direction, and the other is that, until Congress will give National banks the power to accept for domestic transactions (a power which I think we should strain every effort to secure for them) we shall have to consider the condition of the National banks in framing our open-market regulations. We have given the State institutions many advantages and I do not think it would be fair to the National banks to open the Federal Reserve Banks for domestic bankers' acceptances before we have made a real effort to secure this power to accept for domestic transactions for National banks.

Very truly yours,

(Signed) PAUL M. WARBURG.

BENJ. STRONG, JR., Esq.,
Governor, Federal Reserve Bank of New York.

P. S.—I return your memorandum herewith.

EXHIBIT No. 2440

332.2

FEDERAL RESERVE BANK OF NEW YORK,
November 10, 1915.

[Personal]

DEAR MR. WARBURG: I am writing a letter to Governor Hamlin, of which the enclosed is a copy.

Governor Strong and I have been talking the matter over, and as I think you will understand from the conversation which you and I had last Saturday evening, we are very anxious to have our scope widened by being able to buy private bankers' acceptances.

You will also realize the difficulty of getting statements from the best bankers. We on our side realizes the possible embarrassment which might result from a further modification of the acceptance regulation at the present time, but it has occurred to us that at the annual revision of regulations in January 1916, which is periodic and not special, you might find it practicable to modify the acceptance regulation in the manner we have suggested.

Yours very truly,

[S] PIERRE JAY (E), *Chairman.*

Honorable PAUL M. WARBURG,
Federal Reserve Board,
Washington, D. C.

EXHIBIT No. 2441

332.2

FEDERAL RESERVE BANK OF NEW YORK,
November 10, 1915.

DEAR SIR: During the past two months Governor Strong has discussed with some of the leading private bankers in this city the question of their submitting statements in accordance with regulation R of the Federal Reserve Board, in order that their acceptances may be eligible for purchase by this bank. They have never been in the habit of making statements and do not feel inclined to make a statement to this bank which would be subject to the inspection of its board of directors, which is necessarily a changing body, dependent upon the selection of directors by the member banks and by the Federal Reserve Board. They find the same objection to submitting a statement for the inspection of the executive committee, inasmuch as this is a rotating body on which all members of the Board during the course of the year will serve.

A few of the leading bankers have suggested to Governor Strong that they would be willing to submit a statement in such form as might be necessary, to him and to me for our confidential information, which we should retain in our personal possesssion.

We have discussed this at two or three meetings of our board of directors and at a special meeting of the executive committee, to which the subject was referred. There is a feeling on the part of some of our directors that this would not be a satisfactory compliance with paragraph IV, which requires a *Federal Reserve bank* to secure a satisfactory statement of the financial condition of the acceptor. It is their feeling that as the regulation requires the *bank* to obtain the statement, it would not be sufficient compliance with it if this statement were obtained and kept only by the Governor and the chairman.

On the other hand, if this specific requirement were not in the regulation, our Board would feel quite ready, on the basis of the general credit of certain private banking firms, to authorize the officers to purchase certain lines of their acceptances, and this we are anxious to do in order to have as large a volume of eligible acceptances as possible for the purpose of increasing the volume of the acceptance market.

The fact that no statements were required by the regulation would not prevent Governor Strong and me from getting them in the manner above described, and such action, I believe, would meet with the approval of our Board; but as long as the regulation does require them, they do not consider that statements obtained in this manner would comply with it.

As a result of the discussions which I have referred to, our board of directors this morning voted that the chairman be directed to write to the Federal Reserve Board requesting them to modify the terms of regulation R in respect of the requirement of financial statements from acceptors of bills in such manner that the directors of this bank may be permitted to determine whether, and in what cases, such statements shall be required.

It is our earnest hope that in view of the desirability of broadening the discount market here, the modification suggested by our Board may meet with the approval of the Federal Reserve Board.

Respectfully,

[s] PIERRE JAY(E), *Chairman.*

Honorable C. S. HAMLIN,
Governor, Federal Reserve Board,
Washington, D. C.

PJ/LCE.

FEDERAL RESERVE BOARD,
Washington, November 19, 1915.

Memorandum.

My suggestion with respect to the modification of the Board's regulation R, section IV, paragraph (e), made by the Federal Reserve Bank of New York, is that no change be made in the regulation but that the Board by letter to the Federal Reserve agent advise that in its opinion it would not be detrimental to [inconsistent with the] good administration of the Federal Reserve bank ordinarily [and within the power of the board of directors of the F. R. bank, whenever in their judgment this should appear advisable,] to restrict the use of statements of private banking firms to the chairman and Governor, and that letters to this effect be addressed to the chairman of the several banks.

A. C. M.

NOTE.—Pencil notations enclosed in brackets.

332.2

FEDERAL RESERVE BOARD,
Washington, November 20, 1915.

Mr. PIERRE JAY,
Chairman of the Board and Federal Reserve Agent,
Federal Reserve Bank of New York, New York, N. Y.

DEAR SIR: Replying to the request contained in your letter to the Governor of November 10th, that the Federal Reserve Board "modify the terms of regulation R in respect of the requirement of financial statements from acceptors of bills in such manner that the directors of this bank may be permitted to determine whether and in what cases such statements shall be required", I beg to say that your request has been considered by the Board and I am directed to reply that the Board believes it would be inadvisable to amend regulation R in the way suggested. It is of the opinion, however, that it is within the power of the board of directors of a Federal Reserve bank, whenever in their judgment such a course should appear advisable, to restrict the use of statements of private banking firms to the chairman and Governor, and furthermore, that such a course would not be inconsistent with the good administration of a Federal Reserve bank. The board believes that this method would provide a solution for the difficulty presented in your letter of November 10th.

Respectfully,

——— ———, *Secretary.*

EXHIBIT No. 2444

332.2

FEDERAL RESERVE BOARD,
Washington, November 24, 1915.

PIERRE JAY, Esq.,
Chairman of the Board and Federal Reserve Agent of
Federal Reserve Bank, New York.

DEAR SIR: Replying to the request in your letter to the Governor, dated November 10th, that the Federal Reserve Board "modify the terms of regulation R in respect of the requirement of financial statements from acceptors of bills in such manner that the directors of this bank may be permitted to determine whether, and in what cases, such statements shall be required", ~~I beg to state that the Board has considered the matter, and has reached the conclusion that it would not be advisable to amend regulation R in the way you suggest, as it is believed advisable to require such statements uniformly from acceptors whose acceptances are purchased by Federal Reserve banks. You will note that the regulation prescribed that the Federal Reserve bank must have secured a satisfactory statement.~~ While the form of this statement is to be approved by the Federal Reserve Board, the method by which it is obtained would seem to be within the discretion of the board of directors. It would seem, also, that ~~the Board~~ [your directors], assuming that this is the practice in ordinary commercial banks, could delegate to its officers the matter of securing such statements, and the [Federal Reserve] Board, as at present advised, will not insist that such statements shall remain upon the files as the property of the bank. It would seem not unreasonable that when a bank has ceased to discount acceptances of any particular banker, ~~that~~ [whose obligation to the bank shall have been paid off] his statement should be returned to him, and if ~~they~~ [it] were made a permanent part of the records of the bank such course would not be possible.

The matter in question is one largely within the discretion of the board of directors, which can make any order as to such statement which it deems necessary for the protection of the bank at any time.

Very truly yours,

——— ———, *Secretary.*

NOTE.—Pencil notations enclosed in brackets.

332.2

NOVEMBER 30, 1915.

DEAR SIR: Replying to the request in your letter to the Governor, dated November tenth, that the Federal Reserve Board "modify the terms of Regulation R in respect of the requirement of financial statements from acceptors of bills in such manner that the directors of this bank may be permitted to determine whether, and in what cases, such statements shall be required", you will notice that, in the open market regulation for bankers' acceptances, the language has now been used, in connection with statements to be furnished by private bankers, "provided that a statement is furnished", the words "the Federal Reserve bank must have secured" having been eliminated.

This would appear to remove the difficulties you outline in your letter and enable your board to dispose of the matter on the lines indicated by you.

Yours truly,

——— ———, *Secretary.*

PIERRE JAY, Esq.,
Federal Reserve Agent,
New York.

EXHIBIT No. 2449

OCTOBER 8, 1915.

[Memorandum no. 2]

FEDERAL RESERVE BOARD REGULATIONS RE ACCEPTANCES

Before outlining forms of dollar credits that may be available for English institutions, it is well to set out the regulations of the Federal Reserve Board with regard to commercial acceptances.

(1) No national bank can accept finance bills.

(2) State institutions in some of the States, and all private bankers, can accept finance bills, but no finance bills are "eligible" for rediscount at the Federal Reserve Bank without the endorsement of a member bank.

(3) National banks may accept bills drawn against "(quote ruling)" to the extent of their capital and surplus, but only to the extent of ten percent of their capital and surplus for any one drawer.

(4) State institutions are not generally limited in their accepting power, but they are generally restricted against accepting for any one drawer to an amount larger than twenty-five per cent of their combined capital and surplus (New York State—other States different percentages).

(5) Private bankers are not restricted as to the amount of their acceptances, or the amount accepted for any person, but their bills are not eligible for direct discount with the Federal Reserve Bank—

(A) Unless they are based on a commercial transaction involving imports or exports.

(B) Unless the private bankers have qualified with the Federal Reserve bank (qualification requires the filing of a statement of assets and liabilities, and that the statement should be satisfactory to the Federal Reserve bank. Non-eligibiliy of private bankers' commercial acceptances does not in itself militate against their marketability).

(6) All commercial acceptances, whether eligible or not, are rediscountable with the Federal Reserve bank when endorsed by a member bank, subject to the restrictions of the act with regard to the amount discountable by the Federal Reserve bank for any one person or institution, etc.

EXHIBIT NO. 2450

NOVEMBER 11, 1915.

DEAR MR. WARBURG: Thank you for your letter of November 9th. Your argument is a very convincing one, but I cannot help feeling that you are accepting with unnecessary complaisance a rather narrow construction of a very indefinite statute which our Congress has exhibited a confused state of mind as to the difference between a draft, a bill of exchange, and an acceptance. I have always felt that too narrow a construction of the meaning of the law just at this time, when we are attempting to develop a bill market, and to develop commercial credits in connection with exports and imports, would seriously hamper as rapid a growth of the business as would be possible if we took a very broad view of what the statute means. I feel about bills (and you notice I use the word "bills" as distinguished from drafts, bills of exchange, or acceptances) exactly as I stated in Minneapolis. It is one of the draught horses of commerce. If we confine our bill market by technical definitions beyond those that are really required by the statute, we will attempt to make our draught horse walk on one leg, or two legs, or possibly three legs. In order to perform his function, he ought to have four sound legs.

Pardon this rather crude reply to your very able argument. I know you will say in reply that your rulings are limited by the statute. I do not believe they are circumscribed, however, as seriously as your argument indicates.

Would you mind giving me the benefit of Cotton's views on this subject? I have never had an opportunity to discuss it with him.

This matter will come up again in an important way in connection with English credits. A transaction will, I believe, be arranged in the near future by which the leading English banks, acting through a committee, will open credits with a large number of American banks, such credits to be distributed and managed through a committee of bankers representing a number of larger cities. These bills, I anticipate, will be drawn for three months with one renewal arranged at the time the credit is opened—no obligation, however, attaching to the bill or the holder of the bill to renew. If clean bills are drawn, as I anticipate will be the case, the proceeds will probably be disposed against the surrender of export documents or against other evidence that the payment is made for goods actually exported from this country. If the bills are secured by title to the goods exported from this country. If the bills are secured by title to the goods exported, it will, I believe, be arranged that other adequate collateral will be substituted as security to the acceptor before the documents are surrendered and the title passed to the purchaser. In the interest of our export trade, I believe it is important that bills of that character should be eligible, and more important still, that there should be no doubt in the minds of the national bankers that they are authorized under the Federal Reserve Act to accept bills of that character.

I am anticipating negotiations which are far from being concluded, and thought you and your associates would like to know about how this matter was developing.

Yours very truly,

——— ———, *Governor.*

135 ARCH STREET,
Philadelphia, Pa., October 29, 1915.

The SECRETARY OF STATE,
Washington, D. C.

DEAR SIR: We beg leave to acknowledge receipt of your favor of October 23, the same in reference to cabling the American Ambassador in London, in reference to permission to import certain goods from Messrs. Hajee Amir Deen Mohamed Ismail, Hyderabad, Sindh, India, and Mr. G. R. Forster, 75 Weston Street, Bermondsey, London, S. E., England.

Our previous letter informed you that we had, in accordance with the suggestion of the British consul general here, cabled and written the foreign office, London.

Appended you will please find copies of two letters, one from the Under-Secretary of State, Foreign Office, London, dated October 15, and the other, from the India office, dated October 18.

The latter only treats with the shipment from India, and you will note that the Government of India was informed by telegraph on August 28 respecting a proposed shipment, and again on September 28, but it is evident that the India Government did not act promptly, for on receipt of further advices from here, as regards the nonshipment from India, the London office again cabled on October 2nd, asking the India office to issue orders to the customs authorities. These instructions we believe have now been complied with, because we received a cablegram on October 25, advising us of the shipment from Hyderabad.

Neither of the letters above referred to gives us any information respecting permission to ship, being given to Mr. G. R. Forster for some reason that is held in abeyance; and we know that up to the present, permission to Mr. Forster has not been granted. As the conditions given to the British consuls here were the same governing shipments from London, as from India, all of which have been complied with, we fail to understand why they delay permission to Mr. Forster. No doubt your cablegram to the American Ambassador will bring a reply.

There is no question of doubt but what there is a hold-up between certain officials in London and Mr. A. M. Patterson, representing the Textile Alliance Inc., New York; and as we complied with the instructions laid down by the British Government, through the consul general here, we must look to the Department of State, or the Department of Commerce to protect our imports, and not be held up by the irregular actions of others.

In our letter of October 12 we called your attention to the difficulties under which American importers were laboring at the present time, owing to the rather arbitrary action of the British officials. It is very difficult to obtain direct proof, but the circumstantial evidence today is that the British Government, virtually having control of the seas, is indirectly discriminating against other than English merchants in foreign countries. The evidence of that, we think, can be better obtained through the American consuls at the various ports.

We beg leave to further inform your Department that the British Government and British bankers, are doing all they possibly can to prevent operations under letters of credit direct; that is, through American national banks instead of through the intermediate bankers of London. We are doing all we possibly can by writing to various shippers, and sending them statements of some of the ablest banks in this country, and informing them that said banks were under the supervision of the United States Treasury Department, and that drafts drawn by the shippers against national bank credits were A1. The suggestion might be in order that the proper Government official, in the way they might think most advisable, bring to the attention of the local bankers in foreign countries, information respecting the national banks in connection with the Reserve System, in such a way that they can see for themselves that credits issued by our national banks are better than credits issued by private banking concerns who are without supervision.

Yours respectfully,

(Signed). JOHN M. HARPER & COMPANY.

EXHIBIT No. 2453

Federal Reserve
Board File 301.2

AGREEMENT WITH THE BANK OF ENGLAND

AUG. 29, 1916.

Memorandum with respect to the questions of international law raised by the application of the Federal Reserve Bank of New York for consent of the Federal Reserve Board to appoint the Bank of England its correspondent and agent in London.

In considering the questions raised by this application, two issues seem to be presented: (1) Are the actions contemplated by the Federal Reserve Bank of New York, under the plan of operations with the Bank of England, unnuetral in character, and (2) if they are unnuetral, is the Government of the United States involved in such a way as to render the actions of the bank improper?

As to the first point, the actions proposed by the arrangement are:

(1) The establishment of an account with the Bank of England;

(2) The use of the Bank of England as an agent of the Reserve bank, to buy drafts and bills of exchange in the London market for account of the Reserve Bank;

(3) The use of the Bank of England as a custodian of gold owned by the Reserve bank, to be ear-marked for it;

(4) The use of the Bank of England to purchase and sell and ship gold to and from this country when necessary;

(5) A reciprocal purchase by the Federal Reserve bank of bills and drafts in this country for account of the Bank of England.

All the operations above described will be undertaken, if at all, for the purpose of regulating the exchanges between England and this country, which regulation will have as its object the assistance of the commerce of the United States. Such commerce of the United States is entirely proper and lawful in character. This is true, even though the commerce to be assisted by the actions of the Reserve bank consisted entirely of the sale and export of munitions and other contraband of war. The commerce in such munitions and contraband of war was described in one of the early circulars of the State Department, after the outbreak of the present war, as legitimate trade, and was specifically upheld by Secretary of State Lansing in his reply to the Government of Austria-Hungary and characterized as "lawful commerce."

However, the Federal Reserve Board has already sanctioned the indirect assistance of this commerce by the Federal Reserve banks, through its regulations which authorize the purchase by the banks of bills of exchange arising out of the export of goods from this country to the belligerent countries irrespective of whether such goods are, or are not, munitions or other contraband of war.

Consequently, it would appear that the dealing in bills of exchange in England, and the buying and selling of gold in England, and the opening of an account in England cannot be considered as unneutral acts, in view of the fact that taken by themselves such acts are clearly neutral or noncommittal in character and might take on an unneutral quality only through the fact that such fiscal operations might be used to finance exports of contraband of war. As such financing has already been shown to be lawful and not unneutral, there is no ground on which the activities above described can be held to be improper.

As to the second point, that is, whether or not the actions of the Federal Reserve Bank of New York might improperly involve the Government of the United States, assuming that the actions themselves were unneutral, it becomes necessary to consider the relations of the Federal Reserve banks to the Government of the United States, and of the Bank of England to the Government of England.

The Federal Reserve banks bear a relation to the Government of the United States only in the following particulars:

(1) They are created by Federal law;

(2) They are governed by boards of directors, of whom three members out of nine are appointed by the Federal Reserve Board, a Government agency;

(3) They are subject to the general supervision of the Federal Reserve Board, and to regulation by the Board with respect to certain of their activities;

(4) The net earnings of the Reserve banks, after the payment of dividends and the making of certain deductions, are to be paid to the United States as a franchise tax;

(5) The Reserve banks are the medium through which Federal Reserve notes, bearing the obligation of the Government, are issued;

(6) The Reserve banks may act as fiscal agents for the Government when so designated by the Secretary of the Treasury.

It should be noted that these relations between the Federal Reserve banks and the Government differ in degree only, but not in kind, from the relations of the ordinary national banks to the Government, as is shown by the following summary of such relations:

(1) National banks are created by Federal law;

(2) They are under the supervision of an officer of the Government, the Comptroller of the Currency;

(3) They pay taxes to the Government, called duties;

(4) They are the medium through which national bank notes are issued, for the payment of which the Government is obligated by the provisions of the law of 1890.

(5) They may act as fiscal agents for the Government upon the designation of the Secretary of the Treasury.

The only substantial distinction between the two types of institutions is the fact that Federal Reserve banks have three directors out of nine who are appointed by the Federal Reserve Board; but this distinction is only in regard to the method of their appointment, as such directors are no more liable to receive or obey instructions from the Federal Reserve Board than any of the other directors of the Federal Reserve banks.

Consequently, it appears that the Federal Reserve banks can in no sense be called either Government agencies or Government-owned agencies, but are in a situation parallel to that of the national banks.

As for the Bank of England, it is a private corporation, acting under a charter granted by Parliament, the corporation not being owned in any respect by the Government. It receive deposits from the Government, but is not subject to the direction or control of the Government any more than other banking corporations operating under charters.

As has already been pointed out, the Federal Reserve banks, have already been permitted to purchase bills based upon exports of contraband of war, which has not been considered as involving the Government of the United States in any unneutral act. By a parity of reasoning, the establishment of the Bank of England, or the Bank of France, or the Reichsbank, or any national bank of a foreign country, as agent of the Federal Reserve bank, should not be considered as involving our Government in any way. In this connection, it should be noted that the Federal Reserve Bank of New York has already been granted permission to act, and is acting, as the agent of the Bank of the Netherlands in holding custody of gold for that institution, and it has received inquiries looking toward its acting for the National Bank of Greece and the National Bank of Java.

In view of these considerations, it is respectfully submitted that the proposed agreement between the Federal Reserve Bank of New York and the Bank of England is (a) neither unneutral in character nor (b) of a character to involve the United States Government in any manner.

J. F. CURTIS.

AUGUST 29, 1916.

EXHIBIT No. 2454

DENVER, COLORADO, *March 22, 1917*.

DEAR MR. TREMAN: Montagu Norman has sent me copy of Cunliffe's letter of March 2nd, and with a memorandum enclosed therewith, concerning which I wrote Curtis yesterday. At the same time he sent me the enclosed page from an English publication containing an extract from an article which was recently printed in the Journal of the American Bankers' Association. I did not see the article, nor do I see the Journal out here regularly, but it has resulted in some very unfavorable comment abroad, because it betrays such dense ignorance of London methods and conditions. In the interest of a better understanding of these matters, it might be a good plan to have a very discreet and confidential talk with our friend the editor of that publication, whose name I do not recall, and draw his attention to some of the facts regarding British finance. When a man writes today that the Bank of England is not a Government institution, he should explain what he means. When he says that it has avoided alliances, he should be sure of his facts. And when he says that war financing has not been done through the Bank of England, he betrays such stupid ignorance that he subjects the whole banking community to criticism. Almost every statement in the quoted part of the article is either itself inaccurate or so incomplete as to exhibit all the faults of inaccuracy, and if we could arrange to have a discreet but illuminating article published in the Journal in regard to this matter, it might be a good thing. I would be glad to write it if it could be published without my name appearing.

Very sincerely yours,

(Signed) BENJ. STRONG.

R. H. TREMAN, Esq.,
Federal Reserve Bank, New York City.

Enc.

THE BANK OF ENGLAND AND THE FEDERAL RESERVE BANK OF NEW YORK

The January number of the Journal of the American Bankers' Association, which is the official organ of that association, contains some comments upon the recent appointment of the Bank of England as the financial agent of the Federal Reserve Bank of New York which affords startling evidence of the lack of understanding of current financial events in this country prevailing even in such august circles as the American Bankers' Association.

The following extract from the article is sufficient to show the trend of the writer's comments:

"The surprising feature is that the Bank of England is to be the agent. The Bank of England has been much given to aloofness. It is not a Government institution. It has persistently avoided all alliances. British war financing has not been done through the Bank of England. The managers of that staid old institution declined to be parties to the treasury obligations by which the war has been chiefly financed. The notes issued by the bank are still for gold, but it is no longer the dominant factor in the gold market. Its statements, which were formerly the index of British commercial activities, are now all but meaningless. * * * The proposed connection is therefore as interesting in marking a departure for the Bank of England as for the New York Reserve bank. It can mean nothing except that the Bank of England has surrendered its position as the regulator of international finance and London is no longer the financial centre of the world.

"It does not mean that New York has stepped into this position, but it must mean a decided enhancement of the power of New York and the prestige of the New York Reserve bank."

Poor Bank of England And yet we on this side have believed that the reputation of the Bank of England as the cornerstone of British finance never stood higher than at the present time.

To bankers in this country the extract which we have quoted would appear ludicrious were it not a serious matter that at the present juncture such misunderstandings should exist on the other side of the Atlantic.

LONDON, *February 13th, 1916.*

MY DEAR HARJES: Here we are at last after an uneventful but most enjoyable trip across on the "Rotterdam." We were held up for examination of passports, etc., at Falmouth to a degree that was most impressive, and possibly under different conditions would have been exceedingly annoying. Frankly, although my trip is one of business, I am in a frame of mind to submit to almost any degree of annoyance, realizing now as never before how necessary it is that every interest must be laid aside which might interfere with the successful prosecution of this war. You may be surprised at my making this trip, which has some of the elements of a holiday in it. As a matter of fact, London and Paris have meant so much to me in the past that I welcomed the necessity for coming over on business and the opportunity to make a first-hand observation of what is going on.

The principal object of my visit is to make preliminary plans for the banking arrangements of the Federal Reserve System in London, Paris, and Holland. It is most difficult to determine, until I get back home, just how far we can go or would be willing to go prior to the conclusion of the war, but I think we are all agreed that the first steps towards working up our foreign arrangements should be undertaken now rather than later on, hence my trip.

I am looking forward with keen interest to having a visit with you and hope that you will be able to devote a little time to giving me some good advice in Paris, and that it may prove the excuse for you to take a little rest from your arduous labours, which I know you must need.

Jack came over on the boat with me, and I must say he is looking exceedingly well, is in excellent spirits, and stands the strain of their very busy organization with apparent ease.

I have letters to Mr. Ribot, to the governor and deputy governors of the Bank of France. In fact, those are all of the letters that I am taking with me to Paris, and these were furnished me by Mr. Homberg, with whom I have had opportunity to form a most pleasant acquaintance. I hope to have the opportunity for a visit with you before presenting them. * * *

Very sincerely yours,

———— ————

THE COUNSELOR FOR THE DEPARTMENT OF STATE,
Washington, May 1st, 1916.

BENJAMIN STRONG, Jr., Esquire,
Federal Reserve Bank,
New York City.

MY DEAR MR. STRONG: I received your letter of the 28th ultimo, and have directed that all diplomatic correspondence be sent you. I told them to put you on the list, so that you can get all the other correspondence with us. If you do not receive it, please let me know.

Thank you very much for offering me copies of the English war legislation. If you have an extra set, I would appreciate it tremendously.

Hoping to see you soon, I am,

Yours sincerely,

FRANK L. POLK.

EXHIBIT NO. 2457

RITZ HOTEL,
London, England, March 8th, 1916.

DEAR MR. JAY: The windup of my stay in Paris, the trip to London and getting settled in the hotel, the procuring of a typewriter, etc., made it impossible for me to get off a letter but I have cabled you twice and today have your long cable advising of dear old Paul's uneasiness. He spoke this way to me before I sailed, but I am not sure that it is any more than his cautious disposition which led him to speak as he did. I am mighty glad that Kains went with the party—he is just the man for that sort of an expedition and will help them a lot.

It is rather important that I should be able to rely upon your advising me promptly if developments at the office or in Washington seem to indicate the necessity for my return. The English newspapers pretty good Washington news but, of course, not such news as we would get at the office as to what is really going on. It would only require a definite cable from you to bring me home by first steamer.

I had a wonderful time at Cannes. The weather was delightful and I spent all three days there motoring with Mr. Stillman. The bankers in Paris are all pretty busy, particularly at the Banque de France, nevertheless I had opportunity for some good visits with them, and without going into detail think the foundations are laid for perfecting all of the arrangements that we will require there whenever the time arises. Mr. Harjes was exceedingly kind, giving me a good deal of help and advice. As a matter of fact, the time I spent in Paris was all too short to enable me to cover the ground as thoroughly as it should be, and I fear that the same will be the case in London. I have only been here two days but so much time is lost in arranging appointments, etc.—people are so busy in their offices that one should be here a month or two in order to accomplish anything.

I had a long talk yesterday with Jack Morgan and Grenfell, and another visit this morning with Jack. He is sailing for home on Saturday, having been here for four weeks and as he says he really feels that to make progress upon an important matter here one should allow more time. Just to give you an idea of my programme: I had lunch today with Hartley Withers. Spent an hour or two this afternoon cleaning up mail which has accumulated. At five o'clock Fred Wolcott was to come in and take tea with me but just telephoned that he would have to defer it a bit—he is going to tell me something of his trip through Germany and Poland. At eight o'clock I am dining with Lord Fairfax and a number of bankers. Tomorrow morning I am going to make some calls in the city. At 2:15 James Simpson of the Bank of Liverpool will call. After he leaves I am going to look into the question of steamer reservations for the trip home. At five o'clock Lord Churston, who represents Hallgarten & Company here, will call and take tea with me. At eight o'clock I am dining with Jack Morgan, and some of his friends and associates. Thursday I have set aside to make calls, and at eight o'clock I am dining with Lord Reading and McKenna. On Friday evening the London Clearing Bankers are giving me a dinner at the Savoy Hotel. Saturday afternoon and Sunday I hope to get in a little play with some of the men at the Embassy. By the way, last night I had dinner with Mr. and Mrs. Page and spent a most delightful evening. Mr. Page is a "corker." Monday I am dining with them again. Tuesday night Sir Edward Holden is going to give me a little dinner at which he expects to have the principal men, Paish and others, connected with some of the financial publications of London. The disposition here, naturally, with everybody busy, is to make evening engagements.

I will be sure and get the information asked for in your cable, and am quite certain that it would justify the course we contemplate pursuing in regard to our information department.

You will, I fear, find my letters rather bare and uninteresting but it is the best I can do just now.

I would not let the Equitable people delay the completion of our office, except for good cause shown, as we have lived up to our part of the contract most scrupulously. Mr. Horawitz will do everything in human power to see us in on time I am sure.

The arrangement about the investment account strikes me as being most satisfactory from our standpoint. Mr. Kenzel has sent me a copy of the memorandum. Sorry to learn of the repeated reductions in surplus reserve, and presume it is the usual spring movement commencing. If so, it does not indicate very much but if it is due to expansion in the loan account it would be unfortunate at this time.

With best regards to all in the office, including your good self.

Sincerely yours,

——— ———,

EXHIBIT No. 2458

MARCH 9TH, 1916.

DEAR MR. JAY: I cabled you today as per enclosed copy. What I am doing here is most interesting, and I am sure when the report is made, if as successful here as in Paris, it will be gratifying to you and to the directors. Of course, everything is tentative but is working to the arrangement which you and I have frequently discussed and which would be the most dignified that is possible under the circumstances.

Jack Morgan is here, and I have seen quite a little of him—dined at his house last night and met Lord and Lady Bryce. It really does your heart good to sit down in front of a fire and have a chat with that perfectly delightful man. He certainly does love America and Americans. At times I could not help but feel that in his heart he was weeping over a lost child. Lady Bryce is a charming woman, and a more attractive couple it would be hard to find. Tonight I am taking dinner with Lord Reading and a company of gentlemen of whose names I am not yet advised. Next week I am all booked up with engagements for dinner every night and some luncheons. If we have a rough trip home—after all these dinners and champagne—may the Lord have mercy upon my soul and particularly my stomach.

My best to all of you at the office. I feel like a deserter, and yet no harm can possibly come from this trip, and it may develop infinite good to the Federal Reserve System. I have discussed the matter to some extent with Ambassador Page, with whom I dined alone the other night, and he was quite enthusiastic over the outline that I gave him. Let me say right here that he is a start of the first make, in my opinion. I was mightily attracted to him and hear lots of good things said about him here in the city. He is a good, solid, "home cooking" type of American citizen.

Sincerely yours,

—— ——.

Exhibit No. 2459

March 14th, 1916.

Dear Mr. Jay: I have your two hand-written letters of the 22nd and 27th, which reached me only one day apart. It is hard for you to realize how busy one can be in London with engagements for lunch and dinner every day and calls to make, mostly by appointment, all of which seem to take more time than one allows.

I am cabling you today, as per enclosed confirmation. There is a possibility that my visit here will be well worth while if discussions with Lord Cunliffe, Grenfell, and Montague Norman (which commence this week) progress as satisfactorily as I hope. I am glad to learn of the increase in our investment account which we badly need. I am also glad that we have decided to buy bonds on the basis indicated in your letter—that is consistent with the intention of the law and just as you, Curtis, and I agreed should be our policy. I have read the Chronicle article and it is, as you say, rather vicious. Bankers here have spoken of it to me, but I think they are rather appreciative of our independence of criticism. One or two of them have urged that the law should be amended so that the gold will appear in our assets and the notes in our liabilities. Tonight I am dining with the editors of the financial papers in London, and wish to draw them out on this point to see what impression the Chronicle articles are making.

Hope you had a good time at Ithaca and Elmira—you are not the only ones that have to do "speechifying", as I have been called upon to do a little of it here. The dinner given me by the London Clearing Bankers was really quite a notable affair, and I hope what I said was satisfactory to them—it never is to the performer. I am told that this was the first time that the chairman and the managers of the clearing banks had ever sat around the same dinner table together to entertain a guest. They were most complimentary, and Mr. Bassar-Smith, who presided, in describing the work of our System spoke of it as one of the most notable financial achievements ever witnessed—to organize on such short notice and to obtain such substantial results within a year.

I had learned of the purchase of foreign bills in this market for some of our banks before receiving your letter. I sat in Sir Christopher Nugent's office the other day and looked over a batch of bills which I confess it would have comforted me to see in our own portfolio. However, frankly, I do not think we can yet undertake business along that line for reasons which I shall explain fully when I get home. No one can make plans of that character from New York. The fact is, that whatever tentative arrangements are undertaken, both here and in Paris, must be based upon a preliminary understanding, in both cases, with the Bank of France and the Bank of England. The understanding with the Bank of France has now been discussed fully enough to enable us to go ahead promptly when ready, although the details are not yet agreed upon—simply the principles. That is what I want to accomplish here but it takes time, particularly as the officers of the banks are all so busy with many important matters.

I have had opportunity to look into the check collection matter both in France and here, but want to pursue my inquiries here a little further. I am also arranging to go through the portfolios of some of the banks here, if time permits, including the Union Discount Bank, and get a little better understanding as to the method of dealing in bills, endorsing them, etc., etc.

As a vacation trip, this is a complete failure, but I enjoy meeting the people over here and getting information in a way that is really of value. Everyone is most kind and I am so swamped with invitations that it is difficult for me to cover the ground.

Sir Felix Schuster has given me a good deal of his time, and to great advantage, for I feel that he is so well posted and experienced that an hour with him is a real asset.

For various reasons, it will be impossible for me to go to Holland, even if I stay until April first. I am mighty regretful about the possibility of delay in return, which will not be decided until I receive reply to today's cable. Now that I am here I might as well get the job done.

It will not be possible to make tentative banking arrangements with the joint-stock banks until after discussions are completed with the Bank of England. I wish, on receipt of this letter, you would drop in and see Jack Morgan. He will give you, personally, some information that I am sure you will regard as of value, and will indicate my desire to wait here until the work is done. He and his partner, Grenfell, have been most helpful.

My best regards to all in the office, and the same to your good self.

Sincerely yours,

—— ——.

EXHIBIT NO. 2460

RITZ HOTEL,
London, March 22nd, 1916.

DEAR MR. JAY: I am enclosing a rather brief memorandum of my talk with Mr. R. Martin Holland, honorary secretary of the London Clearing Bankers Association, on the subject of the London Clearing House, and check collections. It is the best I can do in the short time at my disposal just now and supplements what I sent you last week. It is hardly necessary to elaborate it with a detail which is considerably complicated by reason of the immense system of branch banks, but the principle underlying the whole scheme is clear enough, and, of course, substantially what the governors of the Federal Reserve banks recommended to the Federal Reserve Board.

I am sorry not to be able to write you fully about other matters, but they will keep until I reach New York. No change in my plan about sailing April first. The weather here is beastly—rain every day without exception, and as the principal part of my work has now been done I am taking it a bit easier, putting in a little time with Captain Symington at squash, etc. Willard Straight turned up yesterday together with Jim Perkins's brother. I dined Monday night with Grenfell, of Morgan, Grenfell & Company; Mr. Farrar, of Baring Brothers, and Mr. Norman, who is now giving about all of his time the Bank of England, having retired from Brown, Shipley & Company. It was a nice party, and you would have enjoyed meeting these charming men. Last night I dined with Sir Felix Schuster, and so it goes, for I have had dinner engagements every night this week and more in prospect. Yesterday I lunched at the Bank of England with Lord Cunliffe and the directors. It was most enjoyable, and afterwards Lord Cunliffe took me all over the bank. We spent about an hour discussing our plans, with which Jack Morgan is fully familiar, and with which Lord Cunliffe is now in accord. Without going into details (unnecessary at this time) I think you are safe in telling Jack that, subject to some discussion with the directors of the bank, and, of course, subject to our own consideration of the matter at home, Lord Cunliffe agrees on all the points which Jack and I discussed when he was in London. Of course, the actual conduct of any transactions must await our determination as to whether it is feasible to undertake any business abroad until after the conclusion of the war. We will talk that over when I get home.

I have been exceedingly interested in many discussions of the bill business, and without reviewing it let me say that, generally speaking, our various monographs on that subject to Washington are borne out in every particular by result of my inquiries here—I refer particularly to the question of finance bills.

My eyes are beginning to develop a strong habit of turning to the west, for I am longing to get home. It would have been a mistake, however, to shorten my trip by sailing even on the 24th.

Best regards to all in the office, and I am greatly indebted to you for your cables. I sent you a brief cable last evening as per attached copy.

With kindest regards, believe me,

Sincerely yours,

——— ———.

BANK AGENCIES WILL WAIT—BENJAMIN STRONG IS ARRANGING FOR FOREIGN BRANCHES

WASHINGTON, D. C., Feb. 17.—Denial was made today by the Federal Reserve Board of the published statement that Benjamin Strong, Jr., Governor of the Federal Reserve Bank of the New York district, had gone to England on a mission for the Board.

The idea that he would take steps to arrange for the establishment of agencies of the Federal Reserve bank system in Europe was denied.

The Reserve Board has power to establish such agencies, but it is the policy of the Board, it was stated, to defer action on this matter until after the war when conditions have become normal.

No apprehension is felt among members of the Reserve Board as to the stability of the gold accumulations in the United States because it is expected that when the war is over there will be a demand on this country for a long time for materials and machinery necessary to the rebuilding of Europe.

EXHIBIT No. 2462

[The New York Evening Mail, Sept. 20, 1916]

KITCHENER SAW GERMAN VICTORY UNLESS U. S. AIDED THE ALLIES, HE TOLD W. CAMERON FORBES

EX-GOVERNOR OF PHILIPPINES STARTLED REPUBLICAN DINERS WITH STORY OF CONFERENCE

Lord Kitchener of Khartoum, the great British war minister who was lost when the cruiser *Hampshire* was sunk off the Orkney Islands, went to his death with the conviction that Germany could not be defeated.

This astonishing information was made public by W. Cameron Forbes, former Governor of the Philippines, at a recent dinner of Republican leaders. Gov. Forbes told the diners that Lord Kitchener had stated to him that it was his belief that without the aid of America the Allies could never conquer the German armies.

The great war chief of England expressed this opinion in the course of a conference with Gov. Forbes, and Benjamin F. Strong, of the Federal Reserve Board, in London *last winter* (1915–1916). It was because of this conviction that Lord Kitchener arranged the meeting—to urge Gov. Forbes and Mr. Strong to throw the weight of their influence in this country on the side of the Allies.

Gov. Forbes and Mr. Strong were expressly invited to confer with Kitchener as quasi-official members of the American Government. And Gov. Forbes held the diners spell-bound for the best part of an hour as he told them of the arguments and reasons that the master-warrior of England advanced to show why the cause of the Allies was the cause of the United States.

The breaking off of diplomatic negotiations with Germany was the immediate step he pleaded for.

His principal argument was what he called German militarism and German weltmacht were inherently inimical to the ideals of Anglo-Saxon democracy—that England and France, democratic in the roots of their being, were fighting the world-fight of democracy against militaristic autocracy, and in that fight the U. S., the greatest of all republics, could not afford to stand by idle and witness at the best a drawn battle between those forces on which her institutions rest and the forces incompatible with her ideals.

TALKED FOR TWO HOURS

Gov. Forbes said that the conversation lasted nearly two hours, and his telling of it made a profound impression on his hearers. It was repeated for days and, according to Gov. Forbes, it was considerably garbled in the retelling.

He was quoted as having stated that Lord Kitchener said that "The Germans might be crowded back on their own lines and much more to this general effect."

"Kitchener did not say anything of that sort", Gov. Forbes told a reporter of the Evening Mail. "I do not feel that it would be proper for me, under the circumstances, to give a detailed story for the press about my conversation with Lord Kitchener. Much of it had to do with the relations between the United States and England after the war and the effect of the United States breaking off diplomatic relations with Germany."

EXHIBIT No. 2463

ESTES PARK, COLO., *September 29th, 1916.*

DEAR MR. JAY: The weekly report of September 21st also contains some newspaper clippings, one being a half column from the Evening Mail about a talk that W. C. Forbes gave at some dinner party about our interview with Lord Kitchener. I had always had a great respect for Cameron Forbes' judgment and ability, but after having seen quite a little of him in London and heard of some of his performances since returning from Europe he strikes me as being a great blunderer.

The interview with Kitchener was the result of a long talk that Kitchener had with Fred Wolcott, who was over there representing the Rockefeller Foundation. Kitchener's aide, Colonel Fitzgerald, called me on the telephone and asked if I would stop at his office and bring Cameron Forbes with me, which I did, and we had an exceedingly interesting talk with him. After leaving, Forbes thought it would be a good plan to write out the interview. He dictated the account, and I went over it and made some changes, and then he agreed that the best thing we could do would be to "can" it. Since coming home at least half a dozen men have spoken to me of this interview, and now Forbes has finally succeeded in getting it in the press. I do not know whether he wants to advertise himself or whether he is just a plain, indiscreet fool. It made me mad to read the article.

The same weekly report contains Mr. Jefferson's account of the mistake that was made in the account of the gold-settlement fund. This illustrates the importance of our recommendation made nearly a year ago that the agent's fund and the bank's fund be separated physically as well as on the books. Don't you think this can be brought about so as to avoid any chance of dispute as to who might be liable for any loss incurred? This error demonstrates that the present system is bad.

Sincerely yours,

——— ———,

PIERRE JAY, Esq.,
Federal Reserve Agent, Federal Reserve Bank,
New York City

[Copy of telegram]

DH44 CH AQG 210 BLUE

CX DENVER, COLO., *March 23rd*—11:40 a. m.

J. F. CURTIS,
Federal Reserve Bank, New York:

Telegram received; suggest cabling Cunliffe substantially as follows quote we suggest the following four changes in revised memorandum of March nineteen sixteen: First, omit references in opening sentence and in paragraph twelve to conclusion of war as we propose earlier start; second, omit provision in paragraph six for earmarking gold only at convenience of debtor institution so that account will be definitely on a gold basis but debtor institution will be protected by understanding that it shall name in advance the limit of gold obligation to be incurred; third, omit change in paragraph ten with respect to word voluntary so as to conform to last suggestion; fourth, omit words if so agreed in paragraph twelve under same understanding as in our second suggestion. As we contemplate transaction as soon as proposed arrangement ratified, it is necessary in present circumstances to define understanding that obligations will be met in gold if not otherwise settled, but we would expect you in advance of operation to place the limit which you desired upon the amount of gold obligation which you would incur. All other changes satisfactory; we will await your reply by cable to above suggestion before revising memorandum and of cable; please mail copy of cable as finally sent.

BENJAMIN STRONG.

AGREEMENT WITH THE BANK OF ENGLAND

FEDERAL RESERVE BOARD,
Washington, May 29, 1916.

DEAR MR. WARBURG: I enclose copy of a confidential letter just received from Governor Strong. You will notice his suggestion at the end that the Federal Reserve Board give immediate consideration to the matter.

Sincerely yours,

[sgd.] C. S. HAMLIN.

Hon. PAUL M. WARBURG,
Federal Reserve Board.
Enclosure.

EXHIBIT No. 2466

Federal Reserve
Board File 310

AGREEMENT WITH THE BANK OF ENGLAND

MAY 23RD, 1916.

[Confidential]

MY DEAR GOVERNOR HAMLIN: When I was last in Washington I left a copy of a confidential memorandum covering my' conversations with the Governors of the Bank of England with Mr. Delano in order that it might be available for subsequent discussion and such action as the Board considers desirable.

There are a number of principal points for consideration in this connection:

(a) Paragraph E of section 14 of the Federal Reserve Act authorizes Federal Reserve banks to open and maintain banking accounts in foreign countries, appoint correspondents, etc., "with the consent of the Federal Reserve Board."

The plan suggested by the memorandum cannot, therefore, be put into operation without the formal authorization of the Federal Reserve Board, which, as I read the statute, should cover the opening and maintaining of a bank account and the establishment of the Bank of England as our correspondent in England.

(b) For reasons which I expressed in some detail while in Washington, it is my opinion, absolutely necessary that the purchase of foreign bills and the operation of banking accounts in foreign countries by the twelve Reserve banks should be conducted as one account. I shall not attempt to repeat the explanation made in Washington, except to say that if the account is to be managed in that way,, it should be done under a sufficiently binding agreement so that when the necessity arose for really protective measures to be undertaken to save this country from a drain of gold the entire burden will not fall upon the Federal Reserve Bank of New York. I regard this feature of the Federal Reserve Act as one of the most important and far-reaching in its effects, so much so that, as I stated to Secretary McAdoo, if the other Reserve banks decide not to participate in the arrangement, we would nevertheless undertake it ourselves, provided our board of directors authorizes us to do so.

(c) The question of neutrality involved must, it seems to me, be taken into consideration by your Board when giving or withholding its consent to the appointment of the Bank of England. I have never believed that a Federal Reserve bank is a Government institution in the sense that it would implicate the United States Government in an unneutral transaction, if our relations with the Bank of England were considered to be unneutral. Furthermore, the Bank of England is a private institution, and in no sense a part of the British Government. It is probably less so than we are, although, as you know, it is the principal fiscal agent of the Government in the management of its domestic financial affairs.

(d) The wisdom or unwisdom of undertaking investments in foreign bills at the present time depends, of course, entirely upon the degree of security afforded by the arrangement made with the Bank of England. After making a very careful study of conditions in England and France, I became convinced that the opening of accounts and purchase of bills abroad during the continuance of the war would not be justified by the Federal Reserve banks unless we were especially protected by an engagement on the part of the Bank of England in England and the Bank of France in France to liquidate our accounts in gold, if we require it. No other bank is able to make as effective a gold engagement as is the Bank of England, it being the custodian of the gold of the nation.

(e) There is no occasion at the present time to consider operations, but occasion may arise, however, some time in the fall and I would like to be prepared before that time arrives. Conditions may alter materially and we might feel unwilling to undertake any transactions, notwithstanding that the arrangement was concluded in all particulars.

(f) Whether we undertake any business abroad before the conclusion of the war or not, it seems to me important that the Federal Reserve Act should be amended so as to provide that Federal Reserve banks may receive accounts from such correspondents as they may appoint abroad, otherwise, it would be difficult for us to make the relationship effective.

May I ask the Board to give consideration to the desirability of acting upon this matter in order that I may continue correspondence with the Bank of England and the Bank of France and, if necessary, submit the matter to the governors of the twelve Reserve banks?

Your Board has been advised of the character of the arrangements already established with the Bank of the Netherlands and we are now in correspondence with the Javasche Bank with a view to establishing somewhat similar relations with that bank. You further understand that Mr. Warburg has discussed tentatively with the Banco de la Nacion Argentina the possibility of the establishment of a relationship with them. Our business with each of the institutions named will vary considerably, but it may be desirable for the Board to consider at this time the whole subject of foreign correspondents and whether it may not be advisable to authorize the appointment of the banks named as our correspondents for the purpose of such business as we may be transacting with them from time to time.

I beg to remain,
Respectfully yours,

——— ———, *Governor.*

Hon. C. S. Hamlin,
Governor, Federal Reserve Board,
Washington, D. C.

EXHIBIT No. 2467

FEDERAL RESERVE BOARD,
Washington, July 21st, 1916.

MY DEAR "BEN": I hope you have had salubrious weather in Colorado; that you survived the journey; that you have escaped the heat; and that you are laying on a few pounds here and there where they will not do you any harm.

I have been thinking a good deal about your Bank of England proposal and trying to figure out how I can overcome the difficulty that Warburg (the only member of the Board who is really well posted upon the subject) points out. Finally the thought has suggested itself to me that I should submit the plan to some high-grade, disinterested man, and have him criticize and endorse it; and that I could then use that endorsement, not only to sustain my judgment, but to present the matter to the Board.

I think Warburg would be willing to waive the responsibility and to have the matter handled during his absence—say during August; but I could not win the votes of my colleagues on the Board, especially the more cautious ones, unless I could show that some person entirely competent and expert in such matters had endorsed the plan. This perhaps will explain how my mind has been running, and in casting about for some one to consult, the names of George Blumenthal, Max May, and John Gardin have occurred to me.

While I do not know much about him, my impression is that the first named is best; but upon inquiry as to where he was and how I could get hold of him, I find that he is now out in California, traveling, and at last accounts was at the Del Monte Hotel, Monterey, and does not expect to be back in New York until September first. Hence the thought has occurred to me (as an alternative from my first thought) that you might get into communication with Blumenthal and ask him to stop off on his was East. If he would do so, and you could thereby fully explain the situation to him, he could come here and make his recommendation to me.

My present plan is to be away the first 10 days of August, returning here for the rest of the month, and going away again early in September, when Miller and Warburg will be back again "on the job." However, I could postpone my going away for a few days in order to see Blumenthal.

The merit of the whole scheme depends, of course, upon your views and conclusions, and I simply throw this out for you to think over and advise me.

Yours very truly,

(Signed) F. A. DELANO.

Mr. BENJAMIN STRONG, Jr.

EXHIBIT No. 2468

[Excerpt of letter]

ESTES PARK, COLO., *July 26, 1916.*

[Personal]

Hon. F. A. DELANO,
% Federal Reserve Board,
Washington, D. C.

MY DEAR FRED: In regard to the Bank of England arrangement, I am about completing a memorandum which will be first sent to the office and then to the Board. It is not as complete, nor as well prepared as I would like to have it, but a good deal of data bearing on the matter is in New York and not available to me. In time, the question is as you say to get a thorough understanding of the whole situation in the minds of all your colleagues. The suggestion you make about consulting some of those who have dealt with these matters for some years past has advantages and disadvantages both. All three of the names you mention are well posted and capable of giving excellent advice, but the difficulty is that they are all in one way or another interested, and some of them, if not all, may be influenced by selfish views.

The first name is the head of a firm that conducts the largest dealings in gold of any firm in the country in normal times. The second one for various reasons I would not consider at all, and the third one has always impressed me as being bull-headed and narrow. On the whole, if really broadminded and intelligent opinion is desired by the Board, I would strongly recommend Frank Vanderlip, of the City Bank, Fred Kent, of the Bankers Trust Co., and Alexander, of the Commerce. They are sufficiently familiar with the technical features of this business to be able to give a well-considered opinion and they are all of them broad-minded enough to set aside any personal interest or selfish purpose. The man you name first is undoubtedly the most experienced, but, personally, if I were in New York, I would hesitate to expose my hand to him at the present time.

Another suggestion is that Jack Morgan's opinion should be obtained. You have that already informally, but as he is a member of the counsel and is probably better posted today on the international situation than any other New York banker, it seems to me, if outside opinions are to be obtained, his is essential both for valuable information and as a matter of courtesy.

Should it seem desirable to carry out your plan of consulting Blumenthal and you will be good enough to wire me in time, I will communicate with him by telegraph and see if we cannot arrange a meeting either here or in Denver.

If by any chance you can get out here for a little holiday early in August, it would be a great delight to me and we might be able to coax Charley Norton to come too. By that time I will be a good deal stronger and able to join you in a little recreation. If you have never been here, this country is well worth seeing.

With warmest regards to you and to your colleagues, I am,

Faithfully yours,

——— ———.

EXHIBIT No. 2469

BANKERS TRUST COMPANY,
16 Wall Street, New York, July 8, 1915.

Mr. BENJAMIN STRONG, Jr.,
Governor, Federal Reserve Bank,
62 Cedar Street, N. Y.

DEAR BEN: After the New York State Bankers Convention, I realized that probably your letter of the 18th was written for the purpose of checking some of the ideas you expected to use in the most admirable address which you made at Saratoga. Have consequently been much chagrined to think that I could not get a chance to answer you. I assure you it was no fault of mine, but was due to the fact that matters of the Trust Company requiring immediate attention absolutely swamped me, and I actually was at a loss to know which way to turn. Because of this instance I was unable to reply at once. I hope you will not hesitate to write again, should occasion require, for it is always a pleasure for me to co-operate with you in every possible way.

Your idea concerning drawings by English banks is an excellent one. Several months ago I wrote to Sir Edward Holden, outlining the whole plan, and advising him that the Bankers Trust Company would be most pleased to accept their drafts. They have never made use of the privilege, however, and I think that they are entirely right in not doing so. The reason I feel this way is because the main value, in so far as exchange alone is concerned, in carrying out such propositions lies in having drawings made at a time of high exchange, with the expectation of having them mature at a time of low exchange. When drawings operate in this manner, it means both a convenience and a profit. Under the conditions prevailing during the past several months and the probable developments in the future, it is more or less of a dangerous expedient. For instance, suppose 90 day dollar exchange had been issued when sterling was 4.80, and had to be met with sterling at 4.76, you can readily see that the exchange loss would be quite heavy. As to the future, the same dangers would seem to exist, and to even a greater extent.

Confidentially, with monthly deliveries running throughout the balance of the year for goods already contracted for amounting to an excess over imports to this country of, say, $100,000,000, or thereabouts, it is hardly conceivable that sufficient foreign loans can be placed here to protect the exchange. Just where it will fall to, no one can guess, for with a constant debit balance, rates assume merely nominal values. Should a month come when Europe cannot meet its payments for deliveries being made, there is no telling what might not happen to exchange. You may have noticed that every time a French loan has been placed in this market, French exchange has dropped. While this has seemed more or less anomalous, yet it is in reality a natural process. Until each loan has been announced, the exchange market has been buoyed by the uncertainty of the amount, and as to whether it would meet the requirements, but as soon as announcement has been made of the amount, it has been recognized as falling so far short of the needs that exchange has immediately dropped.

Confidentially again, would say that I have done my utmost to get the British Government to float loans in this country at a sufficiently higher rate of interest than loans placed in Britain, to offset the exchange discount, and making them free from British income tax. When in Washington, I had a long talk with the Ambassador from Great Britain, Spring Rice, and I believe that he fully agreed with me. It was then, however, long after the matter should have been looked after, in my judgment. Borrowing in Britain at low rates of interest, and using the proceeds to purchase available exchange, was to my mind a silly proceeding, and was certain to lead to ruinous exchange rates, for the reason that the purchase of exchange by the proceeds of loans obtained in Britain did not add one cent to dollar exchange, but merely made it possible to buy up the floating supply, which has not been sufficient and will not be sufficient to anywhere meet requirements. My theory was that loans at higher rates, free from income tax, could have been placed with far greater ease in this country while exchange was nearer normal and the public was not beginning to fear British credit, and it seemed to me the only possible way of meeting a bad situation. A loan placed in this country now of, say, $300,000,000 would only take care of the exchange situation for the next 60 or 90 days, as far as I can judge from the way orders have been placed and deliveries are to be made. Not having seen the actual aggregate of such figures, however, I recognize that I may be wrong as to the length of time such a loan would take care of the situation. As the whole proposition is a Government one, you can readily see why the English banks would naturally refuse to draw at 90 days sight upon American banks, and take the chance of their customers being able to pay them for the dollar exchange when the drafts come due. Of course, as we approach the end of the war, a time is going to come when the operation might be most profitable, but unless contracts already made are repudiated, even at the close of the war, exchange is not going to rebound to par in a minute.

There are many other angles to the situation that are, to my mind, very serious, and while I have presented them to the British Government, yet I have not, for the public good mentioned them to others. It seems wrong to unnecessarily disturb business men with such matters as long as there is a possibility of their working out.

This month I am staying in Hartsdale, taking my vacation. Must be near the office for a number of reasons, and can telephone from here without difficulty. Regretting the delay in writing you, and with sincere regards, I am

Cordially yours,

(Signed) Fred.

Exhibit No. 2470

Estes Park, *August 13, 1916.*

Dear Mr. Curtis: Yours of the 9th has just come, and I hasten to reply, as our time is getting short now in which to conclude the Bank of England matter for this fall. Your comments on the memo give me new courage. I feared the thing was a daub, and have been wondering for some time whether my head piece was working as it should. As to your points:

1st. I think, but am not sure, that par. "c" is as good authority as we need, save for the reference to "member banks", which is awkward. Have marked the M. S. so as to include both references, but defer to your opinion.

2d. Has been changed as you suggest.

3d. Ditto.

4th. Ditto, but where in the Nat. Bk. Act the word "duties" is found, stumps me. Hope you are correct, and leave it to you.

5th. Has been changed as you suggest.

6th. The enclosed insert (1) will, I hope, meet your views. If too long, boil it down. The argument is really a good one.

7th. I have divided your suggestion into inserts (2) and (3) as they are distinct subjects, and hope you will polish them up. They are very rough, but I'm willing to stand on both.

One or two other suggestions:

1. Will ask you to insert the no. of sec. of the Revised Statutes left blank on p. 7. It is the sec. which provides that the redemption fund be covered into the general fund and bank notes paid out of the general fund.
2. Two new corrections appear on p. 14.
3. The enclosed is my last copy. Possibly a good many copies should be struck off now, for use in sending to other governors, and in Washington, so will you send me a final copy as soon as possible.
4. This should reach you by Wednesday, a. m. If you can squeeze in time to run over to Washington and see McAdoo before the Boston meeting, it would be an excellent plan. He is already in favor of going ahead, but if you go, be sure and see Delano. The delay will arise thru Warburg's absence, and he should either leave the matter *entirely* to his associates or have opportunity to study the matter fully. The former is his wisest course.
5. Personally I see no ground for submitting to the State Department, but of that the Board must decide. If they *do* submit it, try and have it done informally, and if that Department demurs, we may be obliged to see Lansing or Polk ourselves.

6. Might as well take the draft of plan of operations, and show that to McAdoo also, as he was the one asked me to prepare it.

7. Unless objection arises in Washington, hope you and Mr. Treman will start the discussion of this matter at Boston conference, impressing importance of maintaining confidential character of whole matter. I would be discredited in London if it got out. The same applies in Washington. If good progress is not made in Washington it may be safer to defer discussion with governors.

8. It's time we pushed this matter to a conclusion, and I hope Delano will take it up actively, getting such advice as he needs if he finds it necessary. I suggest Woodward, Morgan, Vanderlip, Alexander, Kent as the best and safest.

Please pardon this hasty scrawl. I'm lost until Mrs. McLaren arrives. Tell Mr. Treman I have his letter on this subject and hope the above program meets his views. Will write him shortly.

My best thanks to you for your help. This matter is important, and I'm keen, as you know, to see it concluded.

Yours,

[Signed] B. S.

[Excerpt of letter]

AUGUST 28, 1916.

MY DEAR GOVERNOR: * * * With reference to our foreign arrangements, I went to Hartford to see the secretary last Wednesday, he being in the midst of a tour to hold hearings in connection with the establishment of Federal farm-loan banks. I only had a very brief interview with him, but it was sufficient to get his point of view and also some valuable suggestions. I think he is wholly favorable to the plan as outlined in your memorandum and also to its being put in operation as early as practicable, although he did not definitely commit himself on either of these points. He threw out a suggestion (of course, wholly without meaning to have it taken as advice and not to be quoted) that it might be well to omit from the memorandum all references to the question of neutrality, and he also thought that it would be advisable to make our application as brief as possible. Messrs. Aiken, Wold, Treman, and myself thereafter took the matter up with Harding and Delano, who had each been given a copy of your memorandum and who knew of my trip to see the secretary, and it was decided by all hands to be advisable to have any references to matters of neutrality omitted from the memorandum. Both Harding and Delano are definitely favorable to the scheme and, I think, seem in doubt only as to the time when it should be put in operation. There was some indication that it should not be before the first Tuesday following the first Monday in November, but I doubt if this magical date will have much influence in the matter. * * *

Yours sincerely,

AGREEMENT WITH THE BANK OF ENGLAND

FEDERAL RESERVE BANK OF NEW YORK,
August 28, 1916.

SIRS: In accordance with the provisions of paragraph (e) of section 14 of the Federal Reserve Act, the Federal Reserve Bank of New York hereby respectfully makes application for the consent of your Board to open and maintain a banking account with the Bank of England, a private corporation established under the laws of the United Kingdom of Great Britain and Ireland and having its principal place of business in London, England, and to appoint the said Bank of England its correspondent and to establish the said Bank of England its agent in the said United Kingdom.

Accompanying this application is a memorandum prepared by Governor Strong of this bank, outlining the reasons for submitting the application at this time.

Respectfully,

(Sgd.) R. H. TREMAN, *Deputy Governor.*

FEDERAL RESERVE BOARD,
Washington, D. C.

JFC/PE.

EXHIBIT No. 2473

AGREEMENT WITH THE BANK OF ENGLAND

[Excerpt from the minutes of the Federal Reserve Board, meeting of Aug. 29, 1916]

The formal application of the Federal Reserve Board of New York for authority to open an account with the Bank of England was presented and discussed. The Governor of the Board read a memorandum prepared at his request by Mr. J. F. Curtis, counsel for the Federal Reserve Bank of New York.

The following resolution was offered by Mr. Warburg and agreed to by the Board:

"That it is the sense of the Board that an agreement substantially along the lines of that submitted by the Federal Reserve Bank of New York, should be authorized: *Provided, however,* That the right to be reserved to the New York Bank under section 9 of the proposed agreement to commence operations before the conclusion of the war, be not exercised without further authority from the Federal Reserve Board; And, *provided further,* That a committee of three shall first take up the matter with the Department of State and report to the Board that the Department of State sees no impropriety in its granting such authority."

Mr. Warburg also offered the following resolution, which was adopted by the Board:

"That the committee of three to take up the questions above outlined with the Department of State consist of the chairman and Governor of the Board and Mr. Hamlin, the Governor to have the power to fill any vacancy."

EXHIBIT No. 2474

[Excerpt of letter]

[Confidential]

AUGUST 31, 1916.

MY DEAR GOV: In order to keep you up to date on our foreign matters, I give you a brief sketch of what has happened since I last wrote you.

I went to Washington Monday night to see the Board, as I already have written you in my letter of August 28th. Mr. Warburg and I went down on the same train and I showed him a copy of the memorandum I was taking to the Board and also told him of the steps already taken. While he was reading the memorandum, he looked up and said, "You know I wrote this section originally for Senator Aldrich and it was taken bodily from the Aldrich bill and put into the Federal Reserve Act, and now I suppose the Board will tell me what it means." As I was under the impression also that such an event was likely to occur, I made no reply.

On Tuesday morning I went to see Harding and presented him with the various documents; also a copy of the Kains' report, which I am enclosing herewith, and we had a little chat on the subject. He showed me a letter he had just received from McAdoo, stating that he thought the matter was of such importance that before official action was taken, it should be taken up informally with the State Department, which I think is wise on his part, although a slight reversal from what he told me at Hartford. During our talk the Comptroller came in and Mr. Harding showed him the Secretary's letter, so as to make sure that they should not be getting at the subject from too many different angles.

They went into a meeting at 11 o'clock, Harding having asked me to prepare a little memorandum on the neutrality aspect of the matter for him to use if the vote came out as he expected it would—that it should be taken up with the State Department. I spent from eleven until one dictating a memorandum for him on this subject, which was in effect a rather poor imitation of the original pages in your memorandum which had been exercised.

* * * * * * *

I telephoned to Governor Harding in the late afternoon, who told me that the Board had unanimously approved of our application with two provisos.

1st. That the State Department find nothing obnoxious in the plan, and

2nd. That no actual transactions be undertaken without the further specific approval of the Board.

He and Hamlin were appointed a committee to take it up with the State Department informally, and they had an appointment to do so sometime today, Thursday, but I have not yet heard the result.

Later in the evening I ran into Hamlin at the club and I asked him what the idea was in putting in the second restriction. He said the theory of the Board was that it would be well to have the machinery all set up for doing the business, but that they were somewhat doubtful of the advisability of actually beginning transactions during the pendency of the war. I urged him very strongly to permit us to go ahead as soon as we are ready, on the ground that I knew it was your view that the way to prepare for the shock to commerce and the exchanges, which would necessarily follow the declaration of peace, was to have a lot of credits and bills already established and owned in London, so that the slack could be taken up by our selling the same. I also said that to wait until the war was over before getting into this position would be practically locking the stable door after the traditional horse. He said that anyway, their approval today will make the first step, and the Board was rather anxious to go by easy stages.

The psychology of this, I think, is easy enough to understand, especially in view of the fact that they got a unanimous vote, and it seems to me that we will be in a very strong position to begin at any time we want if, as I expect, the State Department has no objection to the plan. You will observe that our position will then be that the Federal Reserve Board will stand committed to the proposition that the principle of appointing the Bank of England our correspondent is a good one and has met with their approval, and the State Department will be in the position of not disapproving of our actually entering into transactions. Consequently, I think it would be very difficult for the Board to put themselves in the position of "hanging their clothes on the hickory limb but not going near the water."

I expect we will hear some more news on this subject tomorrow and I will write you again if this lengthy letter does not prove overpowering to you.

Yours sincerely,

——— ———.

Benjamin Strong, Esq.,

September 1, 1916.

P. S.—I have just received your telegram of August 31st with reference to our foreign arrangements. Your suggestions contained therein had already appealed to us and we have forwarded to Governor Harding a copy of the argument on the neutrality question which had been omitted from the original memorandum. This was prepared in a slightly different form and submitted as a separate memorandum, and, I understand from Mr. Jay, that it has already gone to the State Department. He will tell you also at the end of this letter what occurred in Washington yesterday. I am enclosing herewith a copy of the supplemental memorandum in the form in which it went to Governor Harding.

801.2

AGREEMENT WITH THE BANK OF ENGLAND

AUGUST 31, 1916.

Mr. R. H. TREMAN,
Deputy Governor, Federal Reserve Bank,
New York.

SIR: Your letter of August 28th, making application in behalf of the Federal Reserve Bank of New York for the consent of this Board to open and maintain a banking account with the Bank of England, etc., has been given careful consideration by the Board. Certain questions are involved which render it impossible for the Board to give you a definite reply at this time.

The situation has been explained fully to Mr. Jay, who was here today, and he has been requested to inform you of the status of your application.

Respectfully,

(Signed) W. P. G. HARDING,
Governor.

EXHIBIT No. 2476

[Excerpt of letter]

ESTES PARK, COL., *August 31st, 1916.*

DEAR MR. TREMAN: * * * The difficulty about the submission of our foreign arrangements to the State Department through a third party, that is, through members of the Federal Reserve Board, is the one always encountered in such cases, which is a certain lack of knowledge of detail and of the technique of the matter which would lead to an incomplete submission of the question and, consequently, an unfavorable decision resulting from timidity or ignorance.

Mr. Curtis and I both know practically all the men in the State Department quite well. I refer particularly to Secretary Lansing, Mr. Polk, and Assistant Secretary Phillips, who I believe would be the one to consider this matter. Unless the Reserve Board raised objections, I should think we would be justified in arranging an appointment with Secretary Lansing and Counsellor Polk so the matter could be explained in detail and questions answered. Doubtless questions will arise which have not occurred to us and which with the memorandum in its present shape are not touched upon at all.

I do not want you to feel that I am trying to direct this matter too much from this distance. One has time to do a lot of thinking out here and I apprehend as a result, that the State Department might be disposed to sidestep their decision or make an unfavorable decision unless the members of the Department were impressed, as Secretary McAdoo is, with the importance of this plan in the interest of our own commerce and banking. The things to be urged before the State Department are: First, that the plan is developed for the protection of our own commerce and not for any unneutral purpose; and second, that in order to be effective at all, operations must commence before the war is over and while exchange is in our favor in order that we may have accumulated the means to meet conditions when they are reversed by reason of the conclusion of the war.

There seems to have been some mix-up over the amendments which I do not understand, but a telegram from Curtis yesterday stated that the amendment about "days of grace" have been favorably reported by the conference committee, so I assume that finally the matter has had attention. He will show you my letter on the subject. * * *

Very sincerely yours,

(Signed) BENJ. STRONG.

R. H. TREMAN, Esq.,
Deputy Governor, Federal Reserve Bank,
Equitable Building, New York City.

EXHIBIT No. 2477

[Copy]

[Personal and confidential]

ESTES PARK, COL., *August 31st, 1916.*

DEAR JACK: It will soon be five months since I was in London discussing the preliminary outline of our proposed arrangements with the Bank of England, and have no doubt that Lord Cunliffe and his associates may now be wondering whether there is any possibility of a final conclusion of the matter, particularly, as they know that I am ill in Colorado. On that account, I am writing to advise you of the status of the matter in case inquiry should be made of you.

On my return from Europe, the following things had to be done before it was possible to make any move towards starting the arrangement in operation:

1. The Federal Reserve Act had to be amended so as to authorize Reserve banks to purchase bills having 90 days to run, "exclusive of days of grace" (the words quoted not appearing in the statute in section 14, under which we get our power to buy foreign bills).
2. A second amendment was desirable authorizing us to receive deposits and act as correspondent for banking institutions which we appointed as our correspondents in foreign countries. (Otherwise, any funds held for such institutions would have to be in the form of earmarked gold.)
3. It was necessary to obtain the approval of the directors of the Federal Reserve Bank of New York.
4. It was necessary to obtain the consent of the Federal Reserve Board.
5. It was probably necessary to get some sort of approval or disclaimer of interest from the State Department.
6. It was necessary to formulate some plan by which all 12 of the Reserve banks could operate together under the direction of the Federal Reserve Bank of New York.

The status of the above matters is at present as follows:

1. I am just advised that the amendment as to days of grace has been incorporated in the recommendations made by the conference committee of the House and Senate, and if that is correct, the amendment will undoubtedly pass at this session.
2. The same applies to the amendment in regard to our receiving accounts for foreign institutions.
3. The directors of the Federal Reserve Bank of New York have approved the plan.
4. The Federal Reserve Board has unanimously consented to the plan.
5. No action has yet been taken by the State Department.
6. The scheme for management of the account for the 12 Reserve banks has been laid out and I think will be adopted, subject to modifications in details.

You will gather from the above that if, as I anticipate will be the case, the final necessary approvals are received and the bill now before Congress is signed by the President, it will become possible for us to actually put the arrangement into effect some time this year.

On account of your relations with the bank in New York, as well as your part in the negotiations in London it seems desirable that you should be fully posted as to the progress in this matter, and if you think the situation justifies it, possibly you would be willing to cable or write Lord Cunliffe indicating that progress is being made, although it has necessarily been slow.

I doubt if the bank in New York will be disposed to undertake transactions, notice and approval of which must first be conveyed to the Board in Washington, without my giving an unqualified recommendation to do so, and outlining somewhat the character of the bills to be purchased. Before doing so, I want the best opinions I can get in regard to how well fortified the sterling exchange position is for next fall.

As nearly as I can gather, the present import point of gold is somewhere between $4.76 and $4.77, and I am going to give you my best guess as to the present exchange situation, asking you if you will correct it so far as you feel able and willing to do so and give me your own views as to what may transpire this fall.

I surmise that France now has a total credit in New York unused, created by the recent loan of $100,000,000 and by various commercial credits of which I have been advised, aggregating possibly $100,000,000 in all. I also surmise that the proceeds of the sale of the English notes, together with the unused $50,000,000 bank credit, gives England a total drawing account in New York today of $300,000,000, not counting some of the gold recently imported and which I judge has not yet found its way into bank reserves. I would, also, suppose that England has, unused but available, American and other securities which can be converted and used as collateral in this market, amounting to anywhere from $100,000,000 to $200,000,000. I would, also, assume that Russia had considerable credits here as to the amount of which I would not hazard a guess. In all, let us say that there is $500,000,000 available, possibly more, for us to meet the fall demands. This is, of course, a magnificent preparation, but still I have some doubt whether it will be sufficient to meet the enormous demands which will certainly be made upon us during the present period of the offensive movement. and possibly, in preparing for a more extensive movement next year, if, as I surmise, these three nations are to continue to purchase our raw materials, etc., in anything like the volume which the Government reports indicate. It also seems likely that there will be a large movement of cotton this fall and at pretty substantial prices. In view of the above, which I admit is largely supposition, I have not modified my feeling that the interests of our banks and our exporters may require that the arrangements with the Bank of England be put into operation this fall.

I would very much appreciate your writing me, in confidence, if necessary, the best expression of your own views which you can give me.

Of course, we would not undertake the purchase of exchange, except at some margin below the gold import point, and I would appreciate also the best calculation you can give me of the cost of gold imported from England at the present time by an American bank, independent, of course, of the operations of the British Government, where special facilities and special arrangements for transportation may be made which would result in a cost quite different from that applying to the cost to an American bank.

Please pardon this long letter, but I am so far from home and out of touch with matters that I need the best information you can send me before going any further with our plans.

I hope you are well. Unfortunately, I have been laid up for the past week, but hope to be around again in a few days.

My warmest regards to you and your partners.

Sincerely yours,

——— ———.

J. P. Morgan, Esq.,
23 Wall Street, New York City.

BS/VCM.

Exhibit No. 2478

[Copy]

23 Wall Street, New York,
September 7, 1916.

Dear Ben: I have been very much interested in your letter of August 31st. In regard to your summing up of the exchange situation, you are a little short of various facts, owing to your absence:

First. The French have spent pretty well all the money they have here. There are some commercial credits, and they hope to make more, which will give them perhaps forty or fifty million dollars if they get them; but the French exchange situation is not as good as you put it in actual dollars, but has been much bettered by the recognition on the part of England that they have got to help out if necessary.

In regard to British credit, it is more difficult to say. They had made short time and call loans here for a considerable amount, to pay off which was the first use made of the recent $250,000,000 transaction. The $50,000,000 bank credit has been used. On the other hand, they are at the moment shipping vast amounts of gold, which you guessed rightly has not yet entered the bank reserve situation. This amounts to some seventy odd millions, so far advised. England has a larger amount of possible collateral than you have figured on, but to what extent I do not know.

I think the gold importing point is now somewhere about 4.75½, owing to cost of freight and the large insurance. The British Government does not intend to allow exchange to go far below this, and I think it will succeed in this attempt, in which we all wish to help as much as possible. That being the case, however, your operation will really have to take the shape of an interest operation, more than an exchange operation, although there may be a substantial rise in exchange in the spring.

The requirements for raw materials show no signs of falling off, and they evidently expect the war to go on for another year. On the other hand, the Bank of England rate is now 6%, which may influence you in the decision in regard to bills. I do not think that it is worth while for me to advise. If the Federal Reserve bank is going to take any steps under your arrangement, I should think a month or six weeks from now would be quite time enough to do it, by which time we should be able to measure the question of domestic demand for money. So far as I see now, that demand is much less than ever before at this time of the year, owing to the Western and Southern banks being extremely flush of money. For your information a New Orleans bank, which ordinarily at this time of the year borrows all it can get from its New York correspondent, requested that New York correspondent to lend some money for it at 90 days, and 6 months (this about two weeks ago). That is only an indication, but it is a pretty strong one to my mind.

I am, personally, very well, but much concerned to hear you have been laid up. Please telegraph me when you get this letter that you are better.

For your confidential information, Davison is now on his way to London, and I shall follow him in about two or three weeks. I am, naturally, not saying very much about it as yet, but it will give me an opportunity of seeing Cunliffe, and I can impart your mind to him, if you wish me to do so.

All going along very well here, and the English loan has been a tremendous success. We are much encouraged by it.

With best regards and wishes for your prompt recovery, I am,

Yours very sincerely,

J. P. MORGAN.

BENJAMIN STRONG, Esq.,
The Lewiston, Estes Park, Colorado.

EXHIBIT NO. 2479

[Copy]

ESTES PARK, COLORADO, *September 12th, 1916*

DEAR JACK: * * * Replying specifically to your letter: I think I realize some of the difficulties about the French exchange. It has always seemed to me that the Government was putting too great a burden on the Bank of France, and that the Bank of France was too timid in consequence about letting gold go out of the country. In other words, they should, if possible, shrink their note issue and ship more gold. This means larger Government loans, repayment of advances made by the Bank of France, and the consequent reduction of note issues.

On the whole, I suppose the policy of letting gold come to this country through England is wiser and strengthens their position all around, but so long as they are doing that, it mans that England must bank for France and give France a ratable share of the benefits resulting from the use of French gold which, in turn, enables the negotiations of large English credits here.

Of course, whatever operations we could undertake under the terms of the proposed account would be small in total, compared to the total requirements, and it would be a very flexible account and could be made one of the means of stabilizing exchange, rather than specifically a drawing credit, and, after all, the proposed account is to create machinery for steadying exchange rates, having an eye to conditions after the war is over, just as much, if not more, than present conditions. It is all in the interest of our exporters, and some day I guess that will be fully realized.

The general plan in my mind was to keep in as close touch as possible with the factors which affect the figure at which gold can be profitably imported and accumulate exchange at or below that rate until we have reached a point where we have created as large an account as we thought wise, most of which would be invested in prime bills. The accumulation of the amount of exchange agreed upon would take place only on occasions where exchange was very weak and, naturally, the account would continue a fairly constant one until the time came when the exchanges turned permanently, when the whole operation will be transferred to the other side. In other words, it might be an investment account running for one, two, or three years before any change of position takes place.

What you say about money conditions is exceedingly interesting. The banks throughout the West are all flush so far as I can tell, and if imported gold is held in reserve and deposited only when our surplus at New York shows signs of a sharp reduction, I should think we could get past this fall without any high money rates at all.

I notice by the newspapers that Davison has sailed and am much interested to hear that you are also sailing in a few weeks. Won't you give my warmest regards to our mutual friends in London, particularly Grenfell, Lord Cunliffe, Montague Norman, Brian Cokayne, and the others with whom I had the pleasure of many most interesting meetings?

With warmest regards to you and your partners, I am,

Very sincerely yours,

BENJAMIN STRONG.

J. P. MORGAN, Esq.,
23 Wall Street, New York City.

P. S.—I would appreciate your taking opportunity, if convenient, to explain to Lord Cunliffe the present situation in regard to our negotiations and the necessity for more delay than I had anticipated by reason of my absence. The amendment bill has passed both houses of Congress and will be signed by the President.

EXHIBIT No. 2480

[Excerpt of letter]

PULPIT HARBOR, NORTH HAVEN, MAINE,
September 14th, 1916.

DEAR BEN: * * * P. M. W. had rather a hectic time this summer and not altogether a happy solution in all respects. We carried our fight on rotation far enough to prevent the designation of Hamlin, but we did not get rotation by seniority of terms, not by favor, as we had hoped. That was McAdoo's fine Italian hand.

* * * * * * *

The foreign (English) arrangement is still in statu quo. McAdoo suggested going to the Secretary of State and I was the only one left to say it was quite unnecessary. I presume Lansing will hold the matter up till after the election, but anyway he promised me informally not to turn it down without giving me a chance to discuss it with him. Harding (now Governor of the Board) is strong in favor of the deal and I think we shall certainly put it through, but it does take an infernal amount of time. Your letter answering P. M. W.'s objections I thought was excellent; but P. M. W. while superficially favorable is at heart unfavorable to the scheme and it makes it hard. I think McA. would have said as he did a year ago that the matter did not need action by the State Dept.—had it not been that he wanted without saying so that it should be deferred till after November 4th. * * *

Yours always,

(Signed) FREDERICK A. DELANO.

EXHIBIT No. 2481

[Excerpt of letter]

Estes Park, Colo., September 22nd, 1916.

DEAR FRED: * * * I have had a very deep feeling of sympathy for Warburg this summer. He seems to have been heckled on every side. The outcome of the fight for rotation struck me as being a complete breakdown, except that it established some particular principle. The natural procedure would have been to appoint you Governor and Warburg Deputy Governor. Why, or how, it was not done really beats me. I did not have the nerve to write you on the subject, but did ask Warburg in a recent letter to tell you for me that if you continued to stand by, as I knew you would, it would encourage all of us and I hope he gave you the message.

* * * * * * *

I am terribly discouraged about the English arrangement. It looks as though Lansing were rolling the matter along. If he could only be convinced that it is a matter of serious importance to the banking interests of this country—much more serious, in fact, than it is on the other side—he might be disposed to look at it differently. If you or Harding, or both of you, have opportunity to discuss the matter with the State Department, I hope you can take it up with Frank Polk, as well as with the Secretary. We must some way or other get this concluded, or advise the Bank of England that it must await the conclusion of the war, which would be altogether too bad.

Of course, this has been gall and wormwood to Warburg. I can't help sympathizing with his reluctance to see the arrangement concluded before the war is over. On the other hand, had there been no war, I feel that he would have viewed the arrangement with exultation. It is so distinctly favorable to the Federal Reserve System. On the whole, it may have been wise to take it up with the State Department, but I am sorry that it was thought necessary to do so.

* * * * * * *

Just one more word about Warburg: I have not the slightest reason to doubt his loyalty in every way. Men of his race are very strongly swayed by sentiment and influenced by very active imaginations. His sentiment with regard to the war is naturally a difficult obstacle in the way of some of our negotiations, and I think he is trying conscientiously to ignore them. On the other hand, I can realize that his imagination opens up a picture of scorn and abuse that may be heaped upon him by relatives, friends, and old countrymen, in case it becomes known that we are dealing with the Bank of England, which it will be very difficult for him to face. He probably would find it a cause of reproach in his immediate family. We are all human enough to be influenced by these considerations, and they certainly affect him much more than they would a cold-blooded Anglo-Saxon. What Warburg needs is the influence of friendship and encouragement and he will come along in fine shape. He has a very warm regard for you, and I believe you have more influence with him than any other member of the Board. * * *

Faithfully yours,

—— ——.

FEDERAL RESERVE BOARD,
Washington, October 5, 1916.

Mr. Pierre Jay,
Chairman, Federal Reserve Bank, New York.

Dear Mr. Jay: Referring to the subject of our conversation on Tuesday afternoon, I have to report that the matter is still in the hands of the State Department, and there is no immediate prospect of getting a favorable ruling. In fact, I believe that if the matter should be forced, the decision would be unfavorable, so I would advise that you find some way to temporize, either by writing your friends on the other side asking about some matters of detail, or in such other way as you can. Meanwhile I will watch the situation closely at this end and push for action at the earliest opportune moment.

Very truly yours,

(Signed) P. M. Warburg.

EXHIBIT No. 2483

FEDERAL RESERVE BANK OF NEW YORK,
October 7, 1916.

DEAR GOVERNOR STRONG: When Mr. Curtis and I were in Washington on Tuesday we took up with Mr. Harding the question of the matter now pending before the State Department. He promised to see whether the matter could be expedited in any way, and I have just received the enclosed letter from him to which I have replied as per enclosed copy.

I do not believe there is any use agitating the matter again for another month or six weeks. At that time we shall certainly take it up vigorously and see if we cannot bring the matter to a favorable conclusion. I had urged upon Governor Harding the desirability of prompt action in order that the matter might not be allowed to grow cold across the water, and it is to this that he refers when suggesting that you should write your friends on the other side about matters of detail, etc.

Very truly yours,

(Signed) PIERRE JAY, *Chairman.*

EXHIBIT No. 2484

ESTES PARK, COLO., *October 11th, 1916.*

DEAR MR. JAY: * * * Your letter about the State Department correspondence indicates that you were going to enclose a copy of a letter from the Department. It only covered a letter from Warburg addressed to you and copy of a letter which you addressed to Governor Harding, of the 5th and 7th, respectively. I do not like the way that matter is going at all. Our whole foreign situation seems to be hung up pending dilatory procedure by the State Department and Warburg's prognosis of an adverse decision can be very readily dealt with by arranging for Mr. Curtis to meet Mr. Polk, as I understand Secretary Lansing is not very well. This is a matter which should be discussed informally before any formal ruling is made, and I sincerely hope that it will be done.

I shall write the Bank of England a letter that will keep the matter alive, of course, but it seems sort of a puerile position for a great institution to assume, and I very much regret its necessity.

B. S.

DEAR GOVERNOR STRONG: * * * With regard to the Bank of England matter, I feel personally that it would be inadvisable to try to have Curtis see Polk or to do anything about it until after election. That is only two and a half weeks away. After that time I feel that the subject can probably be discussed on its merits and will be a welcome instead of as at present an unwelcome subject, and that our chances of success will be much greater if we have a little patience. I expect to be over in Washington next week at a meeting of the executive committee of the Reserve agents, and will make inquiries as to whether there is any progress or any damage being done by laches.

I understand from Mr. Kenzel that the Whitney Central National Bank has given us all the information we require. * * *

My Dear Gov.: * * * With respect to our foreign business, I agree with you that some pressure on the Department of State should be exerted, but I don't think there is really any use in attempting anything before election; and, on the other hand, I think it will probably do more harm than good. I am convinced that the administration has had plans for "twisting the lion's tail" which would have been brought off about now had it not been for the appearance of the *U-53*, which made a little change in sentiment. However, it isn't all over yet, and a peremptory threat to use the powers granted to the President under the new revenue act addressed to Great Britain may still be issued before the fifth of November. If my diagnosis of their frame of mind is correct, they would not be likely to listen to our plans, no matter how reasonable or unconnected with their points of view such plans might be. * * *

Yours as ever,

[Copy]

Denver, Colorado, *October 24th, 1916.*

Dear Mr. Jay: * * * My suggestion for having Curtis see Polk about the English arrangement was to enable us to get a line informally prior to the final decision on what their attitude is and to leave the matter in such shape that we could make our own representations directly to the State Department rather than through members of the Federal Reserve Board. That, I regard, as exceedingly important and really necessary in order to ensure a favorable decision. Election is now so near that nothing could be accomplished by pressing the matter, and my letter meantime to Cokayne (recently sent to Mr. Treman) will keep the ball rolling. * * *

Sincerely yours,

Dear Ben: * * * Today I received an unopened letter from the Board marked "confidential", and forwarded from the office. It contained our magna charter, under seal, as follows:

Voted that the Federal Reserve Bank of N. Y. be authorized to appoint as its correspondent and agent the Bank of England, of London, England, and that it be further authorized to open and maintain banking accounts with and for said correspondent and agent for the purpose of purchasing, selling, and collecting bills of exchange in accordance with the provisions of section 14 and other provisions of the Federal Reserve Act, as amended; and for such other purposes as may be permitted under said Federal Reserve Act, as amended.

I hereby certify that the above is a true extract from the minutes of the meeting of the Federal Reserve Board held on Tuesday, December 19, 1916.

[seal] H. Parker Willis, *Secretary.*

That seems pretty satisfactory, doesn't it? I don't altogether agree with you about the Board showing distrust of your intelligence and intentions. I think that they in common with all Washington merely had that pre-election fear of rocking the boat. Six weeks before election Harding predicted to me the exact action which Lansing actually took as soon as election was over; * * *

Yours,

P. J.

MEMORANDUM OF CONVERSATION WITH BENJAMIN STRONG AT ESTES PARK, COLORADO, DECEMBER 26, 1916

At about 6 p. m. we got Mr. Strong on the wire. He said he had received our telegram and one from Jay and was much disturbed over the action of the Board. I told him the details of our information and lack of information, including the substance of our talks with Harding, Delano, and De Neuflize. He advised the following course of action:

1st. To get Jack Morgan to cable his partner in London to see Lord Cunliffe at the bank and explain to him the chagrin felt by the officers of this bank over the premature publication of this matter and get a line from Lord Cunliffe as to what action he would like to have us take in order to set the situation straight. After receiving a report back through Morgan, we could then prepare an appropriate cablegram direct.

2nd. To send a formal letter of protest to the Board, quoting the original understanding between Strong and the officers of the Bank of England as to publicity and making our position very plain.

3rd. To send a cablegram to Pallain of the Bank of France and straighten out that matter in the course of a few days.

4th. He agreed that in the meanwhile it would be wise for us to issue no public statement from the bank.

5th. As soon as we had straightened the publicity matter out with the Bank of England, we should proceed at once to have our tentative understanding made into an actual one and arrange with them for the simultaneous publication of our own statements.

I told him we had called a meeting of the executive committee for tomorrow afternoon, at which we had asked all the other directors within reach to be present, and hoped to get a formal vote with regard to the Board's action, instructing us to protest against it.

He said he would be in care of Charles E. Howes in Estes Park until Saturday and would like to be kept informed of the progress of events.

I told him that I thought it was quite likely that the Board's action was partly due to a desire to help out Mr. Wilson's foreign policies and take away from the pro-German impression created by the last few public announcements.

He felt that it was unwise for the Board to have consulted with the British Ambassador, as we have been endeavoring to keep this matter away from any aspect of international diplomacy, etc., but he thought it would be wise, as long as the Board had already done so, for me to get in touch with the Ambassador and find out for ourselves how the land lay. I told him I hardly knew the Ambassador well enough to call him on the telephone and thought that perhaps we had better let the matter rest till we heard more through the Morgan connection, to which he assented.

[Copy of telegram despatched 10 p. m. to Morgan, London]

33815. For E. C. Grenfell. You will have seen that the Federal Reserve Board yesterday published the authority for the Federal Reserve Bank of New York to make an arrangement with the Bank of England. This is simply the formal statement of authority granted and has nothing to do with the terms or conditions of the arrangement, but both Strong, who is away ill, and the officers of the Federal Reserve Bank of New York ask if you will be kind enough to express to the Governor their chagrin and regret at the premature publication by the Federal Reserve Board, which was made without their knowledge and which is, of course, contrary to the spirit of the last clause in the agreement between Strong and the Governor. The Federal Reserve bank officials have issued no statement as yet and before making one would like to learn the Governor's wishes in this connection, since they desire greatly to do nothing which could in any way embarrass the Governor or the bank. They earnestly hope that no inconvenience has resulted from the Board's action, which was made without consultation with them. They would not for the world have had this happen in this way and want the Governor to know it.—J. P. Morgan.

[Private]

BENJAMIN STRONG,
Governor Federal Reserve Bank, N. Y.:

If English bankers decide to pay off their fifty million dollars loan from New York banks maturing twentieth instant would it be agreeable if we earmark approximately eleven million pounds gold here on bullion basis for your bank and ask you to pay equivalent at mint par on that date to Vanderlip for committee of American lending banks?

BRIEN COKAYNE.

EXHIBIT No. 2498

BANK OF ENGLAND,
June 2, 1917.

DEAR MR. STRONG: Our bankers here wish to pay off the loan of $50,000,000 maturing on the 20th instant which was made to them in December 1915 by a committee of American banks under the presidency of Mr. Vanderlip. They have therefore offered to sell our Government the equivalent amount of gold here if it will undertake to pay off the loan, the idea of course being that such gold could be shipped to make exchange for the payment in the United States.

But it occurred to me that, if agreeable to you, this would be an admirable opportunity of utilizing our new agreement with you for obviating unnecessary shipments of the metal, although it is not precisely the form of operation for which that agreement was devised. I therefore took the liberty of telegraphing to you personally yesterday as follows:

"If English bankers decide to pay off their fifty million dollars loan from New York banks maturing twentieth instant would it be agreeable if we earmark approximately eleven million pounds gold here on bullion basis for your bank and ask you to pay equivalent at mint par on that date to Vanderlip for committee of American lending banks."

I now await your reply to this which I hope will be favorable, and it only remains for me to add that if and when this lot of gold should require to be shipped across, the expense of doing so should in my judgment be borne by us, as the earmarking is not done for your benefit but is the equivalent to our shipping gold "to make exchange."

I am right, am I not, in assuming that it is the equivalent of a shipment, i. e., that you will be able to include in your reserve gold so earmarked here?

I have read with great pleasure your charming letters to Norman and most cordially share your pleasure that our two countries are arm in arm. May they ever remain so.

I am pleased to hear that your son is coming over to the seat of war and hope very much to have a chance of seeing him.

Trusting that your health is now quite restored and that you will be careful not to overtax it again.

Yours very truly,

(Signed) BRIEN COKAYNE.

NEW YORK, *June 19, 1917.*

FEDERAL RESERVE BANK OF BOSTON,
Boston, Mass.:

Referring arrangement Bank of England account covered by recent correspondence. Federal Reserve Board has given written ruling earmarked gold can be counted as reserve and transaction therefor has been consummated with Bank of England and will go through books June twentieth. Federal Reserve Board desires following uniform accounting: Under resources on your books open account, following silver coin, to be called Bank of England sterling gold account, but in statement for public the account should be called sterling gold account; the words Bank of England to be left out. Tomorrow we will charge your collected funds account three million five hundred thousand, the amount of your participation, which you are to credit the Federal Reserve Bank of New York for settlement through the gold fund Wednesday, debiting the Bank of England sterling gold account. Earmarked gold will be maintained at least until after last payment of Liberty Loan is made August thirtieth and reserve conditions then can be ascertained.

FEDERAL RESERVE BANK OF NEW YORK.

Charge.

EXHIBIT No. 2501

JUNE 20, 1917.

SIRS: We enclose herewith copy of letter we are sending to the Federal Reserve banks which have taken a participation in the transaction just consummated with the Bank of England, which we trust may meet with your approval. The Bank of England has earmarked £10,787,899 19/4 in sovereigns, which at the mint par of $4.86656348 is the equivalent of $52,500,000. The Bank of England assumes all risk and expense that might be incurred in shipping this gold to New York should we require that they do so.

The participations in the account taken by the several Federal Reserve banks are as follows:

F. R. B. of—	*Amount*
Boston	$3,500,000
New York	19,750,000
Philadelphia	3,500,000
Cleveland	4,500,000
Richmond	1,750,000
Atlanta	1,500,000
Chicago	7,000,000
St. Louis	2,000,000
Minneapolis	2,000,000
Kansas City	2,500,000
Dallas	1,750,000
San Francisco	2,750,000
Total	52,500,000

It was our desire and intention to submit this matter to you before, but we were obliged to work out the detail by cable and were only able to prepare the letter to-day, the date the transaction had to be consummated in order to meet the maturing loan of the London joint-stock banks.

Respectfully,

——— ———, *Governor.*

The Secretary of State to the Ambassador in Great Britain (Page)

[Telegram]

DEPARTMENT OF STATE,
Washington, August 6, 1914, 1 p. m.

You are instructed to inquire of the British Government whether they are willing to agree that the laws of naval warfare laid down by the Declaration of London, 1909, shall be applicable to naval warfare during the present European conflict, provided that the governments with whom Great Britain is or may be at war also agrees to such application. You will further state that this Government believes that acceptance of these laws by the belligerents would prevent grave misunderstandings which may arise as to the relations between belligerent and neutral powers. It, therefore, earnestly hopes that this inquiry may receive favorable consideration.

BRYAN.

EXHIBIT No. 2503

The Department of State; Policy of the United States Toward Maritime Commerce in War

Prepared by Carlton Savage, Division of Research and Publication

VOLUME I—1776–1914 (pp. 112–113)

THE DECLARATION OF LONDON

The Declaration of London of February 26, 1909, was signed by the delegates of the United States. The fate of the declaration was prejudiced by the adverse vote of the British House of Lords in December, 1911. Ratification was advised by the United States Senate on April 24, 1912, but it was not ratified by the President.

Stipulations of the Declaration of London important in connection with this study were as follows:

1. *Blockade.*—"In accordance with the Declaration of Paris of 1856, a blockade, in order to be binding must be effective,—that is to say, it must be maintained by a force sufficient really to prevent access to the enemy coastline." A blockade must not extend beyond the ports and coasts belonging to or occupied by the enemy; neutral vessels were not to be captured for breach of blockade except within the area of operations of the blockading warships, and "Whatever may be the ulterior destination of a vessel or of her cargo, she cannot be captured for breach of blockade, if, at the moment, she is on her way to a non-blockaded port."

2. *Contraband of war.*—The following articles could, without notice, be treated as absolute contraband: arms of all kinds; munitions; military clothing and equipment; saddle, draught, and pack animals; armor plates; warcraft and component parts; and "Implements and apparatus designed exclusively for the manufacture of munitions of war, for the manufacture or repair of arms, or war material for use on land or sea."

The following articles could, without notice, be treated as contraband of war under the name of conditional contraband: foodstuffs; forage; clothing, fabrics for clothing, and boots and shoes, suitable for use in war; paper money and gold and silver in coin or bullion; vehicles of all kinds available for use in war; floating docks and vessels, craft, and boats of all kinds; railway, telegraph, and telephone material; aircraft; fuel and lubricants; powder and explosives not specially prepared for use in war; barbed wire and implements for fixing and cutting the same; horseshoes and shoeing materials; harness and saddlery; and field glasses, telescopes, chronometers, and all kinds of nautical instruments.

Articles exclusively used for war could be added to the list of absolute contraband by a declaration, and articles susceptible of use in war could be added to the conditional list in the same manner. Absolute contraband was liable to capture if shown to be destined to territory belonging to or occupied by the enemy, or to the armed forces of the enemy. It was immaterial whether the carriage of the goods was direct or entailed transshipment or a subsequent transport by land. Conditional contraband was not liable to capture except when found on board a vessel bound for territory belonging to or occupied by the enemy, or for the armed forces of the enemy, and when not to be discharged in an intervening neutral port.

The following articles could not be declared contraband of war: raw materials of the textile industry and yarns of the same; copra, oil seeds and nuts; rubber, resins, gums, and lacs; hops; raw hides and horns, bones and ivory; natural and artificial manures; metallic ores; earths, clays, lime, chalk, stone, including marble, bricks, slates, and tiles; chinaware and glass; paper and paper-making materials; soap, paint, and colors; bleaching powder, soda ash, caustic soda, salt cake, ammonia, sulphate of ammonia, and sulphate of copper; agricultural, mining, textile, and printing machinery; precious and semiprecious stones; clocks and watches, other than chronometers; fashion and fancy goods; feathers of all kinds, hairs, and bristles; articles of household furniture and decoration; office furniture and requisites.

763.72112/111

The Ambassador in Great Britain (Page) to the Secretary of State

[Telegram]

American Embassy,
London, undated.
[*Received August 26, 1914, 9.15 p. m.*]

483. My 461 and yours of August 24. Following text of Foreign Office note regarding Declaration of London, together with explanation and order in council, telegraphed as instructed.

Foreign Office,
(*London*), *August 22, 1914.*

On the 7th instant you were so good as to address to me a note inquiring, pursuant to instructions from the Secretary of State at Washington, whether His Majesty's Government (were) willing to agree that the laws of naval warfare, as laid down by the Declaration of London, 1909, should be applicable to naval warfare during the present European conflict, provided that the governments with whom Great Britain is at war, or with whom her relations are not normal, also agree to such application.

Your excellency added that it was (the) belief of your Government that the acceptance of these laws by the belligerents would prevent the possibility of grave misunderstandings (as) to the relations between belligerents and neutrals.

I have the honor to inform your excellency that His Majesty's Government, who attach great importance to the views expressed in your excellency's note and are animated by a keen desire to consult so far as possible the interests of neutral countries, have given this matter (their) most careful consideration and (I) have pleasure in stating that they have decided to adopt generally the rules of the declaration in question, subject to certain modifications and additions which they judge indispensable to the efficient conduct of their naval operations. A detailed explanation of these additions and modifications is contained in the inclosed memorandum.

The necessary steps to carry the above decision into effect have now been taken by the issue of an order in council, of which I have the honor to inclose copies herein for your excellency's information and for transmission to your Government.

I may add that His Majesty's Government, in deciding to adhere to the rules of the Declaration of London, subject only to the aforesaid modifications and additions, have not waited to learn the intentions of the enemy governments, but have been actuated by a desire to terminate at the earliest moment the condition of uncertainty which has been prejudicing the interests of neutral trade.

I have (etc).

E. A. Crowe.

[Memorandum]

1. The lists of contraband already published by His Majesty are substituted for those contained in Articles 22 and 24 of the Declaration of London. Lists similar to those published by His Majesty have (already) been issued (by) the French Government.

2. His Majesty's Government do not feel able to accept in its entirety the rule laid down in Article 38 of the declaration. It has been the practice of the British Navy to treat as liable to capture a vessel which carried contraband of war with false papers if she was encountered (while) on the return voyage, and to this exception His Majesty's Government feel it necessary to adhere.

3. The peculiar conditions in the present war due to the fact that neutral ports such as Rotterdam are the chief means of access to a large part of Germany and that exceptional measures have been taken in the enemy country for the control by the Government of the entire supply of foodstuffs have convinced His Majesty's Government that modifications are required in the applications of Articles 34 and 35 of the declaration. These modifications are contained in paragraphs 3 and 5 of the accompanying order in council.

4. Article 15 of the declaration contains a provision as to presumptive knowledge of the blockade incertain cases if the vessel has sailed from a neutral port. No mention is made of British or allied enemy ports. These omissions are supplied by Article 4 of the order in council.

5. The order in council also provides for the acceptance of the very valuable commentary on the declaration which was embodied in the general report prepared by Monsieur Renault.

Following is text of order in council:

AT THE COURT AT BUCKINGHAM PALACE, THE 20TH DAY OF AUGUST, 1914, PRESENT, THE KING'S MOST EXCELLENT MAJESTY IN COUNCIL

Whereas during the present hostilities the naval forces of His Majesty will cooperate with the French and Russian naval forces; and

Whereas it is desirable that the naval operations of the Allied forces so far as they affect neutral ships and commerce should be conducted on similar principles; and

Whereas the Governments of France and Russia have informed His Majesty's Government that during the present hostilities it is their intention to act in accordance with the provisions of the convention known as the Declaration of London, signed on the 26th day of February, 1909, so far as may be practicable;

Now, therefore, His Majesty, by and with the advice of his Privy Council, is pleased to order, and it is hereby ordered, that during the present hostilities the convention known as the Declaration of London shall, subject to the following additions and modifications, be adopted and put in force by His Majesty's Government as if the same had been ratified by His Majesty.

The additions and modifications are as follows:

(1) The lists of absolute and conditional contraband contained in the proclamation dated August 4, 1914, shall be substituted for the lists contained in Articles 22 and 24 of the said declaration.

(2) A neutral vessel which succeeded in carrying contraband to the enemy with false papers may be detained for having carried such contraband if she is encountered before she has completed her return (voyage).

(3) The destination referred to in Article 33 may be inferred from any sufficient evidence, and (in addition to (the) presumption laid down in Article 34) shall be presumed to exist if the goods are consigned to or for an agent of the enemy state or to or for a merchant or other person under the control of the authorities of the enemy state.

(4) The existence of a blockade shall be presumed to be known—

(a) To all ships which sailed from or touched at an enemy (port) a sufficient time after the notification of the blockade to the local authorities to have enabled the enemy government to make known the existence of the blockade;

(b) To all ships which sailed from or touched at a British or Allied port after the publication of the declaration of blockade.

(5) Notwithstanding the provisions of Article 35 of the said Declaration, conditional contraband, if shown to have the destination referred to in Article 33, is liable to capture, to whatever port the vessel is bound and at whatever port the cargo is to be discharged.

(6) The general report of the drafting committee on the said declaration presented to the naval conference and adopted by the conference at the eleventh plenary meeting on February 25, 1909, shall be considered by all prize courts as an authoritative statement of the meaning and intention of the said declaration, and such courts shall construe and interpret the provisions of the said declaration by the light of the commentary given therein.

And the Lords Commissioners of His Majesty's Treasury, the Lords Commissioners of the Admiralty, and each of His Majesty's Principal Secretaries of State, the President of the Probate, Divorce, and Admiralty Division of the High Court of Justice, all other judges of His Majesty's Prize Courts, and all governors, officers, and authorities whom it may concern are to give the necessary directions herein as to them may respectively appertain.

THE PROPOSED "WORKING ARRANGEMENT" WITH GREAT BRITAIN

The Ambassador in Great Britain (Page) to the Secretary of State

[Telegram]

AMERICAN EMBASSY,
London, December 6, 1914, 7 p. m.
[*Received December 7, 8:30 a. m.*]

1199. More than a fortnight ago I took up with Sir Edward Grey the possibility of making some comprehensive working arrangement whereby the two Governments might remove as many as possible of the trade and shipping difficulties that the war has developed. After discussion, he proposed that an effort to formulate such an arrangement be made by Anderson for us and for him by representatives of the several departments of British Government that have to do with these questions. These gentlemen have had many conferences and Sir Edward and I have discussed it three times. Our conference yesterday (lasted) practically the whole afternoon. I contended especially for the lifting of the embargo on the various products which we are prohibited from importing which it seems to me would be a concrete and substantial gain. In the proposed arrangement we have secured this contention except as to wool;—and they promise to take up wool as soon as their own military demands are satisfied.

They contended for a considerable number of concessions, some of which it would be difficult, if not impossible, to grant. We secured the elimination from the proposed arrangement of all the concessions they asked except our at least negative support of their demand that cargoes, especially of copper, shall be consigned to some definite consignee and not to the shipper nor to order. The practice of consigning to the shipper or to order is an innocent and convenient and valuable commercial practice in time of peace when no government cares to whom any cargo belongs or whither it is bound, but they contend that in time of war this method is used to conceal real ownership and real destination of contraband goods. They ask that we refrain from supporting complaints of shippers about detention of cargoes based on this ground only. This leaves us all rights as now of making claims for wrongful detentions of these cargoes as well as of any others whatever. They claim to have definite proof that all copper in Germany or that is shipped into Germany is controlled by the Government for military use and my information is that no neutral Government (in) Europe disputes this. They cite the very high price of copper in Germany as confirming their contention. I hear from independent trade sources that the imports of copper into some of the countries contiguous to Germany has in the last four months been very far in excess of any previous annual importation. Great Britain will in any event continue to treat copper as absolute contraband. They claim also to have proof that many apparently neutral firms and companies in neutral (countries) contiguous to Germany are really German buying agents. They asserted that they have no wish to interfere with bona fide neutral trade and that they have taken and will take no action but what is necessary to prevent contraband trade under the guise of neutral. Every interference with what is proved to be real neutral trade they will take as now at the risk of damages.

The proposed working ararngement can be ended by either party at any time. The text of it, which in this final form was prepared by them and accepted by Grey, follows. Grey hopes it will be acceptable to you and the President.

After conversations with the Principal Secretary of State for Foreign Affairs and with representatives of the Departments of State concerned full assurances have been given that the British Government is earnestly desirous of making arrngements calculated to diminish the interference with the bona fide trade between the United States and neutral countries.

It is not desired to press the Government of the United States to make any declaration of policy with regard thereto; the object is merely to secure good offices of that Government in carrying out the arrangements indicated in this statement and in insuring that exports from America are correctly and fully described on the manifests and bills of lading.

It is pointed out that since the outbreak of war a change has been made in the practice whereby evidence of contents of manifests was available at ports of shipment in the United States. The consequence has been that the information disclosed therein had been withheld, with the unfortunate result thenceforth that additional activity has had to be displayed in visiting, search, and detaining ships in order to discover the real nature of the cargoes. It has also transpired that contraband goods have been shipped either with false and simulated descriptions or with no description whatever. This has been particularly the case with rubber, and, in addition, there is some evidence that the facilities given for the shipment of cotton without hindrance is inducing consignor to mix copper with the cotton (copper packed in cotton). It is the opinion here that such practices as these are dangerous and damaging to honest trading and are sure to restrict trade and create bad feeling. The British Government trust that they may have the administrative assistance of the Government of the United States in putting a stop to such proceedings.

In this connection it is clear that the greatest importance is attached to stopping copper from reaching enemy territory. Great Britain has no wish to come into any conflict with the copper producers in America who desire to carry on a bona fide trade with neutral countries, but it is keenly felt that the United States Government ought to give its whole support to an endeavor to prevent fraudulent trade through American ports, and should also refrain from supporting the complaints of traders based on the ground that there is no right to detain copper merely because it is destined for the enemy territory.

Some part of the difficulties surrounding the treatment of copper has now disappeared, as there is evidence that the German Government has assumed control of all the copper in or entering Germany, and it is hoped that if copper is openly addressed to bona fide consignees in neutral countries, the risk of such detention will be greatly minimized as negotiations are well advanced with most of the neutral countries contiguous to the enemy states to insure easy trade conditions in such countries, subject to prohibition of export therefrom.

Should the Government of the United States find itself able to act on the lines herein described, the British Government will gladly negotiate for the grant of permits for the exportation from Great Britain and its colonies to the United States, of rubber, hides, jute, plumbago, manganese, ferromanganese, chrome, tungsten ore, and other ingredients of steel, on receiving assurances that these articles will not be reexported from the United States in their waste, crude, or raw form, and that bloom or ingots of steel and manufactured rubber and leather articles (to be limited to a specific list), will not be exported to countries at war with Great Britain or to neutral European countries from which Great Britain has not secured satisfactory guarantees against reexportation of such articles. This limitation would not, however, interfere with exportation of any of these articles to Great Britain for distribution from there to neutral countries under the limitations imposed by British law.

Effect would be given to these proposals by granting licenses to the agents in Great Britain of American steel, rubber, and leather trades; such licenses to contain stipulations and provide for necessary securities. The British Government has already been in communication with trade representatives and finds that such a scheme is feasible and would be satisfactory to them.

The remarks made at the beginning of this memorandum as to the good offices of the American Government would apply equally to the arrangements made in.

respect of all the articles that become the subject of license to export to America, and which are not to be reexported.

As soon as the British Government hear that the arrangements herein proposed are acceptable to the United States Government, British officials will be instructed to interview applicants for licenses and to grant permits without delay.

December 5, 1914.

526. American interests deeply concerned and gravity of situation such in regard to the embargoes on rubber and hides, Department feels this should be brought to the attention of the British Government. It would seem not to the

commercial or other interests of Great Britain to pursue a policy which would cripple American manufacturers and depress British interests in the colonies. If American manufacturers are not to obtain necessary supplies, prices of American goods which British may desire will be greatly increased, if, indeed, the exportations from this country be not ultimately prevented.

Present this view to the British authorities and press for definite statement of course to be pursued by British Government respecting American supply of rubber and hides from British territory. Department will consider reasonable arrangement by American exporters to secure against reexportation from United States to enemy countries of British Government. Department earnestly hopes that permits will be allowed for all excess over needs in Great Britain.

Form of Agreement to be signed by importers of rubber from British Dominions and by manufacturers to whom such rubber is sold

RUBBER GUARANTEE

Rubber.—Ex. s. s. ______. Packages ______. Weight ______. Quality ______. Marks ______.

HIS BRITANNIC MAJESTY'S COUNSUL-GENERAL,
New York.

I beg to inform you that I have sold the rubber specified in the margin to ____________________________________, whose guarantee you will find on the back hereof, I will produce to you at any time on demand the original contracts or other documents evidencing the sale.

In consideration of your consenting to the delivery to them of the said rubber, I undertake that I will not, directly or indirectly, at any time so long as the present war continues, export any raw rubber, reclaimed rubber, or waste rubber from the United States, except to the British Dominions, and that I will not sell any raw rubber, reclaimed rubber, or waste rubber for exportation without satisfying myself that it is not intended for exportation from the United States, except to the British Dominions.

Date ----------------------------

[Reverse side of sheet]

HIS BRITANNIC MAJESTY'S COUNSUL-GENERAL,
New York.

In consideration of your consenting to the delivery to us of the rubber specified on page 1 which we have purchased from ---------------------------- ------------ we hereby give you the following undertaking, which shall remain in force so long as Great Britain is at war with any European powers:

We will not export from the United States any raw rubber, reclaimed rubber, or waste rubber, whether the same has been imported from the British Dominions or not, otherwise than to the United Kingdom or to a British Possession.

We will not sell the rubber now delivered by you to any dealer or other person or persons in the United States, but will use it for our own manufacturing purposes.

All orders received by us for manufactured or partly manufactured rubber goods to be sent to neutral European countries shall be executed from stocks maintained by us in the United Kingdom, or be executed by shipments to the United Kingdom and reshipment from there, under license to be obtained for export therefrom.

We will not execute any orders for manufactured or partly manufactured rubber goods to be sent, either directly or indirectly, to any country or state at war with Great Britain.

We will not sell any manufactured or partly manufactured rubber goods to any person in the United States without satisfying ourselves that there is no intention on his part to export, or resell the same for exportation, to any countries in Europe other than Great Britain, France, Russia, or Italy, otherwise than by shipping to the United Kingdom and reshipping from there, under license to be obtained for export therefrom.

If we export any manufactured or partly manufactured rubber goods to a destination outside Europe not being in a British Possession, we will, prior to or simultaneously with the shipment, give you particulars of the goods so shipped and their destination.

All rubber tyres exported by us or sold by us for export shall bear a distinctive name or mark, which we will communicate to you, so as to identify them as being our manufacture.

[Enclosure]

The British Secretary of State for Foreign Affairs (Grey) to the American Ambassador (Page)

Sir E. Grey presents his compliments to the United States Ambassador and in reply to his excellency's note of the 22d ultimo relative to the issue of licences for the supply of manganese to the United States Steel Products Company, has the honour to inform his excellency that his note of December 12 last stating that further licences would not be issued was based on information, received from reliable sources, that the three companies mentioned in that note had exported manganese either directly or indirectly to Germany during the latter part of last year. In view of the paramount necessity, for military reasons, of preventing as far as possible the importation of manganese into Germany, it was therefore considered necessary to restrict the issue of licences.

In view, however, of Mr. Page's note under reply, Sir. E. Grey is happy to state that no difficulty will ensue in future with regard to the supply of ferro-manganese to the United States Steel Products Company or the Carnegie Steel Corporation, subject of course to the requirements of this country, if these companies respectively will sign the guarantee forms which have now been prepared for shipments of ferro-manganese to the United States in each case in which permission is required.

A copy of the guarantee form in question is enclosed for his excellency's information.

London, March 10, 1915.

The German Ambassador (Bernstorff) to the Secretary of State

[Translation]

J. Nr. A2341). WASHINGTON, *April 4, 1915.*

MR. SECRETARY OF STATE: I have the honor to deliver to your excellency the enclosed memorandum on German-American trade and the question of delivery of arms.

Accept (etc.)

J. BERNSTORFF

[Enclosure—Memorandum—Translation]

WASHINGTON, *April 4, 1915.*

The various British orders in council have one-sidedly modified the generally recognized principles of international law in a way which arbitrarily stops the commerce of neutral nations with Germany. Even before the last British order in council, the shipment of conditional contraband, especially food supplies, to Germany was practically impossible. Prior to the protest sent by the American to the British Government on December 28 last, such a shipment did not actually take place in a single case. Even after this protest the Imperial Embassy knows of only a single case in which an American shipper has ventured to make such a shipment for the purpose of legitimate sale to Germany. Both ship and cargo were immediately seized by the English and are being held in an English port under the pretext of an order of the German Federal Council (Bundesrat) regarding the grain trade, although this resolution of the Federal Council relates exclusively to grain and flour, and not to other foodstuffs, besides making an express exception with respect to imported foodstuffs, and although the German Government gave the American Government an assurance, and proposed a special organization whereby the exclusive consumption by the civilian population is absolutely guaranteed.

Under the circumstances the seizure of the American ship was inadmissible according to recognized principles of international law. Nevertheless the United States Government has not to date secured the release of the ship and cargo, and has not, after a duration of the war of eight months, succeeded in protecting its lawful trade with Germany.

Such a long delay, especially in matters of food supply, is equivalent to an entire denial.

The Imperial Embassy must therefore assume that the United States Government acquiesces in the violations of international law by Great Britain.

Then there is also the attitude of the United States in the question of the exportation of arms. The Imperial Government feels sure that the United States Government will agree that in questions of neutrality it is necessary to take into consideration not only the formal aspect of the case, but also the spirit in which the neutrality is carried out.

The situation in the present war differs from that of any previous war. Therefore any reference to arms furnished by Germany in former wars is not justified, for then it was not a question whether war material should be supplied to the belligerents, but who should supply it in competition with other nations. In the present war all nations having a war material industry worth mentioning are either involved in the war themselves or are engaged in perfecting their own armaments, and have, therefore, laid an embargo against the exportation of war material. The United States is accordingly the only neutral country in a position to furnish war materials. The conception of neutrality is thereby given a new purport, independently of the formal question of hitherto existing law. In contradiction thereto, the United States is building up a powerful arms industry in the broadest sense, the existing plants not only being worked but enlarged by all available means, and new ones built. The international conventions for the protection of the rights of neutral nations doubtless sprang from the necessity of protecting the existing industries of neutral nations as far as possible from injury in their business. But it can in no event be in accordance with the spirit of true neutrality, if, under the protection of such international stipulations, an entirely new industry is created in a neutral state, such as is the development of the arms industry in the United States, the business whereof, under the present conditions, can benefit only the belligerent powers.

This industry is actually delivering goods only to the enemies of Germany. The theoretical willingness to supply Germany also, if shipments thither were possible, does not alter the case. If it is the will of the American people that there shall be a true neutrality, the United States will find means of preventing this one-sided supply of arms or at least of utilizing it to protect legitimate trade with Germany, especially that in foodstuffs. This view of neutrality should all the more appeal to the United States Government because the latter enacted a similar policy toward Mexico. On February 4, 1914, President Wilson, according to a statement of a Representative in Congress in the Committee for Foreign Affairs of December 30, 1914, upon the lifting of the embargo on arms to Mexico, declared that "we should stand for genuine neutrality, considering the surrounding facts of the case * * *" He then held that "in that case, because Carranza had no ports, while Huerta had them and was able to import these materials, that it was our duty as a nation to treat them (Carranza and Huerta) upon an equality if we wished to observe the true spirit of neutrality as compared with a mere paper neutrality."

If this view were applied to the present case, it would lead to an embargo on the exportation of arms.

Exhibit No. 2515

F. R. Supp. 1915, p. 160–62
File No. 763.72111/1930

The Secretary of State to the German Ambassador (Bernstorff)

(No. 1379.) Washington, *April 21, 1915.*

Excellency: I have given thoughtful consideration to your excellency's note of the 4th of April, 1915, enclosing a memorandum of the same date, in which your excellency discusses the action of this Government with regard to trade between the United States and Germany and the attitude of this Government with regard to the exportation of arms from the United States to the nations now at war with Germany.

I must admit that I am somewhat at a loss how to interpret your excellency's treatment of these matters. There are many circumstances connected with these important subjects to which I would have expected your excellency to advert, but of which you make no mention, and there are other circumstances to which you do refer which I would have supposed to be hardly appropriate for discussion between the Government of the United States and the Government of Germany.

I shall take the liberty, therefore, of regarding your excellency's references to the course pursued by the Government of the United States with regard to interferences with trade from this country, such as the Government of Great Britain have attempted, as intended merely to illustrate more fully the situation to which you desire to call our attention and not as an invitation to discuss that course. Your excellency's long experience in international affairs will have suggested to you that the relations of the two Governments with one another can not wisely be made a subject of discussion with a third Government, which can not be fully informed as to the facts and which can not be fully cognizant of the reasons for the course pursued. I believe, however, that I am justified in assuming that what you desire to call forth is a frank statement of the position of this Government in regard to its obligations as a neutral power. The general attitude and course of policy of this Government in the maintenance of its neutrality I am particularly anxious that your excellency should see in their true light. I had hoped that this Government's position in these respects had been made abundantly clear, but I am of course perfectly willing to state it again. This seems to me the more necessary and desirable because, I regret to say, the language which your excellency employs in your memorandum is susceptible of being construed as impugning the good faith of the United States in the performance of its duties as a neutral. I take it for granted that no such implication was intended, but it is so evident that your excellency is laboring under certain false impressions that I can not be too explicit in setting forth the facts as they are, when fully reviewed and comprehended.

In the first place, this Government has at no time and in no manner yielded any one of its rights as a neutral to any one of the present belligerents. It has acknowledged, as a matter of course, the right of visit and search and the right to apply the rules of contraband of war to articles of commerce. It has, indeed, insisted upon the use of visit and search as an absolutely necessary safeguard against mistaking neutral vessels for vessels owned by an enemy and against mistaking legal cargoes for illegal. It has admitted also the right of blockade if actually exercised and effectively maintained. These are merely the well-known limitations which war places upon neutral commerce on the high seas. But nothing beyond these has it conceded. I call your excellency's attention to this, notwithstanding it is already known to all the world as a consequence of the publication of our correspondence in regard to these matters with several of the belligeernt nations, because I can not assume that you have official cognizance of it.

In the second place, this Government attempted to secure from the German and British Governments mutual concessions with regard to the measures those Governments respectively adopted for the interruption of trade on the high seas. This it did, not of right, but merely as exercising the privilege of a sincere friend of both parties and as indicating its impartial good will. The attempt was unsuccessful; but I regret that your excellency did not deem it worthy of mention in modification of the impressions you expressed. We had hoped that this act on our part had shown our spirit in these times of distressing war as our diplomatic correspondence had shown our steadfast refusal to acknowledge the right of any belligerent to alter the accepted rules of war at sea in so far as they affect the rights and interests of neutrals.

In the third place, I note with sincere regret that, in discussing the sale and exportation of arms by citizens of the United States to the enemies of Germany, your excellency seems to be under the impression that it was within the choice of the Government of the United States, notwithstanding its professed neutrality, and its dilligent efforts to maintain it in other particulars, to inhibit this trade, and that its failure to do so manifested an unfair attitude towards Germany. This Government holds, as I believe your excellency is aware, and as it is constrained to hold in view of the present indisputable doctrines of accepted international law, that any change in its own laws of neutrality during the progress of a war which would affect unequally the relations of the United States with the nations at war would be an unjustifiable departure from the principle of strict neutrality by which it has consistently sought to direct its actions, and I respectfully submit that none of the circumstances urged in your excellency's memorandum alters the principle involved. The placing of an embargo on the trade in arms at the present time would constitute such a change and be a direct violation of the neutrality of the United States. It will, I feel assured, be clear to your excellency that, holding this view and considering itself in honor bound by it, it is out of the question for this Government to consider such a course.

I hope that your excellency will realize the spirit in which I am drafting this reply. The friendship between the people of the United States and the people of Germany is so warm and of such long standing, the ties which bind them to one another in amity are so many and so strong, that this Government feels under a special compulsion to speak with perfect frankness when any occasion arises which seems likely to create any misunderstanding, however slight or temporary, between those who represent the Governments of the two countries. It will be a matter of gratification to me if I have removed from your excellency's mind any misapprehension you may have been under regarding either the policy or the spirit and purposes of the Government of the United States. Its neutrality is founded upon the firm basis of conscience and good will.

Accept (etc.)

W. J. Bryan

Exhibit No. 2516

State Dept. Doc.
763.72111/3364–½

Hyde, Westbrook & Watson,
Counselor at Law,
Chicago, January 11, 1916.

(Personal)

The Honorable The Secretary of State,
Washington, D. C.

My Dear Mr. Secretary: I am taking the liberty to send you herewith copy of a paper prepared and read by myself before a certain club in this city and also at the houses of some of my friends. It has not been made public and care has been taken to prevent its being reported in the press.

Of course you will understand that no comment from yourself is invited or expected; and I should not be offended were its receipt not acknowledged.

May I congratulate you most heartily on your really great achievement in obtaining assurance of substantial compliance with your demands in regard to submarine warfare. It has been a source of satisfaction to me to be able, on numerous occasions in this city, to express my own confidence (however unimportant) both in your ability to preserve our rights as a neutral and in the wisdom of the course you have pursued. I am trying to make people here trust the Department and so uphold its efforts rather than weaken them by criticism due to ignorance of facts or to unfamiliarity with diplomatic procedure.

With assurances of greatest respect, I am, Mr. Secretary,

Your obedient servant,

[s] CHAS. CHENEY HYDE.

A QUESTION OF LAW AND DIPLOMACY—THE EXPORTATION OF MUNITIONS OF WAR

Throughout the war the suggestion has come from Germany and Austria-Hungary, that if imbued with a spirit of real neutrality the Government of the United States would endeavor to equalize the position of those belligerents with respect to their enemies, by cutting off the access of the allies to its markets, and also possibly by resisting the effort of Great Britain to cut off food supplies from neutral sources. The response of the United States has been that according to international law as exemplified by the Hague Convention above noted, a change of rule in the course of the war, favorable to one belligerent, and harmful to its enemy, would amount to unneutral conduct.

The only ground justifying a change of the rules expressed in the Convention—and one which the Convention itself makes note of in its preamble—is the necessity of a neutral power to make the change in order to protect its own rights. As Secretary Lansing has recently said:

"The right and duty to determine when this necessity exists rests with the neutral, not with a belligerent. It is discretionary, not mandatory. If a neutral power does not avail itself of the right, a belligerent is not privileged to complain, for in doing so it would be in the position of declaring to the neutral power what is necessary to protect that power's own rights."

That the United States does have the right, in case of need, for example on grounds of self-defense, to change the rules and to forbid the sale within its territory of arms to belligerent governments, or to prevent the departure from its territory of such arms when sold, may prove of inestimable value. Two reasons for the assertion of this right might cause us to exercise it. First, the failure of Great Britain to heed American protests against unlawful restrictions imposed upon American commerce; secondly, belief that the unrestricted exportation of arms to the allies would cause Germany and Austria-Hungary to take steps both hostile and injurious to the United States.

* * * * * * *

The most serious aspect of the exportation of arms from the United States today, is the magnitude of the business. Its relation to the highest interests of our country cannot be estimated by the experience of neutral states in past wars wherein such activities were on a smaller scale. In probably no war during the past century has the sale of arms to allied belligerent powers attained such vast proportions, or threatened to inject so decisive an element into the outcome of the struggle. Purchases and shipments now being made by agents of the allies are gradually developing to a degree such as to convert them into valuable aids of those belligerents. A portion of the United States is becoming a base of supplies of such magnitude that unless retarded, the success of armies, possibly the fate of empires, may ultimately rest upon the output of American factories and the exports from American soil. If the part taken by the people of the United States in behalf of the allies should be deemed by their enemies likely to rob them of the fruits of victory, no effort would be spared to render our people impotent and their aid valueless. It is inconceivable that a powerful state engaged in a war against Russia, France and England, would allow any consideration whatever to deter it from preventing the people of a neutral state, such as our own, from becoming the decisive factor in the struggle. The inhabitants of no neutral state can decide the issues of a war by participation therein, without making their country a party to the conflict. The operation of this principle is believed to be relentless.

It becomes important, therefore, to consider the probable mode by which Germany might be disposed to thwart the United States. So long as the exportation of munitions of war is not believed to play an important part in the success of the allies, the effort to restrict the traffic will, if diplomacy fails, continue to be desultory and spasmodic. The success of the numerous efforts thus far made to destroy American plants and to jeopardize the safety of vessels sailing from American ports, indicates grimly how effective a vigorous sentimental interest encouraged by a knowledge of belligerent needs can be, to interfere with legitimate trade. Without venturing the suggestion that this work of destruction has had official inspiration or encouragement, the fact exists that between January 18, 1915 and November 11, 1915, eighteen fires and explosions occurred in American munitions plants, or on trains laden with such material; and that since the latter date, similar occurrences have taken place with increasing frequency. Popular belief that such incidents have in some cases resulted from governmental inspiration has been doubtless intensified by the admissions of Dr. Dumba, former Ambassador of Austria-Hungary, that he had advised his Government to give financial support to a plan designed to frustrate the activities of American manufacturers of arms for the allies.

The outrages thus far perpetrated suffice to show the readiness of persons of alien sympathies to cut off a source of aid to the enemies of the country of their origin and also the relative ease with which the work of destruction may be accomplished on a large scale in the absence of serious effort to guard against it.

If at any time, Germany should be convinced that the magnitude of exports of arms and other munitions of war from the United States, renders such traffic really dangerous to her ultimate success, or a substantial factor in the prolongation of the war, summary steps will be taken.

The most obvious would be to declare war upon the United States, or by some action so to enrage American sensibilities, that we would be encouraged not only to break off diplomatic relations, but also to take the initiative ourselves in declaring war. The method by which the United States could be allured into the conflict and transformed from a neutral into a belligerent is unimportant. The advantages to Germany in making the United States an enemy might be considerable. Two of these invite attention. As a belligerent, the United States by reason of its lack of war material, as indicated in Mr. Lansing's note, would doubtless itself appropriate for its own use much of that which otherwise would find its way to England, France and Russia. Thus an embargo on arms might become an immediate necessity; and such a necessity would remove all just cause of complaint from any foreign source. The appropriation of our own resources would not be necessarily due to a belief that we could surely employ them against a European foe, but rather the response to a popular opinion demanding that the government purchase without stint everything that might be needed; and according to the best military opinion, we need today everything here available which is capable of supplying an army or a fleet.

* * * * * * *

It is urged by some that the cause of the allies is the cause of civilization, and therefore the cause of the United States, that an embargo on arms would mean victory for Germany, defeat for its enemies, and serve to expose the United States itself to ultimate attack whenever the Teutonic Empire turns longing eyes towards the western hemisphere. It is contended, therefore, that the United States should furnish all possible aid to Great Britain, France and Russia, as the best means of weakening a future and probable enemy. Such advocates commonly assume that active aid by means of American war material can be given to the allies indefinitely, and to a degree beyond precedent, without necessarily causing the United States to be made a party to the conflict. They ignore the fact that Germany will never permit the people of the United States to become the decisive factor in the war, without stubborn and prolonged resistance. They fail to realize that the elimination of the United States as a base of supplies may be regarded by the Kaiser as vital to Germany as the retention of Alsace or the subjugation of Servia. This grim fact must guide all our reckonings. We cannot in this war turn the scales of victory as we like, because the moment we appear to exert that decisive influence we become ourselves the object of attack, and expose our resources and industries to the danger of destruction. Thus the issue cannot arise whether it is better for the United States on the one hand for the allies to lose their fight without American aid, or on the other for the allies to win with American aid, even should it drag our country into the war; for as soon as we abandon our neutral status, for whatsoever cause, our impotence becomes apparent, and our assistance insignificant. This fact offers a complete answer to one who urges that the United States should maintain by force the right to supply arms to any belligerent purchaser. The value of that right depends upon the sufferance of the state against whose interests it is exercised. The moment that state, such as Germany, for reasons already observed, becomes our enemy, and we oppose force to force, we ourselves expose to destruction the value of what we seek to preserve. It may be observed also that the people of the United States, however willing to fight for certain principles would hesitate long before fighting for others. Our right as a neutral to sell war material to a belligerent state to enable it to cripple an adversary with which the United States is at peace, would never appeal to the American people to a degree such that they would consent to make war for the mere purpose of preserving that commercial privilege.

It must be constantly borne in mind that the extent of the use of that privilege, or (from Germany's point of view) the abuse of that privilege would be the direct if not the sole cause of a German desire to be at war with the United States. Strong ties of sentiment and commerce have developed a friendly American-Germany relationship, which Germany herself wisely deems a valuable asset. German losses of credits and other forms of property, as well as the personal restraints that might be placed upon German subjects in American territory, all combine to create solid reasons why Germany would be reluctant to make the United States its enemy. If we are driven to war, we must not be blinded to the exact cause. Could we imagine a tragedy more terrible than to be allured into a contest where we battled ostensibly for the cause of justice and humanity, and yet in reality fought a losing fight for the mere right to enrich ourselves by supplying sinews of war to the enemies of a state with which we were at peace?

It may be urged that under no circumstances could we prevent the sale of supplies to the allied states of Europe without forfeiting their good will, and possibly without making them our enemies. It is doubtless true that tremendous pressure would be brought to bear upon the Department of State to prevent any embargo. It will be remembered, however, that the Hague Convention of 1907, above noted, recognizes the right of a neutral to change its policy in the course of a war in order to protect its own rights. Can anyone doubt that to save itself from war with Germany, or to prepare itself from danger of attack, or to secure observance of some violated principle of international law, the United States could reasonably and justly establish such an embargo? It would not be unneutral for the United States, on grounds of self-defense, to prevent its territory from becoming a decisive base of operations of allied belligerent powers. It would not be unneutral, *under such circumstances*, for the United States to prevent those powers from transforming our Atlantic seaboard into a series of foreign arsenals supplying expeditions against their enemies and our friends.

The duty of the United States in the matter cannot be discussed. It suffices to say that the practice of states above noted in previous wars is not altogether enlightening, because in none have the sale of war material threatened to attain a like relation to the outcome of the conflict. It may be observed parenthetically that a reason now advanced for making us a party to the war and the enemy of Germany, is the fact that the United States as a belligerent could not be held to respond in damages for losses occasioned by sales and munitions of war to our own allies, while it is feared that if we maintain our neutrality, we may expose ourselves to a claim analogous to that with which we preferred against England after the Civil War, and by comparison with which the $15,500,000 which we exacted from her by the arbitration of the Alabama Claims might appear insignificant in amount.

The foregoing reason, and also a more sinister one—namely the desire to increase the market price for the bonds of two allied governments and now held in the United States, have served in fact to create in certain portions of our Country a definite and dangerous effort to cause the United States to join forces with the allies.

We may deem it humiliating as well as a source of vexation that the United States finds its actual power to affect European affairs proportional to its abstention from the use of force, and to its restraint in keeping aloof from war. Doubtless occasions may arise when the disregard of our rights may leave no alternative, and serve to plunge the nation into a conflict wherein we anticipate many a defeat and inestimable loss of life and property before we can hope to hold our own. Our unpreparedness for war, however to be deplored, and our unfamiliarity with the mode of dealing with enemies at home and abroad is, however, a painful reminder, that unless our national honor is at stake, the United States simply must remain at peace.

If it is believed that at some future day not beyond the range of our vision, it shall behoove the United States to take up arms in behalf of an inspiring cause against a powerful state beyond the seas, our immediate task is one of self-restraint as well as preparation. We must not allow a probable enemy to deter us from paths of peace until we are able to fight it and overwhelm it. But years of preparation may have to intervene before that day. If in the course of their duration we suffer chagrin from inability to express resentment as we would, or from helplessness to exact justice for our wrongs, we may find consolation in the certainty that readiness to take offense would be suicidal, and that we should be false to our interests if we entered an arena where our adversary could deal with us in its own way. Today we must steadfastly resist the temptation to play Europe's game according to Europe's code. We must avoid war with Germany and with every other European state. So long as a German Ambassador stays at his post in Washington, we not only remain at peace with his country, but also have cause for hope that controversies with it may be adjusted by amicable means.

It must be apparent that at the present time the status of neutrality is a priceless asset of the United States. In years past when Europe has been the scene of armed conflict, the United States has truly profited by Washington's injunction contained in his farewell address in 1796:

"Europe has a set of primary interests which to us have none or a very remote relation. Hence, she must be engaged in frequent controversies, the causes of which are essentially foreign to our concerns. Hence, therefore, it must be unwise in us to implicate ourselves by artificial ties in the ordinary vicissitudes of her politics, or the ordinary combinations and collisions of her friendships or enmities. Our detached and distant situation invites and enables us to pursue a different course."

In the fact of this salutary advice our people are nevertheless taking steps today which tend to endanger the blessings of neutrality. And why—not because we are the victims of a denial of justice at the hands of any belligerent—not because of a disregard of our rights as a neutral. We shall not go to war with England because of the unlawfulness of her restraints upon our commerce. Nor shall we fight with her enemies because of their submarine operations. The former controversies will doubtless be adjusted by arbitration or negotiation; and the latter by diplomacy; for it is believed from assurances already obtained by Secretary Lansing, that every just demand respecting the freedom and safety of the seas will be acquiesced in by the Teutonic belligerents, unless for unrelated causes, it is sought to drag us into the war. If we lose our neutral status, it will simply be for the reason that our actual participation in the conflict through aid given to the allies, is deemed by Germany and Austria-Hungary so serious an obstacle to their success, that the maintenance of friendly and peaceful relations with us is no longer possible. No question touching the honor or vital interest of the United States is now at stake. But such an issue can be and might be quickly raised if for other reasons it should be desired to goad us into war. Perhaps the greatest danger of the present hour is the clouding of the issues and the confusion of the popular mind as to the problems now confronting us. The United States must choose the right course. In order to be right our people need the courage and intelligence to see things as they are; and to beware lest sympathy for a foreign cause blind us to the interests of our own.

Stress has been laid on the extent of the harm to be wrought in the United States if Germany became our enemy, and upon the gain to her if, under certain conditions, we entered the war. Clearly the extent of danger to be anticipated should be no deterrent of any American practice impelled by a sense of justice and required by the dictates of humanity. The sacrifice of some rights for the sake of peace would be a shameful heritage for our posterity. But the magnitude of the harm to be wrought by a possible enemy should be carefully estimated in shaping or adhering to a practice really unrelated to fundamental principles of international law, and inspired solely by commercial interests for pecuniary profit. "What king going to war upon another king, sitteth not down first, and consulteth whether he be able with ten thousand to meet him that cometh against him with twenty thousand?" (St. Luke, XIV, 31.)

While the exportation of war supplies imposes upon our Government no legal duty of prevention, and while the traffic may not as yet have attained a volume sufficient to produce alarm in Germany, it may, by reason of its increasing proportions and its degree of assistance to nations fighting in alliance, lead us to a position where we may be regarded by their foes as a most dangerous participant and hence as an inevitable enemy. Does it not therefore behoove us to be prepared to give the right answer when the time comes, to this final and simple question, which is submitted to your consideration: Is the endeavor to make the resources of the United States win the fight for the allies worth the price of war with Germany? Or, conversely, Is the maintenance of neutrality worth an embargo on munitions of war?

467 Diary—Oct. 2, 1915—243,244

"The other day I asked Mr. S. R. Bertron to invite Lord Chief Justice Reading to lunch at his home and to have no one else excepting the three of us. Bertron gave us a beautiful lunch; the food was delicious and the appointments perfect. After lunch he left Reading and me together and we talked for more than an hour. I told him of the controversy that had arisen between Great Britain and the United States concerning the change in maritime laws. I did not mention Balfour or Sir Horace Plunkett by name, but told him I had received letters from England outlining the English viewpoint and I had taken the matter up with Lansing an hour or two ago, and had found how many difficulties were involved.

What the British Government desire is that on the one hand we shall demand of Germany that no merchantman shall be sunk without warning, and on the other hand, that merchantmen shall, as in times gone by, have the right to arm. I mentioned my conference with Lansing on this subject, in which Lansing did most of the arguing, holding that they could not have their cake and eat it too; that it was manifestly unjust to the submarine to give merchantmen warning and then permit them to fire upon the submarine and sink it while she was giving the warning."

[From the House collection, custody of Prof. Charles Seymour, Yale University, New Haven, Conn.]

The White House,
Washington, October 4, 1915.

Mr. E. M. House,
115 East 53rd Street, New York.

Dearest Friend: The idea about a main issue for the campaign next year seems to me a fine one; it is indeed the one that has been vaguely in my own mind for some time. I am to greet the D. A. R. within a week or so: what would you think of my using that occasion, when the natural theme would be patriotism to develop the idea?

* * * * * * *

I read the letters from Plunkett and Balfour with the greatest interest. The matter of armed merchantmen is not so simple as Balfour would make it. It is hardly fair to ask submarine commanders to give warning by summons if, when they approach as near as they must for that purpose they are to be fired upon, as Balfour would evidently have them fired upon. It is a question of many sides and is giving Lansing and me some perplexed moments.

Affectionately yours,

(Signed) Woodrow Wilson.

Exhibit No. 2518

State Dept. Doc.

(*Personal and private.*)

January 2, 1916.

The President,
The White House.

My Dear Mr. President: The enclosed copies of telegrams telling of the sinking of the British steamship *Persia* on December 30th about three hundred miles northwest of Alexandria do not, in my opinion, seriously affect the *Ancona* case, since the evidence of torpedoing is inconclusive, the nationality of the submarine, if one was the cause, is unknown, and it is stated that the *Persia* carried an armament.

The fact that the vessel was carrying a 4.7 gun raises a question which, it seems to me, we ought to settle.

Three or four days ago I forwarded to the Italian Ambassador at his request the statement in regard to armed merchant vessels, which we issued in September, 1914. I had discussed the question some four or five weeks before with Mr. Barclay of the British Embassy and told him that, in view of the development of submarines as commerce destroyers, which had been unknown when our statement was issued, I felt that the arming of merchant vessels with any gun, of sufficient calibre to attack a submarine, would make it very difficult, if not impossible, to insist that a submarine should expose itself to attack by coming to the surface and hailing a vessel so armed; and that, while the armament might be termed "defensive", it was capable of being used offensively against a submarine and so, I thought, that a merchant ship carrying a gun or guns would have to be considered and treated as a vessel of war if it entered our ports.

In view of this opinion, which I believe I stated to you orally some time ago, I wrote the Italian Ambassador a letter enclosing the statement of September, 1914, explaining the change of view which the new conditions had forced upon us. I enclose a copy of that letter with our printed statement as to the status of armed merchant vessels.

Since we issued the statement of September, 1914. formally, it appears to me advisable to issue a new statement setting forth the new conditions resulting from the successful employment of submarines in interrupting and destroying commercial vessels, the impossibility of a submarine's communicating with an armed merchant ship without exposing itself to the gravest danger of being sunk by gunfire because of its weakness defensively, the unreasonableness of requiring a submarine to run the danger of being almost certainly destroyed by giving warning to a vessel carrying an armament, and that, therefore, merchant vessels should refrain from mounting guns large enough to sink a submarine, and that, if they do, they become vessels of war and liable to treatment as such by both belligerents and neutrals.

The chief difficulty with the situation seems to me to lie in this: If some merchant vessels carry arms and others do not, how can a submarine determine this fact without exposing itself to great risk of being sunk? Unless the Entente Allies positively agree not to arm any of their merchant vessels and notify the Central Powers to that effect, is there not strong reason why a submarine should not warn a vessel before launching an attack?

You will recall the case of the *Baralong* where a German submarine was bombarding a vessel from which the crew had escaped in boats, when a tramp steamer approached flying the American flag. The submarine remained on the surface and awaited the steamer, which on nearing the submarine lowered the American flag, hoisted the British colors, and with a gun mounted on the stern (a defensive armament according to our early definition) opened fire and sank the German vessel killing all the crew. The British Government would urge that this was merely a *ruse de guerre* and entirely allowable, and so it would have been under old conditions, but under the new conditions it presents a strong argument in favor of submarine attack without warning.

Not only, therefore, should we, in my judgment, rewrite our statement as to the status of armed merchant vessels but show that if any vessels of that class is armed, all merchant vessels are in danger of sudden attack without warning. As to the use of the American flag on any merchant ship converted into an armed vessel it might be well also to make representations to the British Government.

In view of the sinking of the *Persia* it would seem to be opportune and advisable to act in this manner, if it is decided to act, as expeditiously as possible.

Faithfully yours,

[s] ROBERT LANSING.

EXHIBIT No. 2520

State Dept. Doc.
763.72/2352½A

THE SECRETARY OF STATE,
Washington, January 17, 1916.

The PRESIDENT,
The White House.

MY DEAR MR. PRESIDENT: I enclose for your consideration the draft of a letter to the British Ambassador dealing with the submarine question, and suggesting a method by which future loss of life on merchant vessels might be avoided.

My first inclination was to send letters to the German Ambassador and Austrian Chargé, but two reasons prevented: first, I was convinced that the German and Austrian Governments would assent to the proposal as it only required them to conform to the rules of international law, while it required their enemies to modify a present practice which might be construed into the relinquishment of a legal right; and, second, if Germany and Austria acceded promptly to the suggestion, any demur by Great Britain, France, Italy, or Belgium would, if it became known (as it would undoubtedly through the German or Austrian Embassies), arouse adverse criticism in the press of this country and excite public resentment against the Entente Powers, which appears to be increasing from day to day.

By adopting this method of approach the proposal can be kept secret if it is refused by the Entente Governments and if it is considered inexpedient to make it public.

Faithfully yours,

[S] ROBERT LANSING

DRAFT

MY DEAR MR. AMBASSADOR: It is a matter of the deepest interest to my Government to bring to an end, if possible, the dangers to life which attend the use of submarines as at present employed in destroying enemy commerce on the high seas, since on any merchant vessel of belligerent nationality there may be citizens of the United States who have taken passage or are members of the crew, in the exercise of their recognized rights as neutrals. I assume that Your Excellency's Government are equally solicitous to protect their nationals from the exceptional hazards which are presented by their passage on a merchant vessel through those portions of the high seas in which undersea craft of their enemy are operating.

While I am fully alive to the appalling loss of life among non-combatants, regardless of age or sex, which has resulted from the present method of destroying merchant vessels without removing the persons on board to places of safety, and while I view that practice as contrary to those humane principles which should control belligerents in the conduct of their naval operations, I do not feel that a belligerent should be deprived of the proper use of submarines in the interruption of enemy commerce since these instruments of war have proven their effectiveness in this particular branch of warfare on the high seas.

In order to bring submarine warfare within the general rules of international law and the principles of humanity without destroying its efficiency in the destruction of commerce, I believe that a formula may be found which, though it may require slight modifications of the practice generally followed by nations prior to the employment of submarines, will appeal to the sense of justice and fairness of all the belligerents in the present war.

Your Excellency will understand that in seeking a formula or rule of this nature I approach it of necessity from the point of view of a neutral, but I believe that it will be equally efficacious in preserving the lives of all non-combatants on merchant vessels of belligerent nationality.

My comments on this subject are predicated on the following propositions:

1. A Non-combatant has a right to traverse the high seas in a merchant vessel entitled to fly a belligerent flag and to rely upon the observance of the rules of international law and principles of humanity if the vessel is approached by a naval vessel of another belligerent.
2. A merchant vessel of enemy nationality should not be attacked without being ordered to stop.

3. An enemy merchant vessel, when ordered to do so by a belligerent submarine, should immediately stop.

4. Such vessel should not be attacked after being ordered to stop unless it attempts to flee or to resist, and in case it ceases to flee or resist, the attack should discontinue.

5. In the event that it is impossible to place a prize crew on board of an enemy merchant vessel or convoy it into port, the vessel may be sunk, provided the crew and passengers have been removed to a place of safety.

In complying with the foregoing propositions which, in my opinion, embody the principal rules, the strict observance of which will insure the life of a non-combatant on a merchant vessel which is intercepted by a submarine, I am not unmindful of the obstacles which would be met by undersea craft as commerce destroyers.

Prior to the year 1915 belligerent operations against enemy commerce on the high seas had been conducted with cruisers carrying heavy armaments. Under these conditions International Law appeared to permit a merchant vessel to carry an armament for defensive purposes without losing its character as a private commercial vessel. This right seems to have been predicated on the superior defensive strength of ships of war, and the limitation of armament to have been dependent on the fact that it could not be used effectively in offense against enemy naval vessels, while it could defend the merchantman against the generally inferior armament of piratical ships and privateers.

The use of the submarine, however, has changed these relations. Comparison of the defensive strength of a cruiser and a submarine shows that the latter, relying for protection on its power to submerge, is almost defenseless in point of construction. Even a merchant ship carrying a small calibre gun would be able to use it effectively for offense against a submarine. Moreover, pirates and sea-rovers have been swept from the main trade channels of the seas, and privateering has been abolished. Consequently, the placing of guns on merchantmen at the present day of submarine warfare, can be explained only on the ground of a purpose to render merchantmen superior in force to submarines and to prevent warning and visit and search by them. Any armament, therefore, on a merchant vessel would seem to have the character of an offensive armament.

If a submarine is required to stop and search a merchant vessel on the high seas and, in case it is found that she is of enemy character, and that conditions necessitate her destruction, to remove to a place of safety all persons on board, it would not seem just or reasonable that the submarine should be compelled, while complying with these requirements, to expose itself to almost certain destruction by the guns on board the merchant vessel.

It would, therefore, appear to be a resonable and reciprocally just arrangement if it could be agreed by the opposing belligerents that submarines should be caused to adhere strictly to the rules of international law in the matter of stopping and searching merchant vessels, determining their belligerent nationality, and removing the crews and passengers to places of safety before sinking the vessels as prizes of war, and that merchant vessels of belligerent nationality should be prohibited and prevented from carrying any armament whatsoever.

In presenting this formula as a basis for conditional declarations by the belligerent governments, I do so in the full conviction that your Government will consider primarily the humane purpose of saving the lives of innocent people rather than the insistence upon a doubtful legal right which may be denied, on account of new conditions.

I would be pleased if you would be good enough to bring this suggestion to the attention of your Government and inform me of their views upon the subject and whether they would be willing to make such a declaration conditioned upon their enemies making a similar declaration.

A communication similar to this one has been addressed to the Ambassadors of France and Italy and the Minister of Belgium at this capital.

I should add that my Government is impressed with the reasonableness of the argument that a merchant vessel carrying an armament of any sort, in view of the character of submarine warfare and the defensive weakness of undersea craft, should be held to be an auxiliary cruiser and so treated by a neutral as well as by a belligerent government, and is seriously considering instructing its officials accordingly.

State Dept. Doc.
763.72/2353½

THE WHITE HOUSE,
Washington, January 17, 1916.

The SECRETARY OF STATE.

MY DEAR MR. SECRETARY: This draft has my entire approval. I hope that you will send it to the Governments you have indicated to me; and I most sincerely hope that they will feel that we are right in our argument and suggestions and will be willing to cooperate with us in attaining the object we have in view, an object which they must surely wish to accomplish as earnestly as we do, and which this seems in the circumstances the only feasible way of reaching.

Faithfully yours,

[s] W. W.

EXHIBIT No. 2521

Foreign Relations, 1916, Supp. p. 146
763.72/2357a

The Secretary of State to the British Ambassador (Spring Rice)

WASHINGTON, *January 18, 1916.*

MY DEAR MR. AMBASSADOR: It is a matter of the deepest interest to my Government to bring to an end, if possible, the dangers to life which attend the use of submarines as at present employed in destroying enemy commerce on the high seas, since on any merchant vessel of belligerent nationality there may be citizens of the United States who have taken passage or are members of the crew, in the exercise of their recognized rights as neutrals. I assume that your excellency's Government are equally solicitous to protect their nationals from the exceptional hazards which are presented by their passage on a merchant vessel through those portions of the high seas in which undersea craft of their enemy are operating.

While I am fully alive to the appalling loss of life among non-combatants. regardless of age or sex, which has resulted from the present method of destroying merchant vessels without removing the persons on board to places of safety, and while I view that practice as contrary to those humane principles which should control belligerents in the conduct of their naval operations, I do not feel that a belligerent should be deprived of the proper use of submarines in the interruption of enemy commerce since those instruments of war have proven their effectiveness in this particular branch of warfare on the high seas.

In order to bring submarine warfare within the general rules of international law and the principles of humanity without destroying its efficiency in the destruction of commerce, I believe that a formula may be found which, though it may require slight modifications of the practice generally followed by nations prior to the employment of submarines, will appeal to the sense of justice and fairness of all the belligerents in the present war.

Your excellency will understand that in seeking a formula or rule of this nature I approach it of necessity from the point of view of a neutral, but I believe that it will be equally efficacious in preserving the lives of all non-combatants on merchant vessels of belligerent nationality.

My comments on this subject are predicated on the following propositions:

1. A non-combatant has a right to traverse the high seas in a merchant vessel entitled to fly a belligerent flag and to rely upon the observance of the rules of international law and principles of humanity if the vessel is approached by a naval vessel of another belligerent.
2. A merchant vessel of enemy nationality should not be attacked without being ordered to stop.
3. An enemy merchant vessel, when ordered to do so by a belligerent submarine, should immediately stop.
4. Such vessel should not be attacked after being ordered to stop unless it attempts to flee or to resist, and in case it ceases to flee or resist, the attack should discontinue.
5. In the event that it is impossible to place a prize crew on board of an enemy merchant vessel or convoy it into port, the vessel may be sunk, provided the crew and passengers have been removed to a place of safety.

In complying with the foregoing propositions which, in my opinion, embody the principal rules, the strict observance of which will insure the life of a non-combatant on a merchant vessel which is intercepted by a submarine, I am not unmindful of the obstacles which would be met by undersea craft as commerce destroyers.

Prior to the year 1915 belligerent operations against enemy commerce on the high seas had been conducted with cruisers carrying heavy armaments. Under these conditions international law appeared to permit a merchant vessel to carry an armament for defensive purposes without losing its character as a private commercial vessel. This right seems to have been predicated on the superior defensive strength of ships of war, and the limitation of armaments to have been dependent on the fact that it could not be used effectively in offense against enemy naval vessels, while it could defend the merchantman against the generally inferior armament of piratical ships and privateers.

The use of the submarine, however, has changed these relations. Comparison of the defensive strength of a cruiser and a submarine shows that the latter, relying for protection on its power to submerge, is almost defenseless in point of construction. Even a merchant ship carrying a small caliber gun would be able to use it effectively for offense against a submarine. Moreover, pirates and sea rovers have been swept from the main trade channels of the seas, and privateering has been abolished. Consequently, the placing of guns on merchantmen at the present day of submarine warfare can be explained only on the ground of a purpose to render merchantmen superior in force to submarines and to prevent warning and visit and search by them. Any armament, therefore, on a merchant vessel would seem to have the character of an offensive armament.

If a submarine is required to stop and search a merchant vessel on the high seas and, in case it is found that she is of enemy character and that conditions necessitate her destruction, to remove to a place of safety all persons on board, it would not seem just or reasonable that the submarine should be compelled, while complying with these requirements, to expose itself to almost certain destruction by the guns on board the merchant vessel.

It would, therefore, appear to be a reasonable and reciprocally just arrangement if it could be agreed by the opposing belligerents that submarines should be caused to adhere strictly to the rules of international law in the matter of stopping and searching merchant vessels, determining their belligerent nationality, and removing the crews and passengers to places of safety, before sinking the vessels as prizes of war, and that merchant vessels of belligerent nationality should be prohibited and prevented from carrying any armament whatsoever.

In presenting this formula as a basis for conditional declarations by the belligerent governments, I do so in the full conviction that your Government will consider primarily the humane purpose of saving the lives of innocent people rather than the insistence upon a doubtful legal right which may be denied on account of new conditions.

I would be pleased if you would be good enough to bring this suggestion to the attention of your Government and inform me of their views upon the subject and whether they would be willing to make such a declaration conditioned upon their enemies' making a similar declaration.

A communication similar to this one has been addressed to the Ambassadors of France, Russia, Italy and the Minister of Belgium at this capital.

I should add that my Government is impressed with the reasonableness of the argument that a merchant vessel carrying an armament of any sort, in view of the character of submarine warfare and the defensive weakness of undersea craft, should be held to be an auxiliary cruiser and so treated by a neutral as well as by a belligerent government, and is seriously considering instructing its officials accordingly.

I am (etc.)

ROBERT LANSING.

EXHIBIT No. 2525

State Dept. Doc.
F. W. 763.72/2525
Not sent.

DEPARTMENT OF STATE,
Washington.

His Excellency, SIR CECIL SPRING-RICE,
Ambassador of Great Britain.

MY DEAR MR. AMBASSADOR: I have received your courteous letter of the 23d instant and given careful consideration to the Memorandum enclosed relating to the proposal for an agreement to disarm merchant vessels by the Entente Powers, which I unofficially submitted to you in my letter of January 18, 1916.

The proposal was made with the humane purpose of removing the principal reason given by the German and Austro-Hungarian Governments for the failure of their submarines to comply strictly with the rules of naval warfare in intercepting the merchant vessels of their enemies on the high seas, a practice which has resulted in an appalling loss of life among the passengers and crews of vessels which have been attacked without warning.

Believing that an arrangement, such as I had the honor to propose would have resulted in the discontinuance by Germany and Austria-Hungary of a method of attack on merchant vessels which puts in Jeopardy the lives of hundreds of men, women and children of neutral as well as belligerent nationality, I cannot but regret that the Governments of the Entente Powers [have rejected]* could not see their way to accede to the proposal [and have declared their unwillingness to agree to refrain from the use of armament in protecting their property on the high seas].*

The Entente Governments having, however, reached a decision to decline the proposed arrangement, it becomes my duty to accept their decision as final, [although I can assure your Excellency that I do so with the greatest reluctance and with grave apprehension for the future]* and in the spirit in which they have made it.

I am, my dear Mr. Ambassador,
Very sincerely yours,

——— ———.

THE WHITE HOUSE,
Washington, March 30, 1916.

The SECRETARY OF STATE.

MY DEAR SECRETARY: There are several reasons why I think it would not be wise to send a reply of exactly this sort to these governments; but it would be very unsatisfactory to set them forth in a letter. I would like the pleasure of an early conference with you, on this and one or two other pending matters. No doubt we can agree upon a time when I see you at the meeting of the Cabinet to-morrow.

Faithfully yours,

[s] W. W.

DEPARTMENT OF STATE,
OFFICE OF THE SOLICITOR,
July 16, 1915.

Notes on the German second note in the "Lusitania" correspondence

There will hardly be two opinions whether the United States is to insist that Germany reprobate the destruction of the lives of American citizens through the sinking of the *Lusitania* by its submarine.

But presupposing this is done—may the United States, without compromise or surrender of the principle, in its essence, for which it has contended, consider proposals for arrangements for setting aside a certain number of vessels for the carriage of passengers in European waters, the same to be free from molestation and danger from war craft

"The Government of the United States is, of course, not oblivious to the great changes which have occurred in the conditions and means of naval warfare since the rules hitherto governing legal blockade were formulated. It might be ready to admit that the old form of 'close' blockade with its cordon of ships in the immediate offing of the blockaded ports is no longer practicable in face of an enemy possessing the means and opportunity to make an effective defense by the use of submarines, mines and air craft; but it can hardly be maintained that, whatever form of effective blockade may be made use of, it is impossible to conform at least to the spirit and principles of the established rules of war. If the necessities of the case should seem to render it imperative that the cordon of blockading vessels be extended across the approaches to any neighboring neutral port or country, it would seem clear that it would still be easily practicable to comply with the well-recognized and reasonable prohibition of international law against the blockading of neutral ports by according free admission and exit to all lawful traffic with neutral ports through the blockading cordon. Such procedure need not conflict in any respect with the rights of the belligerent maintaining the blockade since the right would remain with the blockading vessels to visit and search all ships either entering or leaving the neutral territory which they were in fact, but not of right, investing." (Note of the United States to the British Government of March 30, relating to the British Order in Council of March 11th.)

I interpret these expressions as indicative of a disposition on the part of the United States Government, in view of the recent great changes in the means of warfare, to admit reasonable modifications in the application, in practice, of the established rules of international usage, when the essence of the right of belligerent and neutral, respectively, will be preserved.

Presumably, the view of the author of the paragraph just quoted comprehended the right of Great Britain to establish and maintain a blockade of German ports and an appreciation that rigid compliance with the established and recognized form and manner of blockade would not be insisted on, if to do so the right of blockade would be lost; provided always, and of course, that the substance of the right of the neutral is preserved.

Moreover Great Britain has insisted that the established mode of visit and search of merchant ships on the high seas can no longer be followed on account of the danger to the searching ship from attack by German submarine war craft while such visit and search is taking place, and has insisted upon taking neutral ships wherever found in European waters to British or allied ports, and there detaining them while search for contraband or illicit goods goes on; her contention being that she should not be expected to forego the substantial right of visit and search, which she would have to do, she says, if she pursued the practice in that matter hitherto known to international usage.

The right of a belligerent to overtake and destroy, in so far as neutrals are concerned, enemy merchant ships carrying contraband or munitions of war is to be admitted. (Personally I abhor the whole conception of war which comprehends war on private owned merchant ships, when flying the flag of the enemy, except in the case of munitions and supplies of war, which latter I think may well be summarily dispatched wherever met with.) But we are dealing with a situation where one belligerent insists that its substantial right to overtake and destroy enemy ships carrying munitions of war with which to attack it, is not to be defeated entirely by the presence on such ship of neutral passengers.

It is hardly correct to say that the neutral has the right, unlimited, of traveling on merchant ships of belligerents carrying contraband and munitions of war. A neutral does not have the right to afford, by his presence, protection to such a ship or its cargo, as we see from the admitted principle by which he is required to abandon the ship when overtaken by the enemy—if afforded opportunity to do so with reasonable safety; his right consists in the opportunity to leave the ship in safety before it is sunk. His presence affords no legal protection to the ship or its cargo.

The concurring right of the belligerent to take and destroy enemy ships with their cargoes, and the right of those found aboard to be taken off before the ship is destroyed, may coexist where naval warfare is conducted by the ordinary ships of war; but, it seems, this is not the case where the submarine is employed in the pursuit of enemy merchantmen.

I pass up any discussion of what should be made, or may perhaps finally become, the accepted rule of international law respecting the operation of submarines as relating to merchant ships.

The question arises shall consideration be given to this change in the instrumentalities of naval warfare, or shall we contend for the right of our nationals to use any and all ships, including those flying the flag of Germany's enemy and carrying arms and munitions of war, thereby, in a measure at least, extending protection to the ship and its cargo except when overtaken by an ordinary warship which is able to destroy the ship and at the same time furnish means of escape to those on board.

It should not be overlooked that the protection insisted on for the American traveler on a British ship from New York to Liverpool may also be demanded for the American citizen on a British merchantman loaded at Liverpool and bound for Havre with a full cargo of arms and ammunition destined for immediate delivery to the troops of the allies in the trenches.

Is it of the essence of the right of an American citizen to travel in European waters that he be allowed to take passage on any and all of the ships of the belligerents, whatever may be their cargo or destination? I hardly think so. If abundant facilities are furnished for the safe conveyance of our people in European waters within the zone of hostilities, it seems to me there would be no ground for complaint on the part of any American citizens who might prefer a ship of the enemy carrying munitions of war into the zone of hostilities.

Bearing in mind the views which have been expressed in the correspondence with Great Britain respecting consideration to be given to the momentous changes in the conditions and means of warfare, I am impressed with the idea that if Germany will reprobate the destruction of innocent lives through the attack of its submarine upon the *Lusitania* and the circumstances of its sinking, we should not close the door to the consideration of proposals, if reasonable and practicable, for setting aside an adequate number of ships upon which our people may take passage and travel unmolested in European waters, those ships not to carry mixed cargoes of babies and bullets.

[s] JOHNSON.

(Personal and private)

DECEMBER 21, 1915.

The PRESIDENT,
Hot Springs, Virginia.

MY DEAR MR. PRESIDENT: I had a long conversation this afternoon with Senator Stone in regard to our relations with the belligerent countries, and I am disturbed at his attitude. He clearly indicated after we had talked awhile that he thought that we were bearing too severely upon the Teutonic Allies and were not pressing Great Britain as strongly as we should in insisting upon observance of our trade rights. When I suggested that loss of life seemed to me to require more drastic treatment than loss of property, he replied that they both involved *rights*. I said to him that the right of life was an inherent right, the loss of which could never be indemnified, but that the right of property was a legal right, which could be fully remedied by an indemnity. I could see, however, that this in no way satisfied him, for he then referred to German babies dying because Great Britain would not allow us to send them condensed milk, and followed it up with dyes, potash, etc., etc.

This seems to me a serious matter, for, while I believe the Senator will not oppose the policies of the Administration, I do not think he will support them whole-heartedly or enthusiastically. This is especially unfortunate with Senator Lodge radically pro-Ally at the head of the minority of the committee, and ready to take advantage of a situation which offers possibilities of political advantage.

Probably Senator Stone is influenced by the fact that he has a considerable German constituency, which he wishes to keep in good humor, but whatever the reason, his ideas of our neutral duty will make it difficult for him to deal with our foreign affairs in a way that will strongly support the administration and carry through its policies.

I hope that you will find it possible as soon as you return to Washington to ask Senator Stone to come and see you and see if something cannot be done to change his attitude, as it will otherwise make the situation one which will be hard to handle. I do not think the case one which permits much delay.

Faithfully yours,

[s] ROBERT LANSING.

EXHIBIT NO. 2528

The Intimate Papers of Colonel House, pp. 201–202.

Memorandum of Sir Edward Grey

FOREIGN OFFICE,
February 22, 1916.

(Confidential)

Colonel House told me that President Wilson was ready, on hearing from France and England that the moment was opportune, to propose that a Conference should be summoned to put an end to the war. Should the Allies accept this proposal, and should Germany refuse it, the United States would probably enter the war against Germany.

Colonel House expressed the opinion that, if such a Conference met, it would secure peace on terms not unfavourable to the Allies; and, if it failed to secure peace, the United States would (probably) leave the Conference as a belligerent on the side of the Allies, if Germany was unreasonable. Colonel House expressed an opinion decidedly favourable to the restoration of Belgium, the transfer of Alsace and Lorraine to France, and the acquisition by Russia of an outlet to the sea, though he thought that the loss of territory incurred by Germany in one place would have to be compensated to her by concessions to her in other places outside Europe. If the Allies delayed accepting the offer of President Wilson and if, later on, the course of the war was so unfavorable to them that the intervention of the United States would not be effective, the United States would probably disinterest themselves in Europe and look to their own protection in their own way.

I said that I felt the statement, coming from the President of the United States, to be a matter of such importance that I must inform the Prime Minister and my colleagues; but that I could say nothing until it had received their consideration. The British Government could, under no circumstances, accept or make any proposal except in consultation and agreement with the Allies. I thought that the Cabinet would probably feel that the present situation would not justify them in approaching their Allies on this subject at the present moment; but, as Colonel House had had an intimate conversation with M. Briand and M. Jules Cambon in Paris, I should think it right to tell M. Briand privately, through the French Ambassador in London, what Colonel House had said to us; and I should, of course, whenever there was an opportunity, be ready to talk the matter over with M. Briand, if he desired it.

(Intd.) E. G.

EMBASSY OF THE UNITED STATES OF AMERICA.
Berlin, Germany.

(Personal)
The Honorable the SECRETARY OF STATE,
Washington, D. C.

DEAR MR. SECRETARY: I had the grippe, went to Partenkirchen for a few days, but the first night in country air since July 1914 was too much for me and filled me with such energy that I tried skiing, fell down and broke my collarbone, came to Berlin and can sit at my desk but am very uncomfortable.

I think Germany was about to offer to sink no merchant ships without notice and putting crews etc. in safety, if England would disarm merchant ships, but now, since the President's letter to Stone, both the Chancellor and von Jagow say they are convinced that America has a secret understanding with England and that nothing can be arranged.

It is *claimed* by the Foreign Office here that you said to von Zwiedenek that you approved of Germany's recent memorandum *re.* disarming merchant ships.

Captain Persius points out in to-day's "*Tageblatt*" that it is not submarines alone that are now, without notice, going to sink armed merchant ships, but cruisers etc. will take a hand.

It is reported that the Kaiser went to Wilhelmshafen to warn submarine commanders to be careful. It is reported that submarines will hunt in pairs, one standing ready to torpedo while the other warns. It is also reported that the German losses at Verdun are small as artillery fire annihilated enemy first. I think an attack will be made now in another part of the front.

Germany has forbidden the *import* of many articles of luxury; this is to keep exchange more normal and keep gold in the country. This will continue after the war—probably.

[s] GERARD.

INVESTIGATION OF MUNITIONS INDUSTRY

WEDNESDAY, JANUARY 15, 1936

THE UNITED STATES SENATE,
SPECIAL COMMITTEE TO INVESTIGATE,
THE MUNITIONS INDUSTRY,
Washington, D. C.

The hearing was resumed at 10 a. m. in the Caucus Room, Senate Office Building, pursuant to adjournment, Senator Gerald P. Nye presiding.

Present: Senators Nye (chairman), Clark, Vandenberg, and Barbour.

Also present: Stephen Raushenbush, secretary; Lawrence Brown, financial assistant to committee.

The CHAIRMAN. The committee will be in order. Senator Clark, you may proceed.

CUMULATIVE EFFECTS OF UNITED STATES POLICIES, 1914–1916

Senator CLARK. Mr. Chairman, we come now to the question of cumulative effects of our neutrality policy from 1914 to and including 1916. President Wilson, Colonel House, and Secretary Lansing, apparently from the outset of the war, were convinced that in the interests of the United States in particular, and of civilization in general, a German victory could not be permitted. They considered that a triumphant Germany would be a real menace to the United States and to the world. They were, therefore, strongly pro-Ally in sympathy, and their policies during the first 2 years of the war, which were almost never neutral in spirit as has been demonstrated in the preceding study with respect to British violations of our neutral rights of trade, the arms traffic, the armed merchantmen issue, and warning Americans to stay off armed belligerent ships, can be explained, and to some extent justified on that basis, regardless of whether or not one agrees with the premise.

In the summer of 1916, when President Wilson, particularly, awoke to a realization of Allied aims, when the United States was outraged with the British because of mail censorship and the black list, when our relations with Germany were better than they had been at any previous time during the war due to the Sussex pledge, when President Wilson was disposed to employ drastic measures against the Allies' lack of respect for our rights, he discovered that the tremendous commercial and financial involvments of this country in the Allied cause rendered drastic action against the Allies impossible, rendered him powerless to effect any change, fundamentally, in the policy which for reasons of sentiment, tradition, and a belief in Allied ideals, he had pursued during the first 2 years of our so-called neutrality.

Colonel House, the purveyor of the President's ideas and his unofficial peace emissary in Europe, had made unsuccessful peace trips to Europe in 1914 and 1915. By the fall of 1915 he was thoroughly convinced that the United States must do something positive to end the war in a way that would abolish militarism. On October 8, 1915, he recorded in his diary that he had outlined to President Wilson a positive plan for the United States to follow.

I quote from Colonel House's diary, volume II, page 85 [reading]:

> I thought we had lost our opportunity to break with Germany, and it looked as if she had a better chance than ever of winning, and if she did win our turn would come next; and we were not only unprepared, but there would be no one to help us stand the first shock. Therefore, we should do something decisive now—something that would either end the war in a way to abolish militarism or that would bring us in with the Allies to help them do it. My suggestion is to ask the Allies, unofficially, to let me know whether or not it would be agreeable to them to have us demand that hostilities cease. We would put it upon the high ground that the neutral world was suffering along with the belligerents and that we had rights as well as they, and that peace parleys should begin upon the broad basis of both military and naval disarmament * * *.

The thought expressed there is so striking, Mr. Chairman, that I desire to emphasize again the first sentence in the letter:

> I thought we had lost our opportunity to break with Germany, and it looked as if she had a better chance than ever of winning, and if she did win our turn would come next; * * *.

In other words, Colonel House was apparently regretting very much that he considered we had lost an opportunity to break with Germany and precipitate a war.

President Wilson approved the plan suggested by Colonel House in this letter. Colonel House carried on his negotiations for American intervention, largely with the British depending on them to bring their Allies into line. Sir Edward Grey, however, constantly pointed out that Great Britain could do nothing, actually, in the way of requesting President Wilson to intervene until some of her Allies were ready to discuss peace. In view of the fact that Great Britain was financing her Allies, had control of the seas, and was doing some fighting on land as well, it seems strange that she could not approach her Allies in regard to a discussion of peace, and felt it necessary to send Colonel House on that mission.

However, Colonel House's negotiations were crowned by the now famous House-Grey agreement of February 22, 1916, to which I referred on yesterday, which is a most amazing document viewed from any point of view.

The memorandum of Sir Edward Grey, Committee exhibit 27, was offered yesterday,[1] but I will read the essential portion of it [reading]:

> Colonel House told me that President Wilson was ready, on hearing from France and England that the moment was opportune, to propose that a conference should be summoned to put an end to the war. Should the Allies accept this proposal, and should Germany refuse it, the United States would probably enter the war against Germany.

---

[1] See "Exhibit No. 2528", Hearings, Part XXVII, appendix, p. 8483.

> Colonel House expressed the opinion that, if such a conference met, it would secure peace on terms not unfavorable to the Allies; and, if it failed to secure peace, the United States would (probably)—

I understand the word "probably" was inserted by President Wilson—

> leave the conference as a belligerent on the side of the Allies, if Germany was unreasonable. Colonel House expressed an opinion decidedly favorable to the restoration of Belgium, the tranfer of Alsace and Lorraine to France, and the acquisition by Russia of an outlet to the sea, though he thought that the loss of territory incurred by Germany in one place would have to be compensated to her by concessions in other places outside Europe—

Doubtless in Ethiopia.

> If the Allies delayed accepting the offer of President Wilson and if, later on, the course of the war was so unfavorable to them that the intervention of the United States would not be effective, the United States would probably disinterest themselves in Europe and look to their own protection in their own way.

That was initialed by Sir Edward Grey, Foreign Office, February 22, 1916.

Here we have an entirely unofficial representative of President Wilson, holding no official position, not confirmed by the Senate in any way, not only agreeing to bring the United States into war under certain contingencies, without the knowledge of the Congress or any authority for doing so, but actually presuming to lay down the peace terms which would be proposed at a conference, looking to the taking from Germany of certain territories and the compensation to Germany by a grant of certain other territories, unnamed, outside of Europe.

That is from the Intimate Papers of Colonel House, volume II, pages 163, 174, 201–202.

With regard to the agreement itself, one might be appalled at the extent to which President Wilson had secretly committed this country to war, particularly at a time (February 1916) when the sentiment of the country was overwhelmingly against war. Comment with respect to the complete unneutrality of such an agreement is hardly necessary.

Further, as Walter Millis very pertinently remarks in his *Road to War*, page 272 [reading]:

> As to the character of the peace guarantees, the military and naval disarmament, and the freedom of the seas, for the sake of which the United States would thus be committed to the war, there was not one word in the whole of this extraordinary document.

In spite of the House-Grey agreement, the British never took advantage of this proposal. I now read exhibit 27, being a letter from Colonel House to the President, dated at New York, May 14, 1916, taken from the House collection in the custody of Prof. Charles Seymour, Yale University, New Haven, Conn.

(The document referred to was marked "Exhibit No. 2531", and appears in full in the text.)

Senator **Clark**. That reads:

> Dear Governor: Here is a cable which came from Sir Edward yesterday. It is disappointing in a way and yet there is nothing final about it. He does not give his own opinion firmly, much less that of any of his colleagues.
>
> That is the difficulty we have in dealing with the British Government. Sir Edward has been talking to me for 2 years concerning the necessity of the

United States doing just what you now propose, and yet when you are ready to do it, he hesitates.

What do you think of the enclosed cable to him? I shall also write him a letter by the next mail enclosing some clippings culled from the papers today bearing such headings as these: "Urges the President to offer his services for peace", "Bryan demands move for peace", etc.

Sir Edward wants to know whether he shall take the matter up with Asquith. What would you advise about this? Shall we go ahead upon his negative approval rather than risk a more positive statement from Asquith?

Asquith, of course, was the Prime Minister at that time [continuing reading "Exhibit No. 2531"]:

Do you think it would serve any purpose for me to talk to Jusserand and have him get in touch with Briand and Cambon?

* * * * * * *

I see evidences of the Allies regaining their self-assurance and not being as yielding to our desires as they were when they were in so much trouble. We have given them everything and they ever demand more.

One thing that works against you is the alienated Americans living in both Paris and London. By their wealth and position they have the ears of the members of the governments. Whitney Warren in Paris is a type, and I have been told is very close to Briand. Bacon is another. The members of the firm of Morgan & Co. are close to both Governments, and you may be sure there is nothing your administration does but what is condemned.

They try to create the feeling, and never more so than now, that if the Republicans were in, it would be a triumph for the Allies and that if the war continues until after November, things will be different.

* * * * * * *

It should be borne in mind that Page may resign in any event for the reason that their children are married and Mrs. Page is very lonely and desires to come home. I believe Cleve Dodge would be an excellent substitute for Page. He is loyal and has good sense, and that is all you want in an ambassador.

Affectionately yours,

I think the essential thing to be noticed in this letter is the statement of Colonel House that as the Allies' military position improved they were disposed to run out on their undertaking with regard to peace.

On March 24, 1916, the *Sussex*, a channel steamer, unarmed and with Americans on board, was torpedoed without warning and the submarine controversy between the United States and Germany broke out anew.

The United States did not, however, go to war over the *Sussex* submarine controversy. On April 18, 1916, this Government sent a note to the German Government on the sinking of the *Sussex*, stating that diplomatic relations would be severed unless Germany abandoned her methods of submarine warfare. On April 20, 1916, a conversation in regard to the *Sussex* crisis took place between von Bernstorff, German Ambassador to the United States, and Secretary Lansing, which is here reproduced in part. It is not necessary to read all this rather long conversation, but I will insert it all in the record. There are certain portions of it which I think are material, however [reading from "Exhibit No. 2532"]:

Ambassador von BERNSTORFF. I want to do what I can, because I am perfectly convinced they do not want to break; quite apart from the sentimental side I think they do not want to break. A break would prolong the war. It would last for years.

Secretary LANSING. We do not any of us want to prolong the war.

Ambassador von BERNSTORFF. That is exactly why I want to get out of this present difficulty. From the present state of affairs it looks as if the end is coming and if now there was a break and the United States was brought into the war it would prolong it. It would cause new complications.

Then a little further down Ambassador von Bernstorff says:

> Then I am to understand that you do not recognize the law of retaliation?
>
> Secretary **Lansing**. We do not recognize retaliation when it affects the rights of commerce.
>
> Ambassador **von Bernstorff**. The British retaliate by stopping all commerce to Germany.
>
> Secretary **Lansing**. It is a very different thing. The right to life is an inherent right, which man has from birth; the right of property is a purely legal right.
>
> Ambassador **von Bernstorff**. Only in this case, England's methods affect the lives of noncombatants of Germany.

Coming to the end of the conversation, Secretary Lansing said:

> I do not feel that breaking off of diplomatic relations necessarily means war.
>
> Ambassador **von Bernstorff**. I do not say it myself but I do not see how it can be avoided. If we refuse it will be because we are to continue submarine warfare and then something might happen which would mean war. I came to see if something could not be done.

I now offer Committee exhibit 28, the complete record of the conversation between Ambassador von Bernstorff and Secretary Lansing.

(The document referred to was marked "Exhibit No. 2532" and is included in the appendix on p. 8655.)

Senator **Clark**. The Germans constantly pointed out in their exchanges with the United States the fact that the American Government made no concessions to Germany's contentions that the use of the submarine weapon was vital in their warfare against Britain's control of the seas with its illegal blockade measures and stoppage of commerce to Germany, while the same Government, the American Government, did very little to insist that Britain observe the rules of international law.

This point is clearly emphasized also in a memorandum of April 25, 1916, written by Mr. Frank Polk, who at that time was Counselor of the Department of State, of a conversation over the telephone between Mr. Polk and Colonel House, which was handed to Lansing and transmitted by him to the President. I quote [reading from "Exhibit No. 2533"]:

> Colonel House called me up this afternoon shortly after 4 and said he had just had a conversation with the German Ambassador who had heard from his Government. His Government is most anxious to avoid a break and asked him what was the best course to pursue. They also asked him what was meant by "illegal methods of submarine warfare." These two questions will be answered by the Ambassador without going to the Department of State.
>
> His Government also wanted to know if they gave up submarine warfare what the United States would do about the blockade.
>
> * * * * * * *
>
> In regard to the blockade, Colonel House pointed out that our relations, as far as Great Britain is concerned, are quite different from our relations with Germany; that war with Germany would be possible, whereas war with Great Britain was more or less out of the question. This the Ambassador said he understood.

I now offer for the record Committee exhibit 29, being the letter from Secretary Lansing, transmitting this memorandum from which I have just read a part.

(The document referred to was marked "Exhibit No. 2533" and is included in the appendix on p. 8657.)

Senator **Clark**. On May 4, 1916, came the German reply to the American note of April 18. In it the German Government promised to observe the rules of visit and search and to provide for the safety of persons on board destroyed ships. In other words, the conditions laid down by the President in his note of April 18 had been completely accepted by Germany.

The note contained two significant final paragraphs, which suggested again that Germany could not tie her hands irrevocably on waging ruthless submarine warfare if the United States took no active steps against British violations of neutral rights.

I quote again from the German note [reading]:

> But neutrals cannot expect that Germany, forced to fight for her existence, shall for the sake of neutral interests, restrict the use of an effective weapon, if her enemy is permitted to continue to apply at will methods of warfare violating the rules of international law. Such a demand would be incompatible with the character of neutrality, and the German Government is convinced that the Government of the United States does not think of making such a demand, knowing that the Government of the United States has repeatedly declared that it is determined to restore the principle of the freedom of the seas, from whatever quarter it has been violated.
>
> Accordingly, the German Government is confident that, in consequence of the new orders issued to its naval forces, the Government of the United States will now also consider all impediments removed which may have been in the way of a mutual cooperation toward the restoration of the freedom of the seas during the war, as suggested in the note of July 23, 1915, and it does not doubt that the Government of the United States will now demand that the British Government shall forthwith observe the rules of international law universally recognized before the war, as they are laid down in the notes presented by the Government of the United States to the British Government on December 28, 1914, and November 5, 1915. Should the steps taken by the Government of the United States not attain the object it desires, to have the laws of humanity followed by all belligerent nations, the German Government would then be facing a new situation in which it must reserve itself complete liberty of decision. * * *

At that time President Wilson asked Col. House what he thought of the note and his advice as to the action the President should take. In spite of his apparent eagerness throughout to sever relations with Germany, as illustrated in the quotation below, Col. House realized the German reply prevented that.

I now quote from Intimate Papers of Colonel House, volume II, page 243 [reading]:

> * * * I do not see how we can break with Germany on this note. However, I would make it very clear to the German Government, through both Gerard and Bernstorff, that the least infraction would entail an immediate severance of diplomatic relations; and I would let the public know unofficially that this has been done. We will then have to wait and hope for the best.

I call your attention, Mr. Chairman, to the first and last sentences in that note [reading]:

> I do not see how we can break with Germany on this note. * * * We will then have to wait and hope for the best.

The German reply was accepted and German-American relations improved and remained friendly during the summer and fall of 1916. That was during the campaign.

Again, after the peaceful settlement of the *Sussex* crisis, Colonel House approached Sir Edward Grey with regard to American intervention on the side of the Allies, to bring the war to an end, but the Allies at that time wanted no interference, and Colonel House on May 13, 1916, very pointedly records his disappointment. That is contained in exhibit 30, which I offer, taken from the diary of Colonel House, dated June 23, 1916, pages 217 and 218. I read:

> I believe the French and English are prolonging the war unnecessarily. It is stupid to refuse our proffered intervention on the terms I proposed in Paris and London. I made it clear to both Governments that in the event of intervention we would not countenance a peace that did not bring with it a plan which would make for permanent peace, as far as human foresight could do so. If Germany refused to acquiesce in such a settlement, I promised we would take the part of the Allies and try to force it. It would mean the end of militarism, but it would also mean an end of navalism, and that perhaps is where the shoe pinches. Great Britain desires to destroy militarism and at the same time perpetuate navalism, when the war has shown that of the two, navalism might be made the more oppressive of the two branches of military service. Under a liberal government, navalism or militarism would not be a menace, but under a reactionary government such as Great Britain might have, it could be made a serious menace to the happiness and freedom of mankind.

(The document referred to was marked "Exhibit No. 2534" and appears in full in the text.)

Senator CLARK. On September 25, 1916, Colonel House recorded in his diary [reading]:

> Walter Page called this afternoon. * * *
>
> He said the British resent our trying to bring about peace. * * * I did not think this was as ignoble an effort as it seemed to Page. He declares none of us understand the situation or the high purpose of the British in this war. I replied that we resented some of the cant and hypocrisy indulged in by the British; for instance, as to Belgium. Page admitted that the British would have been found fighting with France even if France had violated Belgium in order to reach German territory more effectively.

At times during our period of so-called neutrality, American public opinion had been exceedingly wrought up because of the British disregard of our neutral rights, as I have pointed out, but at no time, however, was public opinion so completely outraged as in the summer of 1916. The differences with Germany had been smoothed over and the numerous controversies with Great Britain appeared to be clamoring more loudly than ever for settlement. The American public and the administration were particularly excited over the intolerable British censorship of our mails.

I now submit committee exhibit 30–a, from the House collection in the custody of Prof. Charles Seymour, Yale University, a letter from President Wilson to Colonel House, dated at the White House, May 16, 1916.

(The document referred to, marked "Exhibit No. 2535", appears in full in the text.)

Senator CLARK. I will read the letter in full [reading]:

> MY DEAREST FRIEND: I have been giving some very careful thought to your question how we should deal with Sir Edward and his Government at this turning point—for it is really that.
>
> It seems to me that we should get down to hardpan.
>
> The situation has altered altogether since you had your conferences in London and Paris. The at least temporary removal of the acute German question has concentrated attention here on the altogether indefensible course Great Britain is pursuing with regard to trade to and from neutral ports and her quite intolerable interception of mails on the high seas carried by neutral ships. Recently there has been added the great shock, opinion in this country has received from the course of the British Government toward some of the Irish rebels.
>
> We are plainly face to face with this alternative, therefore. The United States must either make a decided move for peace (upon some basis that

promises to be permanent) or, if she postpones that, must insist to the limit upon her rights of trade and upon such freedom of the seas as international law already justifies her in insisting on as against Great Britain, with the same plain speaking and firmness that she has used against Germany. Which does Great Britain prefer? She cannot escape both. To do nothing is now, for us, impossible.

If we move for peace, it will be along these lines. 1. Such a settlement with regard to their own immediate interests as the belligerents may be able to agree upon. We have nothing material of any kind to ask for ourselves and are quite aware that we are in no sense or degree parties to the quarrel. Our interest is only in peace and its guarantees; 2 a universal alliance to maintain freedom of the seas and to prevent any war begun either (*a*) contrary to treaty convenants or (*b*) without warning and full inquiry—a virtual guarantee of territorial integrity and political independence.

It seems to me to be of imperative and pressing importance that Sir Edward should understand all this and that the crisis cannot be postponed; and it can be done with the most evident spirit of friendliness through you. Will you not prepare a full cable putting the whole thing plainly to him? We must act, and act at once, in the one direction or the other.

With affectionate messages from us all,

Faithfully yours,

(Signed) WOODROW WILSON.

I have noted what you send me from Bernstorff and also your suggestion about the campaign committee. I shall profit by the former and write you soon about the latter, with any suggestions I may pick up here

(Signed) W. W.

Then on July 18, 1916, the British Government published a proclamation blacklisting 85 American firms, a gesture which outraged President Wilson and caused a wave of indignation throughout the United States with tremendous anti-British repercussions throughout a large portion of the country.

President Wilson wrote House on July 23, 1916, that he was nearing the end of his patience with the British and the Allies, that he regarded the blacklist as a means to prevent our merchants' getting a foothold in the markets which Great Britain had hitherto controlled and all but dominated, that he was seriously considering asking Congress to authorize him to prohibit loans and restrict exportations to the Allies.

It is here for the first time that President Wilson indicates that he is no longer disposed to pursue the pro-Ally policy which had been pursued for 2 years last past. This was the turning point in his administration, the neutrality policy during the war.

The President was irritated with the British for not having utilized his offer of intervention, an offer that was definitely favorable to them, which had been proffered through Colonel House.

He was convinced of their disregard of American rights of trade, outraged by their mail censorship, and particularly outraged by their blacklisting. Even the extremely pro-Ally advisers of the President, Colonel House and Secretary Lansing, and Counselor Polk, with whom the President had surrounded himself, found the blacklist proclamation completely and plainly inexcusable.

On July 24, 1916, Mr. Polk commented to Secretary Lansing in this way, Mr. Lansing being at that time, I believe, on his vacation [reading from "Exhibit No. 2537"]:

I suppose you have followed the English blacklisting and have seen the mail note. The British Government certainly seems to be doing its best to get into a row. Personally, I think the time has come to stand up to them.

And then, on July 28, 1916, Polk wrote to Lansing as follows [reading from "Exhibit No. 2538"]:

> This week has been absolutely hideous * * * the blacklist has caused an awful row. The innocent and the guilty have come down here together, wildly protesting. It was an extraordinarily stupid move on the part of the British * * *.

I now offer exhibit 31, being a letter from President Wilson to Col. Edward M. House, New London, N. H., dated July 23, 1916.

I will read a portion of it and offer the whole for the record.

(The document referred to was marked "Exhibit No. 2536" and is included in the appendix on p. 8658.)

Senator Clark (reading):

> You will have seen by the papers that we have called Page home from London for a vacation in which it is our hope that he may get back a little way at least to the American point of view about things.
>
> I am, I must admit, about at the end of my patience with Great Britain and the Allies. This black-list business is the last straw. I have told Spring Rice so, and he sees the reasons very clearly. Both he and Jusserand think it is a stupid blunder. I am seriously considering asking Congress to authorize me to prohibit loans and restrict exportations to the Allies. It is becoming clear to me that there lies latent in this policy the wish to prevent our merchants getting a foothold in markets which Great Britain has hitherto controlled and all but dominated. Polk and I are compounding a very sharp note. I may feel obliged to make it as sharp and final as the one to Germany on the submarines. What is your own judgment? Can we any longer endure their intolerable course?

I also offer exhibit 32, being the letter from Counselor Polk to Secretary Lansing, of which I read a portion a moment ago.

(The document referred to was marked "Exhibit No. 2537" and is included in the appendix on p. 8659.)

Senator Clark. I will read one more paragraph from that exhibit:

> I also received your letter enclosing letter of Hamlin. I will take the matter up at once and will write Hamlin that I have the papers. I suppose you have followed the English blacklisting and have seen the Mail note. The British Government certainly seems to be doing its best to get into a row. I have had two talks with Spring Rice and told him that the President considered it a very serious matter and that it might be difficult to prevent Congress from passing some retaliatory legislation. Personally, I think the time has come to stand up to them. Of course, this blacklisting is nothing new, but if we let it slide, it will give the Germans abroad and here very good grounds for saying we are not even-handed in our justice. Why in the world they should have felt it necessary to publish it, Heaven knows.

Apparently Mr. Polk thought there was nothing wrong with the British establishing a blacklist of American firms, but that it was very culpable for them to publish it and give the Germans an excuse to protest.

I also offer exhibit 33, being a letter, of which I read a portion a moment ago, from Counselor Polk to Secretary Lansing, dated July 28, 1916.

(The document referred to was marked "Exhibit No. 2538" and is included in the appendix on p. 8660.)

Senator Clark. The indignation in this country was so intense that even J. P. Morgan & Co., were disturbed by the unwisdom of the blacklist.

In answer to an inquiry from Grenfell, in London, whether the American opposition was genuine or had been trumped up for political purposes, the firm sent the following answer on Augu 1916, being cable no. 23733, for E. C. Grenfell [reading]:

> In our opinion there is really strong feeling here with reference to bla and we do not believe this feeling is political. The word itself is a unpopular one in American business circles, being associated with trade cotts. It is, of course, assumed by intelligent people here that you are within your rights to issue orders to your own nationals not to trade wit' enemy or with those aiding or abetting the enemy. It was stated, howeve responsible papers here that the effect of your order was that if A, an Ame firm, was blacklisted, another firm, B, with no intention of aiding or abe Germany but merely dealing with A in the ordinary course of business w also be blacklisted. That is to say that your nationals were not only bidden to deal with those aiding or abetting the enemy, but with anyone traded with those aiding or abetting the enemy. See editorial in New Times of July 20, mailed you July 25. This editorial might be called fa representative of opinion of pro-ally press. We ourselves have regretted action which the Government deemed necessary.

The upshot of this flagrant British violation of our rights w that Congress was asked to adopt retaliatory legislation enabling t President to combat restrictions placed by foreign countries American commerce, obviously to be utilized against Great Britai

On September 7, 1916, the act to establish a United States Ship ping Board, and on September 8, 1916, the act to increase the revenu and for other purposes, which contained provisions empowering th President to take drastic retaliatory action against Great Britain were approved.

The provisions were discretionary rather than mandatory in character.

The next step was to ascertain how the legislation could be most effectively used by our Government. The Department of State was unwilling to pass on this question, and it met the situation by sending Mr. Woolsey, assistant solicitor for the Department of State, to consult with the Department of Commerce and to request a statement [reading]:

> * * * showing what measures could be taken in regulating trade that would be effective and, at the same time, least injurious to this country, and also a statement showing the exports of ammunition from the United States to the various belligerent countries.

I now offer exhibit 34, which is the memorandum for Dr. Pratt from the private secretary to the Secretary of Commerce, specifying the scope of the investigation desired, and a note from Dr. E. E. Pratt to the Secretary of Commerce, dated October 23, 1916, showing the care taken in making up this exhibit [reading]:

> Please note with special care the accompanying letter to the Secretary of State with the memorandum enclosed therein. This work was taken up at the request of Mr. Woolsey, assistant solicitor of the State Department, who called on Mr. Sweet—

Mr. Sweet was Assistant Secretary of Commerce—

> On account of the delicacy of the question and its great importance no pains have been spared in the preparation of the memorandum.

(The document referred to was marked "Exhibit No. 2539" and is included in the appendix on p. 8661.)

Senator CLARK. I also offer exhibit 35, a rather lengthy statement containing the recommendations of the Department of Commerce in the matter.

In view of the length of this, I desire to read only certain brief portions [reading from "Exhibit No. 2540"]:

> Probably the most effective remedy would be to refuse clearance to vessels carrying war supplies until the orders in council and the blacklist are withdrawn. This would seem to be strictly within the authority granted to the President by the Revenue Act, section 806, paragraph 2, "To withhold clearance from one or more vessels of such belligerent country." In effect, however, this would be to lay an American embargo, and Congress failed to authorize expressly the laying of an embargo. Moreover, it may be doubted whether an embargo on arms and ammunition would be as successful now as a year or more ago. More factories in the United Kingdom have been converted into munition plants. While our exports of arms and ammunition have been continuously on the increase, their need is now probably less pressing. In some cases, it is understood, American concerns have taken up this work only after a contract was given for a sufficiently long period to justify the necessary alterations or enlargement of the establishment. As a result, the embargo might prove in some cases more injurious to American manufacturers than to the countries at war, and might, in practice, effect the cancelation of a contract more highly regarded by the American concern than by the British Government.

A little later on he says [continuing reading]:

> Various possible measures have been pointed out. None of them, however, seem to promise any likelihood of success in the withdrawal of restrictions on American trade and would probably jeopardize our present position. In the belligerent countries, war for the moment is supreme; commercial considerations take a subordinate place. We can attack their commerce but our own commerce will unavoidably suffer in consequence even more than it has suffered from the restrictions placed on it by the countries at war.

Then a little further down he said:

> We have suffered the effect of embargoes and orders in council for a long period—under protest but without retaliation. The restrictions are no more hurtful now than a year and a half ago. But the weapon then in our hands—an embargo on war munitions and supplies—has become dulled.
>
> The most effective measure at our disposal is still a virtual embargo of arms and ammunition. It might still be applied if fully authorized by the Revenue Act, section 806, 2d paragraph, and if, upon investigation, it promises to be effective. To determine the first condition an authoritative legal opinion is necessary; to determine the second condition a report from a competent military authority should be had. A virtual embargo on wheat, though open to serious objections, comes second in point of availability.
>
> Before any action is taken, however, one other point must be carefully weighed. For success in commerce after the war, we need the friendship of the belligerents if it can be obtained and held without undue sacrifice. Is not their goodwill then likely to be worth more to us than the present temporary restrictions have cost us?

I offer the complete memorandum from the Department of Commerce for the record.

(The document referred to was marked "Exhibit No. 2540" and is included in the appendix on p. 8662.)

The **Chairman**. Might we weigh that point for just a moment here?

It appears now that Wilson was asking for retaliatory powers from the Congress. That is true, is it not?

Senator **Clark**. He not only asked for them, but the powers had been granted by Congress, and this memorandum was prepared in response to the request made of the Commerce Department by the State Department as to the means most effective of putting into effect the retaliatory powers already authorized by the Congress.

The **Chairman**. Then he found that the United States Congress would not permit their use accordingly?

Senator CLARK. He found, according to the memorandum of the Department of Commerce, first, an embargo or its equivalent would be a distinct injury to American commerce, both during the war and possible loss of goodwill of the belligerents after the war.

Also, it was found by the Department of Commerce that in view of the increasing supply of munitions being produced by the belligerents themselves, the weapon of an embargo would not be nearly as effective as it would have been a year or a year and a half previous.

The CHAIRMAN. Exactly.

Senator CLARK. In other words, we had, to some extent, at least, lost the opportunity of making the most effective use of the embargo on arms, and it was evidently the feeling of the Commerce Department that it was better to suffer British violations and Allied violations of our asserted neutral rights than run any risk of the loss of trade by asserting them and maintaining them by retaliatory measures.

The remarks of the Secretary of Commerce were made at the height of a 2⅕-billion-dollar increase in our war trade and at a time when it was perfectly clear that England proposed to continue her uninterrupted violation of our neutral rights, and of the freedom of the seas.

So that the effect of the Secretary of Commerce document was that our own high public officials recognized that the powers of retaliation conferred upon the President by Congress could not be invoked without endangering this huge, abnormal war-time trade in the face of the great vested interest in war traffic which had grown up in the United States by that time.

It is interesting to refer to the statistical abstract of the United States 1921, and find what that excess was.

The excess of domestic merchandise exports over imports jumped from $435,758,368 on June 30, 1914, to $1,042,008,725 on June 30, 1915, to $2,074,294,069 on June 30, 1916, or an increase of 139 percent from 1914 to 1915 and of 376 percent to 1916.

Trade with the Allied countries increased approximately 141 percent from 1914 to 1915 and jumped to 289 percent increase in 1916 as over 1914.

Trade with the Central Powers dropped in 1915 to 7 percent of its 1914 figure and to 0.68 percent of that 1914 figure in 1916. The net outstanding indebtedness of the Allies in the United States had been increasing by leaps and bounds.

On June 1, 1916, it was approximately $899,000,000. In 6 months it doubled itself and on December 1, 1916, stood around $1,794,000,000.

In that situation, faced with the choice of working havoc on the whole financial and commercial structure of this country, which by that time was inseparably bound up with the Allied cause, and which Wilson's pro-Ally policies, 1914 to 1916, had very definitely fostered, the President was forced to back down.

What had been intended as "a club for Great Britain if they do not give some real relief on trade interference"— and I quote from Colonel House's book, 2d volume, page 315, the language of the President, would have been a club against United States commerce and industry in this abnormal war trade which had been developed.

The result was that the club was never used.

The Wilson policies had placed no obstacle in the way of the Allies. They had permitted American financial and commercial interests to become completely involved in Allied success, how completely involved will be shown in a later study.

Most probably President Wilson was not conscious himself of the results which naturally flowed from the pro-Ally sympathies of his administration. He was convinced that, fundamentally, American and British aims were similar.

He suffered disillusionment when the British showed no interest in American intervention, and growing irritation as they became increasingly flagrant in their violations of our rights in the spring and summer of 1916. He decided at that time, apparently, to make the British understand that the United States was to be respected in its assertion of our neutral rights, but the decision or the awakening on the part of the President very obviously came too late, because a vested interest had been created in the shape of this war trade which was too formidable to be tampered with by the President, particularly at a time when he was facing a Presidential election.

It should be recalled that Germany in her pledge as to the *Sussex* had said that if the United States did nothing to break the illegal blockade of Germany by Great Britain, by demanding that Great Britain cease her interference with American neutral trade, the German Government, in self-defense, might have to revert to unrestricted submarine warfare.

The adoption of the retaliatory legislation to which I have referred in September of 1916 had been taken as a hopeful sign, but its lack of application, of course, could not pass unnoticed by the German Government.

It was a matter of common knowledge that in spite of the passage of the retaliatory legislation, no use was being made of it, and that no bona-fide attempt was being made to wring concessions in respect of international law from Great Britain by the American Government.

Bernstorff tells us that Colonel House had already, some months before, told him that the United States was no longer in a position to take drastic measures against England. This is quoted from the *Official German Documents Relating to the World War*, volume 1, page 234. Quoting Von Bernstorff:

> He told me at that time that, as matters had turned out, Wilson no longer had the power to compel England to adhere to the principles of international law. That the reason for this was that American commerce was so completely tied up with the interests of the Entente that it was impossible for Wilson to disturb these commercial relations without calling forth such a storm of protest on the part of the public that he would not be able to carry out his intention.

I quote from the memoirs of David Lloyd George, volume II, pages 661–2:

Senator Clark. House told Von Bernstorff, according to Von Bernstorff's testimony.

Lloyd George, in his memoirs, has also emphasized the effect on American policy of the links between American financial and commercial interests and the cause of the Allies.

I quote from the memoirs of David Lloyd George:[1]

If we were interfering with America's potential trade with our enemies, at least we were providing her with a magnificent market in Britain, France, and Russia, which stimulated her industries to an unprecedented level of activity and profitableness. This fact had its influence in holding back the hand of the American Government whenever excited to intense irritation by some new incident of the blockade, it contemplated retaliatory measures.

Andre Tardieu, who was French High Commissioner in the United States after this country entered the war, afterward Prime Minister of France, similarly has written that the tie-up between American commercial and financial interests and the Allies during our neutrality period made victory of the Allies essential to the United States.

I quote from his book, *France and America*, page 150 and 151:

But the increasing volume of allied needs afforded the Americans almost unlimited trade possibilities. Prices had risen enormously. Profits had swollen tenfold. The Allies had become the sole customer of the United States. Loans the Allies had obtained from New York banks swept the gold of Europe into American coffers.

From that time on, whether desired or not, the victory of the Allies became essential to the United States. The vacillations of Wilson's policy only made this necessity more apparent. The note of the Federal Reserve Board forbidding further loans to the Allies jeopardized American financial interests as much as it did the fate of the Allies. This note, coming too late or too soon, placed buyers and sellers, borrowers and lenders, in equal peril. If, deprived of resources, the Allies lost the war, how could their debts be paid and what would their signature be worth? The carefully weighed policy of the President, permitting sales and stopping credits, worked against neutrality and in favor of a break; it worked against Germany and in favor of the Allies. Between the Allies and the American market a common bond of interest had been created.

All through the fall of 1916, the Administration in Washington was kept informed of the inevitable resumption of indiscriminate submarine warfare as the food situation in Germany grew more desperate and Germany became convinced that the United States would do nothing to alleviate the rigors of the so-called blockade of Germany by Great Britain.

I quote now from a report from Acting Ambassador Grew in Berlin on October 7, 1916:

In an informal conversation with Zimmerman last night I told him unofficially that I feared my Government might become disquieted over the rumors in the press and elsewhere of a possible resumption of indiscriminate submarine warfare in violation of neutral rights. He added * * * that the submarine question as a political issue would never be finally laid at rest until the United States should bring pressure to bear on England to abandon the blockade, and he said that any steps taken in that direction would materially aid the Chancellor in dealing with those who wished to resume the indiscriminate submarine warfare here.

Then, on September 15, just a few days before that, Ambassador Elkus, who was at that time American Ambassador to Turkey, passed through Germany en route to Constantinople, and reported to Secretary Lansing as follows [reading from "Exhibit No. 2541"]:

As you probably know, there are 2 no-meat days in Germany, and bread, meat, eggs, sugar, coffee, soap, etc., are distributed upon cards, as are also articles of clothing. Coffee, sugar, and milk are very difficult to obtain. The coffee is very poor; a substitute for it that is used consists of roasted bread and some kinds of beans. The absence of this is very much felt. There is no real milk to be had, only skimmed milk. The government allows one egg per person per week, one-eighth pound of meat per person per week, a similar allowance of skimmed milk, practically no sugar, and a very small quantity of butter per person per week. Potatoes and bread, such as it is, are fairly plentiful, and while filling, the people find them absolutely unsatisfying. The middle classes and the poor people talk of nothing but food, and when they speak frankly, as they did to me in their homes, they said that they were always hungry.

---

[1] Volume II, pp. 661–662.

I was also told unofficially that there was a great increase in tuberculosis cases because of the lack of sufficient proper food. * * * There is still a great dislike of America and Americans, which is based on three grounds: First, supplying ammunition to the Allies; second, the stopping of the submarine warfare; and, three, permitting England to interfere with the neutral mails, etc.

The American Chargé d'Affaires in Berlin, on October 16, 1916, has this report to make [reading from "Exhibit No. 2542"]:

The Navy as a whole is convinced that the submarine warfare must be taken up again and pushed to its extreme form in order to save the situation, and it is reported that a round-robin letter, signed by all the officers of the Navy, has been addressed to the Emperor, calling upon him to adopt this method of warfare in order that the war may be won. * * *

As far as can be made out, then, there was about 10 days ago a belief in the admiralty staff that the political situation was such that the resumption of the "rucksichtslos" submarine warfare against commerce would be permitted them. The political leaders, however, failed to carry this point against the opposition of the Chancellor and, in fact, receded for the present from their position and gave the Chancellor support in his milder policy. The Navy, therefore, postponed any plans it may have had for taking up an extreme form of submarine warfare and are waiting until the Government is forced to their views, which are that the only way of winning the war is to strike with all their force against the English economic life by way of an extreme form of submarine warfare; i. e., by sinking everything that approaches the English and French coasts.

I wish, however, to repeat what I have endeavored to indicate in my various confidential telegrams to the Department, that while the political outlook is for the present moment reassuring, there is no permanent security to be looked for in the situation, in view of the attitude of the Navy, the Conservative Party and its allies in the Reichstag, and the majority of public opinion, and that our Government should, therefore, be fully prepared for an eventual resumption of the indiscriminate submarine warfare against commerce in violation of the rights of neutrals on the high seas.

On October 27, 1916, House recorded in his diary [reading from "Exhibit No. 2543"]:

Polk agreed with me that unless the British helped in some way, unrestricted U-boat warfare may soon begin.

I now offer exhibit 36, which is the letter from Ambassador Elkus, of which I read a portion a while ago.

(The document referred to was marked "Exhibit No. 2541" and is included in the appendix on p. 8672.)

Senator **Clark**. One other sentence, perhaps, from this letter of Ambassador Elkus is worthy of note [reading]:

Feeling about America. There is still a great dislike of America and Americans which is based on three grounds—

Which I read—

But despite all this, they all look to President Wilson as the only commanding figure in the world who will be able to bring about peace. Mr. Gerard told me, and it is rumored and talked about among the people, that because of the dissatisfaction with the present administration in Germany that the present Chancellor will be succeeded by Von Tirpitz or Falkenhayn—

That is, dissatisfaction with the policy of the Chancellor in stopping unrestricted submarine warfare and the hope that the United States would assert its neutral rights as against England.

> Von Tirpitz is still demanding the resumption of submarine warfare and in case of his selection it would mean the resumption of that kind of warfare.

I also offer exhibit 37, being the report of the Chargé d'Affaires, to which I just referred.

(The document referred to was marked "Exhibit No. 2542" and is included in the appendix on p. 8673.)

Senator CLARK. I now read the whole of the memorandum of Colonel House to which I just made reference.

(The document referred to was marked "Exhibit No. 2543" and appears in full in the text.)

Senator CLARK. This is from Colonel House's diary, on October 27, 1916 [reading "Exhibit No. 2543"]:

> Polk agreed with me that unless the British helped in some way, unrestricted U-boat warfare may soon begin. We think the British foolish not to give way on the blacklist, and to arrange for less rigorous censorship of the mails. It is a question how far the President will be justified in straining our relations with Great Britain rather than consent to their insolent methods of conducting their blockade. A note has just come from Great Britain about the blacklist which Polk considers offensive, although Lansing thinks otherwise. He did not bring a copy of the note because it had just come and he was afraid to have one made. The State Department will try to suppress the note until after the election. Polk thinks the President is likely to give them a jolt which will not increase good feeling toward us. He suggests two methods to bring them to their senses. One is the restriction of further loans and the exportation of gasoline. He thought we might do both under pretext of domestic necessity and in a way which would not justify retaliation.

The CHAIRMAN. In other words, Senator Clark, we were being warned, were we not, in those days, all through that year, of the possible resumption of submarine warfare?

Senator CLARK. We were being warned, not only in the original note of the German Government after the *Sussex incident*, in which they promised to stop unrestricted submarine warfare, but we were repeatedly warned by our own Ambassador, by the Acting Ambassador and by the Chargé d'Affaires at different times, as well as by the information supplied by the American Ambassador to Turkey who passed through Germany.

The CHAIRMAN. Resumption then should have been no surprise to the American Government, should it, after all of these warnings through the fall of 1916?

Senator CLARK. No question on earth.

The CHAIRMAN. It was not a surprise?

Senator CLARK. And it was no surprise that England did not intend to accede to the demands of the United States with regard to the blacklist, as indicated by this entry from Colonel House's diary which I have just read [reading from "Exhibit No. 2543"]:

> A note has just come from Great Britain about the blacklist, which Polk considers offensive, although Lansing thinks otherwise. He did not bring a copy of the note because it had just come and he was afraid to have one made. The State Department will try to suppress the note until after the election.

I also offer exhibit 39, being an entry in Colonel House's diary, dated November 16, 1916.

(The document referred to was marked "Exhibit No. 2544" and appears in full in the text.)

Senator CLARK (reading "Exhibit No. 2544"):

> Ambassador Gerard called to talk about my visit to Washington. He believes Germany will finally push us into war because of her desperation. He wishes me to return to Germany with him. I told him this was out of the question, and I thought when matters were finally adjusted between the belligerents, it would not be necessary for me to go to Germany; that in some ways it would be better for me to look out for the Allied countries and not create criticism by going into Germany.

That was before the resumption of unrestricted warfare and at a time when there were extremely strained relations between the United States and the Allies.

Colonel House thought he did not want to create criticism by going into Germany, and he had better look out for the Allies.

It is clear that the administration, of course, was well informed of the situation in Germany, the struggle between the civil faction which wanted to avoid a break with the United States and the military and naval faction, which insisted that the war could only be ended by the renewal of indiscriminate submarine warfare, the constant suggestion from Germany that the United States do something about the blockade thereby to lessen the necessity of eventual resumption of submarine warfare.

The administration in Washington was completely aware of all this, of course, but it did nothing. The drastic measures which might have forced Great Britain to respect our neutral rights and thereby relax its illegal blockade of Germany, the President had discovered he could not use without endangering this country's financial and commercial interests, which were dependent upon allied success.

The country did not realize when Wilson stood for reelection in 1916 on the slogan, "He kept us out of war", that the stress of circumstances would force Germany into ruthless submarine warfare; that the United States had done nothing to prevent that recurrence; that no steps had been taken to force respect from Great Britain because the tie-up between their cause and our interests, industrial and financial, would not permit it; and that when the submarine crisis broke out, which Berlin, all through the fall of 1916, had been informing Washington would almost inevitably happen, the United States would be in the war.

In order that there may be no mistake as to the question of whether or not the submarine warfare was a contributing, if not the principal, cause of the United States getting into the war, I quote from the testimony of President Wilson himself after the war, before the Senate Committee on Foreign Relations, when it had under consideration the Treaty of Versailles, on August 19, 1919, when the following transpired [reading]:

> Senator MCCUMBER. Do you think if Germany had committeed no act of war or no act of injustice against our citizens that we would have gotten into this war?
>
> The PRESIDENT. I do think so.
>
> Senator MCCUMBER. You think we would have gotten in anyway?
>
> The PRESIDENT. I do.

I want to read that again, Mr. Chairman:

Senator McCumber. Do you think if Germany had committed no act of war or no act of injustice against our citizens that we would have gotten into this war?

The President. I do think so.

Senator McCumber. You think we would have gotten in anyway?

The President. I do.

I now desire to offer exhibit 39A, being a cablegram from Ambassador Page in London to the Secretary of State, dated March 5, 1917.

(The document referred to was marked "Exhibit No. 2545", and appears in full in the text.)

Senator Clark (reading "Exhibit No. 2545"):

My 5644, February 9, 10 a. m. The financial inquiries made here reveal an international condition most alarming to the American financial and industrial outlook. England is obliged to finance her allies as well as to meet her own war expenses. She has as yet been able to do these tasks out of her own resources. But in addition to these tasks she cannot continue her present large purchases in the United States without shipments of gold to pay for them, and she cannot maintain large shipments of gold for two reasons: First, both England and France must retain most of the gold they have to keep their paper money at par; and, second, the submarine has made the shipping of gold too hazardous, even if they had it to ship. The almost immediate danger, therefore, is that Franco-American and Anglo-American exchange will be so disturbed——

There is our old friend exchange again—

that orders by all the allied governments will be reduced to the lowest minimum and there will be almost a cessation of trans-Atlantic trade. This will, of course, cause a panic in the United States. The world will be divided into two hemispheres, one of which has gold and commodities and the other, which needs these commodities, will have no money to pay for them and practically no commodities of their own to exchange for them. The financial and commercial result will be almost as bad for one as for the other. This condition may soon come suddenly unless action is quickly taken to prevent it. France and England must have a large enough credit in the United States to prevent the collapse of world trade and of the whole European finance.

If we should go to war with Germany, the greatest help we could give the Allies would be such a credit. In that case our Government could, if it would, make a large investment in a Franco-British loan or might guarantee such a loan. All the money would be kept in our own country, trade would be continued and enlarged until the war ends, and after the war Europe would continue to buy food and would buy from us also an enormous supply of things to reequip her peace industries. We should thus reap the profit of an uninterrupted, perhaps an enlarging, trade over a number of years and we should hold their securities in payment.

But if we hold most of the money and Europe cannot pay for reequipment, there may be a world-wide panic for an indefinite period.

Unless we go to war with Germany, our Government, of course, cannot make such a direct grant of credit, but is there no way in which our Government might indirectly, immediately, help the establishment in the United States of a large Franco-British credit without a violation of armed neutrality? I am not sufficiently acquainted with our own reserve-bank law to form an opinion, but if these banks were able to establish such a credit, they would avert this danger. It is a danger for us more real and imminent, I think, than the public on either side of the ocean realize. If it be not averted before its symptoms become apparent, it will then be too late to avert it. I think that the pressure of this approaching crisis has gone beyond the ability of the Morgan financial agency for the British and French Governments. The need is becoming too great and urgent for any private agency to meet, for every such agency has to encounter jealousies of rivals and of sections.

Perhaps our going to war is the only way in which our present prominent trade position can be maintained and a panic averted. The submarine has

> added the last item to the danger of a financial world crash. During a period of uncertainty about our being drawn into the war, no more considerable credit can be privately placed in the United States, and a collapse may come in the meantime.

The CHAIRMAN. What was the date of that?

Senator CLARK. That is March 5, 1917, just a little less than a month before we actually entered the war.

It is entirely possible that the President may have had Ambassador Page's attitude in mind after the war when he testified before the Senate Foreign Relations Committee as I have just read.

The CHAIRMAN. Plainly the Ambassador in London was convinced that our commerce was going to be all but destroyed if we did not go to war.

Senator CLARK. That is very evident; so evident that I might quote from even so partial an historian as Prof. Charles Seymour of Yale, Colonel House's chief eulogist and apologist, in which he says [reading]:

> * * * by a slightly stricter interpretation of the role of a neutral, President Wilson could have prevented the enormous loans, the shipments of munitions . . . (to the Allies) . . . he had compelled the Berlin Government to submit to his point of view and thereby had incidentally protected Allied shipping . . . he had disallowed their (Germany's) contention that armed merchant vessels were in effect warships. . . .
>
> . . . he had finally, after the attack on the *Sussex*, forced the pledge (by Germany) that no merchant vessel whatever should be attacked without warning. This was at a moment when von Tirpitz promised that if the submarines should be given full freedom, Great Britain would be isolated and the war ended. Wilson's insistence saved the British merchant fleet from the intensive submarine attack, the danger of which became apparent a year later, and for which German naval leaders already clamored.

Professor Seymour goes on to say that President Wilson's great services to the Allies were not properly appreciated by the Allies. I quote further:[1]

> * * * Nor did they appear to realize the degree of consideration which he displayed in the dispute raised by allied interference with American trade on the high seas. It is true that our State Department sent many sharp—perhaps uselessly sharp—protests. But the President never yielded to the constant pressure upon him to take action that might give effect to such protests. It would have been easy for him to ask for retaliatory measures which would have been immediately approved by a Congress that was in no degree inspired by pro-Entente sentiments. An embargo upon munitions was urged again and again. Wilson, however, did not ask for power to use retaliation until the summer of 1916, and he never permitted an embargo, thus allowing the Allies to draw richly upon our munitions factories * * *.

RELATIONSHIP BETWEEN THE ALLIED WAR AIMS AND THE POLICIES OF THE UNITED STATES

Senator CLARK. Mr. Chairman, we come finally in this study to the consideration of the relationship between the American policies and the secret treaties negotiated by the Allies prior to the entrance of the United States into the war.

In spite of having succumbed, by force of circumstance, to the economic interests that subtly determined our foreign policy during the most crucial months in the fall of 1916, President Wilson had not given up his dreams of intervention and a peace conference at which he would preside.

---

[1] *Intimate Papers of Colonel House,* Vol. II, pp. 260–262.

Of that ambition his Secretary of State Lansing has remarked, and I quote from Secretary Lansing's War Memoirs:

> While at the outset * * * the motive inspiring the efforts of Mr. Wilson was essentially impersonal, humanitarian, and altruistic, I believe that the thought of his actual presence and participation in a conference to arrange terms of peace had appealed more and more strongly to him until it had become, possibly unconsciously, an end rather than a means. * * *
>
> It was a great role which he intended to play in the event that the belligerents could be induced to enter into conference, the role of an impartial mediator between the great powers at war and that of creator of a world federation to preserve international peace. It was a splendid ambition, a great absorbing purpose, and if the President had been able to attain it, of which there never was the slightest chance, there is little doubt but that he would have been not only the leader of international thought but the most preeminent personality in the history of modern times.

The plans which had been made by President Wilson and Colonel House early in 1916 to intervene with the proposal for a peace conference had never been availed of by the Allies, to whom the agreement was extremely favorable.

In the fall of 1916, as has been pointed out, this country was continually receiving word that Germany would have to resume indiscriminate submarine warfare.

We received this word from our own representatives in Germany as well as from the German Ambassador here.

On October 18, 1916, Bernstorff communicated with Colonel House to the effect that his Government could not stand the war deadlock and inquired whether Wilson had any intention of initiating peace negotiations as had been hinted by Ambassador Gerard in Berlin in the previous spring.

I quote from the Intimate Papers of Colonel House, volume 2, page 335. House reports von Bernstorff as saying [reading]:

> In view of the methods of our enemies, which become more ruthless every day—Greece, blockade, illegal pressure on neutrals—my Government wishes to remind Mr. Gerard of the confidential negotiations which were carried on last spring.

In regard to the confidential negotiations carried on by Gerard in the previous spring, the following enclosure was transmitted with the letter [reading]:

> Your Excellency hinted to His Majesty in your last conversation at Charleville in April, that President Wilson possibly would try toward the end of the summer to offer his good services to the belligerents for the promotion of peace.
>
> The German Government has no information as to whether the President adheres to this idea and as to the eventual date at which this step would take place. Meanwhile, the constellation of war has taken such a form that the German Government foresees the time at which it will be forced to regain the freedom of action that it has reserved to itself in the note of May 4 last—

That was the *Sussex* note—

> and thus the President's steps may be jeopardized. The German Government thinks it its duty to communicate this fact to Your Excellency in case you should find that the date of the intended action of the President should be far advanced toward the end of this year.

That meant that in effect the German Government was saying to the United States that since we had done nothing and apparently could do nothing about the relaxation of illegal blockade measures, would we do anything in the way of attempting peace negotiations?

President Wilson postponed any move toward attempting peace negotiations until after the Presidential election of 1916, but as soon as it was over, his thoughts turned immediately and concretely toward peace.

In the face of the policies that he had pursued and the realization that Germany would have to resort to ruthless submarine warfare, the President grasped the idea that a successful move toward peace was the only means of keeping the United States from being compelled to join in with the Allies.

Colonel House was opposed to this peace move, for he was sure the Allies would not be receptive to it. His biographer tells us that—

> he was certain that neither France nor Great Britain would regard an attempt at mediation in any light but that of a willingness to play Germany's hand.

That is quoted from the Intimate Papers of Colonel House, volume 2, page 395.

It must be remembered that France and Britain had never given any indication of their willingness to have Wilson offer mediation, nor had they availed themselves of the Wilson offer to intervene on their side.

Perhaps Colonel House had forgotten that, and also the very illuminating entry in his diary of November 17, 1916, from the House Collection, custody of Professor Charles Seymour of Yale University, which I offer for the record.

(The document referred to was marked "Exhibit No. 2546", and appears in full in the text.)

Senator Clark (reading "Exhibit No. 2546"):

> I will confess that the Allies are irritating almost beyond endurance. It is evident they are trying to force us into war with Germany. Our prosperity and growing strength maddens them. I believe this is confined largely to the governing class, nevertheless, the danger is the greater because this is true. They cannot understand why we do not feel that they are fighting our battles. We have no fear of Germany and feel entirely able to take care of ourselves.

President Wilson hesitated to make any move toward peace until, as House's biographer says, on December 12, 1916, the Germans, "wearied of waiting for Wilson's mediation", made a peace move of their own—"published a note which expressed their willingness to enter a peace conference." The Allies completely rejected it. In the words of Secretary Lansing, our Secretary of State, from his *War Memoirs*, page 192 [reading]:

> The joint reply of the Allies to the German proposal was delivered formally to Ambassador Sharp at Paris on December 30 for transmission to Germany and her allies, and was made public the following day. It was a bitter arraignment of the Central Alliance. It closed and barred the door to any negotiations with the enemy or to any interchange of views as to bases for peace. It left nothing to be said. It practically ended for the time all hope of negotiating peace.

In the meantime, President Wilson had arrived at a decision, and on December 18 made his peace move—a suggestion that the belligerent governments communicate their terms of peace. This he did in spite of the fact that, as Secretary Lansing tells us, this Government had been informed on December 15 through our Ambassador in London that the Allies would flatly reject the German note.

I quote again from Secretary Lansing, page 186 [reading]:

> * * * This information * * * did not deter him from his purpose, nor do I think that it caused him to modify his language. He calmly went on preparing the note as if nothing had happened, and on the 18th completed his final revision and directed it to be sent.

On January 10, 1917, the Allies made a joint reply to President Wilson's note, which set forth peace terms that only a completely defeated Germany could have accepted, and which said as well [reading from "Exhibit No. 2547"]:

> They (the Allies) consider that the note which they sent to the United States in reply to the German note will be a response to the questions put by the American Government and, according to the exact words of the latter, constitute a public declaration as to the conditions upon which the war could be terminated.

I now offer committee exhibit 41, being the whole of the Allied response to President Wilson's note.

(The document referred to was marked "Exhibit No. 2547" and is included in the appendix on p. 8677.)

Senator CLARK. Great Britain realized that this country had long since abandoned any idea of compelling respect from her; they all realized, as Lloyd George frankly confessed, that the tie-up between American commerce and finance and the allied cause always operated to stay President Wilson's hand. Sir Gilbert Parker, who at that time, and who for some time prior thereto had been the head of the propaganda bureau of Great Britain in the United States, in a letter to Lloyd George, shortly after the Presidential election in November of 1916, also strikingly presented the British attitude toward this Government. I quote from Sir Gilbert Parker, in Lloyd George's Memoirs, Volume II, pages 1648 and 1649 [reading]:

> * * * We know how Mr. Wilson stands and we may feel very sure that he will do nothing of a serious nature to interfere with the blockade or the export of munitions, which are the two vital points. * * *
>
> * * * Wilson owes his victory in the election very largely to the fact that he has kept the country out of the war, and I have not a doubt that his greatest ambition during the next 4 years will be to act as mediator. Therefore, we have constantly to be on the lookout for some steps in this direction at Washington.

In desperation, finally, and as their only chance of success, Germany did, on January 31, 1917, what this Government knew all through the fall of 1916 she would be driven to do. She announced unrestricted submarine warfare. For its resumption America's complete lack of neutrality, as this record has abundantly shown, was in large part responsible. Even in November of 1916 during the visit of Ambassador Gerard to the United States, he had stated to Colonel House his belief that Germany would finally push us into the war because of her desperation.

And on January 31, 1917, Gerard, back in Berlin, cabled a conversation with Zimmerman, the German Foreign Secretary, in regard to Germany's decision.

I offer as committee exhibit no. 42, the cablegram from Berlin just referred to.

(The document referred to was marked "Exhibit No. 2548" and is included in the appendix on p. 8680.)

Senator CLARK. The pro-Ally policies of President Wilson during the first 2 years of the war had permitted and fostered the growth of a vested interest in Allied success on the part of great commercial and financial interests. That vested interest had prevented President Wilson from employing any penalizing measures against Great Britain in the fall of 1916, had eliminated any such thing as neutrality on the part of the United States, had led President Wilson to follow a course from which he dared not deviate—a course which spelled, inevitably, ruthless submarine warfare and the entrance of the United States into the war.

The President hesitated for some weeks before he called Congress together to declare that a state of war existed. The President told the Congress of the United States we would fight to make the world safe for democracy, to vindicate the principles of peace and justice, and, without doubt, these were lofty sentiments.

President Wilson knew when he uttered them that the Allies were parties to a series of secret agreements which divided up the spoils of war in a manner far removed from the principles of peace and justice. Page in London, Page in Rome, Francis in Russia, had all of them at different times despatched hints and news regarding these secret treaties. Colonel House, Wilson's confidential adviser, knew about them. But, as Secretary of State Lansing has said of President Wilson in *War Memoirs*, page 204 [reading]:

> * * * If facts were hostile to his intentions or seemed to stand in the way of his settled purpose, he was disposed either to ignore entirely their existence or to refuse to recognize them as controlling. * * * He seemed to be striving to convince himself that everything was favorable to his plans by blinding himself to a disagreeable truth and by showing that he did not desire to have it told to him. * * * He resented having his ideas bound down by the logic of events.

As early as May 8, 1915, Walter Hines Page had cabled the State Department from London [reading]:

> The foreign editor of the Times, a usually well-informed and trustworthy man, who knows all the principal European statesmen, is just returned from a week in France. He tells me in strictest confidence that England, France, and Russia made a bargain with Italy on April 30 agreeing to cede to Italy very large parts of Austrian territory, some of which had a Slavic population, if Italy comes into the war within a month. This was done without consulting Servia and against her wishes. Italy will soon come in if she keeps her agreement, to be followed by Rumania. I have heard unofficial confirmation of this agreement here.

On January 22, 1917, Thomas Nelson Page, the American Ambassador to Italy, wrote a letter to Secretary Lansing which he asked him to show the President, conveying confidential information respecting Allied secret agreements. I quote a portion of that [reading from "Exhibit 2549"]:

> Also that when in the autumn of 1914 the conference of the Allies took place in London at the time, I think it was, when England secured the promise from the Allies that no one would make a separate peace but that all would stand together to the end, Russia presented Poincaré's written engagement—that she should have Constantinople and the Straits—and England had to yield to secure her engagement not to make a separate peace.

That is offered for the record, being committee exhibit 43.

(The document referred to was marked "Exhibit No. 2549" and is included in the appendix on p. 8680.)

Senator Clark. On the same day a letter from Thomas Nelson Page directly to the President along the same lines [reading from "Exhibit No. 2550"]:

> The unknown quantity in the present problem, here as least, seems to be Russia. * * * One thing, however, appears reasonably certain, that Russia has recently been on the verge of making some sort of separate accommodation, if not actually a separate peace, and the whole matter of the Dardanelles and Constantinople has come out in consequence of this fact. As my telegram of yesterday stated, Russia seems to be in a fair way of getting from the other Allies a hand sufficiently free to give her a very preponderant position as regards not only eastern and southeastern Europe, but even the Orient itself. I draw from this the conclusion that it was necessary to make large concessions to Russia, either to secure her continued cooperation or to make it appear worthwhile to her to face the conditions in which she finds herself and to put forth extraordinary efforts.

I now offer committee exhibit 43, which is the letter from Thomas Nelson Page to the Secretary of State, dated at London, January 22, 1917; also the letter from Ambassador Page at London to the President, dated January 2, 1917, being exhibit 44.

(The document was thereupon marked "Exhibit No. 2550" and is included in the appendix on p. 8681.)

Senator Clark. I also offer Committee exhibit 45, being a letter from Ambassador Francis, in Russia, dated at Petrograd, January 29/February 11, 1917, directed to the Secretary of State, of which I will read a portion [reading from "Exhibit No. 2551"]:

> I have written you time and again how direct commerce with America is interfered with by British dictation and if I have not written you that the people and the commercial circles here both are becoming restive under that domination, I certainly meant to do so. I do recall, however, having written to either you or Polk that the Russians are saying that if they were going to have a commercial master, there is no reason why they should have changed from Germany, especially when the change has entailed such a great cost. It is true that England is financing Russia and has the power to require an approval of how the money advanced should be expended, and it must also be admitted that in doing so England is exercising a right which any country or Government might be expected to exercise under the circumstances. England should not forget, however, that she is only able to finance Russia and the other Allies by the assistance she gets from the United States.

(The document referred to was marked "Exhibit No. 2551" and is included in the appendix on p. 8684.)

Senator Clark. I now offer Committee exhibit 46, which is a further letter from Ambassador Francis; and Committee exhibit 47, being a letter from Ambassador Page in Italy—Thomas Nelson Page—dated March 20, 1917.

(The documents referred to were marked "Exhibits Nos. 2552 and 2553" and are included in the appendix on pp. 8686 and 8688.)

Senator Clark. I desire to read a portion of Committee exhibit 47, being the letter from Thomas Nelson Page to the Secretary of State [reading from "Exhibit No. 2553"]:

> One result of the present situation is that Italy finds herself almost completely in the power of England, who has been mainly financing her, and who not unnaturally perhaps has taken measure which many Italians consider far more for England's interest, at least immediate interest, than for that of Italy. In fact, there is much grumbling over England's control of matters of great, if not of vital importance, to Italy. An example of this was England's recent orders against the importation of articles from abroad, which include articles of Italian production whose exportation is of great importance to Italy. For example, fruits, wine, silk, carved stone, wood, etc.

> * * * In this connection it seems not out of place to mention a fact that was told me the other day by General Ricciotti Garibaldi.
>
> He says that he was in London a few months back and attended a dinner at which a number of important persons were invited to meet him, and in the course of the conversation he asked how the Allies were going to pay their debts when the war was over. On this point, an Englishman whom he spoke of as a man of great importance and wealth, worth, he said about 40 million dollars, said, "Why, we will make America (the United States) pay for them." "How will you do this?" asked General Garibaldi. "Why", said the other, "England will at the close of the war control all of the markets of the world, and if necessary we will put an ad valorem tax of 100 percent which will have the effect of making America pay the debts."

During the course of his various peace trips to Europe, Colonel House had learned about the secret treaties and knew therefore the intentions of the Allies with respect to cutting up the map of Europe at the end of the war. Professor Seymour tells us that—[1]

> Colonel House knew of the secret treaties. He had told the President of the Treaty of London before Italy entered the war, and Grey had told him of the demands of Rumania, so that he must have guessed the terms upon which she entered the war.

In spite of the strategic position of the United States economically, her resources, money, and men which Britain and France had to have the President found it possible to ask Congress to declare a state of war between the United States and Germany without insisting that the secret treaties be renounced and without an understanding with the Allies that the American Treasury would not open its door and pour out money to them in order to remake the map of Europe to give France security and crush Germany as a powerful economic rival to England. The governing officials of the United States, apparently, never appreciated the position of strength of the United States—to press the Allies in regard to the secret treaties might have led to disagreements, so that the matter was dropped, as is here indicated.

Immediately after the entrance of the United States into the war, a mission headed by Balfour, British Foreign Secretary, came to this country to discuss with the administration problems of cooperation—shipping, finance, and so forth—and at that time the secret treaties were fully discussed with President Wilson, Colonel House, and Secretary Lansing. House records the following from his conference with Balfour [reading]:

> "This led me to ask", House continued, "what treaties were out between the Allies as to the division of spoils after the war. He said they had treaties with one another, and that when Italy came in they made one with her in which they had promised pretty much what she demanded."

Further on, he says:

> Crossing the Bosphorus we came to Anatolia. It is here that the secret treaties between the Allies come in most prominently. They have agreed to give Russia a sphere of influence in Armenia and the northern part. The British take in Mesopotamia (and the region) which is contiguous to Egypt. France and Italy each have their spheres embracing the balance of Anatolia up to the Straits.

House's comment was [reading]:

> It is all bad, and I told Balfour so. They are making it a breeding place for future war. * * *

---

[1] *Intimate Papers of Colonel House,* Vol. III, p. 40.

Balfour had his intimate conference with Wilson in the evening of April 30, 1917, at the White House. Colonel House was present also, and of this conference he says:[1]

> The ground we covered was exactly the same as Balfour and I had covered in our conference Saturday.

House spoke to Balfour of the desirability of giving copies of the Allies' treaties to the President. This Balfour agreed to do.

In his memoirs, Volume III, pages 1686 and 1687, David Lloyd George speaks of the Balfour Mission to the United States in April 1917 [reading]:

> Mention was made of the various secret treaties which had been concluded with Russia and Italy about territorial changes which it would be the allied purpose to effect if successful, and Mr. Balfour described in detail these agreements and offered repeatedly to supply copies of the treaties to the President. * * * He was obviously anxious not to be informed in writing of the details, as he did not wish to be embarrassed by being "affected with notice."

From Mr. Balfour himself is the following extract[2] [reading]:

> A social engagement of singular interest and importance that I fulfilled in Washington soon after my arrival was a dinner of four at the White House, the party consisting of the President, Mrs. Wilson, Colonel House, and myself. From this conversation no subject connected with the war was excluded. We were all absorbed in the problem of successful cooperation, and as this necessarily involved ranging over the immense field of our common interests, a singular unanimity brooded over our friendly discussions. I think the question of the secret treaties was raised by the President after we had left the dinner table. There were no secrets between us, then or afterward, on any of the many subjects that came up for discussion.

At this point, Mr. Chairman, I may say that the Committee has taken cognizance of information from official sources which has not yet been released for publication, which I am therefore unable to put into the record, which clearly indicates that before he departed from this country, Balfour left with Lansing, Secretary of State, a statement which he had made on foreign policy to the British Imperial War Council. This statement referred at length to the terms of peace to which Britain was committed and the secret treaties.

The Lansing date book contains this entry for May 6, 1917 [reading]:

> At Gunston Hall. Mr. Balfour and Sir Eric Drummond motored down for midday dinner. Spent 3 hours in afternoon going over nearly every phase of the international situation, such as Austria, Bulgaria, Russia, Turkey, China, the relations with the Allies, etc.

The CHAIRMAN. Senator Clark, the Committee, of course, does have, and has had, access to this particular communication to which you have referred. It seems to me that for the sake of the record it ought to be noted here that by reason of that the Committee is informed by the highest possible sources that Secretary Lansing and President Wilson were fully apprised by Balfour of the secret treaties, to which Great Britain had been committed, and the record that has been made and is yet to be made will all clearly reveal that both the President and Secretary Lansing falsified concerning this matter, and declared upon occasion that they had no knowledge prior to their visit to the Peace Conference in Paris.

---

[1] Ibid, pp. 44, 45, 48. 49.

[2] *Chapters of Autobiography,* p. 239.

Senator CLARK. I am not familiar with any statements like that, Mr. Chairman, that the President or Secretary Lansing ever stated that they had no knowledge prior to that time. It is perfectly apparent from the evidence which has been presented in the record, both from Colonel House, from Secretary Lansing's memoirs, from Lloyd George's utterances, and from Balfour's utterances, that the President and Secretary Lansing and Colonel House did have knowledge immediately after we entered the war, of these secret treaties.

I have inserted this in the record for the purpose of showing that, no matter what might have been the aims of the United States toward bringing about a peace which would eliminate the possibility of future war, that after you are once committed to a war, after your feet are once set on that path, that you are committed; that any nation is necessarily committed simply to the winning of the war and, if necessary, the maintaining of the status quo at the time they entered the war; and the fact that President Wilson, Secretary Lansing, and Colonel House were informed of these secret treaties after we entered the war did not in any manner change the fact that we had to go ahead with the war, and that later at the peace conference these secret treaties turned up to frustrate and destroy the aims which President Wilson had set up as the goal of the peace treaty.

The CHAIRMAN. Yes; but these aims were in conflict with knowledge which he had at the inception of the war.

Senator CLARK. It was after we had gotten into the war, of course, when these treaties were disclosed.

As David Lloyd George has pointed out, President Wilson did not want to be informed in writing of the details of the secret treaties, because then he would not have to be aware of their existence. That is precisely what the President said at the hearing on the Treaty of Versailles before the Senate Foreign Relations Committee—that he knew nothing about them until after the war, when he went to Paris. I quote from the hearings[1] [reading]:

> Senator BORAH. * * * When did the secret treaties between Great Britain, France, and the other nations of Europe with reference to certain adjustments in Europe first come to your knowledge? Was that after you had reached Paris also?
>
> The PRESIDENT. Yes; the whole series of understandings were disclosed to me for the first time then.
>
> Senator BORAH. Then we had no knowledge of these secret treaties, so far as our Government was concerned, until you reached Paris?
>
> The PRESIDENT. Not unless there was information at the State Department of which I knew nothing.
>
> * * * * * * *
>
> Senator JOHNSON of California. I think you answered to Senator Borah the question I am about to ask, so pardon me if it is repetitive. It is this: Was the United States Government officially informed, at any time between the rupture of diplomatic relations with Germany and the signing of the armistice, of agreements made by the Allied Governments in regard to the settlement of the war?
>
> The PRESIDENT. No; not so far as I know.
>
> Senator JOHNSON of California. So far as you are aware, was it unofficially informed during that period?
>
> The PRESIDENT. I would be more clear in my answer, Senator, if I knew just what you were referring to.

---

[1] See *Treaty of Peace with Germany*, Report of the Conference between Members of the Senate Committee on Foreign Relations and the President of the United States, August 19, 1919, Senate Document 76, 66th Congress, 1st session, p. 22.

Senator JOHNSON of California. I am referring to the so-called secret treaties which disposed of territory among the belligerents.

The PRESIDENT. You mean like the Treaty of London?

Senator JOHNSON of California. Yes; like the London pact.

The PRESIDENT. No; no, sir.

Senator JOHNSON of California. These specific treaties, then—the Treaty of London, on the basis of which Italy entered the war; the agreement with Rumania, in August 1916; the various agreements in respect to Asia Minor, and the agreements consummated in the winter of 1917 between France and Russia relative to the frontiers of Germany, and particularly in relation to the Saar Valley and the left bank of the Rhine—none of these did we (and when I say "we" I mean you, Mr. President) have any knowledge of prior to the conference at Paris?

The PRESIDENT. No, sir. I can confidently answer that "no" in regard to myself.[1]

Secretary Lansing appeared before the committee and I will read a portion of the testimony of that hearing [reading]:

Senator JOHNSON of California. Let me ask you one more question while we are on the subject. You recall that Mr. Balfour was here and addressed the Senate at one time?

Secretary LANSING. Yes.

Senator JOHNSON of California. And that Viviani was here and addressed the Senate?

Secretary LANSING. Yes.

Senator JOHNSON of California. Did either of these gentlemen while here communicate to you any secret treaties that had been executed for the disposition of territory after the war?

Secretary LANSING. Neither of them.

Senator JOHNSON of California. Did either of them on any occasion, either when here or at any other time, communicate to the State Department of the United States any information concerning the treaties that disposed of territory in which the Allies were concerned, the disposition of which was to be made by the peace conference?

Secretary LANSING. None.[2]

On July 21, 1917, after we had become involved in the war, associated with the Allies, and were very busily engaged in supplying them with money and supplies and shipping, President Wilson wrote a most revealing and significant letter to Colonel House, in which he outlined certain matters, and I will offer the whole letter for the record, being committee exhibit 48.

(The document referred to was marked "Exhibit No. 2554" and appears in full in the text.)

Senator CLARK. That letter from the House Collection, custody of Prof. Charles Seymour, Yale University, New Haven, Conn., reads in full as follows:

MY DEAR HOUSE: Frankly, I see some very grave possibilities of danger in your plans for an interchange of views about peace between the World and the Tageblatt, particularly if Northcliffe and Tardieu are to be made counselors in the matter. England and France have not the same views with regard to peace that we have by any means. When the war is over we can force them to our way of thinking, because by that time they will, among other things, be financially in our hands: But we cannot force them now, and any attempt to speak for them or to our common mind would bring on disagreements which would inevitably come to the surface in public and rob the whole thing of its effect. I saw all this too plainly in the conversation with Viviani. If there is to be an interchange of views at all, it ought to be between us and the liberals in Germany, with no one else brought in. Even at that, how is the State Department, or any official agency of the Government, going to ask that the Tageblatt be allowed to print what the World says without any interference by the censor without its appearing that what is proposed is really an interchange of views between German liberals and this Government? I do not think it possible to keep the hands of the administration concealed.

---

[1] Ibid, pp. 28 and 29.

[2] Hearings, Senate Foreign Relations Committee, 66th Cong., 1st sess., p. 221.

It seems to me that these are very real difficulties and disclose some real dangers. Our real peace terms—those upon which we shall undoubtedly insist, are not now acceptable to either France or Italy (leaving Great Britain for the moment out of consideration).

I have delayed writing you about this deeply important matter until I could think it out; and I must say that I have not been able to think myself on safe ground regarding it. You may have entirely satisfactory replies to make to my objections; but I cannot think of them myself. Will you not write me again? I have thought about it enough now, I think, to promise a prompt reply.

I am writing on the Mayflower, on which Mrs. Wilson and I are seeking a day or two of relief from the madness of Washington. A point is reached now and again when I must escape for a little.

With affectionate messages from us all,

Your grateful friend,

Unfortunately the President never seemed to be able to use this financial club, to which he referred, to insist upon the real peace aims of the United States. At the peace conference, with a very few minor exceptions, the Allies did precisely as they pleased and as they had planned before our entry into the war. And as Norman Davis rather bitterly stated in a memorandum for the President on February 21, 1920 [reading]:

> * * * While the Allies have never bluntly so stated, their policy seems to be to make Germany indemnify them for having started the war and to make us indemnify them for not having entered the war sooner.

That concludes the study, Mr. Chairman.

The CHAIRMAN. At this point, and to make complete the record, the Chair asks to be received in the record, properly identified, certain exhibits. First is a telegram of August 5, 1914, from the Ambassador in Great Britain, Mr. Page, to the Secretary of State.

(The document referred to was marked "Exhibit No. 2555" and is included in the appendix on p. 8690.)

The Chair next offers for the record a communication dated April 20, 1916, by the Vice Consul at London to the Secretary of State.

(The document referred to was marked "Exhibit No. 2556" and is included in the appendix on p. 8690.)

The Chair next offers for the record a communication dated September 15, 1914, by the German Ambassador to the Counselor for the Department of State.

(The document referred to was marked "Exhibit No. 2557" and is included in the appendix on p. 8694.)

The Chair next offers for the record a communication dated September 16, 1914, by the Counselor for the Department of State to the German Ambassador.

(The document referred to was marked "Exhibit No. 2558" and is included in the appendix on p. 8694.)

The Chair next offers for the record a communication by the Ambassador in Austria-Hungary, Mr. Penfield, to the Secretary of State, dated July 2, 1915, together with the enclosure which accompanied that communication.

(The document referred to was marked "Exhibit No. 2559" and is included in the appendix on p. 8694.)

The Chair next offers for the record a communication dated August 12, 1915, by the Secretary of State to our Ambassador in Austria-Hungary:

(The document referred to was marked "Exhibit No. 2560" and is included in the appendix on p. 8697.)

The Chair next offers for the record a table revealing the United States foreign commerce through the years 1912 to 1916, revealing merchandise exported and imported during those years.

(The document referred to was marked "Exhibit No. 2561" and is included in the appendix on p. 8700.)

The Chair next offers for the record a telegram dated Berlin on February 14, 1915, sent by our Ambassador in Germany to the Secretary of State.

(The document referred to was marked "Exhibit No. 2562" and is included in the appendix on p. 8701.)

The Chair next offers for the record a telegram of February 17, 1915, by the Ambassador to Germany to the Secretary of State.

(The document referred to was marked "Exhibit No. 2563" and is included in the appendix on p. 8702.)

The Chairman. The Chair next offers for the record a communication of June 1, 1915, from the Ambassador in Germany to the Secretary of State.

(The document referred to was marked "Exhibit No. 2564" and is included in the appendix on p. 8702.)

The Chair next offers for the record a communication dated May 10, 1915, addressed to the President at the White House by the Secretary of State, enclosing a memorandum by the Counselor for the State Department.

(The document referred to was marked "Exhibit No. 2565" and is included in the appendix on p. 8703.)

The Chair next offers a communication of May 11, 1915, by the President to the Secretary of State.

(The document referred to was marked "Exhibit No. 2566" and is included in the appendix on p. 8704.)

The Chair next offers for the record a memorandum dated July 2, 1915, and addressed to the Secretary of State by the President.

(The document referred to was marked "Exhibit No. 2567" and is included in the appendix on p. 8704.)

The Chair next offers for the record a letter dated April 10, 1916, addressed to the Secretary of State by David R. Francis, Ambassador to Russia, with an enclosure indicated, for the attention of Mr. Lansing.

(The document referred to was marked "Exhibit No. 2568" and is included in the appendix on p. 8704.)

The Chair next offers for the record a telegram dated September 14, 1916, to the Secretary of State from Berlin, from Ambassador Egan.

(The document referred to was marked "Exhibit No. 2569" and is included in the appendix on p. 8707.)

Senator Clark, from the exhibits which you have offered and so very ably introduced, are you impressed at all by the thought that our Government during our neutrality days was striving to bring about and putting out a proposal that was not far removed from the proposal that was offered recently for peace between Ethiopia and Italy? I mean by that this: Are you impressed by reason of these records, with the thought that we were striving to bring about a peace that we knew beforehand would be acceptable to the Allies, and which we were equally confident would be turned down by the Central Powers?

Senator CLARK. It think it is perfectly apparent from the House-Grey agreement, that the arrangement was that no peace was to be proposed which was not known to be in advance entirely satisfactory to the Allies, and that if the Germans refused to accept such peace, Colonel House was committing the United States to the entry of the war on the side of the Allies.

The CHAIRMAN. It seems to the Chair that the record now is one very clearly revealing that the needs and interests of our wartime commerce were caused to parallel the changes in and the stretching of our neutrality policy; that when commerce and neutrality at anytime came in conflict during those neutrality days, our neutrality gave way always in order to open the road to a wider and wider commercial relationship.

Beyond that, it seems to the Chair that the record positively reveals that while our Government was pretending neutrality during those days, it was actually hoping for a break with Germany, inviting that sort of a break, and seems to have been in a frame of mind to welcome the break when it came.

Senator CLARK. I do not think it is justifiable to say, so far as the record shows, that the Government was hoping for a break with Germany, but it was very clearly disclosed that Colonel House, who was acting as a sort of super Secretary of State, on several occasions wanted to have a break with Germany. That is disclosed very clearly by his notes.

The CHAIRMAN. When one speaks of the Government in those days, it seems to me quite fair to include Colonel House as part and parcel of that Government.

Do you have anything more to offer, Senator?

Senator CLARK. No, sir.

The CHAIRMAN. The Committee will be in recess until 2 o'clock this afternoon.

(Thereupon, at 12:05 p. m., the Committee took a recess until 2 p. m.)

AFTER RECESS

(The hearing was resumed at 2 p. m.)

TESTIMONY OF J. P. MORGAN, THOMAS W. LAMONT, AND GEORGE WHITNEY—Resumed

ALLIED FINANCING—FALL OF 1916 [1]

The CHAIRMAN. The Committee will be in order.

Mr. Raushenbush, you may proceed.

Mr. RAUSHENBUSH. Gentlemen, this afternoon we would like to secure from you some information concerning some of the complications of the financing which seemed to take place in the late fall of 1916.

---

[1] See also "Exhibits Nos. 3125 through 3162 and 3192 through 3217", Hearings, Part XXX; and "Exhibits Nos. 4048 through 4065", Hearings, Part XXXII.

There are a good many things we have not been able to secure full information on from your files.

I am sure that you will be able to add to the stock of knowledge on that subject.

As we total up these various loans that had been advanced to the Allies up to December 1, 1916, in some of which you took the lead, there was a total of $1,919,098,078, and there have been some reductions on those, some of the acceptances had been retired, and we find a net as of that date of $1,784,461,683.

(The document referred to was marked "Exhibit No. 2570" and is included in the appendix on p. 8708.)

Mr. **Olds**. Was that December 1?

Mr. **Raushenbush**. We put it as December 1 at this time; yes.

If at this time or any later time you find that there is any serious divergence between these figures and yours, please feel free to check and make your comments.

Mr. **Lamont**. That includes the paying off of those 1-year French notes, Mr. Raushenbush?

Mr. **Raushenbush**. We have a total of pay-offs, including the French notes and the acceptances, of $134,000,000.

Mr. **Brown**. That is, excluding the cancelation of U. K. notes by sale of collateral.

Mr. **Raushenbush**. May one get an agreement on this proposition, that the bulk of these loans did not go over easily, they had to be supported very heavily in the market and were not by and large thoroughly passed on to the ultimate investors but stuck somewhat in the hands of the participating and distributing banks and houses?

Mr. **Lamont**. Mr. Raushenbush, you have asked us several questions there. Would you care to mention each specific operation and ask for information about that very briefly?

Mr. **Raushenbush**. If you do not accept that general proposition for practically all of them, we will have to go into the individual ones. I had hoped that you would grant that by and large that is what happened.

Mr. **Lamont**. But I do not believe that we should describe them just the way you have done. There is no doubt, as we have stated again and again, that the investors of this country were new to foreign loans and they were uninformed as to what we regarded and our associates in the business regarded as the soundness of British and French credit.

We spoke of that very particularly in connection with the Anglo-French loan, which I can say offhand was not immediately distributed to the public. It took a long time to get that distributed, and it required, as you have pointed out, some market support.

Then the other two loans that were publicly issued were the first United Kingdom loan in August 1916 and the second United Kingdom loan made in October 1916.

Both of those operations were collateraled so amply by American, neutral, and other securities that we had no great difficulty in getting them underwritten very readily by the community, and the distribution of those loans, I think, was very fair from the start.

Does that answer you at all?

Mr. **Raushenbush**. It answers it in a way, Mr. Lamont. It rather surprises me. I had thought that we might get an agreement that there was a great deal of lagging on the part of both the United Kingdom loans, the first and second.

Mr. **Lamont**. Undoubtedly the banks continued to hold very substantial holdings in both the U. K. issues; no doubt about that.

Mr. **Raushenbush**. And a great deal of purchasing was done to support the market on these bonds, was it not?

Mr. **Lamont**. The record shows just how much purchasing; I forget.

Mr. **Raushenbush**. How about the American Foreign Securities Co.?

Mr. **Lamont**. That is the French operation. That was secured by American securities, was it not? Do you recall any details about that, Mr. Whitney?

Mr. **Whitney**. I think perhaps you do not see quite eye to eye with us on your first question. Do you mean the original distribution, if the underwriters had been left with a substantial portion? Of course, we testified that the Anglo-French was largely held by the original underwriters.

Mr. **Raushenbush**. Yes.

Mr. **Whitney**. But you are now talking about a period over a year later.

Mr. **Raushenbush**. Yes.

Mr. **Whitney**. During that time I think you will find that there had been quite a substantial redistribution, what we call secondary distribution of those securities. So at the time you speak of the banks did not have any substantial amount of these bonds.

For instance, we just, for a matter of curiosity, asked as of December 16, the end of December, the National City Bank how many they had, and they had $461,000. Of course, the American Foreign Securities was out more recently, and they had $3,000,000 of those.

The second U. K., which had been put out only a month after the date you fix, they had $3,400,000 of them, which, after all, for a bank the size of the National City is relatively small.

You come down to the First National, they had $1,300,000 American Foreign Securities, and had $9,000,000 of the second U. K's.

So, if you are talking about the second U. K's a month later, I think it would be probably fair to say that the underwriters had a substantial portion, because they had not had an opportunity yet to do what we call secondary distribution.

As to the earlier loans, I think there were relatively few in the hands of the original underwriters.

Mr. **Raushenbush**. Outside of the Anglo-French?

Mr. **Whitney**. No; I think the Anglo-French is shown by the National City Bank, which I think had a $25,000,000 participation and had $461,000 left.

Mr. **Raushenbush**. You think a year later that was pretty well passed out?

Mr. **Whitney**. On a secondary distribution. I could not speak by the book, but I think that is true.

Mr. **Raushenbush**. How about the munitions people who had taken some of that Anglo-French, do you know whether they had passed that on?

Mr. **Whitney**. I do not know. If you probably have in mind the cable we sent on January 5, I think it was, 1917, we were talking about the third U. K.'s in that cable. We were calling attention to the fact that the banks had had a rather unhappy experience in some of these former loans, and also the munitions makers had subscribed to them and that there was no longer an opportunity to sell any more bonds to the munitions holders.

We say in that cable, if I recollect, that they either held them at below cost or sold them at a loss. That was the type of argument. We had to change the type of bond for the third U. K. I could not tell you how many they had.

Mr. RAUSHENBUSH. We seem to find this story running along through most of these loans. We do not want to go into too much detail on that. Here is this cable of August 2 to Morgan in London, describing the offering of American Foreign Securities Co., for instance, in which you say toward the end of the first page [reading from "Exhibit No. 2571"]:

> We regarded this note as very attractive and hoped we were offering it on a basis which would show not only the underwriters but the purchaser a nice and immediate profit. In this we have been somewhat mistaken although on the whole we regard the undertaking as successful. For your confidential information we and Brown Bros. & Co., New York, have already bought in the market about $9,000,000 of the notes at the issue price.

Mr. WHITNEY. That was a month later.

Mr. RAUSHENBUSH. Yes. A week later, was it not?

Mr. BROWN. August 1 was the date of the loan.

Mr. WHITNEY. They came out in July, did they not?

Mr. BROWN. August 1, I think, Mr. Whitney, July 31 and August 1.

Mr. WHITNEY. It was right after.

You must remember, and we have all to remember, that we were more or less plowing a new field here with these securities, and this was an attempt to use the corporation—you know all the details of it—which, in itself, loaned money to the French Government and then in turn borrowed from the American public.

We had hoped and expected that that would be approved by the investor. We found through that experiment—and that is the only time we did that—that it did not go, as we say in the cable, as well as we had hoped, that the investors generally in the country preferred the direct obligation of the Government.

That was a disappointment, because we had believed and our associates had believed it was to be a great success.

Mr. RAUSHENBUSH. This was under the head of supporting the market. Here on the second day you have already supported it to the extent of $9,000,000. That was the point I was bringing out.

Mr. WHITNEY. That is true.

Mr. RAUSHENBUSH. The next sentence is [reading from "Exhibit No. 2571"]:

> Otherwise the price would have broken and the market become somewhat demoralized.

That is the way it operates, is it not?

Mr. LAMONT. That is your conclusion and I do not want to dispute you at all. We found it wise or expedient to support the market, but we do not necessarily go far enough than to say if we had not, the market would have broken and become demoralized. We think that is very far.

Mr. Whitney says that we did say that. I withdraw that.

Mr. Whitney. Read the next sentence.

Mr. Raushenbush. That runs to all these loans, does it not, Mr. Lamont? If exchange had been unsupported and if these loans had been unsupported, if you had not gone into the market and bought up immediately big blocks of them to keep the price up, the loan would have fallen from a par of 96, if you will, or 98, down under 80, and the bank examiners would have come around and said to you and every other bank, " Here, carry this loan at 80 "; and the financial situation from your angle would have been terribly upset, would it not? You really had to keep that price up?

Mr. Whitney. Mr. Raushenbush, I am sure you do not want me to bore the committee by going into a dissertation on the technique of the bond business, but the fact is that in every bond issue, these and all others, what is necessary is known as secondary distribution.

The record shows over any issue you want to take, that there is about a 10 to 15 percent lag in the original subscription which has to be taken up by further distribution. That is about what happened here, as you will see if you read the next sentence:

> We are still buying but hope to turn the corner within a day or two.

Mr. Raushenbush. Yes.

Mr. Whitney. The purpose was there to give a chance to absorb the usual and expected resale by people who were original subscribers and for some reason or another did not want to keep them. It is a perfectly normal secondary market, about 10 to 15 percent of the issue. This was a rate a little bit faster than that, I agree, but that was the purpose of it.

Mr. Raushenbush. If you would grant what seems to me fairly obvious, and what you have half granted, that practically all of these loans had to be supported by reasonably big purchases in the market to keep the price up, we would not have to have your dissertation on the bond business.

Mr. Whitney. I would not, because I could not grant that, you see. What I maintain is that that purchasing was to permit of an orderly secondary distribution of these securities, which is normal to any bond transaction, then and now.

Mr. Raushenbush. You mean, every one that is floated now is supported by the issuing banks?

Mr. Whitney. Not necessarily supported, because sometimes they go up. In a market like today they generally go above the issue price. But there is still a secondary distribution, which anybody in the bond business will recognize as necessary at times.

It may be an advancing price; but bonds come back and are dislodged, and that is a perfectly ordinary technique of the business.

Mr. Raushenbush. To keep the price up?

Mr. Whitney. Here is a falling market, or a market that has been filled fairly full for the present demand, of course, that is a more urgent problem than it would be on a bond that advances.

Of course, you do not support it if it goes up, obviously.

Mr. Lamont. Of course, in a policy of affording a fair degree of support to bond issues like that, we had splendid company later on. That was the United States Government; because, as we all know, when the Liberty loans were brought out in 1917 or 1918, the United States Government, under a special piece of legislation that was passed giving the authority, supported those bonds very vigorously.

Mr. **Raushenbush.** They used some of the proceeds of the bonds to support the price; is that what you mean?

Mr. **Lamont.** I do not know what particular sources.

Mr. **Raushenbush.** You also had the Bank of England in on some of these to help you support them, did you not?

Mr. **Lamont.** The Bank of England were underwriters but they were released, were they not?

Mr. **Whitney.** In every instance. We had an agreement to have them join with us, if necessary, but in each case they were released. In no case did they join in.

Mr. **Raushenbush.** Was there not one case when you passed out about $19,000,000 to them to join in a $38,000,000 purchase?

Mr. **Whitney.** Not of underwriting.

Mr. **Raushenbush.** I want to offer the cable of August 2.

(The document referred to was marked "Exhibit No. 2571", and is included in the appendix on p. 8708.)

Mr. **Lamont.** Even today, Mr. Raushenbush, you know every time the Treasury brings out a new issue here of obligations, if it is found expedient, they ask the Federal Reserve banks to afford a fair degree of market support. That is a matter of common knowledge.

Senator **Vandenberg.** Is that one of the uses to which our $2,000,000,000 stabilization fund is being put?

Mr. **Lamont.** That I do not know, Senator.

Senator **Vandenberg.** Would you suspect that was one of the services?

Mr. **Lamont.** I have not the remotest idea.

Mr. **Whitney.** It has been suggested.

Mr. **Raushenbush.** Just to finish with this American Foreign Securities, there is a letter, or, rather, a cable I want to enter, dated August 8, to Morgan, Harjes & Co., in Paris.

(The document referred to was marked "Exhibit No. 2572", and is included in the appendix on p. 8710.)

Mr. **Raushenbush.** In that there is one sentence I want to read [reading]:

> We with the Browns have thus far been obliged to purchase in excess of $10,000,000 of the notes recently issued in order to protect the market and save the credit of the undertaking.

Coming to these U. K. loans, about which you were talking a moment ago, Mr. Lamont, on January 5, 1917, there is a cable from you to London, no. 35165,[1] in which this general proposition I was offering, that these notes had to be forced around a bit, is touched upon.

You are discussing, apparently, some suggestions for new loans, and make some comments on the old, beginning in the middle of the second paragraph [reading from "Exhibit No. 2665"]:

> The reason why we deem it essential for the success of the proposed issue to offer a conversion privilege that has decided advantage over outstanding issues is this: Banking institutions are still such large holders of United Kingdom Loan No. 2 that owing to various limitations, with which you are

---

[1] Entered later as "Exhibit No. 2665", see appendix, p. 8801.

familiar, it will be impossible to count upon them for subscriptions anything like so heavy in the proposed loan as before. Likewise, we cannot look to the munition manufacturers for heavy subscriptions as heretofore. In all the issues until now, we have pressed them vigorously and most of them still have on hand the notes of former issues which they have been unable to liquidate at cost. In fact, we believe it is not too much to say that the only munition makers who have liquidated their interests have been those who have been willing to do so at a loss. All of them who have not heretofore taken their loss, are still carrying notes at figures far below cost.

Does not that throw some light on the proposition that these loans were not always the best things in the world?

Mr. WHITNEY. That was the cable I referred to a few minutes ago. I am glad you brought it up, because it brings up what I had forgotten, speaking from memory, that the only United Kingdom loan of which the banks were large holders, according to our statement at that time, was the second United Kingdom loan.

As far as the munitions goes, I could not tell you how many they still had, but we testified the other day, I think, that the contract companies had something like $89,000,000 of the Anglo-French.

As you pointed out the other day, the Anglo-French never sold at anything but a loss, so if they liquidated them, they obviously would have taken a loss.

Mr. RAUSHENBUSH. Did they not have some of this United Kingdom stuff, too?

Mr. WHITNEY. The munitions makers?

Mr. RAUSHENBUSH. You say, "In all the issues till now, we have pressed them vigorously and most of them still have on hand the notes of former issues which they have been unable to liquidate at cost."

Mr. WHITNEY. We can check that. I would not dare speak from memory on that.

Mr. RAUSHENBUSH. We seem to get from the plural here that they have been forced to take some.

Mr. WHITNEY. That is a statement of fact. We are not quarreling with this statement here at all.

Mr. RAUSHENBUSH. Then, later on in the cable, I call attention to further language along the same line, that [reading from "Exhibit No. 2665"]:

They iterate again the unfavorable features of the situation, namely, the discount at which all Allied loans are selling, the fact that friendly banking institutions are so loaded up with United Kingdom No. 2 as to make their fresh participation to a large extent very doubtful, and, further, the banking community has been disturbed by a reiteration from Washington of the position of the Federal Reserve Board.

Mr. LAMONT. It is possible, Mr. Raushenbush, that in a few words we could give the committee a little of the background during this whole period that you are alluding to, so that the allusion which you are very broadly making to the various cables will be confined clearly, they will not be quite so scattered.

Mr. RAUSHENBUSH. With relation to the specific point of the question I asked there about the general stickiness, as I described it, of some of these loans?

Mr. LAMONT. Yes; that would come in, Mr. Raushenbush, because I would remind you that this whole period from September 1, 1916, to April 1, 1917, was a period when Great Britain's shipments of

American purchases, and France's too, were at the very peak. They were growing heavier and heavier. That meant that in turn the payments for meeting those shipments must become heavier.

These cables very clearly point out that we were constantly concerned with the question of exchange, and we were crowding the British Government very hard during all that period, as the cables show, to give us a clearer idea of their mobilizable resources.

We knew that they were ample, but we did not know what they were. We saw that these payments were coming along and we were pressing them—we pressed them, perhaps, unduly hard at times—to find out the information.

It was that situation that naturally led to our issuing the second U. K. loan in October, perhaps a little earlier than we had expected. There was a third U. K. loan in January, to which you have alluded. Then there was, of course, the demand loan.

Mr. Morgan was in London at the time and he furnished us with additional information. The British gradually disclosed their hand to us, that is, gradually showed us that they were in a position to ship several hundred million dollars' worth of gold.

Mr. RAUSHENBUSH. From when to when?

Mr. LAMONT. Between October 1 and the succeeding April 1, and any amount of quantities, hundreds of millions of dollars of American securities.

Then, when along came the ruling of the Federal Reserve Board in late November of 1917 against our issuance, in effect, of British and French Treasury bills, we were a good deal concerned about that, although we had not anticipated that it would amount to so much in dollars and cents, but we thought it was another means of financing.

The British Government, on the other hand, showed very little concern because, as you will recall, the Chancellor of the Exchequer, in one of these cables, at once sent word—

> I will not for a moment dream of suggesting any course not agreeable to your Government. I will ship six or seven hundred million dollars in gold at once.

Mr. RAUSHENBUSH. Let me interrupt just a minute. When you say you do not think it would have meant very much in dollars and cents, that does not seem to check with my memory on the thing in several particulars.

When Mr. Davison went to the Federal Reserve Board and talked it over with them before they issued that ruling, he is quoted as saying, "Oh, I think it would mean half a billion or a billion."

And in the cables discussing back and forth, you mentioned a figure of $300,000,000. That is not meaning nothing in dollars and cents.

Mr. LAMONT. Oh, $300,000,000 would be very far from meaning nothing; there is no doubt about that. But I do not think, according to my recollection, Mr. Raushenbush, that we really had any adequate idea that they would reach anything like that figure.

Then to complete the picture, the British Government kept producing more and more of these available resources. They put their fresh legislation into effect, as you know, requiring the further mobilization of American securities from all their people. They began to ship those over. Then, to wind up with, at the end of December 1916 they had over $700,000,000 of available securities, the greater part of which were not at all utilized.

There was a call loan——

Mr. **Raushenbush.** We would be glad to go into those figures later on when we come into them seriatim, instead of taking them in big chunks like that.

Mr. **Lamont.** Then, at the very end, before we got into the war, there were mobilized several hundred million dollars of Canadian Government and Canadian Pacific securities that were never used at that time at all.

Mr. **Raushenbush.** There were a great many statements you have been making in the last few minutes, Mr. Lamont, that I will not say surprise me but that I would like to go into in some detail, each one at a time, as we try to get this developed perhaps a little more slowly.

You know, you have taken in a great deal of territory. You have taken in a world of excitement, as it were.

Mr. **Lamont.** I was trying to give you a very brief picture of the whole period from September 1, 1916, to April 1, 1917, so as to show you why there was need of financing and the methods that were employed.

Mr. **Raushenbush.** We are not only interested in why the needs of financing. Anybody would grant that, that the British wanted money and needed money as long as the war went on. That is not what we are particularly interested in this afternoon, so much as the question of this mechanism, and what effect the various brakes on it, if you will, had or did not have.

Mr. **Whitney.** You asked me a question a minute ago about the subscriptions of the munitions people to the loans.

Mr. **Raushenbush.** Yes.

Mr. **Whitney.** Here is a statement that shows 9.9 millions in the first and 14.5 millions in the second U. K.'s.

Mr. **Raushenbush.** Does that add up the French and all?

Mr. **Whitney.** No; just the two U. K.'s.

Mr. **Raushenbush.** This is all they had at any time?

Mr. **Whitney.** That is the list that was given to me. I asked for the subscribers.

Mr. **Raushenbush.** We have some figures. We will check them and then enter them.

In a cable dated January 6, 1917,[1] you refer to the second U. K. loan, saying in the course of discussing it:

> But for the moral effect it will be essential to pay off all participants thus leaving us in a position still carrying a larger amount of call loans. We, ourselves, also have on hand approximately $15,000,000 United Kingdom loan no. 2 which, of course, shows a loss.

That is some months after the second U. K. came out, was it not, that you were still hanging on to the $15,000,000?

Mr. **Whitney.** Yes. If you will remember, we made a subscription of $27,000,000, and something, and we had $15,000,000 left. This is 2 months later.

Mr. **Raushenbush.** I want to offer for the record a compilation we have made from your records showing the collateral sales and purchases on the first, second, and third U. K. loans, up to March

---

[1] Entered later as "Exhibit No. 2666", see appendix, p. 8802.

31, 1917, and showing, that on those loans you sold $110,868,857 worth of collateral, and purchased notes to the extent of $102 504,254.

(The document referred to was marked "Exhibit No. 2573" and is included in the appendix on p. 8710.)

Mr. **Whitney**. The rest of the cash would be with the trustee, of course.

Mr. **Raushenbush**. Yes. The excess of collateral sales would go to the trustee, of course.

Mr. **Brown**. The only question was the amount of market support, practically one-eighth of the three issues being bought in to maintain the price.

Mr. **Whitney**. That was in the terms of the indenture in each case, was it not, Mr. Brown?

Mr. **Brown**. Oh, yes.

Mr. **Whitney**. It was definitely advertised that certain securities were going to be sold with the idea of purchasing the notes. That was disclosed and announced, and one of the greatest points we had in them.

Mr. **Raushenbush**. One of the little parts was the mechanism we have touched on as to getting the loans floated and this big machinery started going was the campaign of education—sometimes you indiscreetly referred to them as "propaganda", I believe, in your cables—with the people around the country who were not in the custom of buying this stuff. I wanted to ask a question not of morals but simply a question of mechanism.

When you do something like that, when you tell the banks and they tell their distributors, their surrounding satellites there, that an issue is coming out and it is being floated by Morgan's, does that impress the issue with a little higher character, in your opinion, than if they were floated by X, Y, Z, a house on the Curb?

Mr. **Lamont**. We hope that it does. We do not want to appear too modest or immodest on that point.

Mr. **Raushenbush**. Can you not give me a little better answer?

Mr. **Whitney**. Of course, we do.

Mr. **Raushenbush**. That you were willing to stand by them, that they were good stuff?

Mr. **Whitney**. Certainly. When we offer a loan over our own name, it means that we endorse the statements made about it; we endorse the loan. We show our belief in it. Of course, it carries more weight than a Curb broker.

Mr. **Raushenbush**. And that weight might even be stronger in your minds, might it not—perhaps I had better ask Mr. Morgan about this; perhaps he will feel strongly about it:

Would not the weight be stronger in your minds in the case of something new like these things, where the country had not been accustomed to buying foreign bonds, as we have had testified to here, and they were being floated now and the name of the House of Morgan was on it, and somebody had to take the responsibility of telling all these little country bankers and little people that this was good, would you not feel stronger about that than if you were just selling to the Trio or somebody on the Street who was supposed to have cut his eye teeth and know what was what?

Mr. **Morgan**. We try to be careful at all times.

Mr. **Raushenbush**. But a little more careful?

Mr. **Morgan**. I do not know that we should feel any greater obligation to the little man than the big man.

Mr. **Raushenbush**. The point I was making was not so much on the little fellow but on the new man. This was all a new mechanism.

Mr. **Morgan**. We always hope that it would be an entering wedge for him, that he would become an old man as distinguished from a new man.

Mr. **Raushenbush**. I do not seem to make my question clear.

Mr. **Morgan**. I do not see that that increases our responsibility in any way.

Mr. **Lamont**. If you mean that we always feel a very keen sense of responsibility, certainly, as Mr. Whitney has just said, we did.

Mr. **Morgan**. Certainly we did.

But I do not think that that sense of responsibility is increased at all, the fact that it is offered to a lot of people who are not used to it yet. I should not think so.

Mr. **Whitney**. It cannot be increased because it is a 100-percent endorsement in any case.

Mr. **Raushenbush**. The philosophical question that anything is larger than 100 percent is one of those it is always well to stay out of. All I was trying to get clear to myself was that here we were getting into a mass of financing being taken by new people, and some of it was sticking, apparently, with the banks, and some with the secondary distributing houses, and it was constantly growing. I simply wanted, as part of the mechanism, to fix the endorsement of this. On one of these, I think it was the second U. K., your cable to London dated October 25, 1916, in which the House puts out a statement concerning the second U. K., you say [reading from "Exhibit No. 2574"]:

> We are isuing to press tonight general announcement as follows:
> "A new British Government loan offering had not been in contemplation at the present time, but the prevailing ease of money and the difficulty which the banks are having in profitably employing their funds have led us to indicate to the British Government that the present is a favorable time for it to establish additional credits in America, even though such credits may not be immediately required. Accordingly, the British Government has today accepted the views of the American bankers and has authorized them to proceed."

On the second page you say [continuing reading]:

> Advance applications for participation in the syndicate which will underwrite the issue indicate that it will be oversubscribed. The British Treasury has of late renewed its shipments of gold to this country upon a large scale. This continued influx of the metal has caused some concern in the banking community and it is believed that the issuance of the proposed loan will tend to cause at least a temporary cessation in gold imports.

(The document referred to was marked "Exhibit No. 2574" and is included in the appendix on p. 8711.)

Mr. **Raushenbush**. Does that check with your other cables and cross-correspondence, that present statement on the thing?

For instance—

> a new British loan offering had not been in contemplation at the present time.

Had it not been contemplated before then?

Mr. **Lamont**. It had been on our minds right straight along after the first, but not for such an early issue, I think, Mr. Raushenbush.

You remember that the conditions changed almost overnight at that time.

Mr. **Raushenbush**. In answer to that we find this cable of August 21, 1916, that comes from Morgan in London. August 21 is some time before.

(The document referred to was marked "Exhibit No. 2575" and is included in the appendix on p. 8711.)

Mr. **Raushenbush** (reading):

> Referring to latter part of your cable 25120, we should expect if the present loan satisfactory that we should ask you issue further similar amount November—

And so forth.

Apparently they were contemplating one for November, were they not?

Mr. **Lamont**. Oh, contemplating, yes; but this cable is to the general sense of an immediate loan offering, a loan offering so early.

Mr. **Raushenbush**. Now, about the next part of it [reading from "Exhibit No. 2574"]:

> The prevailing ease of money.

Was money easy there in October?

Mr. **Lamont**. Money changes overnight, almost. That is my recollection.

Mr. **Raushenbush**. I had a memory from the rifle situation we discussed the other day that October was one of the times when things were getting pretty tight [continuing reading from "Exhibit No. 2574"]:

> The difficulty which the banks are having in profitably employing their funds has led us to indicate to the British Government that the present is a favorable time for it to establish additional credits in America, even though such credits may not be immediately required.

Did not the British need them right away?

Mr. **Lamont**. They needed funds right away, but they were constantly shipping gold and were constantly shipping American securities for sale on our market, so that there was no exact knowledge in our minds as to just what and when they would need. It was during all the time we were trying to find out from the British a more exact situation of their resources and requirements.

Mr. **Brown**. Mr. Lamont, half of that credit was applied on the demand loan, was it not?

Mr. **Lamont**. I do not recall, but you have the facts.

Mr. **Brown**. The data furnished by J. P. Morgan & Co. show the credit on demand loan no. 1 on November 10 of $57,284,995, and on the same date on demand loan no. 2, $116,407,444.

Mr. **Whitney**. They had $114,000,000 after paying off the demand loan, roughly.

Mr. **Brown**. That would be a total of approximately $170,000,000; more than half the loan was, so to speak, already earmarked by money already advanced?

Mr. **Lamont**. It was earmarked if we thought it was wise to reduce the demand loan.

Mr. **Brown**. Did you not always feel it was wise to reduce the demand loan?

Mr. **Lamont**. That always depended, Mr. Brown, upon the circumstances prevailing at the time. We aimed, as you know, and as the whole record shows, to pay down the demand loan when the resources that were available were not being immediately utilized.

When they were not, they served as a stop-gap until a further offering was ready.

Mr. **Whitney**. Mr. Raushenbush, you asked about call money.

Mr. **Raushenbush**. Yes.

Mr. **Whitney**. Reading from the Federal Reserve Bulletin of November 1, it said:

> Call money rates were slightly firmer in September ranging from 2 to 3 percent. Early in October call money touched 4 percent for the first time since July. It is now being quoted from 2.5 percent to 3 percent.

So it had gone up and slacked again at the end of October.

Mr. **Brown**. I would like, if I might, to take up one phase of this.

In that press statement Mr. Raushenbush just read you say [reading from "Exhibit No. 2574"]:

> Even though such credit may not be immediately required.

I should think if over half the loan were required for a loan that was on demand, it would seem a rather immediate requirement.

Mr. **Lamont**. Of course, you and I could discuss that at great length, as to whether it was a requirement or not. It was not a requirement. We did not have to pay down the demand loan. After a lapse of twenty-odd years, Mr. Brown, I cannot give you every shade of knowledge of the facts of the situation and what was in my mind at the time I dictated the cable.

Mr. **Brown**. I recall later cables—there are so many I cannot pick them all out—where both you and the British Government were rather regretful at the height to which the demand loan had had to go previous to this second U. K.

Mr. **Lamont**. We were always in a mood to reduce the demand loan when there was good reason for reducing it and when there were resources to make it reducible from.

Mr. **Raushenbush**. The reason that really got my attention was, just before that there was a cable on October 20 in which you were discussing the same thing, and you seemed to paint a picture of, if I may describe it mildly, hard times over here. It is that second paragraph.

Mr. **Whitney**. But, Mr. Raushenbush, is not this just another example of what Mr. Lamont said a little while ago, that in order to get a really clear picture of this fall of 1916 you have to look at it as a whole, because these isolated instances do not give a clear picture?

For instance, when you say that they need money, Mr. Lamont said that we knew that they had very heavy payments running over the next 4 or 5 months.

They were going to be met. It was a question of properly mobilizing their resources so you could meet them.

We knew that and they actually did make payments, as you know, within the next 6 months, amounting to about $1,200,000,000.

Mr. **Raushenbush**. Between what dates?

Mr. **Whitney**. From November 1 to March 31, I think they paid. After the second U. K., they did $250,000,000 of the third U. K.

The demand loan was $345,000,000. They shipped about $536,000,000 worth of gold. They sold about $68,000,000 worth of securities. So that we know that the money was required during that interval.

The question is whether it was immediately required, but we knew it was coming definitely right along all through that period. That is why the most of these cables, as you will remember, are forcing on the British Government authorities the theory of the necessity of their facing the future of these tremendously heavy payments over the next 4 or 5 months.

We were constantly exerting every bit of pressure we could on them for them to get themselves in hand and collect and make available the resources which we knew they had.

If you take one single bit out of it, you would throw the whole picture completely out of focus, because, after all, there is no question about the fact that in the fall of 1916, the purchasing was all heading into one thing, and it was a very large financial question.

The constant effort of J. P. Morgan & Co. during that period was to impress upon the British Government the fact that they had to realize that they had to make definite steps over that period to find available dollars to meet their commitments, or else curtail their purchases, one or the other.

The net of it is that they raised, after the second U. K., about 1,200,000,000 of dollars to meet those payments, and when they got through at that time they had roughly $650,000,000 plus $400,000,000 worth of gold available for further purchases if they had wanted them.

Mr. Raushenbush. We will get into that. The thing in which I was interested and still am interested in was this, that you were the leader in selling that enormous amount of stuff; you knew a lot nobody else knew.

These cables—this one I want to enter, of October 20, and this other one of October 16, which give what seems to be the inside picture—seem to be slightly at variance with the press release that you put out.

That seemed to me to increase still further your responsibility that these big loans would all be good, do you see? That when you told people things, they would probably give you still further the feeling that you ought to stand by them and the loans ought to be good.

Mr. Lamont. But the loans were good; they were very amply secured, Mr. Raushenbush. These loans about which you are talking now, the United Kingdom loans, were very amply secured, in our judgment.

Mr. Raushenbush. You did try some other ones that were comletely unsecured? I mean, the whole treasury bill operation was cited as an unsecured loan.

Mr. Whitney. We were not allowed to do that.

Mr. Lamont. Oh, no.

Mr. Raushenbush. We will get into that in just a minute, as to whether you were allowed.

Mr. Whitney. Well, we did not, anyway, did we?

Mr. Raushenbush. You did not; no; but it was planned and the question still stands.

Take this one of October 16, 1916, where you are pointing out to J. P. Morgan and H. P. Davison in London [reading]:

> 29065. Payments for account of two governments are mounting up so fast it is very difficult to keep pace by means of farming out no. 2 loan.
>
> Please ask authorities to make endeavor for next few days to ease up and to employ every reasonable measure to postpone somewhat their heaviest payments. Loan today is $125,500,000, of which we personally were scheduled this morning to advance $98,000,000. Any such amount, as you can see, is very close to our proper limit.

(The document referred to was marked "Exhibit No. 2576" and appears in full in the text.)

Mr. RAUSHENBUSH. Then this one of October 20, which I mentioned a moment ago, that the bankers seemed to need extra compensation.

(The document referred to was marked "Exhibit No. 2577" and is included in the appendix on p. 8712.)

Mr. RAUSHENBUSH (reading):

> We should be perfectly willing to do this were it not for the fact that the offering group outside of Trio consider that they are properly entitled to some special compensation for extraordinary services rendered and although we have not told them so, we thoroughly agree. While we look for effective work of every member of the syndicate, there is no doubt that this offering group, at least the distributing houses, eliminating Pittsburgh and Chicago banks, are the ones upon whom chief distribution work falls. We are reluctant to keep laying stress on point that only way by which Great Britain can possibly hope to meet its requirements between now and March 1 is to have every member of the banking community over here working, not only steadily but enthusiastically. There is no method of instilling this spirit except by means of profit. All these houses took a handsome loss on the Anglo-French operation and they state that after paying expenses, etc., they made little real profit in United Kingdom and Royal operations. We believe that we must compensate them out of our proposed three-fourths percent to the extent of a special one-fourth percent, if we are to carry this business through effectively.

Then in the next paragraph there is a sentence there to which I would like to call attention:

> We are making every possible sacrifice for her benefit and doing it as quietly as possible, so that the banking public generally will not become alarmed at the magnitude of her requirements.

That just seems in tone very little different than the circular that was sent out just a few days later.

Mr. WHITNEY. You said, Mr. Raushenbush, we were in possession of information as to the requirements of the British Government that was not in the possession of others.

Would you please read the last sentence of that same cable? If I may I will:

> For your information, Chancelor's remarks as to necessity of finding $10,000,000 daily for New York payments cabled over here and featured in press this morning.

That was 5 days before this statement to which you referred was publicity announced, so the public knew pretty well that the Chancellor needed quite a lot of money for quite a long time.

Mr. LAMONT. If you want to find inconsistencies in our cables from day to day, we can turn up a lot more for you than you can turn up, because, of course, we were inconsistent, so far as the record is concerned, because circumstances changed from day to day. Our own opinions changed from day to day.

Mr. **Raushenbush.** No; these cables seem to be consistent. It is that release to the public and the other bankers that seemed to us to be somewhat at variance.

What I am trying to figure out is, when you were opening up a new field with all these people who had never taken these bonds, the question of how fully informed they were got to be an important one somewhere along the line, did it not?

Mr. **Whitney.** This was not awfully new. The Anglo-French was a year or 13 months before that.

Mr. **Raushenbush.** This was preparing for the U. K., the second U. K.?

Mr. **Whitney.** The second U. K. But there had been 500 million Anglo-French in October 1915. They had been in the public markets, certainly talked about enough for a year. We had done a first U. K. in September. So you can hardly call this new. It is all right to be talking about this being new, in the Anglo-French, but this is not new. There had been the American Foreign Securities loan in July. There had been various financings.

Mr. **Raushenbush.** By this time you think the American public was pretty well accustomed to these foreign bonds?

Mr. **Whitney.** I think they had certainly heard enough about them in over a year. I do not know how accustomed they were, but they certainly had heard enough about them.

Mr. **Raushenbush.** Just one more thing about the stickiness of the securities. Here is a letter I want to offer from Fred I. Kent, of the Bankers Trust, to Mr. H. Fischer, care of Wm. P. Bonbright & Co., Inc., in Paris, dated March 15, 1916. The letter ends up [reading]:

> In all of these negotiations it must be borne in mind that the banks in this country that have taken part in the European loans have not been able to pass their participations along to individuals to any appreciable extent, and consequently it is necessary to meet the requirements of our banking law if further funds are to be secured in this country.

I offer it for the record.

(The document referred to was marked "Exhibit No. 2578" and is included in the appendix on p. 8712.)

Mr. **Raushenbush.** Then your cable of October 18, 1916, which points out that it is difficult for the British Treasury to plan to borrow on demand unlimited amounts, even against American securities, even if they put up securities, good American securities.

There is a limit somewhere. That is the only point.

(The document referred to was marked "Exhibit No. 2579" and is included in the appendix on p. 8714.)

Mr. **Whitney.** We say "in unlimited amounts."

Mr. **Raushenbush.** Yes [reading]:

> We are not finding it altogether easy to have the Treasury borrow on demand in unlimited amounts, even against American securities.

Even with good collateral, there was an end to this process somewhere.

I also offer for the record a letter from Frederic A. Delano to Governor Strong, dated December 19, 1916, again pointing out this situation as regards the banks.

(The document referred to was marked "Exhibit No. 2580" and is included in the appendix on p. 8714.)

Mr. Raushenbush (reading):

> To answer your question first, the Comptroller's report showed approximately 300 million European securities held by national banks at the latest report, not in itself an alarming showing, although it can be inferred that trust companies affiliated with national banks hold considerable more. From statements of State and national banks in September, it appears that the holdings of securities of various kinds (bonds and stocks which in the case of national banks is mostly bonds), all slow stuff, have increased from 2,800 million to over 4,000 million. The increase of 1,200 million being about equally divided. We assume that the placings of securities of belligerents and nonbelligerents have amounted to at least 2,000 million and that the selling back of American securities have been, say, 1,500 million, perhaps more, but it is reasonably sure that a good share of this 3,500 million remains "undigested" and not in the hands of the ultimate investor. That is where the danger lies. There is a great difference between my drawing my balance out of your bank and investing it in the bonds of foreign countries and your investing my balance in that way. I wish very much I could talk with you about the situation. You realize how unwilling I was to do anything that looked like a slap at the Allies. Unfortunately, Kent of the Bankers in his acceptance circular and Davison by his actions and methods rather forced the issue.

Then, toward the end of that letter, he says [reading]:

> I can see that if you had been in New York on the job you could have acted as an intermediary and held Davison in check and, at the same time, satisfied the fears of the Board. I say "fears of the Board" advisedly. There is no doubt that four or five were really alarmed, and the rapidly advancing prices of necessaries of life and the hue and cry that aroused all tended to feed the flames.

He seems to think that there is a lot of this foreign indebtedness that is kicking around quite a lot and not being digested as late as December 19.

Mr. Whitney. As far as I could hear what you read, that sounded like what he thought.

Mr. Lamont. Of course, during this whole period that you are alluding to, there was another factor in the situation that may be worth mentioning, and that was the somewhat shifting of sentiment away from favoring the Allies. That was due to the difficulties that Senator Clark and Senator Nye have pointed out so clearly, on contraband, blacklist, and that sort of thing, that our Government was having with the British Government.

So, during all this period there was quite a distinct slackening of pro-Ally public opinion for the time being.

Mr. Brown. Mr. Delano is also pointing out, Mr. Lamont, the inflationary aspects of this situation. Would you agree to that at the end about the rapidly rising prices of the necessaries of life, that the war-trade boom had become, apparently, in his mind, and in the minds of some of the others of the Reserve Board, dangerously close to a runaway inflation?

Mr. Lamont. Mr. Brown, Senator Vandenberg and I both agreed the other day that any very great boom in trade always resulted in an inflation, and that there was always a deflation.

Of course, the American community had imported during all these months a very great quantity of gold; there is no doubt about that.

We were rapidly changing, as Mr. Whitney has repeatedly pointed out, from a debtor to a creditor nation.

Mr. Brown. You would agree with Mr. Delano that it was a very critical business situation in the late fall of 1916 with a certain amount of undigested securities pretty heavily loaded on the banking system, and something that was dangerously close to a runaway inflation?

Mr. LAMONT. Oh, no; I would not have agreed that there was anything in the nature of a crisis, Mr. Brown. Perhaps Mr. Whitney has a comment on that.

Mr. WHITNEY. I do not quite understand how increase in investment account produces inflation.

Mr. BROWN. No; a combination, I said, Mr. Whitney, of a large quantity of undigested securities in the hands of the banks, plus an apparently somewhat runaway market for the prices of goods of all kinds.

Mr. WHITNEY. The second point is the only point that has to do with inflation, is it not?

Mr. BROWN. Yes; but there is this inflation plus a certain undigested banking situation.

Mr. WHITNEY. Might I just read a rather famous statement made by the Federal Reserve Board on November 27?

Mr. RAUSHENBUSH. We are going to come to that.

Mr. WHITNEY. They state here something about inflation, as to what they thought about it. I am not going to read the whole thing.

Mr. RAUSHENBUSH. We will just have to read it again if you are going to read it now.

Mr. WHITNEY. This is directly responsive to the question.

Mr. RAUSHENBUSH. Are you reading the first or the second statement, the one before the change was made in it?

Mr. WHITNEY. This is November 27.

Mr. RAUSHENBUSH. When we come to it, we want to go into it in a little more detail, because that statement, you know, was changed overnight.

Mr. WHITNEY. All we knew about it was, this was published in the public press. It just talks about their not worrying about inflation.

Mr. RAUSHENBUSH. Yes; I know they talked about that.

I want to comment on Mr. Lamont's statement that sympathy was switching a little bit.

Did not that necessitate still further propaganda, if you will, educational activities on your part, if sentiment was changing, to keep the market up?

Mr. LAMONT. We have said in cable after cable to the British Government that they misunderstood the state of public feeling over here. I think in one or two we complained because they did not understand that more fully.

Mr. RAUSHENBUSH. I want to offer these cables of September 21, 1916; October 30, 1916; press comment on Mr. Davison's newspaper statement; and congratulations from the Chancellor to Mr. Davison.

> **He is greatly impressed with skill and usefulness of your propaganda and your speeches are much commented on and approved here.**

That was in November.

(The documents referred to were marked "Exhibits Nos. 2581, 2582, 2583, and 2584", respectively, and are included in the appendix on pp. 8715 to 8718.)

Mr. **Raushenbush.** Mr. Morgan, do you remember particularly what kind of statements Mr. Davison was making at the time that you had that discussion between you and the Chancellor?

Mr. **Morgan.** I do not remember what they were. I have no doubt there are copies of them obtainable.

Mr. **Raushenbush.** We did not find them. They must be something unusual [reading from "Exhibit No. 2584"]:

> He is greatly impressed with skill and usefulness of your propaganda and your speeches are much commented on and approved here.

Mr. **Lamont.** Mr. Raushenbush, perhaps I can answer that, haltingly. I think the chief allusion there was to the statement that Mr. Davison made that appeared in the public press at the time when he returned home from England in the autumn.

Mr. **Raushenbush.** We have that one, and I introduced it a minute ago, the one of October 31, 1916 [reading from "Exhibit No. 2583"]:

> Sees Prosperity Long After War. H. P. Davison expects vast trade with Great Britain and France to continue. Favors unsecured loans. Allied nations' bonds as sure to be paid as those of our own Government.

We have entered that. That was 20 days before.

Mr. **Lamont.** Then I think he made one talk in Chicago, as I recall it. I do not recall any others he made. My people here say he made one in Boston.

Mr. **Raushenbush.** You do not remember anything particularly about that, though, do you?

Then on November 24, 1916, cable to Harjes, with the drastic comment [reading from "Exhibit No. 2585"]:

> We have, as you know, been active, in furthering propaganda as to desirability of long term unsecured loan, and believe that we have made some impression upon American investment public, but, frankly, one operation has followed another so closely as to have sated pretty completely for the moment the appetites of all classes of American investors, both institutional and private.

We do not want to have any more to do with that, but did that not amount to this, that as far as the mechanism went, you said to your Trio, your close friends and your other ones, that, "This is a good loan; you can safely hold it." That is all that meant, did it not?

Mr. **Morgan.** That is all.

(The document referred to was marked "Exhibit No. 2585" and is included in the appendix on p. 8719.)

Mr. **Raushenbush.** You kept shoving them along and saying, "You had better take a little of this and a little of that and a little of the next."

Mr. **Lamont.** We did not say "You better." We undoubtedly recommended the loan, Mr. Raushenbush, and we felt very distinctly this sense of responsibility which you have credited to us by seeing that these loans were set up so that they were amply secured so that they would be paid.

Mr. **Raushenbush.** Yes; except that occasionally you do try, as in that last cable, to arrange an unsecured loan, even at this time?

Mr. **Lamont.** No; we arranged the unsecured loan in October 1915.

Mr. **Raushenbush.** No; you tried as of this time.

Mr. **Lamont.** Oh, that was merely a suggestion. That was talk as between partners.

Mr. RAUSHENBUSH. It was thought of such importance that the Federal Reserve Board took cognizance of it, and it was not idle talk, was it?

Mr. WHITNEY. Perhaps this would sum it up pretty well, Mr. Raushenbush:

On December 1, 1916, which was just after the ruling by the Federal Reserve Board, here is one clause from a cable despatched to the Minister of Finance in care of Harjes, Paris [reading]:

> We must start afresh and do all that we can to show the public the facts as to the undoubted soundness of the Government obligations of France and Great Britain.

That is the text of what we did.

Mr. RAUSHENBUSH. That is one statement out of a lot of cables.

Mr. WHITNEY. That is all we need to do. That is what we did.

Mr. RAUSHENBUSH. We have already put in the record the other day the story of how impressed the British Treasury was with the power of a few banks and munition companies over here, when they came to the cancelation of contracts. Let me ask you this question: You remember that story, of course, and I do not want to put the cable in again, because we spent a lot of time on it——

Mr. LAMONT. Which cable?

Mr. RAUSHENBUSH. September 1916, to Morgan in London, pointing out [reading][1]:

> Effect of any action taken by British Government, which contractors believed unfair and arbitrary, would, in our judgment, be far-reaching, and might well go so far as to affect adversely and seriously further British financial operations in this country as well as to lead other manufacturers of munitions, etc., to seek to protect themselves in future negotiations by demanding higher prices and generally imposing onerous conditions.

We had a long story on that, and one to which I think you will assent, namely, as to the power of a few banks, with whom you were operating, on the British Government in that particular crisis. Is it not fair to suppose that, at this time—we are not in 1915, as I asked yesterday, but in late 1916—that at this time the combined banks and munition companies were so involved in a piece of machinery, that they had even a little influence with the United States Government?

Mr. LAMONT. I do not get the last part.

Mr. RAUSHENBUSH. I am trying to draw an analogy. We had a pretty good story, or at least I thought it was a pretty good story, that they had some influence with the British Government.

Mr. LAMONT. Who did?

Mr. RAUSHENBUSH. These few banks and munition companies, who happened to be in back of this situation, and it occurred to me that Morgans were placed in an unfortunate position in asking the British for about $30,000,000, which they had no legal right to ask, but the American banks would not be hurt and could go along with the necessary financing.

I am asking that question for information, you understand. If they had that much influence with the British Government to get them to put up $30,000,000, to which you had no right, could it not be inferred, with all this going on, that the banks and munition companies had a little influence with their own Government at the time?

---

[1] Previously entered as "Exhibit No. 2098", see Hearings, Part XXV, appendix, p. 7732.

Mr. **Lamont**. Mr. Raushenbush, what possibly could they ask of our Government?

Mr. **Raushenbush**. To be left alone.

Mr. **Lamont**. To be left alone to do what?

Mr. **Raushenbush**. You see the President at that time had asked for discretionary power to put on embargoes? I think that was introduced this morning.

Mr. **Whitney**. Were the records this morning not full of that situation?

Mr. **Raushenbush**. I did not happen to be here, myself.

Mr. **Whitney**. I listened very carefully, and it seems to me they were. We had nothing to do with it.

The **Chairman**. It was very complete this morning.

Mr. **Raushenbush**. I do not think there is any harm in asking the question.

The **Chairman**. Not at all.

Mr. **Lamont**. Not at all.

Mr. **Raushenbush**. Here the President asked for approval of discretionary power on embargoes, and he did not do it, as we know. I am asking if the banks and munition companies who were doing all this business, and who got into these various situations, and had power enough to influence the British Government a little, if they would not have enough power at the time to influence the American Government?

Mr. **Lamont**. Mr. Raushenbush, I should answer that by saying that if ever President Wilson had the slightest tenderness for bankers, big industrialists or munition makers, he did not show it. That is clear enough to me.

Mr. **Raushenbush**. Wait a minute, please.

Mr. **Lamont**. All right.

Mr. **Raushenbush**. Does one have to show everything by what one says, really? I mean, you get action by not taking action, Mr. Lamont. Do you see? Take not embargoing as a definite action. Of course it was.

Mr. **Lamont**. Mr. Raushenbush, as you said the other day, you taught school at one time, and you know more about the field of psychology than I do.

Mr. **Raushenbush**. I did not say that. I taught school.

Mr. **Lamont**. You taught school, but I am crediting you with the knowledge of psychology. But, Mr. Raushenbush, the Administration of Mr. Wilson, I should assume, had a very great regard for the general prosperity of the country, and I think they had a great regard, a pretty tender regard, for the feelings of the Southern States that wanted to sell their cotton, and the Western States that wanted to sell their wheat, but when it came down to tenderness toward bankers or munition manufacturers, I have never heard of it.

Mr. **Raushenbush**. Not in his mind?

Mr. **Lamont**. He showed everything to the contrary.

Mr. **Raushenbush**. Did he at any time do anything which restricted the activities of the bankers, either with respect to loans, credits, embargoes, or shipments of munitions, at any time in his Administration?

Mr. **Whitney.** One of the most interesting of the exhibits this morning, Mr. Raushenbush——

Mr. **Raushenbush.** Are you answering my question?

Mr. **Whitney.** I am about to try to [continuing statement] was a report, if I remember rightly, that the Department of Commerce made at the request of the State Department, and in that report, if I remember correctly, pointed out that the British were increasing tremendously their munition manufacturing facilities.

Mr. **Raushenbush.** And your own cables pointed that out?

Mr. **Whitney.** And our own cables pointed that out; and that, therefor, it seemed to me that the inference was, at the final end of that report, that it was proper and expedient to assume that it had an effect upon the export trade of this country. It must have influenced more things than the munitions makers.

Senator **Clark.** All it said, Mr. Whitney, was that the Government had really allowed the opportunity to pass to use the embargo weapon on munitions with greatest effectiveness.

Mr. **Whitney.** Exactly.

Senator **Clark.** We permitted England to infringe our rights for a year and a half, without using this powerful weapon at hand, and at the time the memorandum was written, after that measure had been passed by Congress, that the weapon would not have been as effective as when Great Britain depended on us in her need for munitions.

Mr. **Whitney.** As when they depended on us for them.

Senator **Clark.** That is true.

Mr. **Raushenbush.** There is also the story of the plant developments. They had gotten the plants going in the fall of 1916.

Mr. **Whitney.** I think so.

Mr. **Lamont.** You mean their plants at home?

Mr. **Raushenbush.** I mean their plants at home, and that was an effective threat, apparently, forcing our Commerce Department to say: "Let us not fool with this. Let us not hurt our own people by embargoing".

Mr. **Whitney.** How can you call that a threat, Mr. Raushenbush?

Mr. **Raushenbush.** Our business being taken away.

Mr. **Whitney.** This was a report of our own Department of Commerce, was it not?

Mr. **Raushenbush.** The two things are similar. It runs through your cables. "You better look out, because after all they are set over there and manufacturing." And the Department of Commerce is saying the same.

Mr. **Whitney.** I would like to see one of our cables which says that.

Mr. **Raushenbush.** In that language, you mean?

Mr. **Whitney.** Or that inference.

Mr. **Raushenbush.** You put it in the record yourself. You referred to the cable and said I had not finished it and you read it in, Mr. Whitney; that the developments were expanding for industrial purposes and consequently, note should be taken of it.

That was a situation which was effective over here, but it was not effective on the bankers. It was in the fall of 1916 that they had their own industrial development going ahead, and they could have cut off some of our trade, but that did not affect the rifle situation. The bankers and the munitions people in that case did not take that into consideration but they insisted upon and got their pound of flesh.

Mr. **Whitney.** You have also failed to mention the fact that the British Government wanted the rifles.

Mr. **Raushenbush.** That is all brought out in the argument, as to whether they did or not.

Mr. **Whitney.** Of course the record shows that they did.

Mr. **Raushenbush.** I do not see that at the moment, because they could have gotten a good many rifles, which they needed, without paying that terrifically high price.

INCREASINGLY CRITICAL SITUATION OF ALLIED FINANCING [1]

Mr. **Raushenbush.** There is a little question which I have here. About December 1, do you have any figures showing what your purchasing commitments were, that is, going through you? We have a figure of $388,000,000 at that time of outstanding purchasing commitments. Just for the British, I mean.

Mr. **Whitney.** I think somewhere in those cables that there is a statement that up to March 1 it was $100,000,000 a month, which would be approximately correct. We have never tried to bring down our contracts in that way because it is so difficult to do it.

Mr. **Raushenbush.** We have worked it out from our records.

Mr. **Whitney.** That would be about the same, would it not?

Mr. **Raushenbush.** There were some French commitments. Do you have a figure on that, about what the purchasing commitments were at that time?

Mr. **Whitney.** It is about $50,000,000 a month, roughly; a little over.

Mr. **Raushenbush.** But what I am trying to get at is, how many contracts they had already, which they had not paid off? That is what I am trying to get at.

Mr. **Whitney.** On the 1st of December?

Mr. **Raushenbush.** About the 1st of December.

Mr. **Whitney.** I can tell you what the payments were over the next 6 months, if that answers it.

Mr. **Raushenbush.** Have you got the totals?

Mr. **Whitney.** I have got the British and French. Do you want them read?

Mr. **Raushenbush.** Yes, sir.

Mr. **Whitney.** Up through May 1917 $705,000,000 paid for the British, being approximate figures, and $459,000,000 for the French.

Mr. **Raushenbush.** Those were payments?

Mr. **Whitney.** Those were for the next 6 months.

Mr. **Raushenbush.** A great many of the British requirements did not come through you at all, such as wheat, cotton, and so forth?

Mr. **Whitney.** The payments did but not the contracts.

Mr. **Raushenbush.** Our figure of $388,000,000 would not include that?

Mr. **Whitney.** I think our estimates given somewhere in these cables, if my memory is correct, were about one hundred million a month.

---

[1] See also "Exhibits Nos. 3192 through 3217", Hearings, Part XXX; and "Exhibits Nos. 3624 through 3637", Hearings, Part XXXI.

Here is a sentence out of a cable of December 5, despatched to Morgan in London:

> Payments under contracts closed through us are not excessive. We figure them approximately one hundred million monthly during the next 4 months.

Mr. Raushenbush. I am still asking the question, does that cover wheat, cotton, and so forth?

Mr. Whitney. No; but it says, "contracts closed through us."

Mr. Raushenbush. Could you give us any idea as to how much the British and French obligated themselves for in connection with such things as wheat, cotton, and so forth?

Mr. Whitney. I gave the total figures. Supposing it was $100,000,000 a month for the commercial agency payments. There were about $700,000,000 paid in the next 4 months, but I have not got them broken down that way because I do not know how those payments were handled actually. We estimated about $100,000,000 a month for 4 months. I should think your figures, based on the payments, were approximately correct. We have not figured it.

Mr. Raushenbush. We think they are correct, because we took them off the books.

Mr. Whitney. I do not doubt it, but I do not know.

Mr. Raushenbush. We want to see how much the British and French pledged themselves for, to see what kind of picture it was around December 1. The commitments for purchasing were $388,000,000 for the British alone, and if we add to that the French and all the other commitments, which Britain and France made for things, you would have a pretty big figure, at that time, of course, far bigger than this.

Mr. Whitney. You have forgotten one of the most important things, which I hate to bring up, namely, the question of exchange.

Mr. Raushenbush. I was coming to it, but let us get to it now.

Mr. Whitney. I think the question of what they had to do is really the pertinent question, is it not, Mr. Raushenbush?

Mr. Raushenbush. Yes.

Mr. Whitney. Rather than the contract payments, because there were sometimes delays and changes.

Mr. Raushenbush. I was trying to get at the definite commitments of purchases and the indefinite commitments of exchange. That combination is the one.

Mr. Whitney. Of course, the exchange problem was really the one which threw out the calculations which made the question difficult, because after the Federal Reserve Board ruling and other things, there was a great deal heavier pressure on exchange.

Mr. Raushenbush. Can we not get an agreement by saying that, by and large, the status of the British Treasury might be shown by the world value of the pound, which was dependent in these days on its peg in New York; that you could get a picture of the status of the British Treasury from the status of exchange?

Mr. Whitney. I do not think I understand what your question is.

Mr. Brown. By that time the full value of the pound sterling depended on the New York market, did it not? I do not say the ultimate value of it, which would be another problem, but speaking of the day-to-day value of the pound sterling in the neutral world, it depended on the New York quotation, did it not?

Mr. WHITNEY. I do not think I understand the question quite. The obvious need of the British Government was for dollars in New York. Is that what you mean?

Mr. BROWN. They also needed currency of other kinds, all over the world. They needed guilders and pesetas, and so forth?

Mr. WHITNEY. I suppose they did. You mean the merchants of Great Britain needed them?

Mr. BROWN. Yes. And the point at which sterling was supported was not in all sorts of neutral countries all over the world but on the New York market, was it not?

Mr. WHITNEY. I would not know what they did with the other currencies. There was obviously a need for dollars, but whether there was a need, such a need in the matter of their commitments to support the other currencies, I do not know.

Mr. BROWN. All the sterling bought in New York was not sterling which had been offered to American merchants in exchange for American goods, was it, Mr. Whitney?

Mr. WHITNEY. I would not know that, either. I am not trying to dodge, but frankly I do not understand what you are driving at.

Mr. BROWN. The question is whether the amounts of money spent on exchange in New York represented money spent in this country, or represented actual British commitments in other countries.

Mr. WHITNEY. You mean, cleared through the New York market?

Mr. BROWN. If Great Britain bought something in the Argentine and paid for it in sterling, the sterling was changed in New York for dollars and the Argentines sold the dollars for their own currency?

Mr. WHITNEY. It might have been, and one way or the other the purchases by Great Britain were on the American market for other markets, and if the other markets cleared through New York, obviously that would be the market, but whether they did or not I do not know.

Mr. BROWN. Except for cotton, there was not very much exported commodities being paid for in sterling in this country. The demand was to receive payment in dollars, was it not?

Mr. WHITNEY. That is correct; all payments under the contracts were in dollars.

Mr. BROWN. So that all the sterling which was being sold represented largely purchases outside the United States, did it not?

Mr. WHITNEY. Was there not any wheat being sold abroad?

Mr. BROWN. Was not that being sold for dollars direct?

Mr. WHITNEY. Cotton was being sold for dollars, so far as the planter went. It merely meant that they needed to draw sterling for the purpose of financing it, and if there was a credit, it would be the same theory again.

Mr. BROWN. There was no way of arriving at an exact figure, but the great mass of sterling which was bought, a great deal of it was for purchasing in the neutral world other than the United States?

Mr. WHITNEY. I do not get it.

Mr. MORGAN. Sterling being bought, you say. What classes of sterling were being bought? There was an immense amount of sterling being sold.

Mr. BROWN. Demand loan no. 1 was entirely used to buy sterling. The British Government was buying what somebody else was selling.

Mr. MORGAN. The British Government drew on us when they wanted the dollars. We did not know what they did with them.

Mr. BROWN. All the purchases of sterling on demand loan no. 1 were not British Government drafts on you, were they? They were in the market buying all the sterling which was offered, were they not?

Mr. MORGAN. They were in the market buying all the sterling that was offered. I see what you mean.

Mr. WHITNEY. We would have to go back and look up each individual draft to know where it came from; would we not?

Mr. BROWN. To get any accurate figure, but I wanted to know your memory, roughly, of the estimates of what represented foreign purchasing and what represented American purchases.

Mr. WHITNEY. If you are going on my memory, that is an easy answer.

Mr. MORGAN. Twenty years? We cannot do it.

Mr. WHITNEY. They show what we made the bills for. Those are their commitments. That we know with a fair degree of exactitude.

Mr. BROWN. Yes.

Mr. WHITNEY. Due to the benefit of hindsight. They did support exchange, unquestionably. Whether those purchases were actually made in this country or the purchases made somewhere else and cleared through that exchange market, I do not quite see what difference it makes.

Mr. BROWN. I do not know whether it makes any difference, but it is a question of what the fact is.

Mr. WHITNEY. I would not know. I could not possibly tell.

Mr. RAUSHENBUSH. Let us get some figures in the record about this time. We have figures in the record which show that between May 1916, and December 1, you had spent $450,000,000 pegging exchange.

Mr. WHITNEY. Doing what?

Mr. RAUSHENBUSH. Supporting sterling.

Mr. WHITNEY. Buying sterling.

Mr. RAUSHENBUSH. Buying sterling. Let us go ahead with it. With the result of pegging the exchange.

Mr. LAMONT. With what result?

Mr. RAUSHENBUSH. I added the words for Mr. Whitney's benefit, "with the result of pegging the exchange." Do you want to fight on that one?

Mr. WHITNEY. Not a bit. I just could not hear.

Mr. RAUSHENBUSH. Also figures to the effect that in December—it turned out your demands for sterling were heavier than you thought or had planned on—you spent in that one month $210,000,000 on exchange.

Mr. WHITNEY. We spent 40 or 50 million on exchange, I know, in one day.

Mr. RAUSHENBUSH. We make the total $210,000,000 in that month, which is at a far faster and heavier rate than in the previous months.

Mr. WHITNEY. There is no question, but do you want the answer on it?

Mr. RAUSHENBUSH. We would like to take it up in our own way, but if you have anything to add, we would be glad to get it.

Mr. **Whitney**. Go ahead.

Mr. **Raushenbush**. I offer for the record a letter from Mr. Warburg to Mr. Treman, dated November 23, 1916, in which he describes the feeling of the Federal Reserve Board to this extent [reading]:

> The Board did not feel that it should take the responsibility of advising the investors and it was thought that as long as there was a natural process of financing our foreign trade by a back-flow of securities into the hands of the investors, the United States were doing in effect a cash business which could only be considered a healthy one.

And so forth.

There are other things in there which need not stop us. However, that is offered for the record.

(The document referred to was marked "Exhibit No. 2586" and is included in the appendix on p. 8719.)

Mr. **Raushenbush**. Then we come to your cable of November 20, 1916, for H. P. Davison, from Morgan in London, which seems to describe one thing of some importance, which we find on the second page in our document here.

Mr. **Whitney**. What is the number?

Mr. **Lamont**. 26519?

Mr. **Raushenbush**. Correct. In the first paragraph it states [reading from "Exhibit No. 2587"]:

> Had lunch with Chancellor today, who says that during next 90 days he can collect between gold and securities enough to make together $1,000,000,000, and more securities if needed. Of course, he does not wish to use this gold.

And then asks for advice, since exchange has to be paid for in large quantities. The point we are coming to is this, in another paragraph [reading]:

> He has at present no obligations to the Allies beyond March 1, though he knows that in a few weeks before that date there will have again to be an international conference and an arrangement as to what they can get from Great Britain. All that will depend largely upon his American situation at that time, and that in turn will depend upon how much we can do for him between now and March 1 and our opinion of the outlook.

Is not that a fair statement at that time, that the Allies were dependent for their financing upon Great Britain, and that Great Britain was dependent upon the United States, American financing, and that boiled down to you? Is not that what it says?

Mr. **Lamont**. You speak as if that financing is the only resource. It was pointed out to us clearly that they had great stocks of gold which they were prepared to send over, we will repeat again, and we knew they were selling American securities constantly and getting British securities.

Mr. **Raushenbush**. It boils down from all of this that the other Allies, France, and Russia, looked to Great Britain, and then Great Britain looked to you?

Mr. **Lamont**. The bulk of it was on Great Britain.

Mr. **Raushenbush**. The Chancellor is saying that it is on Great Britain and, through Great Britain, it is on you.

Mr. **Lamont**. For dollars.

Mr. **Raushenbush**. Yes, sir.

Mr. **Whitney**. Did you read the first sentence of that?

Mr. **Raushenbush**. If not, I would be glad to. You mean about having lunch with the Chancellor?

Mr. **Whitney.** No; not that.

Mr. **Raushenbush.** That is not very important now. However, I read it as follows [reading]:

> Had lunch with Chancellor today, who says that during next 90 days he can collect between gold and securities enough to make together $1,000,000,000 and more securities if needed.

Mr. **Whitney.** It says "during the next 90 days."

Mr. **Raushenbush.** That is what he says.

Mr. **Whitney.** And "more securities if needed."

Mr. **Raushenbush.** That is what he says on November 20.

(The document referred to was marked "Exhibit 2587", and is included in the appendix on p. 8721.)

Mr. **Raushenbush.** Now, we come to a cable dated November 21, 1916, to Morgans in London, in which you tell them over there [reading from "Exhibit No. 2588"]:

> We confidently believed that last issue was on a basis which would show a profit to the public——

Mr. **Lamont.** What number is that, if you please?

Mr. **Raushenbush.** 31458.

Mr. **Lamont.** Oh, yes.

Mr. **Raushenbush** (reading):

> We confidently believed that last issue was on a basis which would show a profit to the public, but the requirements are so great and the public now aware of necessity of succeeding issues, that we are fearful that no issue on creditable terms will show profit although with lapse of few weeks conditions may so improve as to give us renewed hopes and courage as in past.

It says [reading]:

> * * * requirements are so great and the public now aware of necessity of succeeding issues that we are fearful that no issue on creditable terms will show profit. * * *

The thing had gotten to the place on November 21, apparently, that unless conditions improved appreciably——

Mr. **Lamont.** That is what it says.

Mr. **Raushenbush.** That is a pretty pessimistic statement, is it not?

Mr. **Whitney.** The 21st?

Mr. **Raushenbush.** The 21st; yes, sir.

Mr. **Lamont.** After a time they did improve, late December.

Mr. **Raushenbush.** We will get to that situation later.

That cablegram is offered for the record.

(The document referred to was marked "Exhibit No. 2588", and is included in the appendix on p. 8722.)

Mr. **Raushenbush.** Then a cable of November 22, 1916, to Morgan in London, in which you say [reading from "Exhibit No. 2589"]:

> Anticipated payments tomorrow will completely exhaust and probably will require us to reopen no. 1 and no. 2 loans, reluctant as we are to do so so soon after conclusion of last United Kingdom loan operation, being apprehensive as to sentimental effect upon banks and bankers in this market.

That meant that the U. K. loan, which had come along November 1, did it not, had sufficed only up to November 22, and that you would again have to reopen your demand loans and start loaning out of your own pockets to these people? Is not that what it is?

Mr. **Whitney**. This meant that the $114,000,000 had been spent, and that we were going to open the demand loans. So that we say [reading]:

> In view of all the foregoing, kindly cable instructions promptly to ship from Ottawa $25,000,000 gold and be prepared to ship a second $25,000,000 upon cable advice.

Mr. **Raushenbush**. Yes, sir; that cable is offered for the record in its entirety.

(The document referred to was marked "Exhibit No. 2589" and is included in the appendix on p. 8724.)

Mr. **Raushenbush**. I want to see if we are quite clear on this. Here was a loan issued November 1 for $300,000,000, and by November 22 it was already paid out, was it not, to the extent where you had to start opening up credits again?

Mr. **Whitney**. $10,000,000 a day.

Mr. **Raushenbush**. $10,000,000 a day. A little faster.

Mr. **Whitney**. A little faster. That was because of exchange.

Mr. **Olds**. Part of it was used to pay off the other loan.

Mr. **Raushenbush**. Part of it was used to pay off the other loan.

Mr. **Whitney**. There was $114,000,000 left.

Mr. **Raushenbush**. Next is a cable from Morgan in London to H. P. Davison, dated November 23, 1916, which seems to answer a previous cable, in which the situation seems to be set out pretty frankly; that is, the Chancellor's position. It states (reading):

> If Chancellor of the Exchequer cannot feel it probable that he can put out another loan between now and January 1, he is in grave doubt whether he ought to proceed in exhausting his available gold and American securities, and matter would have to be subject of discussion in a Cabinet and possibly among all the Allies. Chancellor regards early issue of unsecured loan as of gravest importance.

That cable is offered for the record.

(The document referred to was marked "Exhibit No. 2590" and is included in the appendix on p. 8724.)

Mr. **Raushenbush**. There is an indication there, and in the next cable, that he is going to need $1,000,000,000 up to March 31. That is in the next paragraph at the end of all this—

> You can see this makes it $1,000,000,000—

and that the British have 1 billion in gold and available securities but do not want to put them up. They want an unsecured loan.

Mr. **Whitney**. Which we tell them is impossible.

Mr. **Raushenbush**. Which you have been telling him is impossible, and I think again you do.

Mr. **Whitney**. This cable, Mr. Raushenbush, of course, is an answer to an inquiry from us to Mr. Morgan to be a little more detailed in the reference back here to $1,000,000,000 which he can get within 90 days. These are the immediately available resources.

Mr. **Raushenbush**. Yes, sir. Then they tell you (referring to exhibit 2590):

> I realize fully the discouragement of seeing the issues drag, and the difficulty of putting another one out imediately on top of the last, which has not yet been digested, but if there is any way in which it can be forced between now and January 1, I believe it is essential that it should be done.

The pressure was getting terriffic here, was it not? They were forcing one issue after another before they could be swallowed or digested.

Mr. Whitney. Pressure both ways.

Mr. Raushenbush. What do you mean?

Mr. Whitney. Pressure on us to put out another loan and pressure on our part to tell them it could not be done and they would have to look some place to see where they were going.

Mr. Raushenbush. And pressure by you upon the bankers to go along?

Mr. Whitney. None whatever.

Mr. Raushenbush. There is some of that in the letter.

A cable of November 23, 1916, from Morgan in London to H. P. Davison, which shortens the problem down to mid-January, apparently, and says on November 23 that the requirements up to mid-January would be $450,000,000.

Mr. Whitney. Which cable is this, please?

Mr. Raushenbush. No. 26592.

(The document referred to was marked "Exhibit No. 2591" and is included in the appendix on p. 8725.)

Mr. Raushenbush. He says if, in order to get that, he has to use a large part of his immediately available American assets, then he will have to go in for much more economy. In other words, he does not want to put up the American securities he has got over there available for these loans, and is saying that rather than do that, rather than give up the rest of the American securities, they have got over there, maybe they will economize and not buy as much as before. Is not that what you get out of it?

Mr. Whitney. That was the alternative. They had to use immediately available resources in the way of gold or securities or they had to economize.

Mr. Raushenbush. Then a cable of November 23, 1916, no. 31592 is offered for the record.

(The document referred to was marked "Exhibit No. 2592" and is included in the appendix on p. 8725.)

Mr. Raushenbush. In that cable you tell him pretty frankly [reading]:

> We are able to offer no encouragement whatsoever in regard to any new issues, either secured or unsecured, prior to January 1. Not only are present issue draggy but you will recall that it is the period of the year when money works close with banking institutions all over the country. If immediately after the first of the year we find that situation has changed, you, of course, can rely upon our making every effort; but to attempt another issue before January 1 unless there is a radical change for the better in the situation, which we do not anticipate, would be to invite failure and discredit.

This was all before the Federal Reserve Board warning, was it not?

Mr. Whitney. You will remember call money went up to 15 percent.

Mr. Raushenbush. Then in paragraph numbered 4, it states [reading]:

> You state the Chancellor's view is that if he must pursue plan as just set forth, he must then reconsider whole subject with a view to rigid economy. Serious as such a step would be we can see nothing else to be done with the situation as it is over here today. You state that Chancellor is in grave

doubt as to whether he ought to proceed in using up his available quick assets over here, yet it seems to us that there is no alternative, always provided the total amount to meet is as large as stated and provided further that Exchequer bill resources are as we apprehend, not likely to be large for the present.

Mr. WHITNEY. That is what I was trying to remember when we told them we did not expect any large sale of Treasury bills.

Mr. RAUSHENBUSH. Cutting down and economizing would have meant definitely a setback in the war, would it not?

Mr. WHITNEY. It depended upon how much their own resources had been developed.

Mr. LAMONT. There are two comments which might be made upon that, Mr. Raushenbush. One is that they had planned from the start of the war to develop their own resources as to finished munitions in England, as rapidly as possible, and they were accomplishing that end. The other is that they were naturally building up munition factories in Canada.

Mr. BROWN. Yes; but, Mr. Lamont, a Government as hard-pressed as Great Britain was not going to strain its resources in the United States to buy things it could do without, was it? What they were buying was essential. If they had had to cut down on that, they would have to cut down on essentials?

Mr. WHITNEY. Perhaps an answer to that is made in a cable sent to us by Mr. Morgan on the 23rd day of November, which referred to the cable to which the large one was an answer. It says [reading from "Exhibit No. 2591"]:

This, of course, he [the Chancellor] does not want to do because it might interfere with the progress of the war.

It is the answer to your question pretty flatly.

Mr. RAUSHENBUSH. Yes. Then we find this supposed answer of November 24, 1916, which leaves out the questions, paragraphs 4 and 5, or at least they do not seem to be in the cable here, so that we do not know what the comment of the Chancellor on the economy program was. That cable of November 24, 1916, from Morgan in London is offered for the record with appropriate number.

(The document referred to was marked "Exhibit No. 2593" and is included in the appendix on p. 8727.)

Mr. RAUSHENBUSH. On November 25, 1916, you show an interest in subsidiary financing. Did anything ever come from that subsidiary financing which was discussed, and the financing of British municipals and the like?

Mr. WHITNEY. No; nothing did, except to this extent: As far as the London municipals are concerned, as you know, the enabling legislation to make such issues had been passed, and plans were made and pretty well along by the time the United States got into the war, to do that financing. As far as the Canadian Pacific Railway is concerned, we were practically ready to go on the 16th of April, and we held them up at the request of the Secretary of the Treasury because he had certain United States financing to do, so that they did not definitely come up, but they were ready to be done.

Mr. RAUSHENBUSH. They were really trying to find every possible way of raising money, and you even discussed the matter of financing small municipals at the time?

Mr. WHITNEY. Yes, sir.

PROPOSED ISSUE OF BRITISH AND FRENCH TREASURY BILLS[1]

Mr. Raushenbush. At this point the discussion of these Treasury bills of the British and French was suggested, was it not?

Mr. Lamont. Back early in November, was it not?

Mr. Raushenbush. You mean October?

Mr. Lamont. Perhaps late in October. I do not recall. The first suggestion, my people tell me, was in October.

Mr. Raushenbush. Was in October. The point of those Treasury bills, as far as the prices went and the Chancellor's need for money, was that these Treasury bills supposedly would be unsecured, would they not? As we get the picture, they would be a floating amount that you could buy in from time to time and issue new ones, and keep it up to some figure which was discussed. I think $300,000,000 was the figure in your cables, and, as I said, there was some report——

Mr. Whitney. You have turned to something which we apprehended (quoting from p. 963 of Morgan document):

> We have completed arrangements, respectively, with the British and French Governments whereby we shall be in a position, on December 1, to supply for investment Treasury Bills of the two respective Governments, in the form of the specimen note attached hereto, which is substantially along the lines of New York City revenue bills.

They are just like the United States Treasury bills, or the British Exchequer bills.

Going back to October, the original suggestion was——

Mr. Raushenbush. This is October 20, is it?

Mr. Whitney. Yes, sir; October 20.

Mr. Raushenbush. The cablegram of November 25, 1916, no. 31674 is offered for the record.

(The document referred to was marked "Exhibit No. 2594" and is included in the appendix on p. 8728.)

Mr. Raushenbush. Let us read the second paragraph of the cable of October 20, 1916, the whole of which will be offered for the record.

(The document referred to was marked "Exhibit No. 2595" and is included in the appendix on p. 8729.)

Mr. Whitney. The first and second parts [reading]:

> First, let us try to market within a reasonable period by selling them over the counter, say, $300,000,000 of British Exchequer bills running anywhere from 60 days to 1 year and assorted over various maturities in whatever way we might determine at the time of sale.
>
> Second, let these bills be secured not by any indenture or trustee, but at most by formal statement from this firm that we had allocated between $350,000,000 and $400,000,000 of American and neutral securities against these bills. If, when we get closer to the operation, which of course would not begin until the new loan is out of the way, we found that we could peddle out bills unsecured and even without any reference to security, then so much the better, but we do not deem that probable.

Do you want to read the next one?

Mr. Raushenbush. I do not think we need that one. But as the operations went on, the security element dropped, did it not?

Mr. Lamont. Yes; and our own idea as to volume dropped.

Mr. Raushenbush. And your own idea as to volume dropped; all right. Now, we find a cable here dated November 20, 1916, despatched from H. P. Davison to Mr. J. P. Morgan in London, reporting that he had talked with the Federal Reserve Board about the French acceptance credit, and also reporting their attitude toward the Treasury bills, meaning these bills, we take it.

---

[1] See also "Exhibits Nos. 3134 through 3156 and 3218", Hearings, Part XXX.

That cablegram is offered for the record.

(The document referred to was marked "Exhibit No. 2596" and is included in the appendix on p. 8730.)

Mr. Raushenbush. That cable reads in part as follows [reading]:

> However, they gave me to understand they would take no steps at this time and would confer with me before doing so, should they decide to make statement. Afterwards had an interview with Woodrow Wilson which was altogether cordial and rather more encouraging, but on the whole my trip to Washington does not increase my hopes for easy future financing. However, no use speculating this subject; only thing we can do is to continue to do our best.

Then there are some cables which I offer for the record, in which Mr. Davison cables to France and Britain, trying to get the figures of their external and internal debt and the relation between their cables of November 20, and the reply of November 21.

Mr. Whitney. At the request of the President?

Mr. Raushenbush. At the request of the President; yes, sir. There is also one of November 23, 1916, in reply to that.

(The documents referred to were marked "Exhibits Nos. 2597, 2598, and 2599", and are included in the appendix o npp. 8730 and 8731.)

Mr. Raushenbush. I might say for the record that there are also two cablegrams of the same date, November 23, 1916, which are also offered for the record.

(The documents referred to were marked "Exhibits Nos. 2600, 2601, and 2602", and are included in the appendix on p. 8731.)

Mr. Raushenbush. Now, we come to a report of the Federal Reserve Board meeting which led to that warning, and we get a picture of it again through Mr. Warburg in a letter to Mr. Strong, Governor Strong, which letter I offer for the record, being under date of November 23, 1916.

(The document referred to was marked "Exhibit No. 2603", and is included in the appendix on p. 8732.)

Mr. Raushenbush. Mr. Warburg in his letter to Governor Strong states in part as follows [reading]:

> I have just finished dictating a letter to Mr. Treman, in which I give him the meat of our last conference with the Advisory Council and also of our meeting with Mr. Davison, who was here last Saturday.
>
> As you know, there has been going on quite an active press campaign, the object of which was to show that unless we granted foreign credits quite freely, the country ran the risk of being choked with gold with the attendant consequences of inflation of prices and credits.

Then the following paragraph appears later in the same letter [reading]:

> Davison took the point of view that they only wanted to do what was good for the country, but that the British Government was buying about $10,000,000 worth a day, and if we did not place these loans, we were taking the responsibility of cutting down the trade of the country—"a very serious responsibility, as we were now in a fair way of becoming the masters of the world." The more we stimulated this trade and the more loans we made to these foreign countries the more would we increase our predominance.
>
> Governor Harding (who had taken the precaution during the last weeks to place himself in touch with the leading authorities in questions of foreign policy—

Mr. **Lamont**. Governor who?

Mr. **Raushenbush**. Harding [continuing reading from "Exhibit No. 2603"]:

> in order to be sure that we were acting in fullest accord with what generally would be considered the best interest of the country) pointed out to Mr. Davison that there was some danger of a creditor becoming so much involved with one debtor that finally, no matter whether the creditor wanted to or not, he would have to go in deeper and deeper. In other words, while you thought you had the bull by the tail, as a matter of fact, the bull had you by the tail. In this case, it is John Bull who would have us by the tail.

Mr. **Lamont**. Does he put that in the letter?

Mr. **Raushenbush**. Certainly; that is not my language. That is Governor Harding's and not Mr. Warburg's.

Mr. **Lamont**. This is Governor Harding's letter?

Mr. **Raushenbush**. No; he is quoting Governor Harding. He has apparently been seeing the leading authorities in the country on finance and points out to Mr. Davison—

> that there was some danger of a creditor becoming so much involved with one debtor that finally, no matter whether the creditor wanted to or not, he would have to go in deeper and deeper. In other words, while you thought you had the bull by the tail, as a matter of fact, the bull had you by the tail. In this case, it is John Bull who would have us by the tail.

Do you think Governor Harding was entirely incorrect in summarizing the possibilities of the situation at that time?

Mr. **Lamont**. Mr. Raushenbush, I do not think that we should describe the situation in the language that he utilizes there, largely because, as you have pointed out, in these cables, and as we have said again and again, the loans that we were setting up were secured loans, with the possible exception of this Treasury bill operation which never took place.

Mr. **Raushenbush**. Which was the one under discussion, however, at this time, and which you tried hard to put over up to that time. That is the case?

Mr. **Lamont**. Certainly.

Mr. **Raushenbush**. Here is a fair analysis by a man whose financial judgment, or patriotism, or what you will, is not particularly in question, and who has just been consulting the leading authorities on foreign affairs on that, and he offers that suggestion and

> pointed out to Mr. Davison that there was some danger of a creditor becoming so much involved with one debtor that finally, no matter whether the creditor wanted to or not, he would have to go in deeper and deeper * * *

All I was asking was as to whether that did not seem a perfectly reasonable analysis, since that was taking place and developing at that time?

Mr. **Lamont**. Very likely. Governor Harding was a very sincere man and well informed. I am not sure to what extent he had an idea of the resources of the British Government in the way of gold and securities.

Mr. **Raushenbush**. It goes on to say [reading from "Exhibit No. 2603"]:

> The discussion with Davison was very pleasant and led to no definite conclusions, which I believe he wanted to avoid. He understood, however, our point of view. While he pointed out to us that we had a duty to finance this trade, he could not answer us when we pointed out that we were financing 10 days according to his own statement and that he could figure

> out for himself the tremendous amounts that this country would have to take in foreign loans if his argument were to prevail that this trade ought to be continued indefinitely and by all means by continuing loans. He answered that, of course, they would not go beyond a reasonable amount, but I believe we have lost what was our standard for what is reasonable and what unreasonable; and, moreover, the further we go the more difficult it will be to stop.
>
> Men like Wing, Rue, Forgan, and Fleishacker all shared these views, and as to the foreign acceptance credits they went in their recommendation even further than the Board wishes to go.

Then, Mr. Chairman, we turn the record from these cables a minute, we turn to the diary of Mr. Hamlin, a member of the Federal Reserve Board, and he records an entry in regard to these British exchequer bills that we are now talking about on November 19, 1916 [reading]:

> Interview of Board with Davison as to.
> Harding disturbed at remark of.
> Board tells Davison may have to issue statement.
> Lansing says Board should go slow in approving unliquid unsecured.

That is on November 19.

Then on November 20 are some further entries:

> New York Tribune says banks will take one billion dollars of these notes.

Mr. LAMONT. One billion?

Mr. RAUSHENBUSH. One billion; yes, sir.

Mr. WHITNEY. Which notes?

Mr. RAUSHENBUSH. The British Exchequer notes we are talking about.

Mr. WHITNEY. One billion?

Mr. RAUSHENBUSH. Yes, sir.

Mr. MORGAN. The Tribune was misinformed.

Mr. RAUSHENBUSH (continuing reading from Hamlin diary):

> Harding called up Lamont who said New York Tribune statement went too far.

Mr. LAMONT. I am glad I made a conservative statement, Mr. Raushenbush.

Mr. RAUSHENBUSH. Have you ever done that at any other time, Mr. Lamont?

Mr. LAMONT. Saying that he called me up?

Mr. RAUSHENBUSH. Saying that the Tribune went too far. It states:

> Harding calls up Lamont—

meaning you—

> who said New York Tribune statement went too far.
>
> Harding tells Lamont Board may have to issue public statement.
>
> Lamont says if this is done they may have to change their plan. Says none will be offered before December 1 and then only 10 or 15 million dollars.
>
> Harding says as Davison consulted Board, Board thought it fair to say it might make a public statement.
>
> Lamont asked no action be taken without letting him know.
>
> Harding said would report this request to Board.

Here is another part of it [reading]:

> Voted that Harding inform President of situation.
>
> Glass told Board it ought to make a public statement.
>
> Board prepared letter of warning to F. R. agents.
>
> Tried to get interview with President but no reply received to our request to Tumulty.

Board voted to send letter

Lamont wired that would make announcement that issue would be limited one, and not unlimited as stated by New York Tribune.

TREASURY BILLS—INTERVENTION OF PRESIDENT WILSON [1]

Mr. **Raushenbush.** Now we have here a letter from Mr. Harding to the President, on November 27, 1916, which I offer for the record with appropriate number.

That letter reads as follows:

> Dear Mr. President: Will you permit me to thank you for your memorandum and to say that the Board has strengthened its statement somewhat and that it will be given to the press for publication tomorrow morning.
>
> I enclose a copy of the revised statement with the new matter underlined.

We want to offer for the record here a copy of the statement, with the new matter underlined in italics, the portion added after Mr. Harding's conference with the President.

(The letter and the enclosure referred to were collectively marked "Exhibit No. 2604", and are included in the appendix on p. 8734.)

Mr. **Raushenbush.** We want to offer for the record also a letter from Woodrow Wilson, dated the same day, November 27, 1916, to Mr. Harding, which reads as follows:

> My Dear Mr. Harding: Thank you sincerely for the revised copy of the statement. The addition seems to meet very adequately what I had in mind.
>
> Cordially and sincerely yours,

(The document referred to was marked "Exhibit No. 2605" and appears in full in the text.)

Mr. **Raushenbush.** You had a copy of it a minute ago, Mr. Whitney, the added portion.

Mr. **Whitney.** I never knew about the added portion. Which is the final one?

Mr. **Raushenbush.** The one with the added portion. If you have got it in front of you, I will continue.

Mr. **Whitney.** This is merely the press release which we have got.

Mr. **Raushenbush.** After discussing this question of credits, the added portion is [reading from "Exhibit No. 2604"]:

> The Board deems—

Mr. **Lamont.** About what part of the release is it in?

Mr. **Raushenbush.** Near the end.

Mr. **Lamont.** Thank you.

Mr. **Raushenbush** (continuing reading):

> The Board deems it, therefore, its duty to caution the member banks that it does not regard it in the interest of the country at this time that they invest in foreign Treasury bills of this character.

Mr. **Whitney.** Is that the added stuff?

Mr. **Raushenbush.** I am just reading the added stuff [continuing reading]:

> The Board does not consider that it is called upon to advise private investors but as the United States is fast becoming the banker of foreign countries in all parts of the world, it takes occasion to suggest that the investor should receive full and authoritative data, particularly in the case of unsecured loans, in order that he may judge the future intelligently in the light of present conditions and in conjunction with the economic developments of the past.

---

[1] See also "Exhibit No. 3218", Hearings, Part XXX.

Mr. WHITNEY. That is almost instructions to educate the public.

Mr. RAUSHENBUSH. It is stronger than that, if you will read through the rest. That is the only place, I think we can agree, Mr. Whitney and Mr. Morgan, where there is something definite, saying to the member banks, "Look out; it is not in the interest of the country to use this stuff."

Mr. WHITNEY. Yes, sir.

Mr. RAUSHENBUSH. And to the private investor, "Look out." There is nothing in the general discussion in the rest of it which is at all as emphatic as that.

Mr. LAMONT. That addition ends with the word "past"?

Mr. RAUSHENBUSH. With the words "economic developments of the past"; yes, sir.

Then we come to some interesting things here, Mr. Chairman, again in Mr. Hamlin's diary. I missed reading his diary of November 25 before [reading]:

> Harding has interview with President.
>
> Harding said had hoped Board would make announcement, but had not felt like suggesting it. He would read out statement and write us Monday as to it.

Then his diary of November 27, 1916, states [reading]:

> Governor Harding reads confidential letters from President.
>
> President says letters not strong enough.
>
> Says would be very embarrassing to have banks invest in this kind of security, if there should be any change in our foreign policy.
>
> Draft then revised.

What do you make of this entry there, describing the report that Harding makes back to the Board, after he has been told by the Board to go see the President?

It had been voted that he do it, and he has this interchange of correspondence with the President, and he comes back and the President says the letter is not strong enough, and he quotes the President as saying [reading]:

> Would be very embarrassing to have banks invest in this kind of security, if there should be any change in our foreign policy.

What do you make of it?

Mr. LAMONT. That is Mr. Hamlin's diary, is it not?

Mr. RAUSHENBUSH. That is right.

Mr. LAMONT. I would think he could interpret it better.

Mr. RAUSHENBUSH. We have talked to him about it, but we are trying to get your reaction to that. Mr. Morgan, you know about that?

Mr. MORGAN. My reaction is that it is what the President said to Mr. Hamlin or the Board.

Mr. RAUSHENBUSH. Were you in London at the time, or here?

Mr. MORGAN. I was in London.

Mr. RAUSHENBUSH. How about you, Mr. Lamont?

Mr. LAMONT. I was here, on the job.

Mr. RAUSHENBUSH. When that was said to be the most serious thing happening to finance, what did you think? Did you see the foreign angle of it, the President saying [reading]:

> It would be very embarrassing to have the banks invest in this kind of security, if there should be any change in our foreign policy?

Mr. LAMONT. What is your interpretation of it?

Mr. RAUSHENBUSH. I asked first.

Mr. LAMONT. I go back to our friend Charles S. Hamlin. I do not know what he means. What is your guess? If you will make a guess, I will see whether I can agree with you or not.

Mr. RAUSHENBUSH. You did not see any foreign angle on this at all as to keeping the banks liquid?

Mr. LAMONT. Of course they must always be liquid.

Mr. RAUSHENBUSH. Oh, but they had not been liquid up to this point.

Mr. LAMONT. Mr. Whitney has something here which may bear on that.

Mr. RAUSHENBUSH. What is that?

Mr. WHITNEY. You asked us what we thought of it?

Mr. LAMONT. This is the Hamlin diary about the foreign angle.

Mr. RAUSHENBUSH. About the foreign angle.

Mr. LAMONT. He said, if our foreign policy should change, whether——

Mr. WHITNEY. He wants us to comment about what it meant?

Mr. LAMONT. Yes, sir.

Mr. WHITNEY. We did not know about Hamlin's diary, did we?

Mr. LAMONT. No, sir; but he is asking us to interpret it.

Mr. RAUSHENBUSH. I was asking if you had gotten any foreign angle on it, that there might be a change in our foreign policy in 1917?

Mr. LAMONT. No; we were not in the confidences of the Administration you know, Mr. Raushenbush, at all.

The CHAIRMAN. But you were in the confidences of the officers of the Federal Reserve Bank, were you not, or the Federal Reserve Board?

Mr. LAMONT. We knew Governor Strong very well, and, as it appears here, we knew Governor Harding, and we knew personally most of the members of the Board.

The CHAIRMAN. But the Governor was close and enjoyed the confidences of the President evidently, did he not?

Mr. WHITNEY. What is he asking?

Mr. LAMONT. He is asking what we thought of Hamlin's comment on this foreign policy at the time.

Mr. RAUSHENBUSH. That is not it.

Mr. WHITNEY. I misunderstood it.

Mr. RAUSHENBUSH. It was whether you, at the time this announcement or warning came out to "clear the decks" if you will, or keep the banks liquid, whether you had seen the possibility of a change in our foreign policy? That was the only question asked.

Mr. LAMONT. A change in our foreign policy?

Mr. RAUSHENBUSH. I do not know; I am asking.

Mr. LAMONT. We knew nothing except what was in the public press at the time. The public press was filled with the fact that our State Department, as Senator Clark has shown, was having a controversy over contraband, and there was a little peace talk about this time, was there not?

Mr. RAUSHENBUSH. Not on November 27.

Mr. Whitney. Do I understand, Mr. Raushenbush, you are asking us what we thought at the time, or what we think now?

Mr. Raushenbush. At the time of the foreign angle.

Mr. Lamont. As I understand it, Mr Raushenbush is asking us whether we had any intimation that the Administration was going to change its foreign policy. Is not that your question?

Mr. Raushenbush. It was not even as specific as that. It was, whether you saw any angle or change in foreign policy involved in the order from the Federal Reserve Board which practically warned the banks to keep liquid and stay clear.

Mr. Lamont. No; not unless Mr. Whitney's projected allusion here, to certain members of the Federal Reserve Board, bears on that. Is that what you mean?

Mr. Raushenbush. I do not remember——

Mr. Lamont. I thought that you meant, Mr. Raushenbush—and you will please correct me if I am wrong—did we have the slightest intimation of any kind that the Administration was going to make some radical change in its policy? The answer to that is we did not have the slightest.

Mr. Raushenbush. Did you give it any interpretation, that it might have?

Mr. Morgan. So far as I can make out, we never knew the facts. This is in Mr. Hamlin's diary and was not a part of the public statement.

Mr. Raushenbush. No; it was not; but your people spent a lot of time interpreting the public statement.

Mr. Morgan. It was not in the public statement that they were contemplating a change in policy, was it?

Mr. Raushenbush. No; but what did you see in it outside of a warning to investors?

Mr. Morgan. Mr. Raushenbush, I am afraid I am too unsuspicious, and when I read a thing, I think it means what it says there. Maybe I am too unsuspicious.

Mr. Raushenbush. That is all right speaking for yourself, Mr. Morgan, but your office thinks things out and tries to figure what things mean.

Mr. Morgan. I do not waste any time on that. I see a thing and if it means something plain and simple, I say it means that.

Mr. Raushenbush. What does this mean?

Mr. Morgan. I do not know what it means.

Mr. Lamont. Mr. Raushenbush, we were very much disappointed when the Federal Reserve Board handed down this ruling, very much disappointed—there is no doubt about that—because we thought this might be a handicap on additional financing.

Some of our boys handed me a note saying that our cables show that our fear in regard to the Federal Reserve Board's action was not in our minds concerning the change of foreign policy. I do not know what the cables are.

Mr. Raushenbush. I was asking about information. I warned you that I was going to try to get information today.

Mr. Lamont. According to my recollection, we did not have the slightest intimation of any change.

Mr. RAUSHENBUSH. You wired this whole thing over to London in a cable dated November 27, 1916, which I offer for the record; and at the same time, or a little bit before that, on November 24, 1916, there is a letter with regard to going ahead with these Treasury bills, being addressed to Mr. Seward Prosser, vice president of the Bankers Trust Co. of New York, which I offer for the record; also a wire to Mr. Anderson of the Bank of California.

Those are not important. They are just letting them know.

(The letter of Nov. 24, 1916, above referred to, was marked "Exhibit No. 2606", and is included in the appendix on p. 8735; the telegram of Nov. 25, 1916, above referred to, was marked "Exhibit No. 2607" and is included in the appendix on p. 2736; the letter of Nov. 27, 1916, above referred to, was marked "Exhibit No. 2608", and is included in the appendix on p. 2736.)

Mr. RAUSHENBUSH. You cabled the statement in full to London, under date of November 27, 1916, and that cable has already been offered for the record?

Mr. LAMONT. Yes.

TREASURY BILLS—MORGAN'S FIRST REACTION [1]

Mr. RAUSHENBUSH. Then on November 28, 1916, which was a day after this happened, you cabled to Morgan in London in part as follows [reading from "Exhibit No. 2609"]:

> Statement of Federal Reserve Board cabled you last night prominently displayed in our newspapers all over country and has caused great excitement in financial circles here. Comment is to effect that Board has gone far beyond its proper function in attempting to advise individual American investors to refrain from foreign loans. At a meeting of several prominent bankers this morning it was expressed opinion of all that statement is product of a certain gentleman who hopes that his efforts will be effective in forwarding peace propaganda being made by his native country. Regardless of the motives lying back of statement, we must recognize this as the most serious financial development in this country since the outbreak of the war and one likely to be of far reaching consequence. Please make this fact plain to the authorities so that they may consider whole situation in its grave aspects. All foreign loans were under pressure today, the Anglo-French 5's declining to 94¼ and interest, the United Kingdom 2-year 5 percent to 98⅞ and interest, the 3-year 5½ percent to 99 and interest, and the 5-year 5½ percent to 98⅛ and interest. The City of Paris 6 percent were the weakest and at their low point of 96⅜ and interest were off over 1 percent from yesterday's close. They closed slightly up at 97 as against issue price of 98¾. The American Foreign Securities Co. notes declined ¼ percent.
>
> For your information we plan to carry out program of having British and French Treasury bills available for sale December 1, but in view of Federal Reserve Board statement are convinced that sales will be negligible at any rate at start.
>
> For practical purposes Chancellor of the Exchequer must in his calculations disregard Treasury bills entirely relying for his future requirements until situation radically changes upon his available supplies of gold and American securities for as he must realize this weighty statement from Government banking heads expressly requesting American investors to refrain from buying allied obligations, postpones by still further period possibility of any new British, French, or Allied loan here. Of course, situation may change but at present outlook is very dark, and we should now doubt whether it would be possible even to consider any fresh loan operation of importance until well after the turn of the year. Every effort, as you must realize, will be made by us and our associates by educational processes to counteract throughout the country statement just issued, but we have got to begin at the bottom of the hill once more, and it will be a long slow process with very much depending

---

[1] See also "Exhibits Nos. 3192 through 3218", Hearings, Part XXX.

> upon future attitude of our authorities. Meanwhile, we can see no way except for your authorities to consider ways and means for immediate curtailment of purchases letting such action be announced without rancor but explicitly with possible good effert upon American attitude.

Then in the next paragraph of the same cablegram you state [reading]:

> Exchange situation is, of course, very grave, and we have bought for you today almost £4,000,000 of exchange. We cannot, of course, maintain this pace even for a few days. We will cable you again on this particular aspect referring to the guaranty of exchange on American deposits in London.
>
> We wish this cable to make clear the fact that despite our most strenuous efforts this Federal Reserve Board statement has brought about such a radical change for the worse in the whole situation that from this time on until further notice authorities must rely for their requirements solely upon their gold, their American securities, and the various special deals along lines of railway shares and the others that we have already discussed.

And so forth.

(The document referred to was marked "Exhibit No. 2609" and is included in the appendix on p. 8738.)

So, not only exchange over here, but everything had gotten worse, because of this statement, and the whole structure of things continued getting worse, until the whole situation was seriously threatened?

Mr. LAMONT. For the time being it had a very adverse effect; there is no doubt about that.

Mr. RAUSHENBUSH. This cablegram states [reading from "Exhibit No. 2609"]:

> We must recognize this as the most serious financial development in this country since the outbreak of the war * * *.

Mr. LAMONT. That is the reason we cabled and insisted they must be prepared to go ahead and ship any amount of gold and securities.

Mr. RAUSHENBUSH. Then you do in this cable seem to indicate a connection, which you have had manifest at various times, a connection between these transactions and the purchases and public sentiment?

Mr. LAMONT. Where is that?

Mr. RAUSHENBUSH. It is toward the end of the second paragraph as we have it here.

> The financial situation seems now to be as bad as everything we have said before, and we can see no way except for your authorities—

meaning the Chancellor of the Exchequer, I take it—

> to consider ways and means for immediate curtailment of purchases.

Mr. LAMONT. Is that in the cable?

The CHAIRMAN. Second paragraph.

Mr. RAUSHENBUSH (reading from "Exhibit No. 2609"):

> Meanwhile we can see no way except for your authorities to consider ways and means for immediate curtailment of purchases letting such action be announced without rancour but explicitly with possible good effect upon American attitude.

Mr. LAMONT. Of course you must remember, Mr. Raushenbush—of course you do—that you called attention to the two affirmative statements in the Federal Reserve Board's statement, one of which was almost instructions to the banks not to buy the Treasury bills; and, the second one was, the advice given at the instruction of the President, which of course no one knew at the time, for the investors not to buy. Of course, that was interpreted in this country as a very definite criticism of the goodness of the obligations of Britain and France.

Mr. RAUSHENBUSH. I understand that.

Mr. WHITNEY. Of course that changed. This depression of mind only lasted for a very few days, and it was only very shortly afterward, I think about December 1, that some members of the Federal Reserve Board, having heard the way their statement had been interpreted, began softening and qualifying it.

Mr. RAUSHENBUSH. We will get to the softening in a minute, but I still did not get an answer to my question, Mr. Whitney.

Mr. WHITNEY. The answer is in the cable now.

Mr. RAUSHENBUSH. No.

Mr. LAMONT. What is the question, Mr. Raushenbush?

Mr. RAUSHENBUSH. The question is this: Here, for the first time, you seem to state pretty frankly to the Chancellor what we have not been able to have you state on the stand here. You will remember this dispute on the connections between the war trade and financing and public opinion and the like. We have had that going on here at various times and there has been intimation from the Senators here, as I gathered it, and listened to it, a sort of suspicion that maybe some of this financing and some of this foreign business influenced public sentiment a little bit. I do not think that is exaggerating the sentiment which I have heard up here.

Mr. LAMONT. We have testified again and again that our success in issuing any loan at the moment was dependent largely upon the state of public sentiment at that time.

Mr. RAUSHENBUSH. Here you are coming in and suggesting for the British that you cannot see any way out except curtailing their purchases over here, and you say, "letting such action be announced without rancour but explicitly with possible good effect upon American attitude." That is that purchases are going to be cut down. The good effect would not be upon the financial people but on the Federal Reserve Board and public sentiment?

Mr. MORGAN. It seems that it would show the public that there was not going to be so much pressure on the American financial markets as heretofore and, consequently, they would not be asked to make such a heavy loan.

Mr. RAUSHENBUSH. Is that what you considered to be the "possible good effect upon American attitude"?

Mr. MORGAN. Yes, sir. Why not?

Mr. RAUSHENBUSH. Mr. Morgan, will you bother to read the rest of the cable, showing how terribly interested you still were in trying to do something for the British, which is all right because you were their agent? You say in another sentence there [reading from "Exhibit No. 2609"]:

> Every effort, as you must realize, will be made by us and our associates by educational processes to counteract throughout the country statement just issued, but we have got to begin at the bottom of the hill once more and it will be a long, slow process with very much depending upon future attitude of our authorities.

How can you reconcile that, by any stretch of the imagination, by saying that an announcement that British purchases are going to be curtailed will have a good effect upon the American public? That is something which I cannot understand.

Mr. LAMONT. My comment on that, Mr. Raushenbush, would be this:

There are two parts to the sentence which you have quoted. The first part was concerned with telling the British Government that it would have to cut its garment according to its cloth. That assertion or statement on our part was in accordance with the conservative practices which you attribute to our firm.

The second part was just as you say; we thought that when that fact was announced, that it might certainly affect the minds of the public who should sell their goods to Europe. There is no doubt about that.

Mr. RAUSHENBUSH. And would go back that way to the Federal Reserve Board and the Administration, to have them change that kind of a ruling?

Mr. LAMONT. The bankers who thought this ruling was inconsistent might well hear from their clients and depositors. I do not know.

Mr. RAUSHENBUSH. I can understand that explanation far better than I can understand Mr. Morgan's.

Mr. MORGAN. Mine was only a suggested explanation, Mr. Raushenbush. I was not here at the time and I had not noticed that before, to speak of. I would like to have it considered, that it might be one suggestion.

Mr. RAUSHENBUSH. Note the contrast, if you will there, between that suggestion and the rest of the letter or cable.

Mr. WHITNEY. Mr. Raushenbush, is it not possible, in trying to interpret what this means, that we are losing sight of our capacity in this situation? Here we were agents of the British Government. You have dwelt at a good deal of length this afternoon on the question of contracts and commitments; that we knew perfectly well, through our own contracts and the exchange market what was facing the British Government. Certainly there could be no franker statement than this that we gave our partners abroad, and through them to our clients, that the situation was very serious.

The one thing which both Mr. Lamont and I attempted to explain earlier was that at not only this time but throughout this whole period we were trying to advise the British Government so that they would not get in a position of embarrassment in paying for the goods they wanted to get.

We, along with other members of the financial community, did not think it was a sound ruling for the benefit of the general economy of the American public. It was certainly the only thing which we, as their agents, could do, to advise them that this certainly changed the situation very materially, and the logical thing, which is perfectly consistent with the previous cables, was that the Chancellor had communicated with our colleague in London and he had cabled us that if he could not get an unsecured loan, there was a large question in his mind as to why he should continue to expend available resources and should curtail his purchases.

Here was a definite estoppel for going ahead with loans as of this date. Were not we under duty bound to advise our clients that, generally speaking, they would have to curtail their purchases?

Why strive to try to put all different kinds of meaning on something that I should think is a perfectly simple statement?

Mr. RAUSHENBUSH. I think it is a perfectly simple statement, too, and the thing, I think, is simple and clear about it is the rest. However, before getting to it——

Mr. WHITNEY. When——

Mr. RAUSHENBUSH. Just a minute.

Mr. WHITNEY. What should I have added?

Mr. RAUSHENBUSH. Just a minute. It is perfectly natural to say, "Sure, we should have warned the British. They were out of luck and should have cut down. We were acting as good prudent agents."

At various times, in my humble way, I have tried to ascertain the situation. I asked about that in the middle of 1915, when the du Ponts were asked whether they would not accept a qualifying clause by the British Government, and I asked whether or not if that had been done the whole economic situation would have gotten a jolt. That was the situation with the British, but here it is sweetened and you say "without rancor, but explicitly with possible good effect upon American attitude."

It seems to me, running through every word of it is an equally business-like understanding of how it was considered at that time.

Mr. WHITNEY. Do you think it would have been better for them just to instruct us to cancel all contracts?

Mr. RAUSHENBUSH. That is still not the question, Mr. Whitney. I am awfully sorry I do not make it quite clear. I am trying to say, public opinion, American attitude, was one of the factors in your business. You said that 100 times.

Mr. WHITNEY. Certainly.

Mr. RAUSHENBUSH. As long as it was good, they would make the investments. When it was bad or the military results of the Allies were disappointing, or if there was a threat, as here, of a cancelation, something could be done to change American attitude.

So that my question, to go back to it again, which I asked before, is that by the fall of 1916, when that announcement came out, were you not pretty much of the opinion that a large part of America, not only the banking community, but the munitions community, was so strong and so much interested in this, that it could effect a reversal on the part of the Federal Reserve Board and the Administration?

Mr. WHITNEY. It is awfully hard to try to think back to what was meant 20 years ago, but my feeling is——

Mr. RAUSHENBUSH. There are some cases where your thinking is very clear.

Mr. WHITNEY. Here is a situation where the Federal Reserve Board ruling, which applied theoretically to certain functions of the Board, had adverse effect upon investors in buying Allied obligations. That attitude was very completely cleared up about a week later, as you have said, and that in effect was quite a blow. This is quite different from the question of day-to-day sentiment. Here is a definite position by an administration, or by a more or less semi-governmental body, definitely advising the investors of this country that they should not buy these obligations without more consideration.

Mr. RAUSHENBUSH. We agree on everything up to the last clause.

Mr. WHITNEY. Is it not reasonable that the British Government should take some position about that? They are face to face with a definite situation. This is not a question of theory but a question of fact. If that situation stayed, they could not borrow any more money, could they?

Mr. RAUSHENBUSH. They have got to take a position, but you tell them how to do it.

Mr. WHITNEY. Sure, with a possible good effect on the American attitude. What is there beyond what it says here?

Mr. RAUSHENBUSH (reading from "Exhibit No. 2609"):

> * * * with possible good effect upon American attitude—

that is, they were so much involved in the war trade and financing that they would get the Administration to change its policy on this?

Mr. WHITNEY. The Administration's policy had to do with loans, and had nothing to do with purchases and supplies.

Mr. RAUSHENBUSH. You see the connection?

Mr. WHITNEY. I see what you are trying to get at.

Senator CLARK. The two things were tied together. It was repeatedly stated here if they did not get loans they would not make purchases.

Mr. WHITNEY. Inferentially.

Senator CLARK. That was the excuse for changing the loan policy of the Government, was it not?

Mr. WHITNEY. This is something quite different.

Senator CLARK. I understand, but the loans in this country to the Allies and the allied purchasing in this country were interlinked from beginning to end.

Mr. WHITNEY. The question of giving a good purchaser time certainly came in. That is why they borrowed the money. There is no question about that.

Senator VANDENBERG. The effect upon American public opinion would be the effect of discontinuing the profitable export trade. Is not that the point at which it would affect public opinion?

Mr. WHITNEY. I do not know, but the record, Senator Vandenberg, shows that here the American public had interpreted this ruling by the Federal Reserve Board to say: "You must not buy any more of these bonds."

If that were the attitude, obviously, if the British could not get any more credit, and a week before they stated they did not want to dissipate their gold and securities, therefore they would have to change their manufacture and purchasing of supplies. That is in the record.

Senator CLARK. That was the way they were going to influence public sentiment and change the policy of the Government, was it not?

Mr. WHITNEY. I do not think so at all.

Senator VANDENBERG. It seems to me we are where Mr. Lamont and I were discussing the thing the other day. You have now reached a point where there is a danger of interrupting this domestic prosperity which flows out of war orders, and you do not want to see that stopped, do you?

Mr. LAMONT. Not unnecessarily, Senator.

Senator VANDENBERG. You have to keep the war going in order not to interrupt it.

Mr. LAMONT. Oh, no; excuse me.

Senator VANDENBERG. Wait a minute.

Mr. LAMONT. Yes, sir.

Senator VANDENBERG. You have to keep a policy going which permits us to participate in the war without being in it?

Mr. LAMONT. Of course I would not endorse that statement.

Senator VANDENBERG. That is the net result of the operation. We participated in this country by furnishing the munitions, the arms, and the implements, and loaning the money, but we are neutral and are not partners in the war itself.

Mr. LAMONT. Senator, we would have to go back a long time, at the very outset of the war, when we were in a depression, and when it was very important for our country to get out of the depression, and we owed a lot of money over there, and we were a debtor nation, and the whole country delighted at the opportunity of selling goods abroad; there is no doubt about that.

Senator VANDENBERG. I agree with that absolutely. I say again and again, if we could only look at the thing objectively and try to get a lesson out of it, and not trying to pin any responsibility on any individual for doing something we did; but I am trying to find out if objectively we cannot learn a lesson. It seems to me we are back where we were the other morning. We were engaged in a profitable export trade, which is dependent upon abnormal conditions. The moment the abnormal conditions cease, the abnormal profit ceases. That is the reason why I think it is of no advantage to the country to have that abnormal trade.

In addition, it seems to me now, being confronted with that condition, that we know the American people enjoyed this abnormal trade and appreciated the profit from it so thoroughly that if they are notified that it is going to be suspended, that they will want to do something about it to keep it going. Is not that precisely the situation?

Mr. LAMONT. As long as the trade is going on, certainly the American people would like to get their share of it; no doubt about that.

Senator VANDENBERG. Supposing the war itself had stopped at that moment, and it had been cut off, what would have happened to this industrial activity? It would have all been suspended, would it not?

Mr. LAMONT. It would have tailed off. There is no doubt about that.

Senator VANDENBERG. It would have kept on going?

Mr. LAMONT. There were contracts which had to be fulfilled. There would be an immediate cessation of orders, I hope.

Senator VANDENBERG. Of course there would be.

Mr. LAMONT. Certainly.

Senator VANDENBERG. The net result of that would have been the precise situation against which this is in effect a complaint. You are trying, as I read this, to interest the American people in protesting against a situation which interrupts their flow of war orders. That is a fair interpretation, is it not?

Mr. **Lamont**. You elaborated that, I think, more than it was elaborated in our minds at the time. As Mr. Whitney stated, undoubtedly we felt that if there had to be a curtailment for some of the reasons which are in your mind, still the American people knew about it. There is no doubt about that.

Senator **Vandenberg**. I think that is true, but I do not see how you escape the final conclusion that there is whipped up by this trade a popular attachment to the maintenance of war conditions, and I do not see how you can separate that out from war trade. That is the reason why I have not any interest in the war trade.

Mr. **Lamont**. Of course, if you mean, Senator Vandenberg, maintenance of war conditions to the point of wanting the war to continue, I would think we must agree that is a fact, but as long as the war is continuing, America wanted to get her share of it.

Senator **Vandenberg**. Precisely. I would not say for a moment that you wanted the war to continue.

Mr. **Lamont**. Right.

Senator **Vandenberg**. But I am saying, that you find yourself in the position where the continuation of the war is of interest to you and to all the people who are participating in it, and human nature is such, it seems to me, that that inevitably affects the processes of thinking with respect to this country's attitude toward the whole situation. I do no see how you can escape it.

Senator **Clark**. Mr. Whitney, a moment ago you took exception to my statement that the curtailment of foreign trade would be employed to influence public sentiment in this country, and it seems to me that the effect of that statement is explicitly set out in your cablegram. It says [reading from "Exhibit No. 2609"]:

> Every effort, as you must realize, will be made by us and our associates, by educational processes, to counteract throughout the country statement just issued, but we have got to begin at the bottom of the hill once more and it will be a long, slow process with very much depending upon future attitude of our authorities. Meanwhile we can see no way except for your authorities to consider ways and means for immediate curtailment of purchases, letting such action be announced without rancour but explicitly with possible good effect upon American attitude.

If that does not mean that you have got to apply the curtailment of British purchases to create sentiment in this country for reversing the Federal Reserve Board's action, what does it mean?

The **Chairman**. That is the question.

Senator **Vandenberg**. It seems to me it must mean that.

Mr. **Whitney**. Senator Clark, the first part of what you read has, I should think, almost direct reference to the second affirmative statement which Mr. Raushenbush read from the Federal Reserve Board statement, which was to the effect that the private investors should not buy these particular unsecured loans, without receiving full and authoritative data, so that he may judge the future intelligently in the light of present conditions. In other words, education.

Now, we come along and come back to this " rancour " thing again.

Senator **Clark**. I made the statement a while ago that your advice to the British to apply pressure in connection with curtailment, or threatening curtailment of purchasing in this country, was to create sentiment in this country to reverse the Federal Reserve Board's position, and you took exception to it and said it was not, but I cannot read this language in any other way [reading from "Exhibit No. 2609"]:

> Meanwhile we can see no way except for your authorities to consider ways and means for immediate curtailment for purchases, letting such action be announced without rancor, but explicitly, with possible good effect upon American attitude.

I ask again, if that does not mean what I said, what does it mean?

Mr. WHITNEY. I think the only difference between us, Senator, is perhaps the question of where you put all the emphasis. You use the word "threat."

Senator CLARK. I will drop out the word "threat", and adopt the modification of what you say there, that this was advocating a curtailment and not threatening.

Mr. WHITNEY. I do not believe you were here, Senator Clark, when Mr. Raushenbush or I put in a cable from the Chancellor to Mr. Morgan, to the effect that if he did not secure an unsecured loan here, he would have to curtail. As a matter of fact, we did receive from the Department of Commerce, which you introduced today, a document showing that they had it in mind about this time.

Senator CLARK. That is perfectly true, Mr. Whitney, but what you were saying was to give it out explicitly, and was it not for the purpose of bringing about an effect on the position of the Administration?

Mr. LAMONT. Senator Clark, to avoid further debate, I should think we would have to permit you to draw whatever inference you please.

Senator CLARK. That is precisely what I am doing, Mr. Lamont.

Mr. LAMONT. Just a moment, Senator. Whatever inference you please, with a statement on our part that we had no such elaborate lucubration in our minds at the time; it was a simple offhand statement.

Senator CLARK. All I am asking you is what you mean by that simple offhand statement, if it does not mean what I have drawn from it.

Mr. LAMONT. I am not going to try to interpret everything I said 20 years ago, cabled in the midst of a lot of hurry, as I said this morning.

Senator CLARK. It is a simple, concise statement as to how to bring pressure to bear in this country.

Mr. WHITNEY. As a matter of fact, they made no such announcement did they?

Senator CLARK. I am not discussing your advice to them and the question of whether they accepted your advice.

Mr. RAUSHENBUSH. Because they did not need to.

Mr. LAMONT. All you and I are interested in, Senator Vandenberg, is the trade matter; and I do not want to prolong the debate on the other point, but what puzzles me is to see what course this country could have taken, other than the course it did take from 1914 on in the way of selling goods, because the minute a war starts, as you know, the purchases of the belligerent nations are not normal purchases.

Senator VANDENBERG. That is correct.

Mr. LAMONT. They are in a different situation. Therefore, if our country had not responded to the particular demands and particular goods that the belligerents wanted, we should not only have stayed in the original depression in which we were, but we should have lost our normal export trade to those fellows.

So that the country was faced with a dilemma as to whether it should fill orders if they came in; if heavy orders came in to fill the orders, and if they came in light to fill the light orders. It seems to me that is all there was to it.

Senator **Vandenberg**. I will just make this comment upon your suggestion:

In the first place, I think, with great respect, it is a fallacy ever to discuss neutrality problems and war situations in the light of pulling ourselves out of a depression. That, at the outset, it seems to me, is a horrible fallacy, because if we are going to try to run our foreign policy for the purpose of fertilizing our domestic economy, why, our foreign policy will be a thoroughly selfish and hazardous sort of thing.

You say, what could we have done? We should have done precisely the thing that is being proposed at the present time before the Foreign Relations Committee. We should have completely embargoed the shipment of all arms and munitions of war to all belligerents, which would have been a neutral act, instead of one in theory, and we could have protected our normal commerce by the quota system, which Secretary Hull is suggesting, and beyond the quota by establishing the embargo, we could have prevented all the argument respecting this abnormal trade, and, from my point of view, all the hazard of deflation, using the term industrially rather than financially, which was inevitable after this extraordinary system had to be thrown into the discard.

Mr. **Lamont**. I think the proposals before the Foreign Relations Committee are of very great interest and of the utmost importance to this country today.

If you will permit me, in a day or two, before the hearing is adjourned, I should like, with great respect, perhaps to submit some observations more at length on the matter for your consideration, rather than attempt to give them by word of mouth now.

Senator **Vandenberg**. I would be delighted to have anything that you have to offer on the subject, with or without respect.

Mr. **Lamont**. Thank you, Senator.

Mr. **Raushenbush**. Going on with this transaction, we complete the record by putting in a cable dated November 28, 1916, to Harjes, in which Harjes is informed that—

> any attempt now to forecast time for another operation, whether secured or unsecured, is impossible. We will keep you in touch with the situation, but regret to say we regard it as more difficult and ominous than ever before.

(The document referred to was marked "Exhibit No. 2610", and is included in the appendix on p. 8739.)

Mr. **Raushenbush**. Cable from Morgan in London dated November 28, 1916, in which Grenfell says he is awaiting further announcement from you as to effect which announcement had upon existing loans, short paper, and commercial acceptances.

(The document referred to was marked "Exhibit No. 2611", and is included in the appendix on p. 8740.)

Mr. RAUSHENBUSH. On November 28, 1916, a telegram in code to be sent to attached list of names; showing the rates for delivery of bills, and a list of names is attached.

(The document referred to was marked "Exhibit No. 2612", and is included in the appendix on p. 8740.)

Mr. RAUSHENBUSH. You were still planning to issue them at that time, were you not, after having gotten the announcement?

Mr. LAMONT. We said, I think, that we might have them on the counter for sale, something like that, was it?

Mr. RAUSHENBUSH. This telegram to these various banks just gives the rates on November 28, the day after the announcement.

Mr. LAMONT. We were awaiting further word from the other side.

Mr. RAUSHENBUSH. Did you ask for further word?

Mr. WHITNEY. No; but we had agreed with these banks we were going to offer. We had to go along more or less as a routine matter, because we had made the arrangements for the offer on December 1.

Mr. RAUSHENBUSH. On November 29, 1916, there is a cable from Morgan's in London, stating [reading from "Exhibit No. 2613"]:

> British Government is communicating upon the subject with Sir Cecil Spring-Rice.
>
> Whilst I have impressed upon the Ministers the fact that the Federal Reserve Board is not directly a Government committee, yet our Ministers adhere to their view and consider it more dignified to take action in concert with the other Allied Governments.
>
> Your statement that the British and French Treasury Bills will not sell to any extent is not the main factor in the Government's decision.

Then later on in that same telegram [reading from "Exhibit No. 2613"]:

> Four. I fully understand that J. P. Morgan & Co., cannot go on advancing indefinitely themselves, but wish to know if there is any difficulty in your getting accommodation against American securities from other banks.

Then there is some information on gold.

Mr. LAMONT. Would you mind just quoting, Mr. Raushenbush, from that gold cable, "he states——"

Mr. RAUSHENBUSH. Which part?

Mr. WHITNEY. In all, $337,000,000 of gold was available. That is the summarization.

Mr. RAUSHENBUSH (reading):

> In all, $337,000,000 in gold.

Mr. LAMONT. Then the rest of it, "he states——"

Mr. RAUSHENBUSH (reading):

> He states you have $150,000,000 free American securities with further $255,000,000 which he hopes to release from the securities pledged under collateral loans.

Is that correct, that on November 29, you had $150,000,000 free American securities?

Mr. LAMONT. I do not know.

Mr. WHITNEY. That is his statement.

Mr. LAMONT. It is probably easy enough to check up.

Mr. RAUSHENBUSH. It does not check at all with our figures.

Mr. BROWN. There is a later cable that says you have only $15,000,000.

Mr. **Whitney**. That is his statement. That is just the time when we were transferring securities from the different schemes. This is his statement, it is not ours, and I have never checked it.

Mr. **Raushenbush**. I take it I was asked to read that because of the exorbitant amount. If it is only $15,000,000, I would like to have that checked.

May we have that inserted in the record?

(The document referred to was marked "Exhibit No. 2613" and is included in the appendix on p. 8741.)

Mr. **Raushenbush**. Cable of November 29, 1916, when the Chancellor of the Exchequer sent you the following message:

> In view of the attitude of the Federal Reserve Board toward the issue of Treasury bills by us in the United States of America, I am now telegraphing to Monsieur Ribot, French Minister of Finance, that we propose, if he concurs, to refrain from proceeding with the issue.

The document referred to was marked "Exhibit No. 2614" and is included in the appendix on p. 8742.)

Mr. **Lamont**. That was a very clear-cut action.

Mr. **Raushenbush**. If Ribot concurs.

Cable of November 29, to Morgan, London. It is your acknowledgment.

(The document referred to was marked "Exhibit No. 2615" and is included in the appendix on p. 8742.)

Mr. **Raushenbush**. Another cable, dated November 29, 1916, to Harjes in Paris.

(The document referred to was marked "Exhibit No. 2616" and is included in the appendix on p. 8742.)

Mr. **Raushenbush** (reading):

> It is necessary that immediately you should cable M. Bloch and ourselves authorizing him to sign.

There is nothing in that cablegram, as you notice, about Ribot's concurring in the refraining from proceeding with the issue. On the other hand, there is a cable dated November 30, 1916, in which Mr. Ribot cables authorization to go ahead.

(The document referred to was marked "Exhibit No. 2617" and is included in the appendix on p. 8743.)

Mr. **Raushenbush**. I now want to turn, Mr. Chairman, again to Mr. Hamlin, who is writing very interesting things in his diary at this time.

On November 29, which is the same day that the formal authority to refrain was received, Mr. Hamlin reports a conversation with Spring-Rice, British Ambassador at the time.

> Spring-Rice says great excitement in England over warning. C. S. H.—

that is Mr. Hamlin—

> said it was purely an internal banking matter not aimed at any foreign government.
>
> Advised him to ask permission of Lansing to talk with Harding.

Then a little later:

> Said he should cable his Government that it was a purely internal bank matter.
>
> C. S. H. said to cable nothing until his talk with Lansing and Harding.
>
> Morgan announces loans will be made notwithstanding warning.

So on the 29th, 2 days after the statement, Spring-Rice has gone to Mr. Hamlin and Mr. Hamlin has told him that he ought to see Lansing and ought to see Harding.

We have already had the cable in here that Spring-Rice was being consulted by the British Government on the matter.

Then on December 1, Hamlin notes that—

> Harding said he had very satisfactory talk with Sir Richard Crawford yesterday.

So it would appear from that, Mr. Chairman, that the source of the information is the diplomatic influence which the British Government had over here. The British Ambassador had gone to the Federal Reserve Board to get inside information, if you will, and Hamlin had told him as clearly as he could what he should do, he should ask the diplomatic permission of Lansing to talk with Harding, and warned him several times not to cable without doing that, from the angle we were interested in before.

On the evening of November 30 a telegram was dispatched to Morgan, London, saying [reading from "Exhibit No. 2618"]:

> Before formally withdrawing Treasury bills from sale we will await word from you that Ribot concurs. We then suggest making announcement, and propose for your consideration a form substantially as follows:

Did you ever get word that before your announcement was made you were withdrawing the French had concurred in that?

Mr. **Whitney**. You did not read the other cable of November 30, did you, no. 26827, in which the Chancellor requests J. P. Morgan & Co. not to issue Treasury bills as arranged on December 1?

Mr. **Raushenbush**. I would be glad to read that [reading from "Exhibit No. 2619"]:

> Chancellor would not wish to disregard the expressed wishes of the Federal Reserve Board of which Secretary of Treasury is a member and, therefore, requests Messrs. J. P. Morgan & Co. not to issue the Treasury bills as arranged on December 1. Former is statement made to me by Chancellor of the Exchequer. Will this provide basis for any explanation you may have to make?

That still does not answer my question, Mr. Whitney, about whether you had gotten a concurrence or the specific approval of the French before you withdrew them.

Mr. **Whitney**. No; but does not that instruct us not to sell the British?

Mr. **Raushenbush**. I offer all that for the record.

(The documents referred to were marked "Exhibits Nos. 2618, 2619, and 2620", respectively, and are included in the appendix on pp. 8743 and 8745.)

Mr. **Lamont**. The answer to Mr. Raushenbush is "no"; we did not receive directly the authorization from the French, but having that strong statement on the part of the Chancellor of the Exchequer that he would not want to do anything not consistent with the wishes of the Federal Reserve Board, and having word that he was communicating with Mr. Ribot, we proceeded to withdraw both classes of bills.

Mr. **Raushenbush**. Without any formal agreement from the French. All right.

I offer for the record a telegram dated December 1, 1916, to Harjes, describing the situation.

(The document referred to was marked "Exhibit No. 2621" and is included in the appendix on p. 8745.)

Mr. RAUSHENBUSH. Telegram from Paris dated December 4, 1916, for H. P. Davison and T. W. Lamont.

(The document referred to was marked "Exhibit No. 2622" and is included in the appendix on p. 8746.)

Mr. RAUSHENBUSH (reading from "Exhibit No. 2622"):

> Ribot is greatly upset over your action in this matter and is quite unable to understand how you took upon yourselves to speak authoritatively for him as you did without even getting his views upon the subject, let alone his consent.

Telegram dated December 9, 1916, continuing the discussion about Ribot's being disturbed, and your regrets.

Mr. LAMONT. December 9?

Mr. RAUSHENBUSH. These are just making a record. I have no comment.

(The document referred to was marked "Exhibit No. 2623" and is included in the appendix on p. 8747.)

Mr. RAUSHENBUSH. I offer a cable from Harjes, Paris, dated December 11, 1916.

(The document referred to was marked "Exhibit No. 2624" and is included in the appendix on p. 8747.)

Mr. RAUSHENBUSH (reading):

> Ribot thanks you for the message contained in your 14965, and he hopes you will consider the whole incident as closed.

Then, Mr. Chairman, it develops that back in October, Kuhn, Loeb & Co., had been negotiating in regard to a German municipal loan. We want to offer some cables exchanged between Kuhn, Loeb & Co., and Germany, regarding the issuance of bonds of the cities of Hamburg, Frankfort, and Berlin, which I offer at this time for the record.

(The document referred to was marked "Exhibit No. 2625" and is included in the appendix on p. 8748.)

Mr. RAUSHENBUSH. This issue was dropped, it is indicated in a letter of December 12, because of the Federal Reserve Board ruling.

GERMAN LOAN BLOCKED BY PRESIDENT WILSON

Mr. RAUSHENBUSH. Then we find a letter of November 23, which is still before the warning, from House to the President, in which he says (reading):

> Baruch tells me that Kuhn, Loeb & Co. are preparing to make a loan to the German cities just as they did some time ago to the French cities. Before doing it they want to be sure that our relations with Germany are satisfactory, otherwise they will refuse to go on. I am wondering what, if anything, you want done in regard to this.

(The document referred to was marked "Exhibit No. 2626" and is included in the appendix on p. 8749.)

Mr. RAUSHENBUSH. Mr. Chairman, I was not here this morning, but as I remember that neutrality picture the relations with Germany were quite satisfactory in November.

The CHAIRMAN. At that time they were.

Senator CLARK. November 1916?

Mr. RAUSHENBUSH. Yes.

Senator CLARK. More satisfactory than they had probably been at any time during the war.

Mr. RAUSHENBUSH. Then there was the reply from Wilson to Colonel House dated the 24th of November. This is still before the warning.

(The document referred to was marked "Exhibit No. 2627" and is included in the appendix on p. 8750.)

Mr. RAUSHENBUSH (reading):

> MY DEAREST FRIEND: I have had a really overwhelming cold during nearly the whole of the week, and it has sadly thrown my plans out. The paper I had intended to write needed the clearest thinking I could do, and not until tonight have I ventured to begin it. Even now I have gone no further than a skeleton outline.
>
> I wanted to make these suggestions:
>
> First. That you convey to Kuhn, Loeb & Co. through Mr. Schiff, who would be sure of my personal friendship, the intimation that our relations with Germany are now in a very unsatisfactory and doubtful state, and that it would be most unwise at this time to risk a loan.
>
> Second. That you write to Lord Grey in the strongest terms to the effect that he could be sure that the United States would go any length in promoting and lending her full might to a league of peace, and that her people were growing more and more impatient with the intolerable conditions of neutrality, their feeling as hot against Great Britain as it was at first against Germany and likely to grow still hotter against an indefinite continuation of the war if no greater progress could be shown than now appears, either for the Allies or the Central Powers.
>
> It might be well to intimate to him that Page no longer represents the feeling or the point of view of the United States any more than do the Americans resident in London.
>
> I hope that these suggestions commend themselves to you. I do not think that he ought to be left in any degree of ignorance of the real state of our opinion. It might even be well to intimate that we, in common with the other neutral nations, look upon the continuation of the war through another winter with the utmost distaste and misgiving.

I regret I was not here this morning, but when he wrote that letter on November 24 can you state whether he had at that time in his hands the retaliatory powers that had been passed to embargo the loans and the like?

Senator CLARK. Yes; he had retaliatory powers, but further than to ask the Department of Commerce for an opinion as to most effective way to use them nothing whatever was ever done with the retaliatory powers. They were in full force and effect at that time.

Mr. RAUSHENBUSH. Yet this letter seems to indicate that at that time he is very thoroughly fed up with what he calls the intolerable things that have been happening here.

Mr. CLARK. The part that was given in the Revenue Act and in one of the other acts passed in September 1916 was entirely discretionary rather than mandatory, and nothing whatever was ever done with the retaliatory powers.

Mr. RAUSHENBUSH. Just reading this language by itself I get the idea that he had sufficient cause to impose those powers if he felt the country was with him on it.

Mr. CLARK. He had sufficient powers if he felt that he should impose them. There is no question about his power.

Mr. RAUSHENBUSH. Then I want to offer for the record a copy of Colonel House's diary of December 3, reporting a conversation with Jusserand.

(The document referred to was marked "Exhibit No. 2628" and is included in the appendix at p. 8750.)

Mr. **Raushenbush.** In that he says that he told the French Ambassador [reading]:

> That we were trying to undo the harm which the Federal Board had done regarding their credits.
>
> The United States has practiced benevolent neutrality toward the Allies which the Allies in no way appreciated. We had gotten the enmity of Germany and had not received corresponding benefit from the Allies.

Then a cable from J. P. Morgan to Morgan in London, dated December 21, 1916. This must have been after the peace announcements.

(The document referred to was marked "Exhibit No. 2629" and appears in full in the text.")

Mr. **Raushenbush.** (reading):

> 33653. For E. C. Grenfell. Distressed and mortified beyond measure by the President's pronouncement of this morning which seems to indicate that he has no appreciation of the difference between the conduct of the Allies and of the Central Powers. It seems that realizing that he had made a mistake in putting it out, he tried to correct it by Lansing's statement, which has rather made matters worse. Do not forget, however, in talking about it, that what the President says does not change the feeling of the country, which I still believe is more than 90 percent pro-Ally, and I think will continue so.

Mr. Morgan, are you right there when you say "the President's pronouncement of this morning?" Is that his request to the powers?

Mr. **Morgan.** I was just trying to get a copy of it.

Mr. **Raushenbush.** I am told that that was the date of the request for the peace terms.

Mr. **Morgan.** That was the suggestion of the peace terms, yes; when he asked for the peace terms [reading]:

> He takes the liberty of calling attention to the fact that the objects which the statesmen of the belligerents on both sides have in mind in this war are virtually the same, as stated in general terms to their own people and to the world. Each side decides to make the rights and privileges of weak peoples and small states as secure against aggression and denial in the future as the rights and privileges of the great and powerful states now at war,

and so on.

That is the statement, yes. I remember it.

Mr. **Raushenbush.** That was the one that distressed and mortified you beyond measure?

Mr. **Morgan.** Yes, it did; and I meant nothing else besides what I said.

Mr. **Raushenbush.** If it could only be clear what you ever meant, Mr. Morgan.

Then a telegram of December 22 for J. P. Morgan from Grenfell.

(The document referred to was marked "Exhibit No. 2630" and is included in the appendix on p. 8751.)

Mr. **Raushenbush** (reading):

> The President's message has, of course, created a great deal of feeling here. The Treasury would be greatly obliged if you could cable your views as to how far the President's action will affect chances of a collateral loan in January.

To which you replied on December 22, 1916, the same day, as follows [reading "Exhibit No. 2631"]:

> 33707. 28497. For Grenfell. Am increasingly impressed with the idea that President's message will do no harm to the prospects of collateral loan; indeed, the liquidation produced and reduction of loans might make it a little easier. The whole thing depends on the money market. Banks in the West are carrying large reserves for which they cannot find use in their own parts of the

country. The course heretofore has always been to remit such funds to New York for temporary employment there. This, I think, is bound to occur again, though this year the tendency of money to New York has not developed quite as early as usual. J. P. MORGAN.

(The document referred to was marked "Exhibit No. 2631" and appears in full in the text.)

Mr. RAUSHENBUSH. You thought that the President's message would do very little harm to the prospects of a collateral loan. There is no discussion at this time any more of an unsecured one, is there? That is offered, is that right?

Mr. MORGAN. The prospects of a collateral loan we thought were better than those of an unsecured one, obviously.

Mr. RAUSHENBUSH. That was the only one that was up for discussion at the moment?

Mr. MORGAN. That was the only one that was up for discussion at the moment.

Mr. RAUSHENBUSH. You did not think the peace terms would hurt that.

Then on December 26 the Federal Reserve Board changed their previous ruling on the Bank of England credit that had been under negotiation for so long.

Mr. Chairman, I want to offer a memorandum from their executive committee dated November 23, 1916, with the changes which were put out in December for the record, allowing that loan to go through.

Mr. WHITNEY. The Bank of England loan, Mr. Raushenbush? Did you say "Bank of England loan"?

Mr. RAUSHENBUSH. Yes. I am just reading into the record the contract between the Federal Reserve Bank of New York and the Bank of England.

Mr. WHITNEY. I thought you said a loan; excuse me.

(The document referred to was marked "Exhibit No. 2632", and is included in the appendix on p. 8751.)

Mr. RAUSHENBUSH. On December 29, then, a cable to Harjes on the matter.

(The document referred to was marked "Exhibit No. 2633", and is included in the appendix on p. 8752.)

Mr. RAUSHENBUSH (reading):

> Announcement is correct but matter is almost simply routine as Federal Reserve Bank of New York City applied sometime ago for permission appoint foreign agents. I think it quite probable Federal Reserve Board thought it was indicating pleasanter feeling by doing this now. Indeed, I think they feel they went much too far and did the wrong thing in the statement of November 28 and are casting about for ways of improving their position.

Mr. Chairman, we had hoped to go into far more of these complications tonight, but if we once get started we will probably want to keep going quite a while.

The CHAIRMAN. You could not in a matter of 15 or 20 minutes round up any matter that remains before us?

Mr. RAUSHENBUSH. No.

The CHAIRMAN. We will recess until 10 o'clock tomorrow morning.

(Thereupon, at 4:55 p. m., the Committee adjourned, to meet again tomorrow morning, Thursday, Jan. 16, 1936, at 10 a. m.)

INVESTIGATION OF MUNITIONS INDUSTRY

THURSDAY, JANUARY 16, 1936

United States Senate,
Special Committee to Investigate
the Munitions Industry,
Washington, D. C.

The hearing was resumed at 10 a. m., in the Caucus Room, Senate Office Building, pursuant to adjournment, Senator Gerald P. Nye presiding.

Present: Senators Nye (chairman), Clark, Vandenberg, Barbour, and Pope.

Also present: Stephen Raushenbush, secretary, and Lawrence Brown, financial assistant to Committee, and Robert Wohlforth, assistant to the secretary.

TESTIMONY OF J. P. MORGAN, THOMAS W. LAMONT, AND GEORGE WHITNEY—Resumed

The Chairman. The committee will be in order.

Mr. Brown. Mr. Chairman, at the opening this morning I just might run over a brief summary of the concluding session yesterday afternoon in regard to the proposed issue of British Treasury bills, whose issuance was blocked by the announcement of the Federal Reserve Board at the end of November 1916.

The record shows that this announcement of the Reserve Board was made at the direct instigation of President Wilson, and that, according to Mr. Hamlin's diary, this was because the President desired to keep the banks liquid in case there should be any change in our foreign policy.

The record further shows that the British Ambassador, Sir Cecil Spring-Rice, was told that this announcement by the Reserve Board was the direct work of President Wilson, and that he cabled this fact to Great Britain.

The record shows that J. P. Morgan & Co. had first thought that the Federal Reserve Board announcement was the worst blow ever received to Allied credits.

At the conclusion yesterday we were discussing putting in the record various evidence in regard to what the President's motives may have been, what he had in mind in the phrase "A change in our foreign policy."

The Chairman. Mr. Brown, let us get clear in our minds, if we can, just what the conditions were surrounding that Federal Reserve order.

Is the record one that would seriously point out that the President at the time of the order was actually contemplating the moment of our moving into war, and was wanting the banks to get in shape in such liquid position that they would be ready to function from the standpoint of our needs once we went in?

Mr. BROWN. So far as the record shows, Mr. Chairman, I can say that is a matter on which each person must draw his own conclusions. I would hesitate to say that there was any definite evidence on that, one way or the other.

The CHAIRMAN. What was the date of that order?

Mr. BROWN. The 27th of November.

The CHAIRMAN. Mr. Morgan or Mr. Lamont, either, can we have a direct picture from you at this time as to whether or not there was any understanding in November of 1916 that we were getting in shape to meet that possible emergency which would exist in case we went to war?

Mr. MORGAN. Personally, not that I know of at all.

The CHAIRMAN. You had no such picture at that time?

Mr. MORGAN. None at all.

The CHAIRMAN. Mr. Lamont?

Mr. LAMONT. You mean, understanding on our part, Senator?

The CHAIRMAN. Yes; if on the part of the banking profession there had been given any cause to believe that we were getting ready to get in and that this reserve order had that in mind.

Mr. LAMONT. Not the slightest, Senator. On the contrary, I think that the country was impressed during that whole autumn with the fact that the difficulties with Great Britain on matters of contraband, and so forth, were very considerable, and, as has been indicated here, the feeling temporarily swung away from the Allies quite distinctly.

Mr. WHITNEY. It was not long after an election which had had as at least one of its objects to keep us out of war.

The CHAIRMAN. Yes. Of course, the election is out of the way at the time this order comes along.

Mr. WHITNEY. About 10 days or 2 weeks.

The CHAIRMAN. The Wilson and State Department papers rather indicate that through November and December there was decided opinion in Administration circles that we were going to have to get in.

Mr. LAMONT. The House diary, you recall, Mr. Chairman, as late as January 4, quotes President Wilson as saying this:

> There will be no war. This country does not intend to become involved in this war. We are the only one of the great white nations that is free from war today, and it would be a crime against civilization for us to go in.

That is on January 4, just about a month after the Federal Reserve note.

Mr. BROWN. We have another diary entry the same day that we will come to in a moment, Mr. Lamont, upon which a quite different interpretation can be placed.

Mr. Chairman, we have seen that despite the formal excellence of our relations with Germany at that time and the official unexcellence, if I may say so, of our relations with Great Britain, the record shows that in November, President Wilson directly intervened to prevent the flotation of a German loan in the New York market.

We have also seen that the Administration, in the Federal Reserve Board announcement, desired to keep the banks from investing in what it considered unliquid Allied paper, but it wished very ardently to take off any reflection upon Allied credit at the same time, and by means of various unofficial announcements, and particularly by means of the reversal of the Reserve Board's position in regard to the agreement between the Bank of England and the Federal Reserve Bank of New York, the Administration went as far as it thought it could in taking the sting off the Federal Reserve Board announcement.

In other words, the record shows that the Administration desired to keep the banks liquid but did not desire to slap the Allies.

Mr. Hamlin's diary shows that not only President Wilson but Secretary Lansing was one of the moving spirits in the Reserve Board announcement.

DISCUSSION OF SUBMARINE ISSUE

Mr. **Brown**. As a further comment on what Secretary Lansing's point of view and motives may have been in that announcement, I offer for the record a diary entry of Colonel House dated January 4, 1917.

(The document referred to was marked "Exhibit No. 2634" and appears in full in the text.)

Mr. **Brown** (reading "Exhibit No. 2634"):

> Lansing desires the President to press the submarine issue and to send Bernstorff home. He has written the President a note urging him to take a firm stand. He believes the President will not do this as the President told him the other day that he did not believe the people of the United States were willing to go to war because a few Americans had been killed.

The significant point, however, is that Lansing desires the President to press the submarine issue and to send Bernstorff home.

Mr. Lamont, do you recall if there was any submarine controversy at that time with Germany?

Mr. **Lamont**. No; I do not recall, except, of course, the submarine controversy was a continuous one, with merely let-ups in between the different submarine outrages, was it not?

Mr. **Brown**. The *Sussex* pledge had been in force ever since the spring of 1916, had it not?

Mr. **Lamont**. I do not recall the exact date, Mr. Brown.

Mr. **Brown**. It was sometime after the sinking of the *Sussex*, was it not, that the agreement was made that the Germans would not sink without warning, and that agreement had been kept and was being kept on January 4, was it not?

Mr. **Lamont**. I do not recall the exact date.

Mr. **Brown**. You have made statements in the course of the hearing that the cause of the war was the submarine, so I thought you would probably be familiar with the details of that.

Mr. **Lamont**. I am not familiar with the date of every submarine outrage, of course.

Mr. **Brown**. Was not the official breach in relations, the official quarrel with Germany, the note of January 30, on the resumption of unrestricted submarine warfare? Is not that what all historians declare to be the cause of our entry into the war?

Mr. **Lamont**. That was the final straw that broke the camel's back, of course.

Mr. **Whitney**. Of course, we know now, Mr. Brown—we did not know then—that on the 9th of January the German Crown Council at Spa decided to resume immediately unrestricted submarine warfare on February 1.

Senator **Clark**. The United States Government, as I pointed out yesterday, had received repeated warnings that that was going to be done unless they could compel the Allies to respect international law in regard to armed merchantmen and the illegal blockade which the United States as well as Germany had contended the Allies had been putting into effect.

Actually, of course, there had been a discussion which at various times threatened the fall of the German Government; that is, had threatened the ousting of the Chancellor, who was opposed to the unrestricted submarine warfare.

But the United States Government had received repeated warnings: In the *Sussex* note from Germany; from the American Ambassador to Germany; and at another time from the Acting American Ambassador to Germany; another time from the American Charge d'Affaires in Germany; and another time from the American Ambassador to Turkey—that this was going to happen and would necessarily have to happen unless the United States compelled or induced the Allies to respect their construction of international law.

So that while Mr. Lamont says it was the final straw that broke the camel's back, it was simply a thing that Germany had warned would happen, in the original *Sussex* note, unless the United States then took steps, as they had originally against Germany, to compel respect of their position by the Allies.

Mr. **Lamont**. Yes; but Senator Clark, on the other hand, even von Bernstorff in his book, regarding the *Sussex* note says that:

> After this note it is obvious that there was no longer any doubt in Berlin, that persistence in the point of view they had hitherto adopted would bring about a break with the United States, for I received instructions to make all preparations for German merchant ships lying in American ports to be rendered useless by the destruction of their engines.

Again, Secretary of State Albert, in a memorial directed to Secretary of State Helfferich, in November 1916, said:

> I can unhesitatingly announce my opinion that the loss of American lives as the result of torpedoing a ship without previous warning and without provisions being made for the safety of the passengers, would mean war with the United States.

Senator **Clark**. There is certainly nothing inconsistent in what you just read with the statement I just made.

Following the *Sussex* incident, the German Government notified the United States that they were prepared to go back to the old rules of visit and search which had applied to navigation before the days of submarines.

It was decided in view of the illegal British practice of arming merchantmen and instructing them to attack and ram submarines on sight, that "We must necessarily reserve to ourselves freedom of action unless you compel the British or the Allies to respect also the new developments of international law."

I dare say that the German officials regarded it as probable that they would have to go back to the unrestricted submarine warfare, because their whole experience with the United States Government since the outbreak of the war had been that as to British violations of international law or French violations of international law, the United States would mildly protest and then, as Secretary Lansing says, "Bury it in a sea of verbosity" and then allow it to slide off.

Mr. BROWN. Furthermore, Mr. Lamont, this diary entry does not suggest that the Germans pressed the submarine issue. That was always in the offing. As long as the Germans lived up to the *Sussex* pledge, officially our relations were excellent.

This diary says:

> Lansing desires the President to press the submarine issue.

In other words, Lansing desires the President to make an issue where there is no issue at the moment. There is always a potential issue if the Germans violate the *Sussex* pledge, but there is no issue at this time unless the President makes one.

Mr. LAMONT. Mr. Brown. Are you attempting to get us to agree with you, if that is your point of view, that the Germans were justified in their attitude? Is that it?

Mr. BROWN. I am not taking up any question of justification. I am merely pointing out that under an informal agreement between the two governments, the *Sussex* pledge, our relations were officially excellent with Germany.

Everyone knew that this was a precarious situation that might not last, as Senator Clark has pointed out; it always was threatened with collapse.

But at this particular time Mr. Lansing, who was instrumental in this Reserve Board announcement that you thought was such a blow to Allied credit, is a man who here is shown to be not desirous merely to stand by the *Sussex* pledge, but he himself to break it.

Mr. LAMONT. But you are reading a lot of papers that have turned up since the war. As I understood your question, Mr. Brown, it was what we thought at that time was the status of the submarine question.

It seems to me that Senator Clark answered your question entirely, that as far as the public knew the relations, we were resting on the *Sussex*.

Of course, it is true that there had been repeated warnings by the Germans that if the British situation was not cleared up, they would have to resume.

But you asked us, I thought, what we thought about it. We did not know of all these papers at the time.

Mr. BROWN. I asked you, not what you thought about it then, I asked Mr. Lamont in passing what he thought about it now, because he has said so frequently that the submarine was the sole cause of the war. I thought we might have a little more historical light.

I wished the record to show that one of the men who was chiefly responsible for this Reserve Board announcement was the man who was very desirous of getting the country into the war.

Mr. LAMONT. Mr. Brown, I do not want to prolong this and take the valuable time of the Senators, but I never said that the submarine was the sole cause of the war. I said that it was the chief cause of the war, both fundamentally and immediately, and I still believe that that is the case. I believe that if Germany had not insisted upon continuing to blow up our ships, if she had not gone back on her *Sussex* pledge——

Senator **Clark**. I do not mean to interrupt you, but it is not fair to say she went back on her *Sussex* pledge.

Mr. **Lamont**. She withdrew it.

Senator **Clark**. She gave warning in the *Sussex* note as to what she was going to do unless the United States compelled England to respect international law.

Mr. **Lamont**. Of course, we can argue all day about this. Germany wanted the United States to act as a bludgeon against England. As I see it, the United States refused to do that. Naturally, when Germany had the apparent superiority on the land and Great Britain on the sea, Germany would welcome any action by America that would cripple England's sea power; very naturally.

Senator **Clark**. What Germany asked the United States to do was to compel the same respect for our rights under international law from the Allies that we were compelling from them.

Mr. **Lamont**. Well, we cannot take up the defense of Germany.

Senator **Clark**. I do not expect you to agree on it, Mr. Lamont.

Mr. **Lamont**. We cannot undertake the defense of Germany, because we think they were all wrong.

Senator **Clark**. I dare say that is true, Mr. Lamont. If I had been one of a very small group that made $30,000,000 out of buying supplies for the Allies, I would doubtless have a somewhat different viewpoint myself.

Mr. **Morgan**. I think I would like to put in a word there, if I may, Senator Clark.

We told you in the beginning that our interest in the Allies began on the first day of the war.

Senator **Clark**. Yes, sir; that is perfectly true.

Mr. **Morgan**. And our sympathy with them. I think you can realize that our sympathy was not reduced when we retired from the purchase agency contracts at the time when we thought that would facilitate the end of the war.

Senator **Clark**. I am not suggesting that is not true in the slightest.

Mr. **Morgan**. Your indication was that we were practically bought by English money in order to sympathize with them. I do not like that kind of insinuation.

Senator **Clark**. No, sir; I do not have the faintest doubt that the sympathies of the Morgan partnership and the individual partners were with the Allies from the beginning. What we have been doing here is tracing the effect of all the commercial transactions on the neutrality policy of the United States and the United States getting into the war. I say merely that doubtless I might have a different viewpoint myself, if I had been one of those engaged in buying supplies for the Allies, and particularly if I had been one of a very small group that had made the very handsome profit of $30,000,000 in the group out of those transactions.

Mr. **Morgan**. No doubt, Senator, but I think you put yourself too low. I do not believe you could be bought for that money or any other.

Senator **Clark**. I am not suggesting in the slightest degree that you were not for the Allies before you entered into this purchase agreement for them. I understand that your sympathies from the very beginning were naturally with England and with the other Allies.

But I do say that your whole intimacy with the whole transaction, which, as I conceive bore a very great influence on our neutrality policy and our getting into the war, naturally gave you a different viewpoint from a man who did not have that experience.

Mr. MORGAN. Yes; but you must remember that we had no influence with the United States Government whatever at that time.

Senator CLARK. I think the record rather shows you exercised first and last considerable influence, Mr. Morgan.

Mr. MORGAN. I do not know that we had any. I did not know it.

Mr. WHITNEY. Economic forces may have, but we did not.

Did I understand you, Mr. Brown, to say that Lansing as well as the President wrote that Federal Reserve ruling?

Mr. BROWN. I think that the best thing there would be to consult the record on it.

Mr. WHITNEY. I do not doubt it, but it has not been introduced in the record yet.

Mr. BROWN. It is in the Hamlin diary.

Mr. WHITNEY. That does not prove anything, does it?

Mr. BROWN. Prove anything? I should say it did, Mr. Whitney. Mr. Hamlin was a member of the Federal Reserve Board.

Mr. WHITNEY. I thought Mr. Raushenbush introduced testimony yesterday to the effect that the Federal Reserve original letter went directly to the President and came back with certain additions, which were specifically read, those two specific points.

Mr. BROWN. Let us hold that question until we find the diary entry.

In the meantime, just to set the record straight on a minor point, Mr. Lamont, you said "The torpedoing of our ships." Is it not a matter of fact that the quarrel was over the torpedoing of British ships?

Mr. LAMONT. Both.

Mr. BROWN. How many of our ships were torpedoed?

Mr. LAMONT. Both.

Mr. BROWN. What were the great incidents with Germany? The *Lusitania*, the *Arabic*, and the *Sussex*. They are all British ships. I say this just to keep the record straight on that point.

Mr. LAMONT. It was American lives, as President Wilson pointed out.

Mr. BROWN. I grant you that. I just wanted the record to be straight. You said that it was the torpedoing of American ships, and the torpedoing was primarily of British ships.

Mr. LAMONT. First rate.[1]

But, Senator Clark, were you really intimating to Mr. Morgan that we asserted or had any influence with the Democratic Administration or Woodrow Wilson?

EXCHANGE CRISIS—AUGUST 1915

Senator CLARK. We put in a day and a half here the other day demonstrating, at least to my own satisfaction, that you had had a very great influence with the Democratic Administration through the exchange market, which was the lever, as I suggested, by which the whole neutrality policy of the United States was changed, authorizing the flotation of these Allied loans in the United States, which later, to my mind, contributed so much toward bringing the United States into the war.

---

[1] Mr. Lamont offered further comment on this matter later, see *infra*, p. 8584.

Mr. Lamont. It was not we, Senator Clark, who had the influence. It was the exchange situation, as indicated by members of the Government and people to the Government throughout the months preceding.

Senator Clark. You and I did not agree on it, I grant you, but it seemed to me that the record showed conclusively that the firm of J. P. Morgan & Co., whether acting as agents of the British Government, or on their own responsibility, was more or less in control of the exchange situation at that time, and that the removal of the support which had been given to the exchange market by J. P. Morgan & Co., on behalf of the British Government, coinciding so exactly in time with the efforts on the part of high Administration officials to change the whole neutrality policy of the Government, was one of the most vital steps in the whole progress of the United States from an attitude of strict neutrality to the attitude of a belligerent.

Mr. Whitney. All that is only assumption, of course, Senator; that we could have held exchange with the pressure that was on it before definitive plans had been made.

You just assumed if we had bought that 7½ million dollars that we had left, the exchange would not have ever gone down.

Senator Clark. As I said the other day, Mr. Whitney, I am not undertaking to determine whether the firm of J. P. Morgan & Co., or the British Government itself is responsible for that.

But I do know that shortly thereafter the firm of J. P. Morgan & Co., on the instruction and at the request of the British Government, did peg the exchange market and hold it there throughout the remainder of the war; and that so far from being out of funds at that time to support the exchange market if it wanted to, the British Government, in the last year, did expend some 4 or 5 hundred million dollars in supporting the exchange market at that figure.

Now, you say it is deduction. Abraham Lincoln once said in a debate with Stephen Douglas that if a man was going through a large forest and at various places in the forest he found James, Roger, Franklin, and Stephen, apparently working entirely without any cooperation between each other, hewing out timbers for a house, and if at a later stage in the proceeding those timbers from the various parts of the forest were assembled and found to fit exactly and exactly construct the house, a reasonable man would conclude that James, Stephen, Franklin, and Roger had been acting in pursuance of a prearranged program.

I say that this record is such that a man can make a reasonable deduction from it without being able to prove the exact conversations that took place.

Mr. Whitney. But, Senator, I certainly did not mean to enter into a debate, but perhaps we can get a formula on that question on which we could agree.

In the first place, exchange, like anything else, is governed by demand and supply, is it not? If there is a great deal more supply than there is demand, it is going to go down. If we could agree that the pressure on exchange at that time was so in excess of the demand that it was inevitably going down unless very careful steps were taken to meet it, and that the economic result of that break in exchange upon American exporters was such that they were worried as to whether they would be able to continue such exports and that that economic factor may have influenced the Administration at that time—may have; perhaps, that is—I could go along with you.

But that is different from the suggestion that J. P. Morgan & Co., or the British Government or the British Government through J. P. Morgan & Co., deliberately withdrew support from trying to stem a tide of pressure that nobody in the world could have stopped.

Senator CLARK. You did stem it 2 months later, Mr. Whitney. You borrowed four or five hundred million dollars from us in the meantime.

Mr. WHITNEY. It is my point that definitive steps had been taken 2 months later. They had borrowed that $500,000,000 in this country. They had announced they were prepared to ship $500,000,000 worth of gold.

And, as stated in the two cables that Mr. Brown introduced in the record the other day, there is no question about it that for 3 successive days they told us to buy up to $10,000,000 of exchange, and the first one of them said that was pending announcement of definitive plans.

The record shows that we bought £400,000, and the third day, when these plans were announced, we sold that. In other words, that was a question purely, as the record indicates just as clearly as it may be, of holding exchange for 3 days pending definite announcement of plans.

That was done merely because they did not want to have an unsettled situation. But that was not very serious.

Senator CLARK. In other words, the British instructed you to hold exchange, which you did?

Mr. WHITNEY. For 3 days.

Senator CLARK. As I recall your cablegram, they asked you to hold it until further notice.

Mr. WHITNEY. No; dated the same day, 3 consecutive days. They say, "Today hold up $10,000,000" They repeated it the next day and the next day.

Senator CLARK. On the next day they said, "Please hold it up till further notice."

Mr. WHITNEY. No; the next day they said 4.70, and they said "hold it up till we could dispose of 400,000 pounds."

Mr. BROWN. From May 1916 on, you pegged exchange.

Mr. WHITNEY. What has that to do with it?

Mr. BROWN. That is Senator Clark's point.

Mr. WHITNEY. A great many British nationals were buying goods of all kinds in this country, which had nothing to do with our contract purchases. They wanted to have dollars available in order to make that trade. It is a question of finding dollars. There has been no question whatever but the British Government had the job of supplying dollars in this country.

It is a thing we talked about for months, that they had to have dollars.

Senator CLARK. Mr. Whitney, let it be understood that nobody has ever criticized the British Government for trying to support their own exchange. That was a perfectly reasonable transaction and undoubtedly a necessary transaction.

Mr. BROWN. Mr. Whitney, you mentioned that between the break in exchange and its reestablishment was this $500,000,000 loan. Surely you do not mean the implication to be taken from that remark that the British Government had no other resources than the $500,000,000 loan in the United States?

Mr. WHITNEY. We have gone over this a good many times, but if you will remember the time——

Mr. BROWN. You do not mean to imply that, do you, that they had no resources other than what they could have mobilized?

Mr. WHITNEY. Mr. Brown, that is purely your implication. I never said it. What I did say was that in August, when we stopped, we stopped because they were preparing plans. When in November we were instructed for 3 days to buy exchange these plans had come through.

They had obtained a credit. They had not received the money yet, and that was because the payment for the loan had not been effected. But certainly they had effected plans, which they talked about in August.

If I may have a second, I think I can find those cables.

November 15, Senator, cable 10456:

> Bank of England requests you continue support exchange market today in accordance with 10453.

No, that is the second one. Here it is. Here is the one on the 13th [reading]:

> Bank of England very desirous that exchange should not be allowed to recede below 4.66 pending completion of arrangements by London Exchange Committee. Bank of England, therefore, will be obliged if you will endeavor to hold exchange at that figure by purchases up to $10,000,000, if required, debiting Bank of England loan account——

That is the pertinent part.

The next day:

> Bank of England requests you continue support exchange market today in accordance with 10453.

Senator CLARK. Look down a little bit below there and you will find one where they ask you to hold the market till further notice. I read it in the record the other day. I do not have it before me right now.

Mr. WHITNEY. That was the 16th.

> If necessary continue support exchange at 4.66 in terms of 10453 until further notice.

Senator CLARK. That is what I was speaking of.

Mr. WHITNEY. Just a moment, and then I am finished. This is on the 19th, 3 days later. It says:

> Bankers not quite finished their arrangements. Therefore, London Exchange Committee cannot proceed with F. A. Vanderlip.

That was to create a $50,000,000 credit, you remember.

> Meantime please hold exchange steady at 4.70, reselling the £400,000 bought November 14, or even more to prevent exchange rising too rapidly, but do not allow it to go under 4.70.

Senator CLARK. That simply meant that your instructions were to hold the market as close to 4.70 as you could, not to let it go below 4.70; if it began to go up, to sell enough to keep it around 4.70.

Was not that what that instruction meant?

Mr. WHITNEY. That is what I mean by steadying it rather than trying to support it.

Mr. BROWN. I suggest we put in the record, Mr. Chairman, transcript of demand loan no. 1, which is the peg from May 4, 1916, to August 7, 1917.

(The document referred to was marked "Exhibit No. 2635" and is included in the appendix on p. 8752.)

Mr. WHITNEY. There is no possible argument that we bought exchange from May, but that is quite a different thing than this particular time the Senator mentioned.

I was trying to work out a basis of agreement, if I could, on the question of leverage.

Senator CLARK. Mr. Whitney, at that time, on August 13, 1915, when the exchange market was left without support, that was just a few days after J. P. Morgan & Co. had offered the British to extend this fund which was in your hands by a further loan up to $100,000,000, was it not?

Mr. WHITNEY. Quite right; and they declined it.

Senator CLARK. So far as the record shows, the British never answered that suggestion.

Mr. WHITNEY. By inference only.

Senator CLARK. They did say they were going to send over a commission and also send over some gold, but they never did directly answer your suggestion of extending their loan up to $100,000,000, did they? I do not recall that they did.

Mr. WHITNEY. They pretty nearly answered it, because you remember—I hate to go over all this again.

Senator CLARK. That is all right. The subject came up again. I do not have my documents over here.

Mr. WHITNEY. On August 20, Mr. Grenfell cabled Mr. Morgan, and I am reading only the pertinent part:

> We have strongly pressed that your proposal $100,000,000 1-year should be proceeded with at once, urging that offer very advantageous and would tide over interval between now and the announcement of any gold arrangements and arrival above-mentioned delegation, but not with success.

Senator CLARK. You are correct about that, Mr. Whitney. Anyway, they did not take up the proposition of extending it to $100,000,000?

Mr. WHITNEY. No; they did not answer.

Senator CLARK. They preferred to leave the market without support until the announcement that their commission was on the way over and that they were going to send some gold took effect, which was about the 2d or 3d of November, was it not, that the announcement came out?

Mr. WHITNEY. Yes. The net of it was that exchange went off to 4.51 on September 1. The next day there was an announcement of this delegation and these plans of doing something about it. That was the bottom. Exchange then climbed up gradually with the announcement.

Senator **Clark**. In the meantime the Government had changed its neutrality policy.

Mr. **Whitney**. I do not know if they changed it between the 1st and 2d of September.

Senator **Clark**. Changed right at that time, though.

Mr. **Whitney**. Somewhere.

Mr. **Lamont**. Mr. Brown, you were asking me a moment ago[1] about the blowing up of American ships, intimating that they were not American ships to any great extent blown up by the German submarines.

I could not give you chapter and verse then because I had not referred to our chronology. Your chronology omitted those blowings-up. There were the following American ships:

The *Healdton*, the *Memphis*, the *Vigilancia*, the *Illinois*, and, I think, the *Gulflight* was under an American flag.

Mr. **Brown**. I did not say that none were torpedoed, Mr. Lamont. I said more controversies with Germany were over the torpedoing of English ships, and that far more English ships were torpedoed than American.

Mr. **Whitney**. There were far more English ships torpedoed than American.

Mr. **Lamont**. All the German archives say that it was their entire intention to try to choke off England's food supply. They speak far more of that.

Mr. **Brown**. I was not discussing that. The only thing I was discussing was your remark in the record about the torpedoing of American ships.

Senator **Barbour**. There was torpedoing of American ships.

Mr. **Brown**. Undoubtedly, Senator. The point I was making was the quarrel with Germany was over the torpedoing of English ships. I was just trying to keep the record straight on that point.

Mr. **Lamont**. And the loss of American lives. You remember that statement the first day. I keep reiterating that.

There has been so much in the record, Mr. Chairman, in regard to the so-called German side of this controversy that now that we are on it, I think we should like to read into the record, with your permission, the famous Zimmerman telegram sent by Germany to the Government of Mexico in 1917, offering to split off Texas, New Mexico, and Arizona for Mexico's benefit in case of war.

Senator **Clark**. You mean, in case of war between the United States and Germany.

Mr. **Lamont**. And Germany, yes—and wanting to get Japan in on the German side.

Senator **Clark**. Japan was already in on the British side, was it not?

Mr. **Lamont**. Yes; but you remember, this note read that he should invite Japan to immediate adherence.

Senator **Clark**. You think it was nefarious for Germany to wish to take away one of England's allies, do you, Mr. Lamont?

Mr. **Lamont**. I am not commenting on it. I am just commenting on the provocative nature of that note, which offered to give away American territory and invite Japan to immediate adherence.

---

[1] See supra, p. 8579.

Senator **Clark**. You recall that Colonel House was at that same time offering to give away German territory?

Mr. **Brown**. If we put the Zimmerman note in the record we had better put the Treaty of London in the record.

Mr. **Lamont**. No; the Zimmerman telegram is that length [indicating]. You can put the Treaty of London in the record, for all I care.

Mr. **Brown**. The business of parceling out the territory of your enemies and your potential enemies is so habitual that we hardly need take any note of it.

Mr. **Lamont**. Mr. Brown, your recollection may not be as vivid as is that of some of the rest of us as to the effect of the Zimmerman note on public opinion in America. I think it worth while noting.

With your permission I should like also to read into the record four paragraphs of the German submarine note of January 31, 1917, now that we are on the submarine question. That note, as you recall, told us the barber-pole manner in which we had to paint our steamers, and we could send only one steamer a week and it had to pursue a certain lane, and so forth.

They are both very brief.

Senator **Clark** (presiding). They may be inserted.

Mr. **Lamont**. Thank you.

(The documents referred to were marked "Exhibits Nos. 2636 and 2637" and are included in the appendix on p. 8780.)

Mr. **Brown**. I do not think, Mr. Lamont, that anyone here is trying to justify Germany. I think what we are trying to do is find out more or less what happened and the defense that is offered against what happened is that it was a moral war against Germany. You cannot get anywhere until you stop to see what happened. But I think no one is trying to justify Germany.

To answer your question, Mr. Whitney, the Hamlin diary has the following entries:

> Lansing says Board should go slow in approving nonliquid unsecured.

And later on:

> C. S. H. says cable nothing until his talk with Lansing and Harding.

Mr. **Whitney**. But Mr. Wilson wrote those two paragraphs.

Mr. **Brown**. So it appears from the record.

Mr. **Whitney**. We did not know that until several years after the war.

FINANCIAL CRISIS—DECEMBER 1916 [1]

Mr. **Brown**. Mr. Chairman, I would like now, as a further comment on Mr. Lansing's state of mind at this time and his part in these financial difficulties that were occurring to introduce into the record a letter written on April 7, 1917, after the declaration of war, addressed to Edward N. Smith, Watertown, N. Y.:

(The document referred to was marked "Exhibit No. 2638", and is included in the appendix on p. 8780.)

Mr. **Brown**. [reading]:

> My Dear Ed: I received your letter of approval of the President's address to Congress and was much gratified that you felt as you do about it, although I knew that you would feel so without your writing.

---

[1] See also "Exhibits Nos. 3125 through 3162 and 3192 through 3217", Hearings, Part XXX; and "Exhibit No. 4135–A", Hearings, Part XXXII.

> Since you wrote me Congress has acted, and I am sure that to one who watches as closely as you do the course of national affairs the vote in the House must indicate the conditions under which we have long been laboring. We have known the state of mind in the House and realized that it was not as "clear sailing" as many people seemed to think. I was asked the day before the vote was taken what would be the number of the opposition, and when I said, "50, possibly 60", I was ridiculed as a pessimistic prophet. I really believe there were a number of others who would have voted against the resolution if they had dared and if they had not the overwhelming majority in the Senate as an indication of popular opinion.
>
> It is my judgment that if the same resolution had been presented in February, the House would have shown three times as great opposition, and if it had been voted on last summer, its passage would have been so close as to show a divided country. Indeed, it might have entirely failed.

Senator **Barbour**. This was Lansing's opinion?

Mr. **Brown**. This was Lansing's opinion [reading]:

> Of course, the President could have made a record for himself by action then, but, knowing the temper of the coordinate branch as he did, he would have placed the country in a most humiliating position.

Mr. **Lamont**. Where did this letter come from?

Mr. **Brown**. This is from Mr. Lansing's papers, the open papers in the Library of Congress [reading]:

> The only course practicable was to wait, to suffer further indignities, and to make every effort to bring about peace, so that the lukewarm would grow hot and the cold lukewarm.

Not to bring about peace, but to bring about a domestic political situation.

Mr. **Whitney**. Is that from the letter?

Mr. **Brown**. No. That is my comment, off the quotes.

I will read that [reading]:

> It was to wait the time when there could be no question but that a substantial majority favored war. Even when that time arrived, the thought that a very considerable number of pacifists of pro-German and anti-British adherents, and of Representatives who sought at any cost the material good of their constituents could be counted against the resolution was to me a distressing fact.

Toward the end of the letter, in the next to the last paragraph, he says [reading]:

> Do not think that I am blaming those who have been bitter critics. I am not, because I realize their felings were natural from the facts at their command. But I do hope that now they will comprehend the obstacles which had to be removed and the difficulties which had to be overcome, before decisive action could be wisely taken.

Mr. **Morgan**. Mr. Brown, might I call your attention to this sentence? [reading]:

> and of Representatives who sought at any cost the material good of their constituents could be counted against the resolution.

Mr. **Brown**. I read that, I believe, Mr. Morgan.

Mr. **Morgan**. That means that the money question did not influence the majority of Congress in any case. I should think it meant that he thought so.

Senator **Barbour**. It certainly could mean that.

Mr. **Morgan**. That is what I thought it could mean.

Mr. **Lamont**. On the sinking of American ships, again, just for a second, you recall that American ships were sunk in March; that is, between the time that Von Bernstorff was given his passports and the time of Woodrow Wilson's speech.

Mr. **Brown**. Oh, yes.

Mr. **Lamont**. I think there is a very distinct factor to be indicated in that circumstance.

Von Bernstorff was given his passports, you recall, a month before Ambassador Page sent his cable which was read into the record yesterday.

Mr. **Brown**. Having covered in a way the elements of motives behind some of the powers within the Administration, I wish, Mr. Chairman, to recur to the financial events.

I offer for the record a cable from H. P. Davison to Morgan, London, no. 31879, December 1, 1916, from which it appears that the exchange situation had become very serious as a result of the Reserve Board announcement.

(The document referred to was marked "Exhibit No. 2639", and is included in the appendix on p. 8781.)

Mr. **Brown**. I wish to call attention just in passing to the second paragraph [reading]:

> In addition to the foregoing, we have invested in United Kingdom loan, other loans to Allies, and acceptances with belligerent government guarantees, $25,759,000.

and so forth.

I wish to offer for the record a cable of December 4, 1916, from Morgan in New York to E. C. Grenfell.

(The document referred to was marked "Exhibit No. 2640", and is included in the appendix on p. 8782.)

Mr. **Brown** (reading):

> Exchange purchases up to noon today already aggregate over £3,000,000. As indicated in 31844, all our calculations will be completely upset if exchange purchases continue as now.

The immediate crisis, apparently, Mr. Whitney, produced by the Reserve Board announcement, other than the general fear that you expressed in cables already in the record, was this sudden pressure on exchange. Is that correct?

Mr. **Whitney**. It was one of half a dozen, if you want, contributing factors that made that period there a serious and an anxious one. Of course, the direct result of the Federal Reserve Board ruling, plus a Cabinet crisis that was pending at that time, was twofold: One of them the great pressure on exchange, partly accelerated by the fact that American balances in London were withdrawn.

There is no question or doubt about it. It runs right through all these cables that the exchange matter, the question of purchasing exchange, and the ability to get dollars, was the unknown factor in the situation, as was brought out yesterday.

We knew pretty well what our contractual payments were.

The Federal Reserve ruling's first repercussion was on the exchange market.

Then, of course, there was the fact that there was a 15 percent market here, which naturally withdrew funds from London.

Those three factors, money rates here, the Cabinet crisis in London, which had an additional sort of human effect that you could not get the assistance from the people over there to do something about it, plus the Federal Reserve ruling—the Federal Reserve ruling first in importance, of course—there is no question about it that the pressure on exchange at this time was a factor in trying to plan for the next 3 or 4 or 5 months how the British would get available dollars.

Mr. Brown. This cable says [reading from "Exhibit No. 2640"]:

> All our calculations will be completely upset.

To what does that "calculations" refer? As I recall the previous record, the Chancellor had been very reluctant to use up his quick American assets. I do not recall that the record shows whether the Chancellor consented to use up these assets. Do you recall to what that "all our calculations" referred?

Mr. Whitney. It would take me a little time to show it actually. I think I can answer your question, though, from memory.

We had talked about what the requirements were, if you remember, up to March 1, and March 31, earlier, the Chancellor told Mr. Morgan that he had requirements of approximately a billion dollars in that period.

We know that he actually spent 1,200 millions, 200 million dollars more than that, they and the French together.

He then had told Mr. Morgan that he then had approximately a billion dollars of readily available resources, readily available within 90 days, but—and this is what I mentioned a minute ago—because of the Cabinet crisis we had not been able to get attention to it.

That schedule was predicated on contracts that they could see. The question of withdrawing some very substantial amount of money from London by American banks was obviously a factor in the whole weight, of exchange, and threw their calculations, that they had given us up to date, more or less out of gear.

Mr. Brown. At this time, on December 4, there was no definitely fixed program for financing requirements? There were tentative calculations, we will say, but there was no definite program?

Mr. Whitney. It never could be very definite. We have tried to estimate, you know, a month ahead, but I do not think that it ever could be called a definite program because there were too many unknown factors.

But certainly what we were doing all the time was pressing the British Chancellor, the British Government, to get his resources over here. They were not any good in London. Gold did not do him any good in London. We were pressing him to go about his business.

This all terminated, as you know, a little later than this in their saying they could see their way through December if we would increase the demand loan.

Mr. Brown. We will come to that in a moment.

I offer for the record cable of December 5, 1916, no. 33036, from Morgan, New York, initialed H. P. D., to E. C. Grenfell.

(The document referred to was marked "Exhibit No. 2641" and is included in the appendix on p. 8782.)

Mr. Brown [reading]:

> Our exchange purchases this morning aggregate approximately £4,000,000. We must again reiterate that this feature seems to be the crux of the whole situation. Payments under contracts closed through us are not excessive.

We figure them approximately 100,000,000 monthly during the next 4 months. But the support of the exchange market is the serious feature. In attempting yesterday to participate nos. 1 and 2 loans beyond our own circle, we found reluctance on the part of some institutions naturally due to low reserves and extraordinarily high rates for call money. With this somewhat unexpected obstacle and with the situation as serious as it is, we called group of confidential leading bankers this morning to point out the necessity of caring for situation and the facility for doing so with such large amounts of American securities to use pending arrival of sufficient gold. All these bankers most anxious to cooperate and express willingness to reduce their reserves even below legal limit, if necessary, but as one man they asked the question, What are Great Britain's requirements going to be in the next 30 days? We could not answer this question because the handling of exchange makes that feature absolutely uncertain.

I would like to call attention to the phrase—

anxious to cooperate and express willingness to reduce their reserves even below legal limits * * *.

How often in the New York money market does the occasion occur where the banks must stand willing to reduce their reserves below the legal limit?

Mr. Whitney. What is a reserve for?

Mr. Brown. That is what Mr. Morgan's father said in 1907. Has it been said since?

Mr. Whitney. I never heard it said since. Do not certain facts still hold true?

Mr. Brown. Yes; but it was a very serious crisis. It was the most serious financial crisis that the New York market had had since 1907.

Mr. Whitney. I just said that call money went to 15 percent.

Mr. Brown. This was a situation where the banks were forced to throw good money after bad?

Mr. Whitney. Not a bit. They did not have this loan, or but a little bit of it.

Mr. Brown. They had Allied bonds and had all kinds of commitments. The financial world had spread, so that it all hung together.

Mr. Whitney. Mr. Brown, when you make a statement about throwing good money after bad, and so forth, and all the rest, obviously you are incorrect. That is as clear as a bell. If you will read the whole cable, you will see what the situation was. You just pointed out what we did. They wanted to know what the situation was for 30 days. Obviously money was tight. We have pointed out in cable after cable that the Federal Reserve Board's ruling precipitated a situation on the exchange which momentarily, temporarily, raised the question of how they were going to get through the 30-day period, and made it a difficult one. You will find further on——

Mr. Brown. Just a moment, because I agree with you entirely, Mr. Whitney, but the only point I want to make is, that the war trade boom had produced a situation now where any injury to Allied credit would become a threat to the reserves of the New York banks.

Mr. Whitney. This was purely a temporary financial matter.

Mr. Brown. But that financial situation is produced, is it not, by a stringency, a temporary blocking of Allied finances?

Mr. Whitney. This stringency was produced by a very unexpected and very broad ruling by the Federal Reserve Board.

Mr. **Brown.** In relation to Allied credit.

Mr. **Whitney.** Certainly, because that had two results. One of them was that it interrupted a program which would have carried us through in a normal way, and, secondarily, that caused pressure on exchange, which created an additional burden beyond which we were perfectly willing and set to carry out. It produced that situation, and the effect of an unexpected contingency, which brought about a very serious stringency in the money market for the moment. As you know——

Mr. **Brown.** Mr. Whitney, that is all true, and I agree with you.

Mr. **Whitney.** May I finish?

Mr. **Brown.** Had not the Allied financial situation got to such a point that it resulted in a drain on the reserve of the banks? I do not see any other way to interpret that phrase.

Mr. **Whitney.** We are doing all this in the light of hindsight, are we?

Mr. **Brown.** Of course.

Mr. **Whitney.** Did they exceed their legal reserves?

Mr. **Brown.** I do not know.

Mr. **Whitney.** If you read the cable, you will see this was a stringency, and in order to meet that temporary contingency, they were prepared, if necessary, to reduce their reserves below the legal limit.

The fact is—and we are reading all this in the light of hindsight—that about a week or two after that money rates slackened very materially, and they slackened at the time when we finally got to the attention of the British Government, and they told us, which I started to say a moment ago, that if they had another 150 millions, they could take care of that.

Mr. **Brown.** I am taking note of that, but I do not think that it answers my question.

Mr. **Whitney.** All I wanted to show was the fact which I stated.

Mr. **Brown.** What I want to say is that the situation had reached the point where because of a blow to Allied credit a general financial crisis was in the offing.

Mr. **Whitney.** Not a crisis, but monetary stringency. We are talking about finance. Certainly it was a blow to Allied credit. It was a blow to financing. It was gratuitously given it by the Federal Reserve Board. They upset the program for the moment. There is no argument about that.

Mr. **Raushenbush.** A month or so before that, in the argument about the rifle situation, we had some of the banks admitting, and you passed it on to England, that some of the banks had gone beyond their limit in lending to those companies.

Mr. **Whitney.** Yes.

Mr. **Raushenbush.** I think the phrase was that it "forced loans in despair." Here they are talking about reasons.

Mr. **Whitney.** That is true, but that had nothing to do with Allied credit, but it was a loan to the rifle people.

Mr. **Raushenbush.** We brought out what connection that had with Allied credit at the time.

Mr. **Lamont.** Mr. Brown, if you ever worked in a bank, you would know that at times of high call money, in meeting the stress, banks never hestitate temporarily to go below their legal reserves. They consider it their duty. As Mr. Whitney said, that is what reserves are for. The reserves may be restored the next day, but it is their duty to relieve a very tight and very difficult situation in conditions.

Mr. **Brown**. Yes.

Mr. **Lamont**. Let me finish.

Senator **Barbour**. Let him finish.

Mr. **Brown**. All right.

Mr. **Lamont**. It is their duty to relieve a difficult situation in the money market, and they do so by furnishing money. Way back in 1907, Mr. George F. Baker, the head of the First National Bank, one of the most conservative of banks of that day—and a bank that was called "Fort Sherman" because it was so terribly solid and such a bulwark for the Government—went down to 10 percent instead of 35. That was a very unusual distance to go, but he had no hesitancy in going there.

During the high call money market of 15 percent, which Mr. Whitney described, in December of 1916, any number of banks in New York, in order to relieve the situation, did go under their reserves for a day or two, and then did go back.

I think you lay altogether too much stress, if I may say so, upon the phrase, "legal reserves."

Mr. **Brown**. I am sorry I did not make myself clear. I was not for a moment implying that there was the least impropriety in such a thing. I have always admired Mr. Morgan's father for that phrase in 1907, when I read the history of it, but the point I am making is the seriousness of the situation in the New York market, together with the involvement of Allied credit.

Mr. **Whitney**. May we get back to the record for a minute? In the first place, this call money market, which caused this stringency should be considered. This cable which you have just read is dated December 5, 1916. You have to judge the whole financial situation. I have here the Financial Chronicle, which is supposed to be the standard thing, and I would like to read what the rates were during the first 2 days of December.

The first is for Friday, and 4½ was low and 6½ high. The following Monday, the 4th day of December, the low was 6 and the high 16; the 5th, the day of this cable, the low was 6 and the high 10; the next day it was 3 to 7; 3 to 5; 3⅓ to 4.

So that by the 8th, they had gone back. In other words, for some reason, there had been a temporary money stringency, the reason of which I do not remember. This cable was quoting the situation to them at the time call money was 15. Obviously the banks in New York were hesitant about doing anything like that. They did not know how long it was going to last, and when we explained the situation to them and explained it was a temporary matter, they said they would take care of that, because that is what a bank is for, to take care of temporary emergencies.

I would like to read again, if I may, a cable which was introduced in the record yesterday,[1] under date of December 22, 1916, which reads as follows [reading]:

> Am increasingly impressed with the idea that the President's message will do no harm to the prospects of collateral loan. Indeed the liquidation produced and the reduction of loans might make it a little easier.

---

[1] Entered as "Exhibit No. 2631", see supra, p. 8571.

That is the first part of the cable. This is of course later, but the point I want to show is the later situation. It was signed by Mr. Morgan and is typical of the general situation at that time. It states further [reading]:[1]

> Banks in the West are carrying large reserves for which they cannot find use in their own parts of the country. The course heretofore has always been to remit such funds to New York for temporary employment there. This I think is bound to occur again, though this year the tendency of money to New York has not developed quite as early as usual.

In other words, there is no question that the Federal Reserve ruling caused additional pressure in exchange, which made an immediate need for money. Secondarily, the high money rates and the ruling caused American sterling balances to be withdrawn in New York. All those things inspired for almost a moment—I used the word "momentarily" and I did not realize how right I was—the going through of a money stringency. That happened to be the day, due to the demands on us, we asked the banks to participate in these demand loans. What could have been more natural? They say when they learn the circumstances, "Tentatively the thing is being taken care of", but it has obviously been set back by the Federal Reserve ruling. There is no question about that.

When they were asked they said, "Certainly this temporary situation will have to be taken care of, and, if necessary, we will draw on our reserves."

It seems to me that is natural, and it is a situation which appears simple.

Mr. LAMONT. One general remark, Mr. Brown, which is this:

You are describing from a few cables what you declare as a terrible critical situation in December 1916.

It so happens that Mr. Morgan, Mr. Whitney, and myself, were in the midst of that situation. It was not critical. It was anxious. There were a lot of things to be done, which Mr. Whitney has described in detail, but I can tell you from our experience, rather than your getting some inferences from a cable, that it was not critical.

Mr. BROWN. I offer for the record the call money rates which Mr. Whitney was reading from.

(The document referred to was marked "Exhibit No. 2642" and is included in the appendix on p. 8783.)

Mr. BROWN. Proceeding with the cable which we were discussing, of December 5, 1916, it states [reading from "Exhibit No. 2641"]:

> It was apparent to us that our inability to answer this specific question or even to place an outside limit upon the exchange item, was very disturbing to these bankers. We feel, therefore, on this and on every other account, that we must have some early expressions as to plans of authorities on this point. We are not fully acquainted with what is in their minds. Perhaps they have some undisclosed resources that we are not aware of, but at the present rate of going they will soon exhaust all gold available or in transit and also available American securities even going so far as to assume that we can possibly secure loans up to 80 percent of the value of these securities. We do not presume to suggest the policy of the authorities but our responsibility certainly requires our pointing out the dangers in the situation so that if we should suddenly find that we had exhausted all available resources of this market, the knowledge of that fact would not come as a shock to authorities.

---

[1] Entered as "Exhibit No. 2631." See supra, p. 8571.

Mr. **Whitney**. Mr. Brown, may I comment on that?

Of course the answer to that is that they did come through with additional resources, and it might clarify the matter slightly if we remember that between approximately this time, the 1st of December, until the end of March, the British Government shipped about $536,000,000 worth of gold to this country; that they sold free securities of about $69,000,000, I think it is; that we floated for them, as you know, $250,000,000 of United Kingdom Third Loan, and the demand loan was at the time of April 6, $345,000,000.

The United Kingdom loan was secured by $300,000,000 worth of securities. The demand loan at the time of April 6 had something over $700,000,000 of securities as collateral for that. And, in addition to those resources which were here, and those shipments of gold and sales, the British Government had about $650,000,000 worth of securities which would have been usable for collateral or for sale, to the extent of about $300,000,000.

We had a transaction with the Canadian Pacific Railway for $200,000,000, and they had about $100,000,000 of British municipals ready for sale, and about $400,000,000 worth of gold.

So that having financed themselves to the extent of about $1,200,000,000 between this date and March 31, they had securities and gold to the extent of approximately $1,000,000,000 readily available.

Now, that shows that this inquiry we made—certainly we made that inquiry because we wanted to know what they were going to do about it. That was our job and our duty. But the answer is, when we asked them what they were going to do about it, that is what they did.

You will remember, of course, subsequent to this cable they put a new law through, which entitled the Government to requisition securities which before had been voluntary. When they shipped gold to meet the engagements in this country, more drastic steps had to be taken to take care of them.

This is pointing out that we had to know, because of this unexpected set-back, if you will, in the program, which made it essential for us to know, so that we would know where they were going, and how they would meet the situation.

Mr. **Brown**. I think a lot of those things we will come to in due course.

Mr. **Whitney**. It is a little easier to get them sort of pooled together.

Mr. **Brown**. That cablegram of December 5, 1916, is offered for the record with appropriate number.[1]

Mr. **Brown**. I offer for the record a cable of December 6, 1916, no. 26986, from Mr. Grenfell, of which I will read only the last paragraph [reading]:

> I presume that if a break were allowed in exchange or any cancelations of orders were to begin, these might occasion a big squeeze in your stock markets and curtailment of loan facilities by bankers. Do you endorse this opinion?

(The document referred to was marked "Exhibit No. 2643", and is included in the appendix on p. 8784.)

---

[1] Previously entered as "Exhibit No. 2641", see supra, p. 8588.

Mr. **Brown**. I offer the answer to that cable, being cable No. 33061 of December 6, 1916.

(The document referred to was marked "Exhibit No. 2644", and is included in the appendix on p. 8784.)

Mr. **Brown**. I offer for the record cable of December 6, 1916, no. 28017, the relevant portion being in the third paragraph at the bottom [reading from Exhibit No. 2645"]:

> If you can therefore care for $150,000,000 during the whole of December out of advances on American Securities in addition to loans nos. 1 and 2 now outstanding there will be a margin. This provided gold deliveries meet exchange requirements.

(The document referred to was marked "Exhibit No. 2645", and is included in the appendix on p. 8785.)

You will remember that it says further back that they were prepared to ship $200,000,000 worth of gold immediately.

Senator **Vandenberg**. Is there any mention made as to the immediate effect of the cancelation of orders?

Mr. **Brown**. J. P. Morgan & Co. say [reading from "Exhibit No. 2644"]:

> A break in exchange or cancelation of orders would probably affect the stock market, and also foreign issues. We are not sure we know just what you have in mind by a break in exchange.

Mr. **Lamont**. Go ahead.

Mr. **Brown**. Shall I read the rest of it? [reading]:

> Our experience leads us to believe that if the protection were completely removed the exchange market would break badly, the results of which would be reflection upon British credit, which would in turn make borrowing more difficult. We do not see how cancelation of orders would bear upon this, unless cancelations were viewed as necessary because of lack of ability to pay for the goods; that is to say, if cancelations were made because of speeding up of resources at home or in colonies, thus enabling Great Britain to get along without goods from this country, it would be only a natural move in view of the difficulties of borrowing in this country.

However, Mr. Whitney, that does not seem to square with the situation in connection with the rifle matter, where, as I recall the record, the attitude of the British Government was that no cancelation must be made because it would produce a terrific financial squeeze. My guess would be that that is what E. C. Grenfell had in mind in his inquiry of the 6th [reading from "Exhibit No. 2643"]:

> I presume that if a break were allowed in exchange or any cancelation of orders were to begin, these might occasion a big squeeze in your stock markets, and curtailment of loan facilities by bankers.

Mr. **Whitney**. That is a question, is it not?

Mr. **Brown**. Whether you endorse the opinion.

Mr. **Whitney**. We say it would affect the stock market.

Mr. **Brown**. You opened the paragraph by stating [reading from "Exhibit No. 2644"]:

> A break in exchange of cancelation of orders would probably affect the stock market, and also foreign issues.

Mr. **Whitney**. I do not quite get your reference to the rifles contracts.

Mr. **Brown**. You say down here that cancelation would not bear upon this, but, as I recall the record of the rifle situation, the argument to the British Government was, "You cannot cancel these contracts because the whole financial situation in America hangs on them."

Mr. **Whitney**. Excuse me. What we stated to them in connection with the rifle contracts was that we were then planning the second U. K. loan, and that because of certain large important banks, whose support had been necessary, if we were going to get through the second U. K. loan, and they were interested in the settlement of the rifle contracts, because of loans and other reasons, that unless we could convince those banks that the British Government were prepared to make an equitable adjustment of those contracts, that we would not be able—I think we used the words, it would necessarily delay that operation.

The question here is, I think that you read [reading from "Exhibit No. 2644]:

> We do not see how cancelation of orders will bear upon this, unless cancelations were viewed as necessary because of lack of ability to pay for the goods. * * *

In that case it certainly would affect the British credit, would it not?

Mr. **Brown**. That is not the situation with the rifle matter.

Mr. **Whitney**. I do not see any analogy in the rifle matter to this.

Senator **Vandenberg**. What would have been the effect of a general cancelation of orders?

Mr. **Whitney**. You mean on the credit situation?

Senator **Vandenberg**. I mean on the general economic situation in the United States.

Mr. **Whitney**. I think you asked Mr. Lamont that question the other day.

Senator **Vandenberg**. I seem to find myself coming back to it constantly.

Mr. **Whitney**. I think Mr. Lamont can answer it better than I can, because he has answered already, but if there had been an abrupt cancelation, it probably would have been very upsetting.

Mr. **Lamont**. Bound to be so.

Senator **Vandenberg**. In other words, our economy was squarely tied to these orders in a large degree?

Mr. **Whitney**. These are purely financial troubles.

Senator **Vandenberg**. I understand, but I am talking in general terms.

Mr. **Brown**. And also tied to the exchange.

Mr. **Whitney**. General orders?

Mr. **Brown**. I mean our economy was tied to these orders and also tied to the exchange.

Mr. **Lamont**. Any sudden collapse of a high degree of prosperity, whether it happens to be in time of war or otherwise, always means a depression.

Senator **Vandenberg**. That is quite true.

Mr. **Lamont**. As it goes up it is inflation, and coming down it is deflation.

Senator **Vandenberg**. That is why I am not interested in that at any time.

Mr. **Brown**. We have seen the importance of exchange and orders to the American economy, and I would like to offer for the record, as an example of the importance of the exchange to the British economy, as indicating the immensely close tie-up that had been created, a memorandum dated July 23, 1917, being a memorandum which was handed to Mr. Page on July 20, 1917, at the instance of the Chancellor of the Exchequer, that is, by the British Chancellor of the Exchequer.

Mr. Lamont. When was this?

Mr. Brown. This is dated July 23, 1917.

Mr. Lamont. Four months after we got into the war?

Mr. Brown. Yes, sir.

(The document referred to was marked "Exhibit No. 2646" and is included in the appendix on p. 8785.)

Mr. Brown. The relevant parts of that memorandum read as follows [reading]:

> By the beginning of 1916 they—

That is the British—

> had to go a step further and to come to the support of commercial exchange by making a standing offer through their agents in New York to purchase sterling from all comers at fixed minimum rate of $\$4.76\frac{7}{16}$.
>
> * * * * * * *
>
> This arrangement provided a direct means of conversion of sterling into dollars by which British purchasers of American goods could reckon on financing them at a fixed rate while the Allies and dominions who received sterling credits could turn them into dollars to meet their American payments. Indirectly also it stabilized in some degree all the other foreign exchanges, since sterling could be, if necessary, converted into any other foreign currency by first purchasing dollars and then using these dollars to obtain foreign currency required.
>
> As time went on this system developed into one by which the nervous center of Allied financial system was as much in New York as in London. While gold was occasionally exported to other destinations, the bulk of it was reserved for America. By furnishing America with unprecedented quantities of specie we ourselves provided the basis of credit she required to finance her sales to us.

Mr. Brown. I also would like to offer for the record a letter from the British Ambassador, Sir Cecil Spring-Rice, to the Secretary of State, dated July 1, 1917.

(The document referred to was marked "Exhibit 2647", and is included in the appendix on p. 8789.)

Mr. Brown. That letter reads in part as follows [reading]:

> I am instructed by His Majesty's Principal Secretary of State for Foreign Affairs to call your immediate attention to the financial position of Great Britain in regard to the war, inasmuch as it is of an urgent and critical character. It appears, indeed, to Mr. Balfour that the United States Treasury do not realize how perilous the situation truly is, namely, that there is danger that the ability of His Majesty's Government to effect payments in America from today onward will be in jeopardy.

This is the relevant passage [reading]:

> The effect which will be produced on the progress of the war by a collapse of the exchange will be no less disastrous than a great military reverse, for not only will all commercial relations between the two countries, including the cotton trade, be thrown into complete disorder, entailing the stoppage of the entire private export business from the United States, but, further, the basis of financial relations of all the Allies with the rest of the world will be removed, and a general collapse of credit and of all financial confidence will inevitably result.

I offer for the record a cable dated December 7, 1916, no. 28037, indicating that the delay in contracts—what would you conclude, Mr. Lamont, that this cable indicates?—that the delay in signing contracts was largely due to the Cabinet crisis, rather than anything else?

Mr. **Lamont**. No. 28037?

Mr. **Brown**. Yes, sir.

Mr. **Lamont**. Your question was what?

Mr. **Brown**. Does not that indicate that the delay in—I will offer along with no. 28037 cable no. 28038 of December 7, 1916—and do not these two cables together indicate that the chief difficulty with regard to purchases was the Cabinet crisis?

Mr. **Lamont**. Getting orders signed, you mean?

Mr. **Brown**. Yes, sir.

Mr. **Lamont**. No fresh orders should be placed in view of difficult money situations, also.

Mr. **Brown**. The cable also reads [reading from "Exhibit No. 2649"]:

> Further, in view of difficult money situation * * *.

Mr. **Lamont**. Mr. Whitney alluded to that as one of our difficulties.

Mr. **Brown**. Yes, sir.

Mr. **Lamont**. During all this period I think it is important not to forget the fact that the British Government had immense liquid resources. They were dilatory in mobilizing those resources. They were dilatory in telling us just how they were going to mobilize them. That is really the burden of the reports in the course of the 6 months before America finally entered into the war. We constantly communicating to them, and saying, "For goodness' sake, show your hand and get your resources together, and show how you are getting on", and so forth. They were occupied with the war on the western front, with the Cabinet crisis, and so forth. They always knew they had ample resources, so that they did not take the matter as seriously as we thought they should at the time.

Mr. **Brown**. Mr. Lamont, it seems to us that it is either one way or the other—either the British were rich enough to do this or else they were not. The memorandum I just submitted for the record said that the British were worried about their resources.

Mr. **Lamont**. Who said that?

Mr. **Whitney**. When we entered the war they had $1,000,000,000 to ship, and everything covered here.

Mr. **Brown**. How do you interpret this language [reading from "Exhibit No. 2647"]:

> * * * that there is danger that the ability of His Majesty's Government to effect payments in America from today onward will be in jeopardy?

Mr. **Whitney**. Was not that August 1917?

Mr. **Brown**. July 1, 1917.

Mr. **Whitney**. 1917?

Mr. **Brown**. 1917.

Mr. **Lamont**. Four months after we were in the war. What has that got to do with the last January? You have been talking about the conditions in December and January.

Mr. **Brown**. Then the situation, as you picture it, is that the British Government was rich enough to carry the war through up to July 1, 1917, and then was busted?

Mr. WHITNEY. Mr. Brown, it is perfectly well known that there was an Anglo mission which came over here to meet with the United States Treasury on the question of finance. It is perfectly well known that the markets were closed to private borrowing on the part of Great Britain. That cable merely says that the British nationals—I can not quote it, but it said that the British nationals needed such loans on which to continue their purchases here, outside of the Government, and it says that the commercial business will break down if something is not done about the exchange markets. That is 4 months after we had entered the war, when the United States Government was discussing with the British Government the method of financing, about which we have no knowledge. The result, we know, is that from the entry of America into the war on, the markets were closed to the British Government, to go and try to do further financing. I cannot see that that has any reference whatsoever to a matter four or five months before our entry into the war.

Mr. BROWN. I hope we will come to that point a little later.[1]

I offer for the record a cable dated December 7, 1916, No. 33131. This cable is apparently the answer to the request whether you could furnish $150,000,000.

(The documents referred to were marked "Exhibits Nos. 2648, 2649, and 2650" and are included in the appendix on pp. 8790 and 8791.)

Mr. BROWN. In the middle of the first paragraph that cable reads [reading from "Exhibit No. 2650"]:

> * * * that your estimate is that an additional amount of loans, say $150,000,000 during December will take care of the entire situation as you see it for that period. Our important banking friends have assured us that they will stand by and assist and as result of various conferences today, we expect that we will be able to carry the business through if no unforeseen obstacles arise. To give you something of the picture, this would involve our having a participation in excess of $100,000,000, the National City Bank, say, $40,000,000, the First National Bank, say, $30,000,000, and so on. Naturally these institutions ask what is going to happen after the first of the year and to that we are unable to reply. We of course cannot encourage an operation which will bind up the New York market without some way of liquidating it.

Mr. WARDWELL. Read on.

Mr. BROWN (continuing reading):

> As we have said before, we hope that conditions will soon improve so that we can make an issue and certainly we could make a public issue upon these Americans which would undoubtedly go promptly. Otherwise we would have to liquidate by sale some of the securities and on this point we may point out that we have only about $15,000,000 Americans in British Government Treasury account, unpledged so far as regards either of the United Kingdom loans.
>
> This phase of the problem is a most important one.

Now, at that time, do you recall the height of the demand loan on December 7, the two loans?

Mr. WHITNEY. What?

Mr. BROWN. Do you recall the height of the demand loans on December 7?

Mr. WHITNEY. I think $175,000,000.

Mr. BROWN. Was that the highest?

Mr. WHITNEY. Yes.

---

[1] In regard to the closing of the American market to British borrowing after April 6, 1917, see testimony on that subject, Hearings, Part XXIX, pp. 9014, 9024 to 9027.

Mr. **Brown**. The addition of another $150,000,000 would put them up to $325,000,000?

Mr. **Whitney**. As a matter of fact, in December they drew about $60,000,000, so that it shows how conservative they were, and $75,000,000 more in January. That was the story, I think, as I said yesterday, that they went up to a certain figure. We know, do we not, that when the third United Kingdom loan was sold and paid for, that there were $76,000,000 of the demand loan unpaid? We took that ourselves. You suggested that in the cable yesterday. From then on the demand loan increased to $345,000,000, when we went into the war, so that it went up to roughly $345,000,000.

Mr. **Brown**. At that time, in December, you undertook to furnish on the demand loans sums which, judging by the previous United Kingdom loans, there would be no way to liquidate? The biggest United Kingdom loan was $300,000,000.

Mr. **Whitney**. That is the net result of it. Are you forgetting the French?

Mr. **Brown**. I am talking about the United Kingdom.

Mr. **Whitney**. That is the fact. I said it went up, so that when we sold the U. K. loan on the 1st of February, there were only sufficient funds derived from that loan to bring down the demand loan, making it short by $76,000,000.

Mr. **Brown**. You say here, "We, of course, cannot encourage an operation which will bind up the New York market without some way of liquidating it."

What kind of method did you have in mind?

Mr. **Whitney**. We did liquidate it except for our own participation.

Mr. **Brown**. You did liquidate it to the 1st of February?

Mr. **Whitney**. We took it further.

Mr. **Brown**. For how many days, Mr. Whitney?

Mr. **Whitney**. I said it went up to $345,000,000 by April 6.

Mr. **Brown**. By the middle of February?

Mr. **Whitney**. It went right on up.

Mr. **Brown**. It went right on up?

Mr. **Whitney**. Certainly.

Mr. **Brown**. So that in effect you could consider in December 1916, judging by the standard of previous U. K. loans, that there was no possible way to liquidate the demand loan?

Mr. **Whitney**. Mr. Brown, I have explained before that we were working with all kinds of transactions, including British municipals. One of them we discussed, to the extent of £50,000,000, which is in the cables. It was necessary to get enabling legislation, which they got. We were discussing a transaction of $200,000,000 with the Canadian Pacific, as I said a moment ago, so that you can liquidate it. The net of it was, it was liquidated.

Mr. **Brown**. When was it liquidated?

Mr. **Whitney**. To February 1.

Mr. **Brown**. That $73,000,000?

Mr. **Whitney**. Seventy-six million.

Mr. **Brown**. Within a few days the British purchases put it back up again?

Mr. WHITNEY. Of course, we keep getting mixed up, because I talk banking talk. The loan was liquidated. When it started again, the banks who loaned the money had the chance to say if they would take any more of it. When a loan is paid off, it is liquidated, in ordinary parlance, and when he gives a new loan, that is new business.

Mr. BROWN. Can we not avoid technicalities?

Mr. WHITNEY. That is not technical; those are facts.

Mr. BROWN. The fact is that the British Government remained continually indebted to you and the New York banks from this time on until some time in 1919. Is not that correct?

Mr. WHITNEY. Excuse me, Mr. Brown, because at that time everybody was paid off except J. P. Morgan & Co.

Mr. BROWN. For a few days?

Mr. WHITNEY. For a few days. At that time we went back and asked them if they wanted to participate again, they had the option. So that when you say they were continually obligated, I am sorry, Mr. Brown, but that is not the fact. To answer the rest of your question, it is true that after the banks had been paid off—we had not been—but after the banks of New York City and the country had been paid off, very shortly thereafter they participated again, and then the demand loan was finally paid off in July 1919.

Mr. BROWN. So that the statement here: "We of course can not encourage an operation which will bind up the New York market without some way of liquidating it" is not quite what occurred is it?

Mr. WHITNEY. That is exactly what occurred, because remembering that fact and the fact that we felt under some obligation not to bind them up is the reason we paid off the other banks and retained the $76,000,000 ourselves, which gave them practically and actually, not merely technically, the right to say whether they would loan the money the second time.

Mr. BROWN. On that point, Mr. Whitney, I will offer for the record the cable of February 6, 1917, from Morgan in New York to Morgan, London No. 37352.

(The document referred to was marked "Exhibit No. 2651" and appears in full in the text.)

Mr. BROWN [reading]:

> For E. C. Grenfell. After payment yesterday for United Kingdom no. 3, loan no. 1 now stands at $8,790,274.67. Loan no. 2, $63,000,000. This is a figure which, as you can see, if added to materially in the near future through exchange purchases or otherwise, is likely to compel us to begin participating out no. 2 loan again almost immediately. We are apprehensive that this would surprise the financial community and that the sentimental effect so soon after the recent issue would be unfavorable. For this reason, we should think it advisable for you to begin gold shipments again promptly. Would it be possible to send, say, $100,000,000 within the next two or three weeks?

Mr. WHITNEY. Thank you; that confirms what I just said.

Mr. BROWN. It seems to me, Mr. Whitney, that that cable shows the loan was continuing. You were not using banking parlance here. You state: "This is a figure which, as you can see, if added to materially in the near future through exchange purchases or otherwise, is likely to compel us to begin participating out no. 2 loan again almost immediately."

Mr. WHITNEY. Quite.

Mr. BROWN. It is a continuous process, is it not?

Mr. WHITNEY. No, because they were paid off.

Mr. **Brown**. Is not that a technicality?

Mr. **Whitney**. No, no.

Mr. **Brown**. It says [reading from "Exhibit No. 2651"]:

> * * * is likely to compel us to begin participating out no. 2 loan again almost immediately.

Mr. **Whitney**. That is the cable which I was referring to, which merely gives full confirmation to what I said, that the banks were paid off. In this cable we tell Mr. Grenfell that by exchange payments, and so forth, we were going to have to begin participating out no. 2 loan again almost immediately. And as a matter of fact, we did.

Mr. **Brown**. The cable says you will have to.

Mr. **Whitney**. Yes, sir; "is likely to compel us * * *"

Mr. **Brown**. It is not really interrupted then, is it, Mr. Whitney?

Mr. **Whitney**. Mr. Brown, the fact is just as simple as daylight, that the participants in the two demand loans were paid off in full, except for us.

Mr. **Brown**. Except for you.

Mr. **Whitney**. So that therefore——

Mr. **Brown**. Let us take that, if we cannot agree on it in the banking parlance. We will say that J. P. Morgan & Co. remained from this time on into 1919 as creditors of the British Government on demand?

Mr. **Whitney**. Yes; certainly.

Mr. **Brown**. In large sums of money.

Mr. **Whitney**. I call $76,000,000 quite a lot of money.

Mr. **Brown**. That was one of the smallest sums, was it not, too?

Mr. **Whitney**. Before you were talking about our apprehension or our dislike to bind the banking community without knowing what we were going to do about it. We got assurances that they were going to take care of it, and therefore we felt it was right and proper for us to pay off the other banks, giving them complete option as to whether they wanted to participate again.

Mr. **Brown**. What would have happened if they had refused to participate again?

Mr. **Whitney**. They would not have participated.

Mr. **Brown**. What would have been the British Government's financial position in America, if those banks had refused?

Mr. **Whitney**. Somebody said the other day if your uncle were your aunt—I do not know.

Mr. **Raushenbush**. That is not such a bad question. Mr. Brown is trying to get the answer, and I wish you would try to answer it.

Mr. **Whitney**. I will try to.

Mr. **Raushenbush**. If the other banks had not taken part in a further participation could Morgan & Co. have carried them?

Mr. **Whitney**. If all the banks had refused to have gone in, probably, considering the amount of money which was raised, $345,000,000, as the demand loan was ultimately, it probably would have been more than we prudently would have carried, but if we had run into such an impasse as that with the banks refusing to participate, then probably the British Government would have had to expedite the shipment of gold faster. But, of course, the banks did not do it, because they believed, as bankers, that the loans which they were offered were good. And now you want to remember that we always had nearly 100 percent of American securities to cover the loan. As a matter of fact, it may be interesting to know that in April, of the $700,000,000, there were over $400,000,000 of American securities.

Senator BARBOUR. When you say American securities, you mean British-owned American securities?

Mr. WHITNEY. Yes; but I mean obligations of American organizations, and the Canadian Pacific Railway, which were listed; not all listed but American corporations, stocks, too.

Mr. RAUSHENBUSH. How much would Morgan & Co. have had to carry themselves, if they had not been able to get other banks to participate with them?

Mr. WHITNEY. We must start somewhere. What banks would refuse to do it?

Mr. RAUSHENBUSH. Let us cut out everybody but Morgan.

Mr. LAMONT. Why cut out everybody?

Mr. RAUSHENBUSH. I got an answer from Mr. Whitney that Morgans could have carried it all.

Mr. WHITNEY. I said could not have.

Mr. RAUSHENBUSH. I misunderstood you.

Mr. WHITNEY. The loan was $345,000,000. You are setting up some assumptions, that the banks declined, and in the next place that the British did not make further shipments of gold.

Mr. RAUSHENBUSH. I am assuming further shipments of gold.

Mr. WHITNEY. The demand loan was $345,000,000 on April 6, and went down, and it was $398,000,000 on May 5.

If all the banks had declined to come in, you ask the question if J. P. Morgan & Co. would have carried that. I was not a partner at that time, and I think I probably better let Mr. Morgan answer it, but I do not think I would have tried to.

Mr. MORGAN. I do not think we should have tried to.

The CHAIRMAN. The fact remains that if any considerable number of other banks had declined to participate in the loan, the situation would have been embarrassing?

Mr. MORGAN. The situation would have been more difficult and we would have had to try to find some other way.

Mr. WHITNEY. When you were absent here a few minutes ago, Senator, it was brought out that they had $400,000,000 of gold on April 1 that they were prepared to ship. I do not know where it is getting us to ask if they had not participated, because the banks did not refuse. Mr. Brown has a list of them. Aside from the Trio, where there were large amounts of money involved with relation to the assets of the banks, these pieces of papers were considered desirable. It caused unhappiness later, when, for other reasons, the liquidation of it was delayed, but as far as there not being any declinations, I think there were dozens of them, were there not?

Mr. LAMONT. As I recall it; yes. Mr. Raushenbush, if you were inquiring as to the attitude of these banks during all this period on the demand loans, let me say this.

That while of course their keenness might go up and down a little, according to the money market conditions, nevertheless, on the whole, a whole lot of banks which were offered participations were very glad to get the participations, for two reasons: One, the loan was excellently secured, in the first place; and, in the second place, because we always arranged a rate of interest on it which was attractive, above the going rate.

Mr. RAUSHENBUSH. I can understand that.

Mr. LAMONT. The British Government sometimes thought we favored the American banks too much by charging them a higher rate of interest, but, nevertheless, that was one of the factors which made the loan attractive.

Mr. RAUSHENBUSH. The thing which I did not understand, which prompted my question, Mr. Lamont, was this:

That these loans seemed to be coming along pretty fast, every so often, and you told the British not to come so fast, that they were not getting digested, and they held off, and they piled up in the meantime a big demand loan, and the third U. K. loan comes along, let us say in February, and it is not large enough in itself, being $250,000,000, to do more than pay off your participants in that connection and you are still $76,000,000 in the hole, if I may use that phrase.

Mr. LAMONT. Not in the hole.

Mr. RAUSHENBUSH. No?

Mr. LAMONT. We had $76,000,000 of a fine loan.

Mr. RAUSHENBUSH. You were creditors on a demand loan. Then the thing shoots up again. If you had tried to float another loan on March 1, that loan of $250,000,000 or $300,000,000 would not again have covered your demand loan?

Mr. WHITNEY. I do not know.

Mr. RAUSHENBUSH. Probably would not have.

Mr. WHITNEY. We did not.

Mr. RAUSHENBUSH. You did not. It was getting difficult. That is the complication in the situation which interests me, here. The borrowings of the British Government were not commensurate with the demand loan. They were not paying off their indebtedness by these demand loans. That was the complication to which I was addressing my question.

Mr. WHITNEY. Mr. Raushenbush, I was not trying to evade your question. I have said it a good many times, and I think both Mr. Morgan and Mr. Lamont have, that back in November we had been advising the British Government that deliveries under their contracts and the like would be very seriously growing for the next 5 months, which took us up to the 1st of March. It is certainly true. and of course that demand loan generally has not been taken up here yet, but the demand loan, in its essence, was a means of financing, pending refunding of obligations in some new series of operations. It is true, and there is no doubt about it, that the third U. K. loan did not pay off the demand loan by $76,000,000. It is also true that the immediate loans would run the $345,000,000 at that day up to a degree, but it is also true that during that period, which was a length of time of 2 months roughly, that there were all kinds of plans under consideration for further refinancing or refunding of the demand loans.

I mention it specifically, because that was the only one which was really satisfactory to them at that time, the Canadian Pacific for $200,000,000.

It is further true that $200,000,000 would not have paid off the demand loan.

Mr. Raushenbush. That is the point.

Mr. Whitney. In other words, it is almost impossible because of the concentration of the payments throughout this period to show it exactly as perhaps you have in mind that we could have done, but we had been saying for months at that time that this problem was going to be a difficult one and were urging them continuously to get themselves prepared and get this stuff over here ready to take up these operations.

Your premise is right, if we had done $200,000,000 by April 1, as we had hoped to do, and continued to have the Canadian Pacific, we would have had to go to London municipals and various other things which we had in mind.

Mr. Lamont. Mr. Brown, you spoke about our continuing interest in this demand loan up to 1919, which is perfectly correct. We did have a continuing interest. You will perhaps recall that after America entered the war, we were hopeful that some arrangement might be made between the British Treasury and the American Treasury, whereby this particular loan would be taken over with its securities, so as to leave the decks clear for American financing. The American Treasury, however, never saw its way clear to do that. They insisted that the demand loan be cleaned up entirely from the British Government, or ourselves, which was done.

I am saying that in allusion to your point that we had a continuing interest, which is perfectly true.

Mr. Brown. The question which I had in mind was the one Mr. Whitney outlined. He said the Canadian Pacific would not have liquidated the loan, the subsidiary financing, the London and Edinborough municipals, and so forth, all of which were demanded of the British.

Mr. Whitney. I referred before to enabling legislation for requisitioning securities, which had just gone into effect, and of course they did not continue it, but securities were coming in. I do not think that any of these things were what you could call demands. Various propositions had been presented, but I grant you, as the necessities became more drastic, one by one, they had been accepted abroad.

It is awful hard to plan what we would have done if things had been different, but certainly the record is chockfull of our intentions, urging on the British Government that they take adequate steps to meet their commitments.

Mr. Brown. Decidedly, but they did not take those steps.

Mr. Whitney. They did not take steps?

Mr. Brown. This is from the Treasury account and shows that from August 1, 1916, to December 1, 1916, shipments of gold amounted roughly to $380,000,000. From December 1 to April 5, they amounted to $424,000,000; slightly more in other words. The sales of securities from August 3 to December 1 amounted to $532,000,000, and the sales of securities from December 1 to April 5 were only $48,000,000. This is from the Treasury account, excluding collateral sales.

Mr. Lamont. That was sale of securities?

Mr. Brown. That was sale of securities. In the meantime, commercial agency expenditures from August 3 to December 1 had been

$469,000,000, which held up pretty well in the succeeding 5 months, at $427,000,000.

Mr. **Whitney**. This is just British?

Mr. **Brown**. This is just British. In other words, they shipped little more gold, and they sold less securities by nearly $500,000,000.

Your cables, as you say, Mr. Whitney, are full of urgings on the British to do something, but the figures seem to show that the British took no such action, relying on the one hand, on the amount of the advances through the demand loan in its place.

The thing in which Mr. Raushenbush and I are interested is that here in December the British were carrying on a demand loan program, if I may say that, in which the record of advances showed it was not possible—I won't say not possible because it is true there are all sorts of possibilities—but which did not show any utilized means of repayment.

Mr. **Whitney**. Mr. Brown, you talk about a demand loan program, but what you have got to remember, as has been pointed out here, is that there was a British Cabinet crisis in London somewhere in the first days of December. It is a fact that that upset all of these plans. You say the British did nothing about it. Your figures do not check with mine, but that is immaterial. What they did do in the early days of this year was to pass a law, which I said four times before this morning, enabling the Government to requisition, changing the whole obtaining of collateral or advancing of securities on a voluntary plan to a compulsory plan.[1]

So that that was one step they took. There was a lag in there, but at no time did we not have full collateral. I think the so-called demand loan, if I remember correctly, of December 1, had something like $700,000,000 collateral in their hands behind it.

Mr. **Brown**. We do not say it was a bad loan.

Mr. **Whitney**. I know, but you talk about a program.

Mr. **Brown**. I construe cable no. 33131 as a program during December; "we will take care of entire situation", and so forth.

Mr. **Whitney**. For December.

Mr. **Brown**. The operation in December put another $150,000,000 on top of the demand loan as it then stood, and I raised the point that no previous U. K. loan would have fully liquidated it, and I did raise the point whether or not you considered the third U. K. loan did not liquidate it and also that this involved the situation in connection with the Canadian Pacific arrangement which was ready, and that this, too, would not have liquidated the loan. In other words, you admit this situation in December——

Mr. **Whitney**. I do not admit anything. I assert it. In the second place, the question of having commitments is another thing which we were urging on them. Everybody knew that their contract orders were all culminating. All the purchases in this country, aside from that, were culminating. We had been urging them steadily to get ready to do this. Now in that connection there are two things which have been brought out: One is the Federal Reserve ruling, which upset the program and retarded it, although it is true we did not think we could put out the loan until after the turn of the year; and the second thing was the Cabinet crisis in England, which caused a delay in this thing.

---

[1] See "Exhibit No. 4252", Report of the American Dollar Securities Committee, for a full discussion of the British mobilization of American securities, Hearings, Part XXXV.

The program all through was to create various means of financing, which they put on a longer time basis than the demand loan.

The demand loan was the interim means of creating payments, of creating dollars for the British with which to meet their obligations.

There is no question about the facts which you state, that those commitments were so heavy, that they came in during January with a third U. K. loan which did not pay off the full demand loan.

It is also true, looking at it from hindsight, that if we had done the Canadian Pacific loan, which we did not do at the request of the Secretary of the Treasury, obviously at that time it would have been $145,000,000 less than the demand loan.

But when you say that the British did nothing about it, I say there were various other plans. You should say there were the municipals, 50,000,000 sterling, $250,000,000, and supposing we had done that and things had kept steady, that would have paid off the demand loan.

Of course, I could have made a better presentation of it, because it was going on indefinitely. All the time the one thing the British Government resolved not to do, and we resolved not to let them do, so far as we could, was to undertake purchases which involved production in this country beyond what they were able to meet.

The alternative, which has been introduced as a threat, was that they would have to curtail. My interpretation is that that is what any normal prudent business man would do. If he saw his resources were limited, he would stop buying goods to meet the payment for them that he had bought. That could be gone into but it gets almost into the realm of fancy, does it not, where you see that the circumstances were different. They had been warned and informed that they could not buy goods here unless they could see themselves clear to cover their purchases in this country, and have their resources in position to be converted into dollars.

The demand loan was never anything but a very first-class loan. On December 31, when it was about $235,000,000, we had $700,000,000. After putting up $300,000,000 worth of collateral with the third U. K. loan on April 6, we had $700,000,000, of which over $400,000,000 were Americans.

The program goes along, and there was not an exact program of what we would do in February.

You referred to gold, and my figures here, by months, show that we received gold in December to the extent of $179,000,000, in January $114,000,000, February $102,000,000, and March $115,000,000. I am not a very good adder.

Mr. Morgan. $490,000,000.

Mr. Whitney. That is $490,000,000.

Mr. Brown. It is bigger than my figures and suppose we check it and get together on it.

Mr. Lamont. Maybe I am stupid about this, Mr. Brown, but why are you so worried about the British commitments in January, February, and March 1917, when, as the record shows, they made every payment that they had to make promptly on the dot, and they had lots of gold that was being shipped in and lots of securities? I do not see just what the point is to worry about.

Mr. **Brown**. The point which seems to me strange is this statement in this cable [reading from "Exhibit No. 2650"]:

> We, of course, cannot encourage an operation which will bind up the New York market without some way of liquidating it.

The fact remains that it was not liquidated at that time. For 2 years that loan hung on.

Mr. **Lamont**. What of it?

Mr. **Brown**. It seems a complete discrepancy.

Mr. **Lamont**. Well——

Mr. **Brown**. Here in December you entered upon an agreement to loan the British money but carried the loans on demand higher than the available refunding operations were ever able to take care of.

Mr. **Whitney**. Of course, you might put the construction on that, that we did not know that America was going into the war when planning, which we certainly did not at that time.

Mr. **Raushenbush**. There is one other alternative, if I may interrupt, on that comment. This is something I do not understand yet. For instance, on the securities, they seemed to drop down from $432,000,000 to $48,000,000, sales of securities.

Mr. **Lamont**. That was the sale of securities?

Mr. **Raushenbush**. That was the sale of securities.

Mr. **Lamont**. But they were shipping a great deal for collateral, to hold on reserve.

Mr. **Raushenbush**. Collateral for your loan.

Mr. **Whitney**. When they first started they had the British Treasury securities, which were bought outright from their nationals and then they had A. and B., which were borrowed, and then ultimately the requisitioning of securities. The securities we sold were securities under Treasury account, under the first plan. They never instructed us, although we had an absolute right under hypothecation on the indentures to sell them, if need be, because they had certain ways to pay back the lenders, but under A. and B. they were very expensive.[1]

All that comes up later under subrogation, when they try to get them back so as not to have a forfeit.

In referring to the $15,000,000 of credit under the Treasury account, under their instructions those were the only securities which we sold and had free sale of. The requisitioning took all those securities, so that they were all available. Yet, at that time, under the terms of the demand loan that was arranged specifically here in December, we could have sold A and B securities, which were $135,000,000. That is where we got that figure yesterday. We had a perfect right to sell them if we had wanted.

Mr. **Raushenbush**. That applied to the outstanding loans and not the necessity of new money.

Mr. **Whitney**. Excuse me. We always had the right, under the demand loan, if we wanted, to sell any securities behind it. We never, as a matter of fact, did, because it would have involved the British Government in very serious forfeits in connection with those securities.

Mr. **Raushenbush**. You seem to have been very much worried, and properly so, in impressing upon the British Government all the way through here, devices, ways and means, of getting new money. That, I think, is pretty clear.

---

[1] In regard to the various security schemes, see "Exhibit No. 4252", Hearings, Part XXXV.

Mr. WHITNEY. Certainly.

Mr. RAUSHENBUSH. The thing which struck my attention is after this Federal Reserve warning and the conference between Hamlin and Spring-Rice, the Government seemed to show a great deal less worry than at any previous time about it.

Mr. WHITNEY. We did not know that.

Mr. RAUSHENBUSH. They seemed to let the things slide, and the sales here were down, and all the plans about municipals, Canadian Pacific, or anything else, were entirely brushed aside and they do not seem to bother about them. That prompts the question.

Mr. LAMONT. That illustrates how Governments work at times, Mr. Raushenbush, and how the British Government was preoccupied at that time with the conduct of the war, and feeling all the time that they had plenty of gold, and that they could get plenty of securities to take care of their American situation, they were dilatory in spelling it out to us. There is no doubt about that. We were constantly pressing them, as you say, and as we have pointed out, and their answers were not always complete, but, as Mr. Whitney has pointed out in detail at least one-half a dozen of times, they finally came through with this immense quantity of gold and securities and the situation was cleared up. That is all there was to that.

M. BROWN. The demand loan was not liquidated, Mr. Lamont?

Mr. LAMONT. The demand loan was not liquidated. The American Treasury, when we got into the war, refused to liquidate that, so that we carried it on for quite a long time, as you have pointed out, with the best possible security.

Mr. MORGAN. We could have at any time sold out the securities for the demand loan and gotten it paid off, if we wanted to, but the United States Treasury asked us not to.

Mr. RAUSHENBUSH. Mr. Morgan, if at any time you had tried to take the $700,000,000 or so of securities, which were behind the demand loan, let us say in February or March, and sold them fast, that would have broken the market over here terrifically, would it not?

Mr. WHITNEY. Certainly.

Mr. MORGAN. It would have been paid, and there was enough there to do it, to clean up the loan.

Mr. BROWN. As Mr. Whitney pointed out, it would have cost the British Government heavy penalties?

Mr. LAMONT. Why suggest to us that we would be capable of advising a very unwise course?

Mr. WHITNEY. We would not do it for several reasons.

The CHAIRMAN. Before recessing this noon, the Chair feels that it is proper to make a statement of Committee plans. It had been our earnest expectation to finish with this immediate hearing this week, to permit the witnesses to go home without need of having to return, but the individual members of the committee are embarrassed at this time by all manner of things moving in in a legislative way, and it is deemed altogether advisable that when the Committee finishes its work this afternoon, that a recess be taken until a week from today, at which time we shall have to ask the witnesses to be back.

In the meantime Mr. Raushenbush, I am sure, will indicate to the witnesses what records and what material will be needed at that time, and thus enable you to get back into your files a great deal of the material you have brought with you.

I do not know how long and how well we are going to get on this afternoon with a bonus issue pending in the Senate. There is just a little danger that the Committee may be forced to run back and forth frequently and we may not make much progress, but we will hope for the best.

Mr. WHITNEY. Will we be able to get the 5 o'clock train this afternoon?

The CHAIRMAN. We will have that understanding now, that we will quit in time so that you can catch the 5 o'clock train.

Mr. LAMONT. Thank you so much.

The CHAIRMAN. The Committee will be in recess until 2 o'clock.

(Thereupon, at 12:10 p. m., a recess was taken until 2 o'clock this afternoon.)

AFTER RECESS

The hearing was resumed at 2 p. m., pursuant to recess, Hon. Gerald P. Nye (chairman) presiding.

TESTIMONY OF J. P. MORGAN, THOMAS W. LAMONT, AND GEORGE WHITNEY—Resumed

The CHAIRMAN. Proceed, Mr. Brown.

Mr. BROWN. Mr. Chairman, continuing the morning discussion, I wish to offer for the record cable of December 9, no. 28122, and cable of December 11, no. 28140, conferring broader powers upon J. P. Morgan & Co. in handling the demand loan at this period.

(The documents referred to were marked "Exhibits Nos. 2652 and 2653" and are included in the appendix on p. 8792.)

Mr. BROWN. They are formal documents. The cable of December 9 encloses a letter from John Bradbury, Secretary of Treasury. December 11 encloses a letter from the Bank of England, under which it appears that the Bank of England is not quite sure that it is the obligor under loan no. 1.

Mr. RAUSHENBUSH. Just as a matter of curiosity on that, Mr. Whitney, that demand loan had run into scores of millions, had it not, by this time when the Bank of England seems to express the opinion it did not know it was the obligor of the loan?

Mr. WHITNEY. Apparently there was some question of misunderstanding on the other side of the water as to whether this so-called Exchange Committee was taking over the Bank of England's obligation. There is nothing in our record at all that substantiates it, but that is what this says, and that is why they confirmed it. We had always informed our participants that we had always understood ourselves it was the Bank of England. That is the answer.

Mr. BROWN. I offer for the record a cable dated December 5, 1916, no. 26950, from E. C. Grenfell, and merely note in passing that it cites the discussion of a secured loan on that date.

(The document referred to was marked "Exhibit No. 2654", and is included in the appendix on p. 8793.)

Mr. **Brown.** I offer for the record a cable of December 6, 1916, no. 33077, which continues the discussion of a collateral loan.

(The document referred to was marked "Exhibit No. 2655", and is included in the appendix on p. 8793.)

Mr. **Brown.** I offer for the record a cable of December 18, 1916, no. 33518, from J. P. Morgan to E. C. Grenfell.

(The document referred to was marked "Exhibit No. 2656", and is included in the appendix on p. 8794.)

Mr. **Brown** (reading):

> Since my return I have looked into things pretty closely and am of course impressed anew with the difficulties we have to encounter in getting what the Allied Governments are entitled to expect. As I see it, even with the best will in the world and the utmost pressure, we cannot secure by loans the amounts the Governments want as fast as they might have them. The public which will invest simply in bonds is more or less limited and while it is increasing it has not unlimited investing power.

I would conclude from this that the discussion we had on that earlier cable is in Mr. Morgan's mind here, that the loan capacity of the market is not sufficient to liquidate the demands that are being put upon the demand loan.

Mr. **Morgan.** As quickly as they came; yes. That is probably what it meant. That is what it says.

Mr. **Whitney.** As quick as the demands.

Mr. **Brown** (reading from "Exhibit No. 2656"):

> We must, therefore, turn to another resource which we have hardly as yet tapped and which I believe could be used to greater advantage in spite of being very distasteful to the British Government, that is the selling of some of their equities. There are, for instance, in the borrowed collaterals a very large amount of Canadian Pacific Railway shares. I quite understand that the Government does not like to enforce the sale of these shares, but I believe there are a large number of capitalists who would be glad to purchase something in which there is a certain speculative element, who would for instance buy $10,000,000 of some security which might rise when they would be disinclined to invest $2,000,000 in the form a permanent bond.

The British never did put up any other of their equities except these Canadian Pacific shares, did they?

Mr. **Whitney.** This, Mr. Brown, I think was just a question of trying to search out every possible means of taking care of the British requirements, just as we talked this morning. Further down it speaks of the Forestal, Atlantic Leased Lines, as having been up at various times before. At those times the owners of those various properties had not been willing to part with them. We are merely reiterating suggestions before made at various times, that perhaps there was another resource in the way of selling equities in companies not known in this country. The Canadian Pacific Railway securities, of course, were listed on the New York Stock Exchange and really are considered American securities. These were just another one of our constant efforts to suggest means whereby the British Government could get additional resources.

Mr. **Brown.** You say in effect, "We cannot borrow in this market against bonds fast enough for the Government's needs; now, therefore, won't the Government please put up something else that will make it easy for us to raise money?"

Mr. **Whitney.** That is the general idea.

Mr. **Brown.** But the Government did not, did it, ever put up any of these equities?

Mr. **Whitney.** Because the occasion after all did not arise. It does not happen like that [snapping fingers], you know.

Mr. **Brown.** I understand that, but the fact remains it did not put up any of these equities, did it?

Mr. **Whitney.** No; I do not think so. The Cuban Railways is what I was hesitating about, but I think the answer, general speaking, is "no" to that.

Mr. **Raushenbush.** Equities, as I get it, Mr. Whitney, simply means stocks in contrast to bonds. Is that what that is about?

Mr. **Whitney.** Mr. Raushenbush, of course this is suggesting a completely new theory of financing. Up to the present time the securities which they had been collecting were securities which would either be available for sale in this market, in other words, American stuff, or else well-known companies like British railways and South American bonds, to use the bonds for collateral purposes.

This is the first concrete suggestion that they were to go into an entirely different thing where they were to collect the ownership of something in South America, or Forestal, which I think, is in Brazil, and sell the whole control of the company. As Mr. Morgan says, a certain type of money is interested in a more or less promotional scheme rather than a fixed investment.

Mr. **Raushenbush.** As I gather, the control of these stocks in effect represented the British commercial empire?

Mr. **Whitney.** That is right.

Mr. **Raushenbush.** That gave them the ownership of means of production around the rest of the world. Those are the things they never did put up over here.

Mr. **Whitney.** No; but it was on December 18 that we made the suggestion. Perhaps if they wanted to continue to purchase in this country they might have to look into something which, as Mr. Morgan says here, would be very distasteful to them.

Mr. **Raushenbush.** I was interested in it because of that Balfour memorandum that was read in this morning, after we got into the war, when he pointed out that the Government over there was financially in a shape where they had to be helped out on July 1; and, even there, there is no discussion of these equities. You and I and everybody know that they were available. They could have been put up, I suppose, could they not?

Mr. **Whitney.** You are now talking as to whether we could have used them?

Mr. **Raushenbush.** You could have used them; yes.

Mr. **Whitney.** Whether they could have been used in this country?

Mr. **Raushenbush.** Yes.

Mr. **Whitney.** Of course, that is a very questionable point, the question of introducing completely unknown companies all over this country, or getting American capital, which, as we have said before, was not then used to investigating very much, anyway, as to whether they would go to the length of buying equities in foreign countries, which American capital had never done before. We frankly suggested this, but I think that we thought it would be a very long educational process before it could be of any very great use to us. Of course, it never did happen. I do not remember even whether they answered this cable. It did not happen. But it would have been long, hard work to get people to buy, because it is not something to sell the public.

Mr. **Raushenbush.** They did not seem very much interested in it, as I remember the cable interchange.

Mr. **Whitney.** I do not think there was any doubt about it that they wanted to hold on to their equities, no doubt about that.

Mr. **Raushenbush.** They wanted to hold on to their commercial empire.

Again let me say that that interested me because later on, when the question of going on with their financing after we had gotten into the war came up, there was still no proposition on their part to try this out. We might differ on whether American financiers would not see Royal Dutch, the Argentine railways, and Cuban railways, whatever they had shares in, as very interesting things for America to take over. But the natural effect, we can probably agree, would have probably been to lose to Great Britain her commercial empire at the time she was winning a military war.

Mr. **Lamont.** Here is a suggestion of two or three securities, I suppose, out of tens of thousands of securities, that constituted her commercial empire, Mr. Raushenbush, and the period you speak of, of course, we have nothing to do with.

You are speaking now of Balfour and the July situation, and so forth. That was entirely a matter between the American and the British Governments.

Mr. **Raushenbush.** I still do not make myself clear, Mr. Lamont; I am sorry. What I am trying to get through my own mind is this situation we seem to be at some divergence about, what happened after the third U. K., after February, as it is described in Balfour's words.

We do not want to challenge it at all, and do not challenge it.

He said that by July they had come to the end of their resources. It just struck me as an interesting thing that perhaps they really had not, in the sense that these equities were at least a method that might have been used.

Then I was trying to get at the possible reasons not only why they did not use it then, but why you got no answers here, and I was making a suggestion for your comment that if Britain had had to turn over the Royal Dutch or Argentine railways or Indian cotton mills and all the things she had, that would have amounted to turning her industrial empire over to the hands of the United States. She would have lost her industrial empire while she was winning a military war. She would not have anything to do with it.

Mr. **Whitney.** Of course, Mr. Raushenbush, you, I assume, have had the opportunity to see the Treasury records of this talk with Mr. Balfour, which, of course, we have not.

I assume from what you say that the Treasury did not discuss whether they wanted to buy British equities or not. This suggestion we make here is right in the face of a suggestion, as the end of the cable says [reading from "Exhibit No. 2656"]:

> We understand that it takes time to carry through pieces of business like those mentioned.

In other words, it was merely what we were doing every time any of us in New York had an idea of some possible source of getting available resources; we put it up to Great Britain. Next day we would have another idea, and they were sort of thrown into the hopper and put up because we were trying to search every possible means.

This, as I say, is something that we did not believe would be productive of any very great amount of money in any single transaction. It was frankly just an effort to search out a new method, as Mr. Morgan says in his cable, something that he knew would be distasteful but which might be necessary if they were to continue on their program of purchasing in this country.

Of course, there is no question but the United States entry into the war changed that thing materially. What the conversations were between the British and the United States Treasury we, of course, have no means of knowing. All it says about it is in this cable of December 20, 1916 [reading from "Exhibit No. 2657"]:

> Discussed with Treasury who will communicate same to Chancellor of the Exchequer, and hope for some message from the authorities in reply to your clear pronouncement.

I do not know why they never answered it specifically, except that as we got on we did do the third U. K. I do not know why they did not answer it. I think we probably did not press it, certainly, because some of us in the securities end of the business at that time thought it would be a very difficult thing to make good on, I mean, to get any real money out of it.

Mr. RAUSHENBUSH. You may be quite right on these transactions here in this country. You had the job of selling in the course of all this financing, a lot of good American securities, did you not? That was part of the process. I take it you found out that the market would take a certain amount of them every week but no more. That was part of the mechanics of selling them, was it not? You had to do that fairly slowly. And yet those were American securities.

By the way, did you put them on the market or did you offer them to various banks individually, all these American securities?

Mr. WHITNEY. We sold almost exclusively through brokers of one kind or another, or to dealers, and in certain rather isolated cases, we sold to insurance companies. Of course, some were sold just on the stock exchange. Bonds were sold all kinds of ways, depending on the size of the blocks.

Mr. RAUSHENBUSH. You did not take them individually to the banks and say, "Here is a good block in which you might be interested"?

Mr. WHITNEY. In certain instances we sold them to banks. They bought them for the carry, and the dealers sold them. We did practically no retail selling on them except certain insurance companies. I can think of one instance, one bank that was in the habit of running a bond trading account, a short account with certain dealers. But by far the bulk of it was just through brokers and/or dealers who would distribute it.

Mr. RAUSHENBUSH. About how many of these securities would the market take without breaking? Could you do that in millions of dollars?

Mr. WHITNEY. I remember one day we sold $34,000,000 of them, but I should think the average was, as it says in the cable here, day in and day out about 2½ million dollars a day and that, of course, depended on conditions.

Sometimes they would not take it. It depends how they came in and were made ready for delivery. Of course, it is awfully hard to give a specific answer to that, but the average was about 2½ million dollars a day when we had the more current type of obligations.

Mr. RAUSHENBUSH. This questioning I was doing before this really depends on Balfour rather than on you.

Mr. WHITNEY. Of course, we did not know anything about that.

Mr. RAUSHENBUSH. Balfour's memorandum was to the effect that by July, at the rate they were going, the British were "bust", if we may use a vulgar phrase about either Balfour or the British, or at least unable to go on any further.

Mr. WHITNEY. Go on purchasing.

Mr. RAUSHENBUSH. The question I was interested in was, supposing we had not gotten into the war—not looking at it from your standpoint at all, but just from the standpoint of the British Treasury—whether the crisis would not have come along there about July 1, a month later or a month earlier, when they would have had to put up these equities and sell their industrial empire over here.

Mr. LAMONT. Who knows? As I understand it, you are saying this, Mr. Raushenbush, and I want to be sure that I get you right:

You say British citizens either voluntarily or under the compulsion of law allowed three or four billion dollars of American and neutral securities to be sold over here or pledged. After they had completed all the mobilization of securities under the law, which they had not, but after they had done that, then the next natural step might have been for them to see whether they could dispose of some of these equities held by British investors in South America and all over.

It was manifest that the British investors were reluctant to dispose of those. Certainly it was. They had been reluctant to dispose of any of their investments, but they had done it partly as a patriotic duty and then after that because they were commandeered, so to speak, under the law.

Mr. RAUSHENBUSH. Can you describe a little more fully for the committee what that is? We touched on it this morning. You just referred to it as commandeering. How did they get those securities here. Was that a capital levy, or what was it?

Mr. LAMONT. That is alluded to in several of the cables. Mr. Whitney mentioned that once or twice this morning.

Mr. RAUSHENBUSH. What was the effect? That did not take away from people their property; it simply forced them to put it up at the Government's disposal, is that right?

Mr. LAMONT. Yes, and to take British consols or British exchequer notes, whatever it might be, in place.

Mr. MORGAN. War loan bonds, mostly, they took in exchange for them.

Mr. BROWN. Have you the report of the American Dollar Securities Committee there? We could put that in the record at this point to be relevant.[1]

---

[1] Introduced later as "Exhibit No. 4252", Hearings, Part XXXV.

Mr. **Whitney**. May I read just one paragraph from the report of the American Dollar Securities Committee, which is this so-called exchange committee? It says, and this is their official report:

> On the 24th of January 1917 the Defense of the Realm (Securities) Regulations nos. 7c, 7d, and 7e came into force which gave the Treasury power to acquire securities, and placed restrictions on the disposal of same. While securities continued to be received on deposit, such securities were to be subject to any orders that might be issued by the Treasury under the regulations. The Treasury notice under these regulations, dated 30th January 1917, stated the conditions under which securities could be sold abroad, and placed upon the American Dollar Securities Committee the duty of issuing the necessary permits.

I do not have a copy of the law, but it was done under the door of General Regulations.

What, in effect, was meant, was that they could force them into Schemes A and B.

Excuse me. Here further on it says:[1]

> The general effect of the order was to make the securities specified the property of the Treasury as on the 17th February 1917 including the right to dividends payable on or after that date, and to require the proper persons to take all steps necessary to effect that purpose.

Of course, Mr. Raushenbush, when you refer to the question of July, it is obvious, is it not, that after we came into the war it would have been even harder to create a brand-new interest in securities up to then completely unknown to the American public?

We thought it would be difficult enough long before the war, or several months before the war. The net of it is that since the war the American public has never been interested in going into these foreign British securities, most of which are listed.

Mr. **Raushenbush**. And a great many of which are closely held.

Mr. **Whitney**. Certainly.

Mr. **Raushenbush**. I would not think that would follow as a conclusion. The bond market, as this points out, is a different thing from the stock market.

Mr. **Whitney**. Entirely.

Mr. **Raushenbush**. Different people interested. Here I am sure Mr. Morgan is going to agree. Surely, if the American financiers saw the opportunity to take at a reasonable price what the British had spent a couple of hundred years building up, a commercial empire in the Argentine, the oil fields, and so forth, they would, as shrewd businessmen, have been glad to take that opportunity.

Mr. **Morgan**. I am not at all certain that you are right about that, Mr. Raushenbush. They did not want the responsibility of managing them. If they took over the control of a thing they would have to manage it, and the management of a thing five or six thousand miles away is not so easy to the American mind as it is to the English mind, because they have had less experience at it.

It would have taken a long time to persuade a good many gentlemen whom I used to know quite well, who were willing to buy things—if they thought they had a strong British group with them who managed it, they were perfectly willing to take a part and sell back the shares to the British group later on if that relieved them at all for the moment. But to buy the whole of a company, they were not out for creating a commercial empire all over the world.

---

[1] Introduced later as "Exhibit No. 4252." See Hearings, Part XXXV.

Do you see what I mean there?

Mr. **Raushenbush.** I defer to your judgment on the American investing habits.

Mr. **Morgan.** The theory of management is that troubles are very great if you have to deal with a thing six or seven thousand miles away from you.

Mr. **Raushenbush.** Surely. Do you not think they would even have been willing, if this thing was dumped in their laps, at pretty much a reasonable price, to have taken a considerable share of those things? Those were good things.

Mr. **Morgan.** They might have done it. That is what we hoped they would, if they were properly coached.

Mr. **Whitney.** Do you not think that they thought the opportunities in this country were even greater than abroad?

Mr. **Raushenbush.** I do not know.

Mr. **Brown.** If I may break in on that, the fact remains, it seems to me, that the suggestion was made in pretty definite form in this cable [reading from "Exhibit No. 2656"]:

> * * * while I understand the exceedingly disagreeable character of our suggestion our advice is definite as it has been before, that we see no other way of accomplishing the raising of the necessary sums on this side.

Mr. **Whitney.** That is what I said.

Mr. **Brown.** I judge from Mr. Morgan's remarks that while the American market might not have been particularly glad to have these, that being a debate we have no way of settling because they never came, at this point the commercial fabric of the British Empire was being endangered by its American needs.

Mr. **Morgan.** I think you figure the thing would go to an amount that is far in excess of anything that we could possibly have managed. The British commercial empire does not rest on 5 or 10 securities. There are hundreds and hundreds of them, and closely held, at that.

Mr. **Brown.** Did you, Mr. Whitney, offer the answer to that, 28406?

Mr. **Whitney.** It is a very inadequate answer.

Mr. **Brown.** Such answer as the cables seem to make.

Mr. **Whitney.** Cable 28406? I just read the first paragraph of it. It goes on to say what I referred to this morning:

> Treasury ask me to inform you that Municipal Act was introduced in Parliament Monday, and it is hoped will pass before Christmas.

(The document referred to was marked "Exhibit No. 2657" and is included in the appendix on p. 8794.)

Mr. **Whitney.** That is the enabling legislation to permit British municipals to finance over here.

Mr. **Brown.** I offer for the record a cable of December 20, no. 33604, from J. P. Morgan to E. C. Grenfell.

(The document referred to was marked "Exhibit No. 2658" and is included in the appendix on p. 8795.)

Mr. **Brown** (reading):

> Without committing ourselves we have no hesitation in saying that it is our present opinion that if the money market works around in better shape as we rather expect and unless something very radical happens to change the situation here, we should hope to be able, some time in January, to arrange for a very considerable secured loan, terms, date of maturity, and all other

questions to be settled when we get a little nearer to time. It is at present our idea that this secured loan would have to be of very early maturity in order not to interfere in any way with the market for the much desired but still very doubtful long time unsecured loan. In connection with the foregoing we feel impelled to call your attention to 33559 which you will appreciate might have a bearing upon the situation.

Do you recall what it was that would have a bearing upon the situation?

Mr. WHITNEY. No. We do not have it here, do we?

Mr. LAMONT. Yes. It is page 1045, Mr. Morgan's cable.

Mr. BROWN. 33559?

Mr. LAMONT. 33604.

Mr. MORGAN. It refers to cable 33559.

Mr. WHITNEY. It suggests it has to do with the requisitioning of securities, but I do not know of my own memory.

Mr. BROWN. You do not have that cable, do you?

Mr. OLDS. You did not take a copy of it, but I think you saw it.

Mr. NICHOLS. That is one of the missing ones.

Mr. WHITNEY. Well, I do not know. I guess my guess was wrong.

The CHAIRMAN. When you speak of it as a missing one, that the record may be clear, is the committee to understand that endeavor was made to locate that particular communication without success?

Mr. WHITNEY. I assume so. It is one of those they asked for that we could not find. It may have to do with an entirely different subject.

We have not been able to locate it. I do not know what it is. I did not know it was missing.

Mr. BROWN. I offer for the record the answer to the foregoing cable, the cable of December 27, 1916, 28559.

Mr. LAMONT. By the way, Mr. Brown, this statement you have just read shows how the situation had changed in the American market.

Mr. MORGAN. Money market.

Mr. LAMONT. Yes; the American money market, very considerably within a comparatively few days, a change for the better.

Mr. BROWN. Oh, yes; that is the purpose of putting it in here, to show the situation.

Mr. WHITNEY. Which is the one you refer to now?

Mr. Brown. 28559, of December 27, 1916.

(The document referred to was marked "Exhibit No. 2659" and is included in the appendix on p. 8795.)

Mr. BROWN (reading):

> As regards question of maturity of collateral loans, if it eventuates, however, Government feel strongly subject to any overruling consideration that may be present to your mind that it would be desirable to have 3 years and 5 years issue as in case of last loan.

On December 27 how could there be any question whether there was going to be any collateral loan or not? What do you suppose London had in mind here?

Mr. WHITNEY. We did not say we would do one; we said we were hopeful of doing one. We had, without committing ourselves.

Mr. BROWN. I offer for the record cable of December 26, 1916, no. 18554, from Harjes, just in passing noting that the French are not very well informed of the situation.

(The document referred to was marked "Exhibit No. 2660" and is included in the appendix on p. 8795.)

Mr. Brown. I offer for the record a cable of December 27, 1916, in answer to the foregoing. It is no. 30100.

(The document referred to was marked "Exhibit No. 2661" and is included in the appendix on p. 8796.)

Mr. Brown. The relevant passage in this is [reading]:

> We are obliged to begin the educational process, to a great extent all over again, but, of course, the process ought to be less difficult this time.

That seems to me somewhat in contrast with cable 31778, which, as I remember, is in the record. It said that the process must begin at the bottom of the hill all over again.

This is but a matter of 3 weeks later.

Mr. Whitney. We found we were not so far down the hill as we thought we were.

Mr. Brown. On the second page of the edition of that cable that I have——

Mr. Whitney. 30100 again?

Mr. Brown. Yes; at the beginning of the first paragraph—it says [reading]:

> As to new financing, we are waiting upon word from the conference in London of the Allied financial representatives.

What word did you receive from the conference in London of the Allied financial representatives?

Mr. Whitney. That letter gives you some indication of what it was from the point of view of Mr. Ribot.

Mr. Brown. Yes.

I will offer for the record a letter of December 31, 1916, from Mr. Harjes to Mr. Morgan.

(The document referred to was marked "Exhibit No. 2662", and is included in the appendix on p. 8797.)

Mr. Brown. But, Mr. Whitney, this letter does not discuss what the conference of Allied financial representatives found as far as American financing was concerned, does it?

Mr. Whitney. I would like to read it, to be sure; but my recollection is it says on about the second page, pretty well down toward the end, about half way through the letter, I should think [reading]:

> Mr. Ribot said he had only spoken in very general terms to them in London (as he was so busy with the note and other things) and had not discussed the American financial situation in detail, but that was apparently the impression he had gathered.

Of course, before that he quotes what Mr. Ribot had said. Do you want me to read it?

Mr. Brown. No, I think this paragraph you read is significant. But in contrast to 30100 it says, "We"—that is J. P. Morgan & Co.—"are waiting upon word from the conference in London of the Allied financial representatives."

Mr. Whitney. Apparently they did not come to any conclusion.

Mr. Brown. That was the conference, according to this letter of December 31, in which the reply to the United States peace note was also drafted, or at that time.

Mr. **Whitney**. Apparently it would certainly seem, would it not, that they had not come to any definite conclusion?

Mr. **Brown**. But your negotiations on this loan were already underfoot, were they not, Mr. Whitney?

Mr. **Whitney**. This cable to which you are referring now has to do with French financing, and that has to do with British.

Mr. **Brown**. 30100.

Mr. **Whitney**. That is sent to Harjes, in Paris. You read a cable in which they inquired where they all stood; and this is a cable to Harjes, is it not, no. 30100?

Mr. **Brown**. That is right.

Mr. **Whitney**. Naturally Harjes' business had to do with French financing, not British.

Mr. **Brown**. The cable says [reading from "Exhibit No. 2661"]:

> The only concrete effect of the statement apparently has been first in the distinct curtailing by Great Britain of her purchases here.

And so on [continues reading]:

> Of course, both these developments are distinctly to the disadvantage of American trade.

You have been discussing Canada and British financing. Then the paragraph opens [reading]:

> As to new financing.

Not necessarily new French financing.

Mr. **Whitney**. No; maybe I have misunderstood your question.

Mr. **Brown**. The same cable goes on at the end [reading]:

> E. C. Grenfell cabled us that they would not attempt to give us their further views as to future financing in America until after the conference which you mention.

Mr. **Whitney**. I am afraid I missed your inquiry.

Mr. **Brown** (reading):

> Meanwhile, in reply to inquiry, we have told E. C. Grenfell that sometime after the New Year, if possible, before February 1, we should hope to be able to put out a new British short-term loan.

It appears from this cable that you were, as the cable states, awaiting word from that conference at which the Allies rejected the American peace offer before you proceeded with any new financing.

Mr. **Whitney**. What is the point of your question? I am afraid I do not understand it.

Mr. **Brown**. Simply that you were proceeding at this time with the negotiation of a loan.

Mr. **Whitney**. Certainly.

Mr. **Brown**. I offer for the record cable of December 28, no. 33836, in which there is distinct negotiation in regard to this third U. K. loan before the answer from Mr. Harjes, and which, as far as the record shows, is the only comment on this very important conference of the Allied officers in London, where, as I said, there were not only finances but peace being considered.

(The document referred to was marked "Exhibit No. 2663" and is included in the appendix on p. 8799.)

Mr. **Whitney**. You will certainly concede that we were only concerned with financing, and you have been reading cables steadily—have you not?—from the time where we said there had been a change and we hoped for more after the turn of the year; if conditions continued to improve, as we hoped they would, we would be prepared, too.

Now these other cables are carrying along that discussion. Certainly. The cable you now refer to is giving some more of the facts to Mr. Grenfell with which to continue those discussions.

As to Mr. Harjes, we advised him very roughly of where we are going with the British. There is no negotiation yet.

Mr. BROWN. You say you are waiting upon word, and the word does not seem to be present there.

Mr. WHITNEY. There are subsequent cables. We know from Mr. Harjes' letter they have not had their meeting yet.

Mr. BROWN. This cable to Harjes that says you are waiting upon word is December 27, and there is no evidence of the word. However, I think we can move along on that.

Mr. MORGAN. The word came to us from Mr. Harjes in the letter dated Paris, 31st of December. That was the first we heard from them.

Mr. BROWN. But the loan was well under way before that was received.

Mr. WHITNEY. Oh, no. It takes two to make a trade, does it not? We have been making some suggestions to the British Government, and right through this date, December 28, we were still waiting word from them.

Mr. BROWN. I offer for the record the answer to Mr. Harjes' letter, which is a cable of January 29, 1917, no. 30397.

(The document referred to was marked "Exhibit No. 2664" and is included in the appendix on p. 8800.)

Mr. BROWN. Speaking again for a moment of cable 33836, which is already in the record, we will draw attention in passing to the phrase [reading from "Exhibit No. 2663"]:

> The United Kingdom notes are still largely held by friendly banking institutions.

And paragraph 3, the last sentence:

> In fact, as former Chancellor and the Governor have both pointed out, it is important that we should keep ourselves prepared for further operations and be able to act on a large scale in temporary emergencies as at present.

The comment on that is, to my mind, simply a comparison between the enormous growth of the demand loan and the expression that seems to be here that J. P. Morgan & Co. should be kept liquid for temporary emergencies, whereas the demand loan had become very rapidly a permanent feature, had it not?

Mr. WHITNEY. Certainly not.

Did you read carefully to yourself that last four or five words?

> Temporary emergencies as at present.

It was just about 10 days after the British told us if they could secure another $150,000,000 for December on top of the $175,000,000, that would see them through December. It is now December 28. So that ties in, it seems to me, Mr. Brown, completely with what we talked so long about this morning, about the immediate emergency.

Mr. BROWN. I agree with you, Mr. Whitney. You and I seem to agree entirely on this.

At this period you had made tremendous advances on the demand loan which you considered temporary. You were searching around, you were asking the Britsh to send over their equities, and you were asking the British to go through with the municipals; you were considering, in the offing, the Canadian Pacific and a number of operations—so that that advance on the demand loan would, in fact, be temporary.

Mr. WHITNEY. Certainly.

Mr. BROWN. The British declined all of them.

Mr. WHITNEY. Oh, excuse me.

Mr. BROWN. Or they were not consummated.

Mr. WHITNEY. Not any of them.

Mr. BROWN. They declined equities.

Mr. WHITNEY. They never declined it, but the circumstances changed. You put entirely the wrong emphasis there on it. They told us in that same cable they passed the enabling legislation for the municipals. The Canadian Pacific, this morning I testified six or seven times to the fact that we were prepared to do it in April, and stopped doing it at the request of the United States Secretary of the Treasury.

The equities we put up as an additional thought for the first time in that cable you read never came to fruition, it is true. The others were all ready.

Mr. BROWN. Neither did the municipals.

Mr. WHITNEY. No; because it is certainly an historical fact that we entered the war on April 6, and at that time the whole money market was preempted, naturally and properly, by our Treasury.

Mr. BROWN. By April 6 the demand loan was at a height that any of these, as you testified this morning, the Canadian Pacific, would not have taken it down.

Mr. WHITNEY. Operations do not come along and just sort of happen; they take an awful lot of preparation, drawing of the papers, and so forth.

Mr. BROWN. Certainly, I understand that, but you had in the broad view this contrast, that before December, loan after loan liquidates the demand loan down and keeps it always at a reasonable point, more or less.

As I recall the cables prior to the second U. K., Mr. Lamont's cable says that a commitment of some ninety-eight million by J. P. Morgan & Co., was regarded as very close to the proper limit; that in the whole financing up to December, the demand loan, as was testified during the discussion of the Anglo-French, was predicated on constant liquidation by a refunding operation.

From December on until April I am unable to see how the loan is predicated on a refunding operation because each time a refunding operation arises, the loan has reached a height where it cannot be refunded entirely.

Mr. WHITNEY. Of course, you have to start with some fact, have you not, and then go ahead and let us do all the imagining we want to. But on December 31 of this year the demand loan was, roughly speaking, $235,000,000. Against that there was collateral for $700,000,000.

Mr. BROWN. Can we leave the collateral out for a moment?

Mr. WHITNEY. You cannot——

Mr. **Brown**. Because the question has never been raised that the loan was not good.

Mr. **Whitney**. I supposed that you were asking me to answer a certain theoretical supposition you made.

The fact is that it is true, and there is no argument about it, that on April 6 the demand loan was $345,000,000. There is no argument about that. There is no argument about the fact that after the payment of the third U. K.'s, the proceeds of that were insufficient by $76,000,000 to pay off the then demand loan.

But when you then carry on and say there was no program for the ultimate liquidation of it, I think that that is a very misleading way to put it. It may be the demand loan or the requirements of the British were at this time faster and heavier than we could keep absolutely up with; but when you say there were no plans, I can only take the date of April 6, which because of other circumstances terminated the opening of the market to others than the United States promptly and at that time the British Government had not only $700,000,000 worth of securities, the same amount, roughly they had on December 31, but they had plans to ship $400,000,000 worth of gold, and they had $200,000,000 Canadian Pacific and $300,000,000 Canadian Government bonds.

The requisitioning, this new scheme we talked about, was just getting under way. So that while we did not do it, because of other circumstances, I say there were infinitely sufficient commercial securities here to liquidate the demand loan.

After all, if you assume that certain circumstances had been completely different—I am not saying they could go on indefinitely buying at the same rate in this country, because obviously some time there comes an end to it, but there is no indication anywhere in the record that at the time circumstances changed the British were not more than able to take care of their full requirements.

Mr. **Raushenbush**. I think the Balfour thing is what upsets us. We believe the Lord Chancellor when he made these statements and we seem to see a little contradiction between his statement that they were in financial extremities by July 1 and the statements we have been getting here that there were excess gold and securities of almost unlimited quantities.

There just seems to be a discrepancy. I would gather that the difference in the argument is that you attach little less importance to his statements than we do.

Mr. **Whitney**. No; Mr. Raushenbush, it is not that at all, but I find it awfully difficult to discuss a conversation between Balfour and the Secretary of our Treasury of which we have no knowledge, and to know what the circumstances about the other part of their conversation were. I still think that the fact that the United States had entered the war, and that this mission was over here, as I understood at the time, to discuss with our Treasury co-operative methods, not only in financing but in buying and all the other things, certainly brings about a change of circumstances where it might have accounted in some measure for what Balfour said.

I do not see anything that he said that is quoted to me that contradicts the facts as we know them to be prior to the United States entry into the war.

Mr. **Raushenbush**. Perhaps we can get an agreement that everything was reasonably rosy or had possibilities up to July 1 and then at that point he was right; you just had never got to that point.

Mr. **Whitney**. There is nothing I would like better than to agree, but, you see, you are getting into July, something I do not know about. I think that was a fairly important 3 months that interposed between the time that we have actual knowledge of and this conversation between Balfour and the Secretary of our Treasury.

Mr. **Raushenbush**. We are frank enough about this. We take Balfour and his statement here. The statement—which, by the way, was a statement, not simply a conversation—points out that by that time the thing was in such bad shape that either the United States had to come in or British credit would have gone to pieces.

That is what he says.

Mr. **Whitney**. They had come in.

Mr. **Lamont**. They had come in by July 1. That is when the conversation was.

Mr. **Raushenbush**. They had to help them out financially.

Mr. **Lamont**. That is when the conversation was.

Mr. **Raushenbush**. No, he said as of that date, "We have now within a matter of a day or two." This is not a matter of months, this is a matter of days. "On July 1 come to the place where the British creditors are about to go on the skids in a big way." I do not see why I speak so colloquially about this.

Mr. **Lamont**. Does it not come down to this: You cross examined us on what the British Government resources were, vis-a-vis America, up to April 6. After that you have to carry on your discussion with the American Treasury.

Mr. **Raushenbush**. No; I do not think that is quite right. You accept everything the British Chancellor told you about all the resources they had and predicate the whole proposition of continued Allied financing on that, and it seems reasonable. Then a few months later, really relatively a few months as the world goes, 3 months after we got into the war, the British, the same people who have been talking with you, say something that may be entirely different than what they have been telling you, and they say it officially to the United States Government, that "We are really only able to carry on 3 more months, gentlemen, after April, and by July we have now come to the finishing point."

There may be a difference in what they told you and what they told him, but the cross examination on all of that which was told you is certainly in point with this other thing in mind. I think it is very germane.

Mr. **Lamont**. But it was not our hunt after April 1.

Mr. **Whitney**. Perhaps Mr. Brown knows this, because it is all in the record through here, that after the entry of the United States into the war the public markets were closed to the British Government in its financing except, naturally, with the approval of our Treasury.

That being closed, they were dependent upon some other way of carrying on, were they not? They had to get new resources somewhere. They could not sell securities. They were not permitted at that time even to liquidate the demand loan, for which, of course, they had no new money. The only means they had of getting it on their own account was gold. It was not long, but it was a pretty important three months, was it not?

Mr. RAUSHENBUSH. Your point seems to be well taken, that they had been relying on our bond market. Now the bond market was closed when we got in.

That is why awhile ago I was so interested in this equities proposition.

Mr. WHITNEY. Mr. Nichols very politely reminds me that I made a misstatement when I said that the suggestion of equities was first made in December. It was actually made back in May or early June.

Mr. RAUSHENBUSH. And, again, it was made by you, was it not?

Mr. WHITNEY. Yes.

Mr. RAUSHENBUSH. It was your suggestion in both cases, as I remember.

Mr. WHITNEY. I just forgot it. I did not do it deliberately, of course.

Mr. RAUSHENBUSH. Yes. There was no reply in both cases. The British did not take it up. That is why I was so interested, if they really wanted to win the war, that they did not at least try later. There is no record, that you know of, of their trying later after the American bond market was closed to them by our own war issues, to get money for themselves by, if you will, divesting themselves of their commercial empire. That is why I was interested in that.

Mr. WHITNEY. Of course, I do not know whether that was discussed by Mr. Balfour and the Secretary of the Treasury. Of course, the circumstances were a little different in July than they were in December.

Mr. RAUSHENBUSH. They would be more likely to take it up with you, would they not? They could not sell the stock of their commercial companies through the United States Treasury.

Mr. WHITNEY. They did not want to, that is clear.

Mr. RAUSHENBUSH. They did not want to at any time.

Mr. WHITNEY. No. We said it would be distasteful to them.

Mr. RAUSHENBUSH. But the more likely people to them would be yourselves.

Mr. LAMONT. But they would not, no matter what the disposition might be. They would not take up any question of financing with us of that kind without first talking it over with the American Treasury and getting not only their approval but their direction to take it up with us.

Mr. RAUSHENBUSH. After the war, you mean.

Mr. LAMONT. Yes; after the war, and they never did. That was entirely between the two Treasuries. We did not have anything to do with that.

Mr. RAUSHENBUSH. And, as a matter of fact, they never did discuss it again.

Mr. LAMONT. Never did with us that I know of, certainly not.

Mr. BROWN. I offer for the record a cable of January 5, 1917, no. 35165, which has been largely discussed before. I think we can just pass it over.

Mr. WHITNEY. That was introduced yesterday.

Mr. **Brown**. Is it already in the record or was it just discussed?

Mr. **Whitney**. It was mostly read, I guess.

(The document referred to was marked "Exhibit No. 2665" and is included in the appendix on p. 8801.)

Mr. **Brown**. In regard to the amounts of U. K.'s held by banks and munitions companies, I offer a cable of January 6, 1917, no. 35177, confirming what we have already said.

(The document referred to was marked "Exhibit No. 2666" and is included in the appendix on p. 8802.)

Mr. **Brown**. It says in the middle of the first paragraph [reading]:

> The chances are that the projected issue, even if successful, will hardly be sufficient to pay off the amount of loans nos. 1 and 2 as they will then exist. But for the moral effect it will be essential to pay off all participants, thus leaving us in a position still carrying a larger amount of call loans. * * * We set forth these matters not in a spirit of complaint but in order to acquaint you fully with situation and with realization of difficulties inherent in it.

That indicates clearly, does it not, that you did not like the position of having to carry the British Government on the demand loans?

Mr. **Whitney**. No, no; I do not think that is fair. I think that it meant that we were again just pushing them, that they had to keep awfully busy to meet their requirements.

Mr. **Brown**. You seemed to feel you might be complaining.

> We set forth these matters not in a spirit of complaint, but in order to acquaint you fully with situation and with realization of difficulties inherent in it.

Mr. **Whitney**. We were not complaining, and we did not want them to think we were.

Mr. **Brown**. But you did say it was a very difficult spot to be in?

Mr. **Whitney**. We never have denied that.

Mr. **Brown**. I offer for the record a group of cables in regard to negotiations on the third U. K.'s. First, cable no. 28495, of January 10, 1917.

Mr. **Whitney**. Is this the series of cables, Mr. Brown, in which we insisted that it had to be very attractive, and so forth?

Mr. **Brown**. Just the mechanics of that matter.

(The document referred to was marked "Exhibit No. 2667", and is included in the appendix on p. 8803.)

Mr. **Brown**. 35445.

Mr. **Lamont**. What date was that?

Mr. **Brown**. That is January 12, 1917.

(The document referred to was marked "Exhibit No. 2668", and is included in the appendix on p. 8803.)

Mr. **Brown**. I offer cable no. 35572, dated January 16, 1917, to Morgan, London.

(The document referred to was marked "Exhibit No. 2669" and is included in the appendix on p. 8804.)

Mr. **Brown**. I offer cable no. 35628 of January 17, 1917, to Morgan, London.

(The document referred to was marked "Exhibit No. 2670" and is included in the appendix on p. 8805.)

Mr. Brown. There is one passage there that is worth noting [reading]:

> We have a feeling that your authorities may not fully appreciate the absolute necessity of the various changes which reluctantly we have been obliged to suggest as contrasted with our own original views as furnished, but we are sure you will make clear to them that situation for this issue has been more difficult than in case of either United Kingdom loans one or two and there has been much lethargy to overcome.

Could that be taken to indicate that these other plans for financing the demand loan, even had they eventuated, would also have met a good deal of lethargy?

Mr. Whitney. It so happened that the third U. K., you know, was a great success. We had always said they would have to have a conversion feature, but we had hoped in the beginning that the conversion into a 10-year bond would be sufficient. Then, as the cables which you have introduced show, we first went to a 15-year conversion and finally ended up in a 20-year conversion.

Mr. Brown. You made a very attractive issue out of it.

Mr. Whitney. We made it just as attractive as we could.

Mr. Brown. Because there was a great lethargy in the market to overcome.

Mr. Whitney. There were three features, I think.

First, what we said in that January 5 cable, that we would have to go to the investing public rather than rely on the banks and munitions firms. That was read several times yesterday.

Second, of course, we still had the aftermath of the Federal Reserve statement.

Thirdly, it was necessary, we thought, to pick this up, and there was a lethargy because of various commitments of this kind. We wanted to be sure it was a success, and it was.

Mr. Brown. I offer, similarly, for the record, cable no. 30339 of January 23, 1917, from Morgan, London; cable no. 35824, of January 23, to Morgan, London; cable no. 37032. of January 29, 1917 to Morgan, London; and an exchange of cables of the 23d, nos. 30360 and 35818, in regard to the arrival of Sir Samuel Lever, Financial Secretary to the Treasury, in New York in the end of January.

The Chairman. Both of these last are dated the 23d.

(The documents referred to were marked "Exhibits Nos. 2671, 2672, 2673, 2674, and 2675", and are included in the appendix on pp. 8805 and 8806.)

Mr. Brown. Then I offer, similarly, for the record, in regard to these drawing plans and municipals that have been discussed, cable of January 29, no. 30500 in regard to the British turning down one drawing plan.

(The document referred to was marked "Exhibit No. 2676" and is included in the appendix on p. 8806.)

Mr. Brown. I also offer cable of January 3, 1917, no. 28754, in regard to the London municipal issue.

(The document referred to was marked "Exhibit No. 2677" and is included in the appendix on p. 8807.)

Mr. Whitney. What does that read? Just give me the first words of it.

Mr. Brown. It begins: "We quite understand your views" and so forth.

Mr. Whitney. Yes.

Mr. **Brown**. Note at the bottom of the cable the following [reading]:

> We note you speak of smaller amount now than $50,000,000.

Is that pounds or dollars?

Mr. **Whitney**. This is $50,000,000.

Mr. **Brown**. Yes; $50,000,000 of that. There has been some discussion of the huge size of the municipals.

Mr. **Whitney**. That was not on any given issue, was it?

Mr. **Brown**. That was on the London issue.

Mr. **Whitney**. But the total municipals were a great many more than just London. The total amount considered as the maximum was 50,000,000 sterling. Let me get this cable. I do not like to speak too much from memory. This is referring to just one specific issue, is it not—the London County Council? Here we speak apparently of an amount less than $50,000,000. Certainly. We were discussing Birmingham and—there were four of them, were they not?

Mr. **Brown**. I offer cable no. 30666 of February 2, 1917, from Morgan, London, on the municipals also.

(The document referred to was marked "Exhibit No. 2678" and is included in the appendix on p. 8807.)

Mr. **Brown**. I now offer a group of cables on this Canadian Pacific operation, dated January 22, 1917, to Morgan, London, and April 5, 1917, to Morgan, London—the numbers are respectively 35763 and 41584—indicating that the Canadian Pacific arrangement had not reached fruition on April 5, 1917.

Mr. **Whitney**. Is not that what I said?

Mr. **Brown**. I do not remember what the date was.

Mr. **Whitney**. I said April, just when we went in the war.

(The documents referred to were marked "Exhibit Nos. 2679 and 2680" and are included in the appendix on pp. 8807 and 8808.)

Mr. **Brown**. I also offer cable no. 41732, dated April 10, 1917, to Morgan, Grenfell & Co., London, and a letter of April 14, 1917, from Mr. Lamont to Secretary McAdoo in regard to dropping that issue.

Mr. **Lamont**. What date is that?

Mr. **Whitney**. We are into April now.

(The documents referred to were marked "Exhibit Nos. 2681 and 2682" and are included in the appendix on pp. 8809 and 8810.)

Mr. **Brown**. During this period there was some discussion on the part of the Reserve Board reversing in some way its earlier stand, was there not?

Mr. **Lamont**. What is in the cables about that, Mr. Brown?

Mr. **Brown**. I offer for the record cable no. 35997, dated January 27, 1917, to Morgan, London.

(The document referred to was marked "Exhibit No. 2683" and is included in the appendix on p. 8811.)

Mr. **Brown**. It says [reading]:

> On Wednesday I conferred informally at Washington, D. C., with Secretary of Treasury, Governor and one other member of Federal Reserve Board. For your information Secretary of Treasury expressed apprehension as to increasing European loans here fearing that possibly his own financial plans for moderate bond issues might be interfered with.

Mr. **Whitney**. "Of course to us"—do you want me to read it on?

The **Chairman**. Read on.

Mr. WHITNEY (reading):

> Of course to us, this apprehension seems utterly groundless and we so expressed ourselves. Other two members of board seemed generally favorable to our plans, including present issue, as designed for distribution among private investors and thus relieving banks. Also seemed very favorable to suggested drawing plan by American manufacturers.

That is the one which did not come through.

Mr. BROWN. I offer for the record a similar cable of January 25, 1917, No. 30353, to Harjes in Paris, and a cable supplementary to that to Mr. Harjes in Paris, no. 30440, dated February 2, 1917, just after the breach in diplomatic relations.

(The documents referred to were marked "Exhibits Nos. 2684 and 2685" and are included in the appendix on pp. 8811 and 8812.)

Mr. BROWN. I call your attention to the line down in the middle of the second paragraph of cable No. 30440 [reading from "Exhibit No. 2685"]:

> In such an event—

this is in case of hostilities with Germany—

> Federal Treasury may float immediately bond issue of $500,000,000, possibly $1,000,000,000, either amount being quickly absorbed.

Mr. Lamont, was that amount mentioned to you in your conference with the Secretary of the Treasury of January 25?

Mr. LAMONT. I have not the slightest recollection, Mr. Brown.

Mr. BROWN. It seemed so close, February 2, hardly when the breach in diplomatic relations had been accomplished, that you informed Harjes that in the event of war the Federal Treasury has a plan to float anyway $500,000,000 and maybe a billion. It occurred to me possibly that that might have been discussed on January 25th.

Mr. LAMONT. January 25th was 6 days before the Germans filed their notice declaring unrestricted submarine warfare. I did not know anything about their note.

Mr. BROWN. Did you confer with the Secretary of the Treasury after the receipt of that note?

Mr. LAMONT. Not that I recall, unless it is in the record somewhere.

Mr. BROWN. You do not recall it?

Mr. LAMONT. I do not recall it. I was subject to his call if he ever wanted to see me.

Mr. BROWN. But did he tell you at any time, if you remember, whether the Federal Treasury would float this amount of money?

Mr. LAMONT. I have not the slightest recollection of that.

Mr. RAUSHENBUSH. The last letter, referring to this discussion between Mr. Lamont and Mr. McAdoo, as I got it—no, this was a cable to Harjes on February 2, referring apparently to an earlier discussion between Mr. Lamont and Mr. McAdoo. That was the day before the diplomatic relations were severed, was it not?

Mr. LAMONT. What?

Mr. RAUSHENBUSH. The cable was dated February 2.

Mr. LAMONT. Diplomatic relations were severed January 31?

Mr. BROWN. No; February 3.

Mr. LAMONT. The note was January 31.

Mr. RAUSHENBUSH. And your conversation was January 25, so we gather.

Mr. LAMONT. Yes. In this cable, Mr. Raushenbush, that you are alluding to of mine, I say at the very end—and this will probably answer Mr. Brown's question [reading "Exhibit No. 2685"]:

> In dictating this we are as yet quite in the dark as to what action Washington is about to take, which, of course, may be announced later in the day. Such action may serve to make the foregoing suggestions entirely negligible.

Mr. RAUSHENBUSH. Washington presumably was in doubt, too. I was simply trying to place the date on which that information was secured that the bond market of the United States might be closed to the British, whether that was presumably in your meeting with the Secretary of the Treasury, which is otherwise dated as January 24.

Mr. LAMONT. What does my letter say about my meeting with the Secretary of the Treasury?

Mr. RAUSHENBUSH. Your telegram to Harjes is dated the 25th, and in this last paragraph says [reading from "Exhibit No. 2684"]:

> For your private information, Secretary of Treasury, who T. W. Lamont visited yesterday, stated informally that in view of pending necessity for American Government to issue bonds * * *

Mr. LAMONT. Yes.

Mr. RAUSHENBUSH. So I was just trying to find out whether you had gotten the information put in the cable of February 2 in that conference of January 24, or do you remember subsequent conferences?

Mr. LAMONT. Mr. Brown asked me that a moment ago. I said I had not the slightest recollection of that.

Mr. RAUSHENBUSH. All right; I am sorry. I did not hear it.

Mr. BROWN. I offer a cable of February 21, 1917, no. 37870, to Morgan, London. It needs no comment, I believe. It is in regard to this possible bridge matter.

(The document referred to was marked "Exhibit No. 2686", and is included in the appendix on p. 8813.)

Mr. BROWN. I offer a cable of February 27, 1917, no. 39085, from H. P. Davison to Mr. Grenfell.

(The document referred to was marked "Exhibit No. 2687", and is included in the appendix on p. 8813.)

Mr. BROWN (reading):

> Lever and I to spend this evening in Washington, D. C., with British Ambassador and Governor Federal Reserve Board to discuss subject our 37870. Nothing new and really not very hopeful that anything will come of these particular negotiations.

Mr. BROWN. I then offer a cable of February 28, 1917, no. 39124, from Mr. Davison to E. C. Grenfell, in regard to this same conference, apparently.

(The document referred to was marked "Exhibit No. 2688", and is included in the appendix on p. 8814.)

Mr. BROWN. I also offer a cable of March 8, 1917, no. 39510, to Morgan, London.

(The document referred to was marked "Exhibit No. 2689" and is included in the appendix on p. 8814.)

Mr. BROWN. I offer cable no. 41287, dated March 28, 1917, to Morgan, Grenfell & Co., London.

(The document referred to was marked "Exhibit No. 2690" and is included in the appendix on p. 8814.)

Mr. **Brown**. I read from this cable [reading]:

> For your most confidential information, J. P. Morgan conferred yesterday with Secretary of Treasury, whose attitude is in favor of granting ample credit to the Allies. We believe that in due course President Wilson is likely to advocate such a plan to Congress and we are in hopes that if adopted it might become effective on or about May 1, thereby leading to a solution of all the exchange difficulties of the Allied Governments.

Mr. **Lamont**. That, of course, was subsequent to the time that the President had sent out the call for Congress.

Mr. **Brown**. Does Mr. Morgan recall whether the discussion at that time was to advance the Allies money for their expenses in the United States or for all the expenses that came over the New York market of any kind?

Mr. **Morgan**. I do not know. I do not remember the discussion. The record is here. That is all I know about it.

Mr. **Brown**. I would like to offer for the record in regard to this collateral question on these United Kingdom loans, a letter from the Farmers Loan & Trust Co. to J. P. Morgan & Co., dated December 27, 1916. You have not got it. It is a list of collateral.

We will note in passing that that is the collateral under the United Kingdom loan, no. 1, December 26, 1916, and this shows Dominion of Canada $62,000,000 and 7,000,000 pounds sterling plus.

(The document referred to was marked " Exhibit No. 2691" and is included in the appendix on p. 8815.)

Mr. **Brown**. Then I will offer, as the third page of the previous document, a memorandum, whose source is the Guaranty Trust Co. of New York, memorandum at close of business, December 27, 1916, showing the status of the U. K. No. 2 loan as of December 27, 1916, in which it appears that the British railroads under this loan had 7,718,000 pounds of obligations unsecured and that Australia, Canada, Egypt, and New Zealand and South Africa had a total of $45,612,029.53 and 32,464,840 pounds.

Also there is a memorandum attached to the same document, first, Bankers Trust Co., résumé of collateral February 1, 1917, showing that under the U. K. No. 3 loan there were unsecured bonds of Egypt and Canada under the amount of $47,000,000 and 3,606,700 pounds.

(The documents referred to were marked "Exhibits Nos. 2691A to 2691C" and are included in the appendix on pp. 8817, 8827, and 8836.)

Mr. **Whitney**. Are they all as of December 27?

Mr. **Brown**. No; one as of February and other dates.

Mr. **Whitney**. And all those in accordance with the terms of the trust indenture.

Mr. **Brown**. Unquestionably; and the total par of these loans was $800,000,000, was it not, two at 250 and one at 300.

Mr. **Whitney**. Are you going to bring out that the collateral in there is different. Mr. Brown, they were entirely distinct loans. The third U. K. had no lien on the securities behind the first U. K.

Mr. **Brown**. Mr. Whitney, the question has been raised frequently that all those loans were collateralized.

Mr. **Whitney**. They were.

Mr. **Brown**. Now, we have in the record the nature of that collateral.

Mr. WHITNEY. Certainly I can submit all those things, but when you begin bulking them, Mr. Brown, they were sold at the very crest, and the collateral was different, each one of them was different. For instance, when you talk about Egypt, that applied only to one loan. It is easy to submit, and I would be only too happy to have you use it, because it is a record of which we are very proud, to show that each one was collateralized in accordance with the terms of the circular under which they were originally sold.

Mr. BROWN. There is no question but what they were collateralized according to the terms of the indenture.

Mr. WHITNEY. I know.

Mr. BROWN. I want to put in the record that the total par of the loan was $800,000,000 and the British railroads and the British Dominions unsecured obligations amounted to $405,000,000.

Mr. WHITNEY. Say that again.

Mr. BROWN. That out of a total par of $800,000,000, that would mean about one billion of collateral, roughly $405,000,000 par, Mr. Whitney, consisted of British railroads and British Dominion unsecured obligations, obligations of British protectorates.

The queston is, if the unsecured bonds of the British or the British Empire—Mr. Lamont talked about the collateral—if they were unsecured, of what value would be the Dominion securities, if some other country's securities were questioned?

Mr. LAMONT. Do you mean to say that the entire North American Continent north to the Canadian line would blow up, if Germany had had better luck in the war?

Mr. BROWN. I am not questioning any one particular part of it, but the whole unsecured obligations of the British Empire—and not by any means are all of those Canadian, Mr. Lamont—and this does not include the Canadian railroads but merely includes Dominion securities——

Mr. LAMONT. We have always considered Canadian Dominion securities, provincial securities, very high grade, Mr. Brown.

Mr. BROWN. How about New Zealand, South Africa and Australia? You have made the argument that if the British lost the war, that did not mean that the loans would not be secure.

Now the question I have in mind is this, taking those securities under the loans, if Great Britain defaulted, so that those pledge agreements had to be enforced, what market would there be for 9,000,000 pounds of Australians, 5,000,000 pounds of New Zealands, and 6,000,000 pounds of South Africans, and 5,000,000 Egyptians?

Mr. LAMONT. Mr. Brown, we have not the slightest idea but what every one of those items, in case of necessity, would have been liquidated in due course by the obligor. If we had had any doubt of that at all, we would not have accepted that.

Mr. BROWN. Do you think, if the mother country had been unable to pay them, that the Dominions would have gone through on their obligations?

Mr. LAMONT. We think, as I stated, absolutely, that the obligations were absolutely good.

Mr. WHITNEY. In support of that, Mr. Brown, you must remember that each colony of Great Britain to which you referred is an exporting nation, all having very great natural resources. They could then stand on their own bottom and have since.

I am delighted to have you present it any way you want, but I do say that when you are bulking them, you are always inevitably going to give a misleading picture, because the first loan had a certain basis, two groups of collateral, of which we took Canadian Pacific Railroad on the first group. The British railways I think, came in the second.

Mr. BROWN. In the second.

Mr. WHITNEY. Yes, sir; the second one, where we had in the first group $180,000,000, we had them. Of course none of these things went against the 2-year period. Some of them went against the 3 and 5 and certain others, the British railways, I think, were entirely in the third, were they not?

Mr. BROWN. They are in the second.

Mr. WHITNEY. British railways?

Mr. BROWN. Yes, sir; number 2.

Mr. WHITNEY. What was the third?

Mr. BROWN. The third was Canada and Egypt chiefly.

Mr. LAMONT. You see, Mr. Brown, as Mr. Whitney has pointed out, the details of this collateral at the time of these loans were made public to the investors and before that to the syndicate bankers underwriting the loan. They evidently were convinced as to the goodness of those loans, because, in the first place, they would not otherwise have underwritten them and in the second place would not have bought them.

Mr. BROWN. That question was never at issue, Mr. Lamont. The question is, or we have found since the hearing, suppose that they accomplished collateralization of these loans. I am simply asking you if you thought the credit of the colonies was better than the credit of the mother country. That is all. Does it add anything to the security of a British bond to put behind it the obligation of its colonies and protectorates?

Mr. LAMONT. Certainly it does.

Mr. WHITNEY. Absolutely.

Mr. BROWN. Then the credit of the colonies is better?

Mr. LAMONT. It does not say that. The total of the joint credit of Britain and France in 1915 was $500,000,000. Then as the situation progressed, Mr. Brown, it became perfectly evident that the investment community in America did not want to buy any more unsecured obligations on any scale, and we asked for security and security was forthcoming.

Mr. BROWN. You did not have the thought of securing them with British Treasury bonds too?

Mr. LAMONT. We did not secure them with British Treasury bonds. You may have your opinion on the matter, but ours was that the loans were absolutely safe and very amply secured.

Mr. BROWN. I offer for the record an extract from your Life of Mr. Davison, Mr. Lamont.

Mr. LAMONT. What is that about?

Senator VANDENBERG. I wrote a book once.

Mr. BROWN. This extract states [reading]:

> After the war was well over, the cry began to be raised that American bankers had dragged the United States Government into the conflict in order, as it was often put, "to make good their foreign loans." Of course, any such charge was so absurd and unwarranted as to be ridiculous. The total amount

of unsecured loans, issued in America by the British and French Governments and outstanding at the time America entered the war, did not exceed $500,000,000 * * *.

You would amend that figure, would you not, Mr. Lamont?

Mr. LAMONT. You suggest the amendment, and it is very possible I can accept it. What is your amendment?

Mr. BROWN. I should amend it in the sense that we ought to include the acceptances, the French municipals, the British bank credit of 1915, all told an amount that I figure roughly as $855,000,000.

Mr. LAMONT. Including the $500,000,000, you mean?

Mr. BROWN. Yes, sir; including the $500,000,000.

Mr. LAMONT. Was I alluding in the book to the publicly issued loans?

Mr. BROWN. The phrase is:

> The total amount of unsecured loans, issued in America by the British and French Governments, and outstanding at the time America entered the war, did not exceed $500,000,000.

Mr. LAMONT. I used that word "issued" in the ordinary sense, Mr. Brown, which meant publicly issued.

Mr. BROWN. It did not mean that it included the total unsecured obligations of those two countries?

Mr. LAMONT. I was not taking into account these scattering credit operations; no, sir.

Mr. BROWN. But the scattering credit operations raised it to the very considerable total of $855,000,000?

Mr. LAMONT. First rate.

Mr. BROWN. The extract continues [reading]:

> and there never could have been any valid doubt of their goodness. At the time of their issue they had been widely distributed throughout the American investment community, and were not—contrary to common belief—held in bulk by bankers.

(The document referred to was marked "Exhibit No. 2692", and is included in the appendix on p. 8853.)

Mr. BROWN. That is all, Mr. Chairman.

The CHAIRMAN. Senator Pope, do you have here a statement which you wish to offer at this time?

Senator POPE. Yes, sir.

The CHAIRMAN. You may proceed.

REMARKS OF SENATOR POPE

Senator POPE. When the United States Senate authorized an investigation of the munitions industry, we were honored to be named members of the Committee. The objectives outlined in the resolution authorizing the investigation were to inquire into the practices of manufacturers, sellers, and distributors of arms, munitions, and implements of war, to investigate existing legislation and treaties in the regulation and control of the traffic in munitions and to recommend additional legislation. For many years we felt such an investigation to be desirable and that a thorough-going expose of the practices of munitions makers is necessary to the future peace of the United States and the world. We most emphatically are in favor of appropriate legislation to control or regulate the munitions traffic.

During the major part of the Committee's inquiry it has conformed to the statutory limits of its jurisdiction and has been of untold value to the people of the United States. It appears now, however, that the investigation has degenerated into an attack upon our wartime President, Woodrow Wilson, and his Secretary of State, Robert Lansing. No word that we can say will add to the greatness of President Wilson, the genuine sincerity of the man, his honesty of purpose, his unusual personal integrity, and his life-spending effort in behalf of his native land, but we must express our resentment at any effort to impugn the motives of Woodrow Wilson and to discredit his great character. The chairman of this Committee is quoted in the press as making the charge that President Wilson and Secretary Lansing were falsifiers. Just what this has to do with an investigation of the munitions industry under the terms of the resolution it is not possible for us to see. The purpose of the investigation is being lost sight of and the chance to secure enactment of remedial legislation is rapidly disappearing. Such efforts to disparage Wilson and Lansing, however, do disclose the bias and prejudice with which the investigation is being carried on.

We will take no part in such performance. We are emphatically not interested either in head hunting or using an instrumentality of the United States Senate to promote the bias, prejudice, or animus of any member of the committee.

We repeat, there is the most urgent need for a true munitions investigation and remedial legislation. Whenever this Committee realignes its investigation to conform with this objective, it will have our full support. Signed by myself and Mr. Walter F. George.

The Chairman. The Chair could not at this time avoid, however briefly it might be, comment upon the statement which has just been offered for two members of this Committee by one of our distinguished members, Senator Pope.

As a member of this committee, I want to say that there has been no avenue pursued in our study that has not first been approved by a majority of the Committee, and the calls for meetings at which there was to be considered what direction the committee was to take have been for meetings, of which every member of the Committee has had notice. There have been times when a majority of the Committee could not be mustered. Invariably there was postponement to a time when a majority could be had.

The Chair has taken no pleasure in many of the avenues that have been pursued. He feels that sometimes very considerable weakness of his is that when he starts out in pursuit of facts, upon a given line, he does not know enough to stop when the going gets a little rough, by reason of the persons whose toes might be in the way of the committee pursuing the course that it chooses.

I regret that the Senator should have to refer to yesterday's developments as a degeneration on the part of the Committee. I wish the Senator from Idaho could have been present yesterday when Senator Clark was developing the story of the tramp, tramp, tramp, step-by-step progress in 1915 and 1916 of the United States into the World War.

I think all who were present on yesterday will bear testimony that there was not malice in the comment that was offered, to the effect that Secretary Lansing and President Wilson had evidently falsified when they were asked, after the war and after the Peace Conference in France, whether they had had earlier knowledge than at the conference of the so-called secret treaties made between Great Britain and those of her Allies who were allies before the United States entered the war. Invariably Secretary Lansing and President Wilson responded to the Foreign Relations Committee, when it thus questioned them, to the effect that they had had no previous knowledge.

No man can read the record that has been made respecting history, actual history of those days, and ignore the fact that both Secretary Lansing and President Wilson had departed from the facts when they pleaded that they had no knowledge of these secret treaties.

The record which every member of the Committee has had in his possession for the last 4 or 5 weeks very clearly establishes the fact that within a matter of a very few days or weeks after the United States entered the World War, those who were leading our American cause did have knowledge, and that direct, that secret treaties had been entered into.

Senator POPE. Mr. Chairman——

The CHAIRMAN. Just a moment, Senator. Pardon me.

I am not going to be at all resentful, if it does develop, as it has, that there has been displeasure on the part of any member or members of the Committee with the course which the proceedings have taken, but any endeavor, any undertaking that has as its purpose the lessening of the danger of our being drawn into more war, if it be an undertaking that does not deal fairly and squarely and without prejudice on these very direct things, that did enter into, in a very vital way, and finally into our declaration of war such purpose cannot be said to be a fair one.

I have never devoted myself as earnestly, with as little prejudice and with as thorough a determination to make the job a thorough one, as I have entered upon the tasks which have been very plainly laid out for us in the resolution adopted by the Senate and under which we have been operating.

I should regret exceedingly if there can be made, as a result of the hearings that have been conducted, any showing whatsoever indicating that there has been animus on the part of the chairman of this committee, or any member of this committee in the prosecution of its plain duty.

Senator POPE. I was just going to ask, Mr. Chairman, if you did not base your conclusion that Wilson and Lansing were falsifiers upon statements made by two eminent Englishmen?

The CHAIRMAN. Only in part, Senator.

Senator VANDENBERG. Mr. Chairman, I would like to make a comment on this situation.

I was not present yesterday afternoon when this particular incident occurred, to which Senator Pope refers. I have great respect for the memory of President Wilson; I have great respect for Senator Pope and Senator George; I have great respect for Senator Nye and Senator Clark, who have borne the chief burden of this inquiry, and who, in my judgment have rendered an inestimable service to the American people.

My regret is, that it seems to be so difficult to conduct the inquiry objectively.

The record will disclose my constant efforts to be objective in consideration of it.

In this sense, in an objective sense, it seems to me that tremendous and vital values are being disclosed. In my view, we see a clear demonstration that the commercial factor is an inevitable and irresistible impulse in these war equations. That can be said objectively. It does not attach to any particular individuals—and I may add that I have great respect for the witnesses who now sit in the box in front of us. It does not attach to individuals as such; it attached to our entire existence in our attitudes heretofore. It is inherent in our entire neutrality policy heretofore, which has been a policy primarily intended first, to preserve commerce, and, secondarily, to preserve peace, if possible, as a by-product.

Now, I think our objective can certainly be unanimous—and this includes Senator Pope and Senator George, and I think it includes the witnesses and all the others, as well as myself and the balance of the committee—that our objective is to try to quarantine this hazardous impulse, if it can be done.

It seems to me that history has been rewritten in the last 48 hours. That is not strange. I never knew in all my observations that history could be written accurately until years and years after a given event, until a full perspective is available.

Now, I think it is very important that history should be revealed in all its nakedness, no matter what its implications are, and then the facts can speak for themselves, and then if we can study them objectively, perhaps we can gain a lesson from them.

My feeling is that it is not our function to prosecute anybody. I am certainly not sitting here as a prosecutor in any sense, of anybody. Foresight never can be as good as hindsight. The Congress, the President, the members of the Cabinet, could not be in possession of all the knowledge that we have today respecting the interlocking factors.

These gentlemen who have done us the honor of testifying here for nearly 2 weeks could not have known all the interlocking factors that were involved in the situation 21 years ago.

It seems to me that our problem objectively is to see what we can do to profit by mistakes that are disclosed, and to benefit by the errors, so that in some small, final degree, the World War will not be a total loss to the United States, which up to date it is, unless we can learn something advantageous from it.

So, Mr. Chairman, so far as I am concerned, I shall very heartily continue to cooperate with the committee objectively in an effort to do everything within my power honorably to keep America out of war. And I think if we could only get it into our minds and our purposes that the pursuit is objective and not personal—that is, it is impersonal—we can achieve a far finer result.

The Chairman. There has very obviously been——

Senator Pope. I agree absolutely.

The Chairman. There has very obviously been an established intent on the part of some—I think I should confine it to some editorial writers—during the last 2 weeks, especially, to indicate that the Committee was bent upon finding a—what word do I want?

Senator Barbour. A victim?

The **Chairman**. No; a villain.

Senator **Vandenberg**. A "goat", in the parlance of the street.

The **Chairman**. I think that the witnesses who are before us at the present time are ready to bear testimony that there has been no attempt on the part of the Committee to put them in the light of villains, who had set out in 1914 to drive 110,000,000 or 120,000,000 people into a war. And all the contentions to the contrary. I think no member of this Committee has ever pretended that such was the case.

But, in the furtherance of what Senator Vandenberg has remarked, the Chair would like to say this: That he is convinced from the following of this record that has been made, that throughout the years of 1914, 1915, and 1916, in each and every instance when American commerce was in any degree in conflict with America's policy of neutrality, that policy of neutrality was made to get out of the way and to give the center of the road to commerce. And I am sure that when this record is complete, and it is possible to piece it together in its proper order, that can be made plain to one and all alike.

Again Senator Vandenberg spoke of his respect and admiration for Woodrow Wilson. I have entertained, and I still entertain, largely a faith in that man's determination, if it were at all possible, to keep America out of the war. How much faith I had in him is perhaps best exemplified by the fact that in 1916, the campaign that year found me a poor little newspaper man with an editorial column to be filled every week, putting out a column which will be found to be in constant support of reelection of the man who had kept us out of the war.

I did that as a Republican, and I shall not for 1 minute accept any challenge that any purpose which has been mine as respects the record relating to Woodrow Wilson, to bring into play any animus or to use any occasion which might be presented to get even with someone whom I had opposed politically, because the record is so clearly one of support for the same man.

Unless there are further remarks, the Committee will proceed.

(At this point Senator Pope withdrew.)

SMALLER LOANS OF 1916 [1]

Mr. **Raushenbush**. Gentlemen, there are still a few questions about some of the loans that seem to have culminated, and which we have not finished up, and I think we can get through with them very quickly, and then the record on those other loans will be completed.

We touched for a moment yesterday on the American Foreign Securities Co., and we find that apparently the negotiation for that loan, issued by that company, began on January 5, 1916; and I wish to enter a letter from Mr. Harjes to " Dear Jack ", which opens those negotiations. I have no comment on it, unless you have. It just seems to be the start of it.

(The document referred to was marked " Exhibit No. 2693 " and is included in the appendix on p. 8854.)

Mr. **Raushenbush**. Do you remember at the time about that loan, what the point and purpose was of floating loans in addition to ordinary public financing? What was the point of the corporation?

---

[1] See also "Exhibits Nos. 3192 through 3217", Hearings, Part XXX; "Exhibits Nos. 3960 through 3977 and 4043 through 4073", Hearings, Part XXXII. For Russian financing see "Exhibits Nos. 3266 through 3333", Hearings, Part XXX.

Mr. **Morgan.** I think I have a pretty good recollection of that. It was because the French Government was very adverse to putting out a secured loan, and this was a method of getting around that, by organizing a corporation to which the French Government presented the securities, and on those securities the corporation borrowed the money.

Mr. **Whitney.** With the French Government to keep them supplied with necessary securities, and to pay the interest and the bonds when due.

Mr. **Raushenbush.** I think that probably answers the question.

At this point we notice that you made on February 3, 1916, a proposal for this corporation, and sent it over to Mr. Harjes, and I want to offer that for the record.

(The document referred to was marked "Exhibit No. 2694" and is included in the appendix on p. 8855.)

Mr. **Raushenbush.** I take it that represents a true statement of the facts at that time?

Mr. **Morgan.** It is a very simple matter.

Mr. **Raushenbush.** Yes, sir.

Mr. **Whitney.** February 3, Mr. Raushenbush?

Mr. **Raushenbush.** I have no comment, unless you do. I am simply putting in the pertinent documents about the loan.

Mr. **Whitney.** Right.

Mr. **Raushenbush.** On February 8, 1916, the subject came up again in a further proposal from your firm, in which the possibility of loaning up to $200,000,000 came up.

Mr. **Morgan.** Yes, sir.

Mr. **Raushenbush.** That later came down to $100,000,000, did it not?

Mr. **Morgan.** Yes, sir.

Mr. **Raushenbush.** I offer that for the record.

(The document referred to was marked "Exhibit No. 2695" and is included in the appendix on p. 8856.)

Mr. **Raushenbush.** Then on February 21, 1916, the discussions go on in a telegram from Harjes in Paris, no. 16646, in which he points out that apparently the cost of that loan, as it is being discussed at that moment, is going to be 9 percent to the French Government, and that is a little too high. Correct?

Mr. **Whitney.** Yes, sir.

Mr. **Raushenbush.** That is offered for the record.

(The document referred to was marked "Exhibit No. 2696" and is included in the appendix on p. 8857.)

Mr. **Raushenbush.** On February 25, 1916, there was a wire to Harjes, no. 12102, in which you set out, in a little more definite terms, your endeavor to form a corporation, with all American capital, to purchase from the French Government their 3-year 5-percent obligations on a 7½-percent basis net to them, in an amount approximating $100,000,000.

That, I take it, was the best offer at the time, and it was on that basis that it went on?

Mr. **Whitney.** Yes, sir.

Mr. **Raushenbush.** That is offered for the record.

(The document referred to was marked "Exhibit No. 2697" and is included in the appendix on p. 8857.)

Mr. **Raushenbush**. Now, we come to a later paragraph in that same cable which raises one question which we have talked about at times before, which is this [reading from "Exhibit No. 2697"]:

> We have had constantly in mind the political exigencies of the French Government as repeatedly emphasized by you and as again recently urged by J. P. Morgan, but we cannot change conditions as they exist in America today.

Do you take that first sentence to mean what Mr. Morgan says, that the French did not want to be put in the position of having secured their loans?

Mr. **Morgan**. They were dreadfully sensitive about all that sort of thing.

Mr. **Raushenbush**. That is all it means?

Mr. **Morgan**. That is what it alludes to.

Mr. **Raushenbush**. That seems natural enough.

Mr. **Whitney**. Another factor is, they did not want to get the securities in.

Mr. **Raushenbush**. Do what?

Mr. **Whitney**. Collecting securities from their nationals. They thought that would be very unpopular.

Mr. **Raushenbush**. The cable continues [reading from "Exhibit No. 2697"]:

> Recent developments of our Administrations' controversy with Germany are making our investors more wary even than before. Further, for your private information, Dominion of Canada is pressing here for $100,000,000 loan, likewise Russia for same amount, being in active negotiation with strong group here for credit, cost of which in this market to Imperial Russian Government will be not less than 9 percent.

Could you give some explanation of that phrase, "recent developments of our Administration's controversy with Germany are making our investors more wary even than before"?

Mr. **Whitney**. Let us find out where we are.

Mr. **Raushenbush**. February 25, 1916.

Mr. **Whitney**. Our chronology shows that on that date—this is the 24th of February 1916—but that was not published at any time—a letter to Stone.

February 10, Germany had announced that armed merchantmen would be considered armed vessels of war. That may have been it.

Mr. **Rausenbush**. That states, "Our Administration's controversy with Germany."

Mr. **Morgan**. I do not know that. It must be the announcement of a more active or extensive submarine program.

Mr. **Whitney**. The beginning of the extending of submarine warfare.

Mr. **Raushenbush**. According to our chronology, on January 18, Lansing had suggested to the Allies the *modus vivendi*, which would have changed the whole situation, and that apparently leaked out to the papers, as I remember the history of the time, leaked out about this time.

Mr. **Morgan**. I cannot remember that.

Mr. **Raushenbush**. You see the significance of the question, do you not? At the same time, on February 22 and 25, at least on February 22, the McLemore Resolution had been introduced, so that you see the significance of this. If this was in your mind—and that is why I am asking the question—if the Lansing proposal that the submarine-merchantmen controversy be settled in the way Mr. Lansing thought advisable at that time, if that was the only thing up, if that was our controversy, that that would make the investors "more wary even than before"; and my query is, whether there was anything else which was brought up at the time in your minds, if you can remember?

Mr. **Morgan**. I cannot remember now.

Mr. **Raushenbush**. Do you remember the circumstances there, Mr. Lamont?

Mr. **Lamont**. I have failed to follow just the very phrase you referred to, Mr. Raushenbush.

Mr. **Raushenbush**. The one reading [reading from "Exhibit No. 2697"]:

> Recent developments of our administration's controversy with Germany are making our investors more wary even than before.

What I am trying to find out is, whether we were going toward a more peaceful situation or toward a more warlike situation. Do you see?

Mr. **Lamont**. Yes. I should not be able to recall unless I read the public press at the time, Mr. Raushenbush. That would probably give all the information that we had.

Mr. **Raushenbush**. All the information which we have is that the Lansing modus vivendi had been announced January 18, and it leaked out to the press before this February 25 letter.

Mr. **Lamont**. It has already been stated, has it not, Mr. Raushenbush, that on February 10——

Mr. **Whitney**. Yes.

Mr. **Lamont**. Then I won't read it again.

Mr. **Raushenbush**. I offer for the record a telegram to Harjes, dated June 28, 1916, and numbered no. 13307.

(The document referred to was marked "Exhibit No. 2698", and is included in the appendix on p. 8858.)

Mr. **Raushenbush**. That cablegram begins [reading]:

> Financial situation with Mexican trouble looming up becoming uncertain; therefore, it is of the utmost importance to French Government's interests to rush shipment of total amount securities necessary for loan. Every measure for this end should be undertaken, and no stone should be left unturned to impress situation upon officials.

Mr. **Whitney**. You will remember, Mr. Raushenbush, for clarification, that Mr. Ribot did not want to issue the orders to get the necessary securities, unless he had obtained the assurance that we could move it, and they had taken longer than we liked, and it was getting on, and we were trying to hurry him up.

Mr. **Raushenbush**. I can understand that. Then this latter part in the cable mentioned the same thing [reading from "Exhibit No. 2698"]:

> This possible war with Mexico, and likelihood of the United States Government issuing loans on its own account, may bring about radically changed conditions; therefore, we urge all haste for completion of operation.

That is the same thing you were talking about.

I offer for the record a cable dated July 17, 1916, to Morgan in London, no. 23206, which apparently carries the final formation of this American Foreign Securities Co., when it says [reading from "Exhibit No. 2699"]:

> For your information, the underwriting syndicate for the $94,500,000 3-year 5-percent notes of American Foreign Securities Co. completed today. We expect to make public offering of notes on Wednesday, price to public 98, syndicate underwriting, at 96, selling commission and other expenses to be paid by syndicate. American Foreign Securities Co. loans $100,000,000 to French Government at 7¼ percent per annum, although Government had agreed to pay 7½ percent if necessary.

That was about the form in which it finally went through, was it not?

Mr. **Whitney.** Yes, sir.

(The document referred to was marked "Exhibit No. 2699", and is included in the appendix on p. 8859.)

Mr. **Raushenbush.** Then I offer for the record the syndicate agreement on that, again showing, I believe, this issue at 96, that is, by the corporation at 96 and selling them at 98.

(The syndicate agreement referred to was marked "Exhibit No. 2700" and is included in the appendix on p. 8860.)

Mr. **Raushenbush.** The stock of this company was $10,000,000, was it not? It is in the syndicate agreement, the first paragraph.

Mr. **Morgan.** Yes, sir.

Mr. **Raushenbush.** You and Brown Bros. and some other groups, were the owners, were you not? Who else was in that? National City?

Mr. **Morgan.** You have a reference to them, have you not?

Mr. **Raushenbush.** I do not find them.

Mr. **Whitney.** A group of individuals, because the banks could not buy stocks.

Mr. **Raushenbush.** Were they officials of the bank?

Mr. **Whitney.** Yes.

Mr. **Raushenbush.** And the control, I take it, was in your hands?

Mr. **Whitney.** The control was trusteed. It was a holding trust, Mr. Morgan; Mr. James Brown, Mr. Robert Bacon, five, I think.

Mr. **Raushenbush.** We have from your records a summary of the syndicate, showing the net profit to the participants of $1,594,215, and that I take it is the difference between 96 and 98, is it not? It was floated at 98, was it not?

(The summary of the syndicate referred to was marked "Exhibit No. 2700–A" and is included in the appendix on p. 8864.)

Mr. **Whitney.** I have not got it right here.

Mr. **Raushenbush.** Ninety-eight and a quarter.

Mr. **Whitney.** Ninety-six and 98, that is two points, on $94,500,000 and plus expenses and various things up there. It was provided that the expenses would be borne by the syndicate.

Mr. **Raushenbush.** Yes, sir.

Mr. **Whitney.** That was the difference between $1,800,000 and the other figure.

Mr. **Raushenbush.** The net profit was $1,594,215. Then, as we gathered the picture—and I wish you would check us on this—the company itself, the corporation, took the notes from the French at 5 percent, I mean paid the French 5 percent, and got the revenue of 7½ percent. Is that right?

Mr. **Whitney**. They took the notes—I have to speak from memory, but it said in that cable you read that they took the notes at 7¼ percent, did it not?

Mr. **Raushenbush**. Seven and one-quarter, yes, sir.

Mr. **Whitney**. But I would have to get my figures before I would be certain.

Mr. **Raushenbush**. We figure out that this company with a $10,000,000 capital floated these notes and made, during the period of their length, for each of the 3 years that the notes ran, a profit there of the difference in the percents.

Mr. **Morgan**. That is right.

Mr. **Raushenbush**. It had to pay only 5 and it got 7¼.

Mr. **Whitney**. They had to pay more than 5, because they had to amortize. They sold them at a special discount of 4 percent, so that they had to amortize that difference when paid at maturity.

Mr. **Raushenbush**. Could you put in the record at this point what the profit of that corporation was for 3 years?

Mr. **Morgan**. It is in the record somewhere. I do not know where it is.

Mr. **Raushenbush**. I have not seen it, Mr. Morgan.

Mr. **Whitney**. They loaned the French Government $100,000,000 at 7¼ percent, and then there were $94,500,000 which they sold to the syndicate at 96. I think we can get the profit for you.

Mr. **Raushenbush**. For each 1 of the 3 years.

Mr. **Whitney**. We can get it for you very easily.

Mr. **Raushenbush**. Mr. Reporter, we will reserve a number for that.

Mr. **Whitney**. You want to know the net return per annum?

Mr. **Raushenbush**. In addition to this syndicate proposition, which we have already put in.

Mr. **Whitney**. You want to know what the stockholders got?

Mr. **Raushenbush**. Yes.

Mr. **Whitney**. We will get that.

The **Chairman**. The reporter will note that and offer it for the record at this point.

(The document referred to was marked "Exhibit No. 2700–B" and is included in the appendix on p. 8865.)

Mr. **Raushenbush**. I want to offer the participations and identify for the record without comment the collateral indenture in connection with that company.

Mr. **Whitney**. Those are the participation subscriptions?

Mr. **Raushenbush**. Yes, sir; those are the participations.

(The two documents referred to were marked "Exhibits Nos. 2701 and 2702" and are included in the appendix on pp. 8865 and 8873.)

Mr. **Raushenbush**. There are just a few things in connection with the United Kingdoms which we have talked about off and on, questions about mechanism, and I think a few on collateral. To summarize—and will you check me here—the first United Kingdom was $250,000,000; the second United Kingdom was $300,000,000; and the third United Kingdom was $250,000,000, a total of $800,000,000. The collateral behind them amounted to $300,000,000 in the first case, $360,000,000 in the second, and $300,000,000 in the third.

Mr. **Whitney**. One hundred and twenty percent.

Mr. **Raushenbush.** One hundred and twenty percent. I have already put in the record in another connection, I believe, that on the first loan, to support the market, Morgans bought $54,609,277, and on the second loan you bought $36,425,919, and on the third loan you bought only $11,409,058.

Mr. **Whitney.** That was in a trading account. That was stating just one side of the ledger; we bought and sold.

Mr. **Raushenbush.** You sold securities and bought the notes?

Mr. **Whitney.** Yes, sir.

Mr. **Raushenbush.** Going back to the American Foreign Securities Co. matter a minute, did you not spend about $10,000,000 to support the market on that, did not the company?

Mr. **Whitney.** Yes, sir; but what you just referred to was sales of collateral, the purchase of notes and carrying out the indenture? Is that what you mean?

Mr. **Raushenbush.** Yes; but the purpose was to keep the market up. We discussed that yesterday.

Mr. **Whitney.** It is a little different, because you extinguish the notes when you buy collateral, and one was a trading account for $10,000,000, but the net of it is more or less the same.

Mr. **Raushenbush.** The three loans were essentially the same, with regard to terms, were they not? They were all secured, and the syndicate agreements and the pledge agreements were very similar, and the third one a little more favorable, having a conversion provision?

Mr. **Whitney.** They were different maturity and different classifications, and the last one had the conversion.

Mr. **Raushenbush.** Generally speaking, they are very much the same, are they not?

Mr. **Whitney.** In general outline, yes; but in detail quite different.

Mr. **Raushenbush.** I want to offer the syndicate agreement of the 18th of August 1916, and the pledge agreement dated September 1, 1916, as typical of the United Kingdom loans generally.

(The documents referred to were marked "Exhibits Nos. 2703 and 2704" and are included in the appendix on pp. 8896 and 8900.)

Mr. **Whitney.** I do not want to interrupt you, Mr. Raushenbush, but with the qualification that certain substitute clauses in the three were different as to details, but the same as to general outline, as I said a moment ago.

Mr. **Raushenbush.** The nature of the collateral underlying them all is about the same, is it not?

Mr. **Whitney.** They were classified differently, and also some of the later loans had securities deposited pending arrival of securities from England, so that the substitution of it in general outline shows that they were the same, though in detail quite different.

Mr. **Raushenbush.** Of the 120 percent collateral, let us say, roughly, you tried to keep it about 40 percent Americans, 40 percent Canadians, and 40 percent neutrals. Is that not about it, making up the 120 percent?

Mr. **Whitney.** Could I introduce, which will clarify for the record, a public circular descriptive of those three issues?

Mr. **Raushenbush.** Yes, sir.

Mr. **Whitney.** I think that would make the record clear. One of the loans have the Canadians with the Americans.

Mr. RAUSHENBUSH. In the later one——

Mr. WHITNEY. In the second one.

(The three documents offered by the witness were collectively marked "Exhibit No. 2704–A" and are included in the appendix on p. 8924.)

Mr. RAUSHENBUSH. I want to call your attention to cable dated August 8, 1916, to Morgans in London, no. 23860, and call your attention to the middle paragraph there and ask for an explanation for the record. You are describing the collateral there and you speak of $100,000,000 of Americans, divided equally between American Dollar Securities and securities available for sale. For the record, will you explain what the difference was in the collateral that was put up—the American collateral, I mean?

Mr. WHITNEY. I tried to earlier. There were so-called Treasury securities which were owned by the British Treasury which had been acquired directly from their nationals and those we had general orders to dispose of. The securities under either Scheme A or B—while we had the complete right to sell them, if need be, under hypothecation, we had no instructions to sell them, because, as I said earlier, the terms under which they had been borrowed would have involved the British Government in very serious penalties if they had sold them, but, so far as the collateral went, we were completely free to sell them, if we wished to.

Mr. RAUSHENBUSH. If you got instructions to do so, you mean?

Mr. WHITNEY. At our election. If there was any default in the loan, we had a perfect right to sell them.

Mr. RAUSHENBUSH. I wanted that explained for the record. About one-half of them, about 50 million in that particular case, could not have been sold without definite instructions from the Treasury?

Mr. WHITNEY. Except to satisfy the loan.

(The document referred to was marked "Exhibit No. 2705", and is included in the appendix on p. 8928.)

Mr. RAUSHENBUSH. I offer for the record a cable dated October 27, 1916, to Morgan, in London, no. 29493.

(The document referred to was marked "Exhibit No. 2706", and is included in the appendix on p. 8929.)

Mr. RAUSHENBUSH. In the second paragraph of that cable there seems to be the same arrangement. It states [reading]:

> We expect to utilize among Americans about $50,000,000 Treasury securities supplying balance from American Dollar Securities.

Mr. WHITNEY. Yes; about 100 million Americans.

Mr. RAUSHENBUSH. You felt free, I take it, to use $50,000,000 to buy collateral balances, if necessary, to support the market, in which case there would be substitution of other Americans. Is that right?

Mr. WHITNEY. If we sold them, of course, we would deposit the cash with the Trustee, available for the purchase of others, or the cash stayed there. I do not quite follow your question about substitution.

When we speak of Treasury securities, we mean securities owned by the British Treasury and available for sale without further instructions. The other securities were, as I said before, those which involved a penalty to the lender by the borrower.

Mr. RAUSHENBUSH. A penalty against the British Government, if it ordered them sold?

Mr. MORGAN. Yes, sir.

Mr. WHITNEY. Yes, sir. Scheme A and Scheme B had different penalties.

Mr. RAUSHENBUSH. Now, coming to the cable from Morgan in London, dated July 28, 1916, still on the first U. K. loan, no. 20654, it describes the Canadian collateral being put up, and it describes it as Dominion indebtedness to the United Kingdom. Was that new indebtedness created for the purpose of buying collateral for this loan?

Mr. WHITNEY. No; it was putting into longer-term operations certain advances made by the British Government to the Canadian Government.

Mr. RAUSHENBUSH. That had already been outstanding?

Mr. WHITNEY. I understand so.

(The document referred to was marked "Exhibit No. 2707" and is included in the appendix on p. 8930.)

Mr. RAUSHENBUSH. We had a question on it, because on July 29, 1916, the next cable to Morgans in London, there is a question of getting the opinion of the Canadian Attorney General to the effect that all steps have been taken to make the bonds legal and binding. That is why I asked if they were new.

Mr. WHITNEY. My recollection is there was a question of whether the Canadian Government had proper legal authority to issue a long-term note as against the question of a short advance they were borrowing from the British Government. It was purely technical.

Mr. RAUSHENBUSH. That cable is offered for the record.

(The document referred to was marked "Exhibit No. 2708" and is included in the appendix on p. 8930.)

Mr. RAUSHENBUSH. The purpose of getting the Canadian Government to switch from a long term to a short term was to make more available as collateral?

Mr. WHITNEY. Quite.

Mr. RAUSHENBUSH. I offer both of those cables.

Now on November 23, 1916, you mention some Australian Government bonds which were being put up, and I offer that to connect up the record.

(The document referred to was marked "Exhibit No. 2709" and is included in the appendix on p. 8931.)

Mr. RAUSHENBUSH. On November 24, 1916, there is an acknowledgment to that being turned over to the Trustee. I offer that cable for the record.

(The document referred to was marked "Exhibit No. 2710" and is included in the appendix on p. 8931.)

Mr. RAUSHENBUSH. On December 1, 1916, the South African 4½'s were turned over.

I offer that for the record.

(The document referred to was marked "Exhibit No. 2711" and is included in the appendix on p. 8931.)

TERMS OF THE BRITISH PLEDGE AGREEMENTS[1]

Mr. RAUSHENBUSH. Then, on December 7, 1916, we come to a letter from you to the Lords Commissioners of His Majesty's Treasury, London, England, pledging not to sell any securities under the said pledge agreement, other than the securities which are the absolute property of His Majesty's Government, without further instructions. Do you have that letter in front of you?

Mr. WHITNEY. Yes, sir.

Mr. RAUSHENBUSH. You are not free to sell them without instructions?

Mr. WHITNEY. I cannot remember what clause 13 is. I think you will find it was all subject to the right of selling to satisfy the indebtedness, but we would not sell them unless instructed to. What is clause 13, if you know?

Mr. RAUSHENBUSH. We just put it in a minute ago, did we not?

Mr. WHITNEY. We always had a complete right to sell any collateral and satisfy notes, but this does unquestionably say that we were not to sell them without further instructions.

Mr. RAUSHENBUSH. I offer that for the record.

(The document referred to was marked "Exhibit No. 2712" and is included in the appendix on p. 8931.)

Mr. RAUSHENBUSH. Clause 13 of the pledge agreement, which has been introduced in the record, is as follows [reading from "Exhibit No. 2704"]:

> From time to time, acting by its agents authorized in writing (of which authorization a duplicate shall be filed with your company) the obligor may sell any of the pledged securities, provided that the obligor shall not be in default in the payment of the principal or interest of any of the notes—

And so forth.

Mr. WHITNEY. For the purpose of retiring the notes?

Mr. RAUSHENBUSH. You so informed the Trustee on August 18, 1916, in a letter outlining this and quoting the section, which I offer for the record.

Mr. WHITNEY. August 18 again?

Mr. RAUSHENBUSH. Yes, sir; it may be the 15th. It is August 15, 1916, to the Guaranty Trust Co.

Mr. WHITNEY. That must have been the Farmers Loan.

Mr. RAUSHENBUSH. We have this addressed to the Guaranty Trust Co., 140 Broadway, reading in part [reading from "Exhibit No. 2713"]:

> DEAR SIR: The Government of the United Kingdom of Great Britain and Ireland proposes—

And so forth.

Mr. MORGAN. To the Guaranty Trust?

(The document referred to was marked "Exhibit No. 2713" and is included in the appendix on p. 8932.)

Mr. RAUSHENBUSH. You say you may sell for cash any of these securities?

Mr. WHITNEY. This is not as a Trustee because they had nothing to do with the first U. K. This is advising them as one of the offering group. It is not as Trustee. They were Trustees under the second loan.

---

[1] For collateral under the three United Kingdom loans see "Exhibits Nos. 4173 through 4183 and 4190 through 4196". Hearings, Part XXXIII; and "Exhibits Nos. 4254 through 4256", Hearings, Part XXXV. See also "Exhibits Nos. 3192 through 3217", Hearings, Part XXX.

Mr. **Raushenbush.** You made similar arrangements on the second and third U. K. loans, and I offer a letter to the Lords Commissioners of His Majesty's Treasury, dated November 1, 1916.

(The document referred to was marked "Exhibit No. 2714" and is included in the appendix on p. 8933.)

Mr. **Raushenbush.** I also offer a letter from M. G. Ramsay, in Treasury Chambers, to Morgan, Grenfell & Co., dated February 8, 1917, and I call your attention to the last paragraph.

Mr. **Whitney.** What date?

Mr. **Raushenbush.** February 8, 1917. This is from the British Treasury to Morgan, Grenfell, which states in the last paragraph [reading from "Exhibit No. 2715"]:

> But to avoid any misapprehension My Lords think it well to state that they are under pledge not to dispose in the market of the dollar bonds of the three Governments mentioned above, equally with the dollar bonds of the Government of Canada; and they would be obliged if Messrs. J. P. Morgan & Co. would give them an explicit recognition that all securities in group 2 are excluded from the authority for sale quoted above.

The three Governments mentioned being Australia, New Zealand, and South Africa.

Mr. **Raushenbush.** After receipt of that letter, was the situation that we referred to, which was communicated to you. You have been told that the collateral back of the third was subject to a double pledge, that is, that My Lords of the treasury had pledged themselves to the Dominions of Australia, New Zealand, and South Africa, and Canada, that they would not dispose of the dollar bonds of those Governments.

Mr. **Morgan.** That was subject to the overriding rights to sell them, if they were needed to satisfy the notes.

Mr. **Raushenbush.** Yes; I would suppose that legally, if there was default, they would all be sold.

Mr. **Morgan.** Absolutely. There was no charge against them——

Mr. **Raushenbush.** At this moment, the point I was trying to get at was a little different, namely, that the Lords of the Treasury, whatever they call themselves, told you that My Lords had pledged themselves.

Mr. **Whitney.** I think I can explain this. It sounds a little bit mysterious, but it is really very simple.

All the three trust indentures instructed the Trustees to take our order on the sale of collateral for the purpose of buying in notes, in our judgment. We had that general authority, and on these securities it was made overriding of the whole business under clause 13. The British Government advised us, however, that in connection with these four Dominions, they did not want to have these bonds sold for the purpose of buying notes or leaving cash, and we advised the Trustees in each instance that that general authority given us was still good with the exception of those four blocks.

This has nothing to do with the rights of the noteholders in protection of their collateral. It was merely a limitation put on our authority to sell all the securities behind these loans for the purpose of buying notes.

That is all of the significance this has. We, in the first instance, got the blanket authority, and then had it limited for that purpose under clause 13, and that alone.

Mr. RAUSHENBUSH. Barring default—and these things would not have defaulted for several years because they had 3 years to run—barring default, it simply provided brakes on the selling of the three Dominions?

Mr. MORGAN. Yes, sir; they did not want them sold for the purpose of obtaining notes before they were due, which has a very valuable effect on the margin and collateral, if they are carried out to a large extent.

Mr. WHITNEY. It is not collateral, Mr. Morgan. Practically, we were limited as to Treasury securities. But we got general authority under the indenture to sell it all, which they had sent out, and then they wanted to put this definite limitation on our authority in connection with the dollar securities of those four Dominions. It has nothing to do with the general rights of the note holders running to the collaterals, but it was just for a specific purpose.

Mr. RAUSHENBUSH. I want to offer, to complete the picture back and forth, the letter to which I have just referred of February 8; also the letter of February 12, 1917, from Morgan, Grenfell, calling it to your attention.

(The letters referred to were marked "Exhibits Nos. 2715 and 2716" and are included in the appendix on pp. 8933 and 8934.)

Mr. RAUSHENBUSH. I would also like to offer the letter of January 30, 1917, again bringing the matter up; letter of February 1, 1917, when you acknowledged it to the Lords Commissioners of His Majesty's Treasury—that is the phrase I was trying to get, "the Lords Commissioners of His Majesty's Treasury."

(The documents referred to were marked "Exhibits Nos. 2717 and 2718" and are included in the appendix on pp. 8934 and 8935.)

Mr. RAUSHENBUSH. Then on November 1, 1916, going back again, there is a cable which you dispatched to Morgan in London, no. 29745, which reads in part as follows:

> In order to avoid specifying to Guaranty Trust Co., New York, securities which are comprised in Treasury list, and which we will be authorized to sell, we propose to amend letter in 25448 as follows:
>
> "Delete 'Specified in annexed schedule aggregating in value $——— being securities included in group one', substituting the word 'pledged.' We, on the other hand, giving Ambassador letter stating that without further instructions we will not sell securities other than those comprised in Treasury list."

(The document referred to was marked "Exhibit No. 2719" and is included in the appendix on p. 8935.)

Mr. WHITNEY. That is just what I referred to a minute ago.

Mr. RAUSHENBUSH. What was the point of avoiding specification to the Guaranty Trust?

Mr. WHITNEY. I am advised it is to prevent the inconvenience of having them check up each time, as to whether it was scheme A, B, or Treasury. The authority of the trustee was complete, although we agreed with the Treasury, with the Government, that we would not sell anything but the securities they owned.

Mr. RAUSHENBUSH. Then there is a further cable on that under date of November 4, 1916, no. 26068, which says:

> Treasury letter confirming now received, * * *.

And so forth.

I will also offer the cable of November 3, 1916, no. 26037.

(The documents referred to were marked "Exhibits Nos. 2720 and 2721", respectively, and are included in the appendix on pp. 8935 and 8936.)

Mr. **Raushenbush.** Next I offer a letter dated November 9, 1916, to the Guaranty Trust Co., informing them that you are appointed agent and enclosing a letter to that effect.

(The document referred to was marked "Exhibit No. 2722" and is included in the appendix on p. 8936.)

Mr. **Raushenbush.** Next I offer a cable of November 4, 1916, with this paragraph at the end [reading]:

> If qualification is put in letter to us it would put the Trust Co. under duty to inquire as to whether securities mentioned were those we were authorized to sell, and we wish to avoid disclosing even to Trust Company that only comparatively small amount of securities are as a practical matter available for sale. Mr. Barclay will be here Monday morning to sign Pledge Agreement and other documents, so please cable to reach us our opening if this course is satisfactory.

(The document referred to was marked "Exhibit No. 2723" and is included in the appendix on p. 8936.)

Mr. **Raushenbush.** That deals with the second U. K., does it not, which was issued November 1st?

Mr. **Whitney.** Yes.

Mr. **Raushenbush.** What is the explanation for that apparent desire to avoid disclosing that situation to the trust company? I do not understand it.

Mr. **Whitney.** Well, for the purposes of article 13, we had agreed with the British Government that we would only sell without further authority from them the securities actually owned by the British Treasury, and the authority of the Trustee was to sell everything.

It says here that apparently in the first instance at least there was such a comparatively small amount of Treasury securities owned that were practically available for sale under our agreement. But I want to repeat again that that had nothing to do with the general rights of the noteholders for sale in that respect.

This was clearly the amount of the securities available for what you would call the support of the market.

Mr. **Raushenbush.** You would call it that, too, would you not?

Mr. **Whitney.** I meant what one might call, and not you.

Mr. **Raushenbush.** On this second U. K., a good deal was used to support the market. That is what you were interested in at this time, were you not?

Mr. **Whitney.** It did support the market.

Mr. **Raushenbush.** And you just had an experience——

Mr. **Whitney.** Of course, it extinguished the notes as the result of that support.

Mr. **Raushenbush.** Then there is a cable dated August 2, 1916, to Morgan's in London, no. 23656, calling attention to the third page, reading as follows [reading]:

> Much as we regret to say it, we doubt if this offering could be made successful without being handled in a very strong and aggressive manner. We have in mind, therefore, that if this principle and plan are approved by you, you might arrange, say with the Bank of England, to underwrite jointly with us up to $100,000,000 of the issue and to trade back and forth in the notes to a point not exceeding in the aggregate that amount at any one time,

And so forth.

What happened to that; did it go in with you?

Mr. **Whitney**. On each of the U. K.'s, we had an arrangement with the Bank of England that they would go in in an equal amount with us, but in each case we did not need a participation, so that it was a sort of insurance fund, but in no case did they ever actually participate under their terms.

We did the same thing in each one of the U. K.'s.

Mr. **Raushenbush**. You offered them underwriting?

Mr. **Whitney**. No; we asked them if they would be prepared to take a part in the underwriting, if we needed it, and every time they said they would, and in each case we were able to relieve them. They never wanted to.

Mr. **Raushenbush**. These loans here go to the largest banks first.

I offer a telegram dated August 15, 1916, no. 25199, for E. C. Grenfell, signed by Davison.

(The document referred to was marked "Exhibit No. 2724" and is included in the appendix on p. 8937.)

Mr. **Raushenbush**. That telegram reads in part as follows [reading]:

> In order to insure success of undertaking we first secured firm underwriting from largest interests and then advised dealers and banks of additional reservations subject to their acceptance, making aggregate allotted participations about $60,000,000 in excess of issue. Apparently, practically all reservations will be accepted which will result in the necessity of cutting down $60,000,000.

I mean, you were not really oversubscribed $60,000,000, were you?

Mr. **Whitney**. This is underwriting.

Mr. **Raushenbush**. Underwritten $60,000,000?

Mr. **Whitney**. That is a perfectly normal operation in the security business. We went to the biggest people and got a general commitment from them and then we went to all the dealers throughout the country and offered them participation, with the idea of what we call an over-underwriting, and have it reduced to the amount of the bonds.

In this case, apparently, we got applications for $60,000,000 in excess of the $250,000,000 and then, of course, had to cut it down to $250,000,000.

Mr. **Raushenbush**. With that sort of an oversubscription, if you will—I do not understand——

Mr. **Whitney**. It is not a subscription, Mr. Raushenbush, but an underwriting.

Mr. **Raushenbush**. An excess of underwriting. I do not understand why on the first U. K. you had to spend fifty-four odd million dollars, according to that.

Mr. **Whitney**. Because, after it is underwritten, it is offered to the public. There were no withdrawals like the Anglo-French loan.

Mr. **Raushenbush**. Then the one question which was in my mind, covered in a cable of August 26, 1916, where Mr. Morgan and Mr. Davison are wiring Morgan in London, cable no. 25488.

I offer that for the record.

(The document referred to was marked "Exhibit No. 2725" and appears in full in the text.)

Mr. **Raushenbush.** That cablegram reads as follows:

> At close of subscription books noon today, total amounted to $211,014,000. We have, therefore, subscribed on behalf of Bank of England and ourselves, joint account, balance of $38,986,000—being $19,493,000 for Bank of England and $19,493,000 for J. P. Morgan & Co.
>
> We shall, of course, continue to deal with the bonds held for our joint account to best advantage we can with the view to reducing the amount as fast as possible.
>
> In view of all circumstances, particularly the continued threatened railroad strike, also this being holiday season with very many important bank officers throughout country away, we are on the whole most gratified at outcome and hope your authorities are pleased.

Mr. **Whitney.** Further on you will find that we released them from that subscription. That was in accordance with their understanding, to take anything from up to $100,000,000. Somewhere, if I can turn it up, it says——

Mr. **Raushenbush.** Actually they never subscribed but simply underwrote?

Mr. **Whitney.** We released them from that subscription.

Mr. **Raushenbush.** So that their subscription had in effect shown a very large oversubscription?

Mr. **Whitney.** No, no.

Mr. **Raushenbush.** A very large underwriting?

Mr. **Whitney.** No; it tended, in the first instance, to release the underwriters from any liability there. In other words, there was seemingly a gap between the public subscriptions at that time and the total of $250,000,000, and then additional subscriptions came in which resulted in relieving the underwriters.

We say 3 days later [reading]:

> We now find our position such that we are quite willing to relieve the Banks of their participation in the purchase, and take them ourselves if they would prefer to have us do so or we will carry them in joint account with interest until further notice at 4 percent. You, of course, understand, that our desire is to do exactly that which the Bank most prefers.

They come back and say they would rather have us take them ourselves.

Mr. **Raushenbush.** I still have not got it very clear in my head as to why the Bank of England would become an underwriter but never a subscriber.

Mr. **Whitney.** It was a matter of security.

Mr. **Morgan.** It was never a subscriber but always an underwriter.

Mr. **Raushenbush.** I understand.

Mr. **Whitney.** They agreed to do both, but we never called on them for either.

The **Chairman.** Before recess, the Committee is desirous of entering for the record certain documents which will be properly identified, dealing with certain phases of the loans negotiated by Kuhn, Loeb & Co.; Lee, Higginson; and J. & W. Seligman.

Without objection from the Committee, they will be offered and the clerks will see that they are properly identified before turning them over to the reporter.

Mr. **Raushenbush.** Mr. Chairman, in that connection we have some of the Morgan cables which I should have put in the other day, running through 1916, and we have a list of them here and would like to offer them.

The CHAIRMAN. Is there objection on the part of the witnesses to these being offered for the record?

Mr. WHITNEY. Those are in connection with the financing?

Mr. RAUSHENBUSH. Yes, sir; of the other day, running through 1916. I have a list of them here.

The CHAIRMAN. The Committee is offering no comment upon them.

Mr. WHITNEY. We will see them in the record.

The CHAIRMAN. You will see them in the record.

(The following documents offered by Mr. Raushenbush were received, pursuant to the statement by the chairman above, being cable no. 12392 of Jan. 11, 1916; cable no. 13089 of Jan. 12, 1916; cable no. 13143 of Jan. 13, 1916; cable no. 12451 of Jan. 14, 1916; a letter of Jan. 17, 1916, from "W. P. B. to Right Honorable Lord Fairfax"; cable no. 17963 of May 3, 1916; cable no. 17987 of May 4, 1916; cable no. 16776 of May 5, 1916; cable no. 19058 of May 6, 1916; cable no. 19469 of May 20, 1916; cable no. 19760 of June 1, 1916; cable no. 19914 of June 6, 1916; cable no. 21104 of June 10, 1916; cable no. 21105 of June 10, 1916; cable no. 21221 of June 14, 1916; cable no. 18191 of May 24, 1916; cable no. 19627 of May 26, 1916; cable no. 18348 of May 31, 1916; cable no. 19767 of June 1, 1916; cable no. 19992 of June 8, 1916; cable no. 25120 of August 16, 1916; and cable no. 22281 of August 23, 1916—which were marked respectively "Exhibits Nos. 2726 to 2747" and are included in the appendix on pp. 8937 to 8949.)

(The following documents offered by the chairman were furnished the reporter by the Committee staff, being letter of Sept. 3, 1915, from Lee, Higginson & Co. to the Italian Ambassador; letter of Sept. 14, 1915, from the Italian Ambassador to Lee, Higginson & Co.; Italian contract of Oct. 9, 1915; letter of Nov. 14, 1916, from Lee, Higginson & Co. to Italian Ambassador in Washington; a draft of a communication dated Dec. 27, 1916, from the files of J. & W. Seligman & Co.; letter of Nov. 17, 1916, from Kuhn, Loeb & Co. in re 6-percent 3-year gold bonds of the cities of Bordeaux, Lyons, and Marseilles; circular on French municipal bonds issued by Kuhn, Loeb & Co.; statements of Kuhn, Loeb & Co. in connection with cities of Bordeaux, Marseilles, and Lyons; letter of Nov. 29 to Jacques de Neuflize; letter of Oct. 9, 1917, to Jacques de Neuflize; letter of Sept. 9, 1918, to Messrs. Kuhn, Loeb & Co. from J. Frederick Bloch; statement of French Government to Oct. 22, 1919, in account with Kuhn, Loeb & Co.; letter of Sept. 23, 1918, addressed to French Finance Commission; circular of Kuhn, Loeb & Co. on City of Paris 6-percent 5-year gold bonds syndicate; statement of account of Kuhn, Loeb & Co. with City of Paris; circular of Kuhn, Loeb & Co. on $50,000,000 City of Paris 5-year 6-percent gold bonds; letter of Aug. 30, 1916, to Mr. de Neuflize; letter of Oct. 3, 1916, to Mr. Jacques de Neuflize; letter of Oct. 13, 1916, from Cravath & Henderson to Messrs. Kuhn, Loeb & Co.; letter of Oct. 14, 1916, from Jacques de Neuflize to Messrs. Kuhn, Loeb & Co.; letter of Oct. 16, 1916, to Mr. de Neuflize; memorandum dated Nov. 20, 1916, headed "French municipal loans"; French Government account, Kuhn, Loeb & Co. (French municipal bonds—purchases and sales); circular of Kuhn, Loeb & Co. in re Royal Dutch Co. matter; cable of about November 1915 from Kuhn, Loeb & Co.; letter of December 1916 from H. W. A. Deterding to Messrs. Kuhn, Loeb & Co., which were respectively marked "Exhibits Nos. 2748 to 2775", and are included in the appendix on pp. 8949 to 8973.)

Mr. LAMONT. Mr. Chairman, in the course of the inquiry I have quoted figures now and then about the total of imports and exports, and so forth, quoted orally. These are embodied in our statement which, if entirely agreeable to the Committee, we would like to have for the record.

The CHAIRMAN. There is no objection.

Mr. LAMONT. We will submit it to you.

The CHAIRMAN. You are submitting it to the Committee, and if the Committee approves, you will offer it for the record?[1]

Mr. LAMONT. First rate.

The CHAIRMAN. The Committee then will be in recess until next Thursday morning at 10 o'clock.

(Thereupon, at 4:30 p. m., a recess was taken until Thursday, Jan. 23, 1936, at 10 a. m.)

---

Exhibit No. 2532

State Dept. Doc.
763.72/2652½

Memorandum of Conversation with German Ambassador, April 20, 1916

L. Good morning.

B. Good morning, sir. You handed me a copy of the note yesterday, and in the present state of affairs of course my chief object is to find a way how this break can be avoided, because I hope it can be avoided. My idea is to find a way out of it, but of course I had to telegraph my Government that this Government seemed to offer little opportunity for settlement. If it means the entire stopping of the use of submarines, I am afraid that it cannot be arranged.

L. You will recall that we said in the first *Lusitania* note that we thought it was impossible to use submarines in a really humane way and that later, in our note of July 21, we said that the way submarine warfare had been conducted for the past two months showed that it was possible and therefore we hoped that course would be pursued. Then we had the sinking of the *Arabic* right on top of that, which was another great disaster. Our position is that, if submarine warfare had been conducted in that way, that possibly there would have been no further question raised. But it has not. It has been conducted in the most indiscriminate way and we cannot help but believe that it is ruthless. In those conditions submarine warfare should stop against commercial vessels, unless visit and search is observed.

B. That, of course, is impossible. Germany cannot abandon submarine warfare. No government could come out and say—"We give up the use of submarines." They would have to resign.

L. What possible methods in the use of submarines, that are effective from a belligerent standpoint, can be suggested which will comply with the law?

B. I had always supposed that warning was to be given.

L. We do not consider that the people on board—the non-combatants on board the vessels—are in a place of safety when put into an open boat a hundred miles from land. It might be calm there, but in the two days it would take them to reach land there might be a severe storm. That is one of the grounds of complaint.

B. That, of course, speaking of neutral vessels——

L. The fact that we do not have Americans on these vessels does not remove the menace to American lives. The sinking of neutral vessels shows that Americans cannot travel with safety on neutral vessels even. That is the serious part of it and I do not know how your Government can modify submarine warfare and make it effective and at the same time obey the law and the dictates of humanity.

B. Humanity. Of course war is never humane.

L. "Humanity" is a relative expression when used with "war" but the whole tendency in the growth of international law in regard to warfare in the past 125 years has been to relieve non-combatants of needless suffering.

B. Of course I think it would be an ideal state of affairs, but our enemies violate all the rules and you insist on their being applied to Germany.

L. One deals with life; the other with property.

B. Yes.

L. The German method seems reckless to me. It is as if a man who has a very dim vision should go out on the street with a revolver in search of an enemy and should see the outline of a figure and should immediately fire on him and injure him seriously and then go up and apologize and say he made a mistake. I do not think that would excuse him. That seems to be the course pursued by your submarine commanders—they fire first and inquire afterwards.

B. I myself cannot at all explain how it comes that so many neutral vessels have been attacked. I have not the slightest evidence. I do not know anything about it from our communications.

L. Of course we are gradually collecting the evidence. We have not in all the cases but we have in certain ones. The *Tubantia*, for example, seems to have been torpedoed by a German torpedo—a Schwartzkopf.

B. She was at anchor.

L. No. I do not think she had let her anchor down but she was preparing to anchor. She was at rest.

B. Yes, I know. And then there was a Spanish vessel which——

L. Of course there is this, Mr. Ambassador, that any discussion of the submarine and its present method of attack cannot go on indefinitely.

B. What was your idea to prevent the break—that we should for the time being stop?

L. I think the only way is to declare an abandonment and then if the German Government desires to discuss a method of renewal——

B. An absolute abandonment, to my mind, is impossible. It might be possible to announce stopping for a time for discussion and giving the reason plainly for the purpose of quieting our public opinion, that might be possible.

L. I understand that you are speaking entirely without instructions.

B. I am not at all instructed. I am speaking to you purely from my desire to prevent a break.

L. In view of our note I would not want to say that that would be satisfactory, but if it was made——

B. I am only trying to see what can be done because a declaration to my Government to absolutely abandon submarine warfare would make a break absolutely necessary. To abandon it would mean the overthrow of the Chancellor.

L. Probably you would get a more radical man. I realize that.

B. So the question is what we can do.

L. There would have to be a complete abandonment first and then if the German Government desires to discuss the matter——

B. I want to do what I can, because I am perfectly convinced they do not want to break; quite apart from the sentimental side I think they do not want a break. A break would prolong the war. It would last for years.

L. We do not any of us want to prolong the war.

B. That is exactly why I want to get out of this present difficulty. From the present state of affairs it looks as if the end is coming and if now there was a break and the United States was brought into the war it would prolong it. It would cause new complications.

L. New complications?

B. New economic difficulties.

L. I think that would be Germany's problem. The only possible course is an abandonment of submarine warfare, whether limited or not would depend on the terms. I would want to see an abandonment first and then possibly a discussion could follow as to how submarine warfare can be conducted within the rules of international law and entire safety of non-combatants, because, of course, in my viewpoint that is the chief question of international law in regard to attacks by belligerents on enemy's commerce.

B. Then I am to understand that you do not recognize the law of retaliation?

L. We do not recognize retaliation when it affects the rights of commerce.

B. The British retaliate by stopping all commerce to Germany.

L. It is a very different thing. The right to life is an inherent right, which man has from birth; the right of property is a purely legal right.

B. Only in this case, England's methods affect the lives of non-combatants of Germany.

L. Not neutrals.

B. No, but it affects non-combatants.

L. Does it affect their lives? I thought from the statements which have been made that Germany was not suffering from want of food.

B. But they are trying to starve them. You do not stop England but insist we must stop our retaliation.

L. But you must appreciate that we care more for the lives of our people than we do for the property.

B. We have the same difficulty—our people are getting to care more for lives. That is the whole difficulty—we are dealing with a warlike population.

L. I realize that. I appreciate that you have great difficulty with your public.

B. If you and I were to have the say in settling the case it would be an easy matter, because one can discuss the matter without heat.

L. I realize that. It makes it very difficult, but I do not think there is any other course. That certainly may be an impossible course for your Government to pursue, yet I see no other way, and I think I am as anxious to preserve peace as anyone.

B. I wanted to find out what I could do, because I do not see how they can do it though they might do it temporarily. I am sure that in the first place they would say they believed in the submarine entirely and that secondly the rules of international law must be modified by conditions. Your idea is that the submarine cannot be used if it does comply with the rules.

L. That is true. My view is that certain instruments of war are not proper to use under certain conditions, and that is the viewpoint that has largely been held in regard to the submarine as a commerce destroyer. You can not and do not know the nationality of the boat attacking. It attacks without being seen and so avoids responsibility. It gives every opportunity to kill indiscriminately and recklessly.

B. I perfectly agree with you that sinking without warning would have to stop entirely, sinking without warning is an international offense, and that is why I thought possibly my Government might give up the retaliation, but I do not think it would be possible to say we would give up submarine warfare. I do not think we would do it.

L. And if they should now sink another vessel it would be very serious—that is the way I look at the situation.

B. And if they continue the submarine warfare and an instance should happen directly after the break of diplomatic relations, if that should come, it would be still more serious.

L. That is logical.

B. That is why I look at it so seriously.

L. I do not feel that breaking off of diplomatic relations necessarily means war.

B. I do not say it myself but I do not see how it can be avoided. If we refuse it will be because we are to continue submarine warfare and then something might happen which would mean war. I came to see if something could not be done.

L. I am very much obliged to you for coming in, sir.

B. Good bye, Mr. Secretary.

L. Good bye.

EXHIBIT NO. 2533

State Dept. Doc.
763.72/2653½

(Personal and confidential)

APRIL 25, 1916.

MY DEAR MR. PRESIDENT: In view of the press despatches which are coming from Berlin—although we have received nothing of an official nature indicating the course which the German Government will pursue—I am convinced that there will be an attempt to compromise in the declaration, if they do make any declaration in regard to the abandonment of submarine warfare. Any conditions which they may advance will undoubtedly be based upon their position as to armed and unarmed merchant vessels.

It would seem to me a decided strategic advantage to have made known clearly our position in regard to armed vessels before Germany presents her reply. To do that it will be necessary for us to make public in some way the memorandum which I sent you Monday morning, and which you returned to me with your general approval. It could be done by a formal statement issued from the Department; by sending the memorandum to the various belligerents; or by sending it to the Committees on Foreign Relations and Foreign Affairs in Congress. If it seems advisable to you to do this it seems to me that the time to do it is at once, before we receive Germany's reply.

Faithfully yours,

[s] ROBERT LANSING.

P. S. Since writing the foregoing Mr. Polk has just handed me the enclosed memorandum of a conversation over the telephone with Colonel House this afternoon.

State Dept. Doc.
763.72/2653½

Memorandum for the Secretary, April 25, 1916

Colonel House called me up this afternoon shortly after four and said he had just had a conversation with the German Ambassador who had heard from his Government. His Government is most anxious to avoid a break and asked him what was the best course to pursue. They also asked him what was meant by "illegal method of submarine warfare." These two questions will be answered by the Ambassador without going to the Department of State.

His Government also wanted to know if they gave up submarine warfare what the United States would do about the blockade.

Colonel House advised him to tell his Government not to send a note suggesting a compromise, and, above all, not to raise any question in regard to the blockade. He stated the only safe course to pursue would be to advise the German Government to agree to discontinue submarine warfare pending negotiations.

This the Ambassador said he would do at once, and also said he would warn them not to send anything in the nature of a note. In regard to the Blockade, Colonel House pointed out that our relations, as far as Great Britain is concerned, are quite different from our relations with Germany; that war with Germany would be possible, whereas, war with Great Britain was more or less out of the question. This the Ambassador said he understood.

Colonel House thought it advisable to issue at the earliest possible moment the memorandum on armed merchant vessels, a copy of which he had seen. He suggested that it be issued tonight for the morning papers, but I told him in the absence of the President that it was impossible. He urged that the matter be presented to the President with the suggestion that the memorandum be given out not later than in time for the afternoon papers Wednesday.

He suggested one or two changes in the wording of the memorandum. These changes have been called to your attention and have been made.

("Exhibit No. 2535" appears in text on p. 8493)

Exhibit No. 2536

[From the House Collection, Custody of Prof. Charles Seymour, Yale University, New Haven, Conn.]

THE WHITE HOUSE,
Washington, July 23, 1916.

Mr. EDWARD M. HOUSE,
New London, New Hampshire.

DEAREST FRIEND: Thank you for the many useful and enlight[en]ing letters which I have not been able to acknowledge separately. They go into my thinking, and go, you may be sure, to the very heart of it, and are invaluable to me.

You will have seen by the papers that we have called Page home from London for a vacation in which it is our hope that he may get back a little way at least to the American point of view about things.

I am, I must admit, about at the end of my patience with Great Britain and the Allies. This black list business is the last straw. I have told Spring Rice so, and he sees the reasons very clearly. Both he and Jusserand think it is a stupid blunder. I am seriously considering asking Congress to authorize me to prohibit loans and restrict exportations to the Allies. It is becoming clear to me that there lies latent in this policy the wish to prevent our merchants getting a foothold in markets which Great Britain has hitherto controlled and all but dominated. Polk and I are compounding a very sharp note. I may feel obliged to make it as sharp and final as the one to Germany on the submarines. What is your own judgment? Can we any longer endure their intolerable course?

I dare say you were surprised by the nomination of Clarke for the Supreme Court, because I suppose you did not know him; but I am confident you will approve when you know all about him. He is close friend of Newton Baker's and Gregory (whom I love and trust more than ever) picked him out.

I have not been very well for the past week or two,—since I came back from Detroit. My digestion has been upset in some way. But I am slowly getting it in shape again, I believe, the undeniable truth being that a rest, a real rest, has been now a long time overdue. I wish I were in better trim for the campaign.

All join me in affectionate messages.

Faithfully and gratefully yours,

(Signed) Woodrow Wilson.

Exhibit No. 2537

[Lansing Collection, Manuscript Division, Library of Congress]

July 24, 1916.

Honorable Robert Lansing,
Henderson Harbor, Watertown, New York.

My Dear Mr. Lansing: I am delighted to hear from Sweet that you are enjoying your holiday and look like yourself once more. I tried not to bother you any more than I could help, but, of course, there are certain matters in which I could not take the responsibility of going ahead and not letting you know what was going on.

As to the Danish matter, Woolsey returned Saturday morning and has been at work on it. He sent a letter to you Saturday covering the objections that had been found. I also told him to send a message to Brun, in Bar Harbor. He has not yet come in, so I do not know what was done.

The Mexican matter is dragging on, but I hope to come to some sort of closing within the next few days. It may be necessary in the end to accept their Note and express a hope that the Commission will also investigate other matters that are causing trouble between the two countries. It was an absolute piece of bad faith on Carranza's part in publishing that Note and it was quite as much a surprise to Arredondo as it was to us. I rubbed it in hard and told him that we must have some explanation. I am afraid that is what it is going to be in the long run, as I have no faith whatever in anything they say. I have been spending a lot of time with Lincoln Steffens and some of the other socialistic friends of the Mexican Government and they are tremendously impressed with our good intentions. I think Steffens almost considers me qualified for membership in the Socialist Party. Fletcher has been useful as an interpreter, besides many other ways. He and Arredondo have established more or less pleasant relations.

I received your letter enclosing the suggestion of E. D. Morgan, in regard to the *Deutschland*. That is one of the points that has been raised in connection with this matter and I have kept in close touch with the Neutrality Board. Would you care to read their report? I took particular pains in announcing the report to make it negative and stated that this was no precedent.

I also received your letter enclosing letter of Hamlin. I will take the matter up at once and will write Hamlin that I have the papers. I suppose you have followed the English blacklisting and have seen the Mail Note. The British Government certainly seems to be doing its best to get into a row. I have had two talks with Spring Rice and told him that the President considered it a very serious matter and that it might be difficult to prevent Congress from passing some retaliatory legislation. Personally, I think the time has come to stand up to them. Of course, this blacklisting is nothing new, but if we let it slide, it will give the Germans abroad and here very good grounds for saying we are not even handed in our justice. Why in the world they should have felt it necessary to publish it, heaven knows.

It has been pretty hot here in spots, but on the whole I have been quite comfortable. I have the date of your return marked on my calendar and am hoping that there will be no serious blow-up before your return. What happens after that date will have my sympathetic interest. I have kept in close touch with the President and will try not to bother you any more than I can help.

By the way, the question of the personnel of the Commission is being discussed. There has been some doubt expressed as to Chief Justice White. I personally think it would be a mistake not to appoint him, particularly on account of his religion. I think Brandeis would be a good appointment, and Lane. President Elliot has been suggested, but I think the Commission, if composed of the other three, would be more useful.

Please present my kindest regards to Mrs. Lansing, also to General and Mrs. Foster. Hoping you are catching plenty of fish,

Yours faithfully,

FRANK L. POLK.

I find Woolsey wrote you in detail on the Danish Treaty.

EXHIBIT No. 2538

[Lansing Collection, Manuscript Division, Library of Congress]

JULY 28, 1916.

Honorable ROBERT LANSING,
Henderson Harbor, Watertown, New York.

MY DEAR MR. LANSING: I enclose a copy of the Note which was sent to Great Britain in regard to blacklisting. It is to be published on Monday morning. You will have no difficulty in recognizing the style. In some ways I think it would have been better if it had a little bit more punch, but if you read it carefully, it seems to me, the punch is there.

This week has been absolutely hideous. The Danish treaty made trouble, but the blacklist has caused an awful row. The innocent and the guilty have come down here together, wildly protesting. It was an extraordinarily stupid move on the part of the British and both Jusserand and Spring-Rice threw up their hands over it. I think Spring-Rice is secretly pleased that the Foreign Office has made a bad break and apparently acted contrary to his advice.

I pointed out to both the French and Italians how this blacklist is going to ruin their South American business, as most of the agents down there are German firms. Spring-Rice tells me that he thinks that we will have "a diplomatic victory." There were so many angles to it that they did not foresee that we really had a splendid case. I found that banks were refusing to give drafts to blacklisted firms. This even aroused the ire of that well known pacifist, John Skelton Williams. The British consuls have been sending out blacklists to a number of custom house brokers in New York.

I enclose a copy of a telegram I sent you yesterday in regard to the Danish treaty. I saw the President on Wednesday and told him of your telegram and that you had also written a letter, which had not been received, pointing out your objections. He said that he felt we should go ahead at once and take a chance on the defects, whatever they might be. I told him of your objection to giving special rights to Danish subjects, and also that there was a concession the details of which we had not received. He told me that he thought we would have to take a chance on both those points and go ahead.

Thursday, yesterday morning, I called him on the telephone and told him we had received your letter addressed to Mr. Woolsey and asked if he wished to see it. I again told him what the objections were and added that there was some question in your mind as to the declaration in regard to Greenland. He again said please to notify Brun at once by telegraph that we accepted the text of the treaty.

After reading your letter, I decided to send it to him and also a copy of the declaration in regard to Greenland, which, up to that time, he had not seen. In the letter I told him that Brun had telegraphed me in the morning (this was Thursday) that he would like to have the Department telegraph a formal acceptance, but that he had already cabled for full powers to sign. I said to the President that as long as Brun had not waited to hear from the Department before cabling, I was sending over your letter so he could see what your objections were. I waited until after six and not having heard from him, I sent a message to Brun as follows:

"Your telegram July 27th. On behalf of the Government of the United States I accept the text of treaty forwarded in your letter of the 18th instant and accompanied by a memorandum of your Government dated June 28, 1916. In order to clear up the English translation, I have had to make two or three verbal changes which do not in any way affect the sense of the text. Please telegraph me what the words quote capitals allotted to the churches unquote in Article two mean. Do they mean investments made by the churches or moneys allotted to the churches out of the revenues of the Islands?"

Apparently the President called me up shortly after this, but I had gone. I called him from the Metropolitan Club a little after eight and he told me that he had read your letter and the proposed declaration in regard to Greenland and still felt that the treaty was so important that we would have to make every concession in order to get it through at once. I told him that I had already sent the message to Brun. He said that was quite right.

Arredondo stayed away and sulked for several days. Yesterday, Thursday, he came in and assumed full responsibility for everything. He said that Carranza had definitely turned down our suggestion of a modification and that he, Arredondo, had continued negotiations without informing Carranza, to see if he could not reach some settlement here. He also said that he had failed to notify Carranza of our agreement not to make any statement to the press in regard to the negotiations or the Note. I showed nothing more than a polite interest in his story, but felt compelled to accept it, with the suggestion that hereafter it will be well to see that our understanding is carried out. He put it in such a way that we had to accept it.

I then submitted to the President a suggested answer which says we are disposed to accept Carranza's proposal and that the President hopes the Commission will also take up other matters, the settlement of which would tend to improve the relations of the two Governments. I will send you this when I have it in form, sometime this afternoon.

I should have written you before and kept you posted of what is going on, but I really have not had a moment as the place has been filled with Senators, Representatives, and prominent politicians bringing in victims of the blacklist. In between time, Lincoln Steffens and other gentlemen with ready reliefs for Mexico, have been on my shoulders.

It was very hot yesterday and the day before, but it is delightfully cool today, though frightfully damp.

Please give my kindest regards to Mrs. Lansing and to General and Mrs. Foster.

Yours sincerely,

FRANK L. POLK.

DEPARTMENT OF COMMERCE,
OFFICE OF THE ASSISTANT SECRETARY,
Washington, September 16, 1916.

Memo for Dr. PRATT.

Kindly note the portions marked in blue pencil of the enclosed laws of Congress. These are the so-called "Retaliatory Measures" passed by the recent Congress with the view of combatting hostile trade regulations of European belligerents.

Mr. Sweet requests that you prepare very carefully for Mr. Woolsey of the State Department a statement showing just what practical measures we could take in regulating trade "that would hurt others the most and ourselves the least"; what commodities we should aim to control; and just how far our imports and exports regulations should go so that we should not do ourselves more harm than good. The aim should be to single out commodities in pursuance of the above policy that would bring other countries "to time."

Mr. Sweet also requests that you prepare for Mr. Woolsey a statement showing exports of ammunition and munitions classified in groups, as cannon, shells, etc. The amounts to the various countries or to the Entente Allies as a whole would be satisfactory, and the data should go back as far as possible to the beginning of the war. But all possible information along the lines of the above relative to munitions should be given to the State Department.

Speed is of the essence in both the above requests.

ROBERT H. CLANCY,
Private Secretary.

DEPARTMENT OF COMMERCE,
BUREAU OF FOREIGN AND DOMESTIC COMMERCE,
Washington, October 23, 1916.

The SECRETARY OF COMMERCE: Please note with special care the accompanying letter to the Secretary of State with the memorandum inclosed therein. This work was taken up at the request of Mr. Woolsey, Assistant Solicitor of the State Department, who called on Mr. Sweet. On account of the delicacy of the question and its great importance no pains have been spared in the preparation of the memorandum.

E. E. PRATT.

DEPARTMENT OF COMMERCE,
OFFICE OF THE SECRETARY,
Washington, October 23, 1916.

(Ink) Mr. Polk, Apr. 4/17

The SECRETARY OF STATE,
Washington, D. C.

SIR: During my absence from the City Mr. Woolsey, of your Department, called upon Mr. Sweet, then Acting Secretary of Commerce, and requested a statement showing what measures could be taken in regulating trade that would be effective and, at the same time, least injurious to this country, and also a statement showing the exports of ammunition from the United States to the various belligerent countries.

In compliance with the first request, a memorandum, compiled in the Bureau of Foreign and Domestic Commerce, of this Department, is inclosed. It was understood that the request for information was directed primarily to the Act to Establish a United States Shipping Board, approved September 7, 1916, Section 36, and the Act to Increase the Revenue and for Other Purposes, approved September 8, 1916, Sections 804 to 806. The memorandum treats the subject from the commercial point of view, not the legal. The interpretation of the different provisions of law is, of course, a question for your Department to determine, and, accordingly, the memorandum has not been submitted to the legal officers of this Department for an opinion. At the same time, some of the provisions that seemed open to more than one construction have been indicated, but only so far as they are involved in the consideration of the commercial phases of the subject. In a memorandum covering so wide a subject, and one of such great delicacy and importance, only the main features of the situation could be discussed, and these could be treated only in a rather cursory manner. A more detailed study of the probable commercial effect of any measures that in your judgment merit further consideration will gladly be made.

In compliance with the second request, two statements are submitted, one showing the exports of firearms, cartridges, gun powder, and other explosives (except dynamite), from the United States to the various countries of Europe and Canada, Japan, Russia in Asia, Australia, New Zealand, and other countries during the fiscal years ending June 30, 1915 and 1916, and, for purposes of comparison, a statement extracted from Commerce and Navigation showing the exports of these same articles to the various foreign countries during each of the five years ending June 30, 1915.

Respectfully,

WILLIAM C. REDFIELD, *Secretary.*

MEANS OF COMBATING FOREIGN RESTRICTIONS OF AMERICAN COMMERCE

LEGAL PROVISIONS

The Act to establish a United States Shipping Board, approved September 7, 1916, Section 36, and the Act to increase the revenue and for other purposes approved September 8, Sections 804 to 806, contain certain provisions designated to combat restrictions placed by foreign countries on American commerce. Some of the provisions are concerned particularly with restrictions applied by nations now at war. An abstract of the several provisions contained in the two laws cited as follows:

Nature of restriction	Remedy provided	Reference
Import restrictions:		
If any country prohibits importation of any non-injurious product of U. S.	President may prohibit importations of similar (or, if such are not imported into U. S.) other products to such country.	Revenue, sec. 804.
If (during a war, by laws, regulations or practices, contrary to the law and practice of nations) any country prevents or restricts importation of any non-injurious product of U. S. into same or other country.	President may prohibit or restrict importation of similar or other products of such country.	Revenue, sec. 805.
Discrimination by vessel:		
If any vessel refuses appropriate cargo	Secretary of Treasury may refuse clearance to such vessel.	Shipping, sec. 36.
If (during a war, on account of laws, regulations, or practices of a belligerent Government) any vessel gives undue preference to, or unduly discriminates against any particular shipper or particular description of cargo.	President may detain vessel	Revenue, sec. 806.
Discrimination against American vessel or American citizens:		
If (during a war, by laws, regulations, or practices) any belligerent country withholds from American vessels or American citizens any facilities enjoyed in U. S. by vessels or citizens of such belligerent, or accorded by such belligerent to vessels or citizens of other nationality.	President may withhold clearance from one or more vessels of such belligerent, or may refuse similar facilities in U. S. to vessels or citizens of such belligerent.	Revenue, sec. 806.

Import prohibitions.—There are two provisions directed against import prohibitions of foreign countries, the one general in its character, and the other concerned directly with the restrictive measures of belligerents. The general provision authorizes the President to prohibit the importation of products of any country that prohibits the importation of any product of the United States that is not injurious to health or morals. The products selected by the President, according to a strict wording of the provision, must be similar to those prohibited from the United States. Other articles may be selected by the President "in case the United States does not import similar articles from that country." The legal interpretation of the word "similar" offers considerable difficulty. If interpreted in a broad way, it would be very difficult to show that "similar" articles are not imported, and, therefore, the President would be required to select such articles for prohibition. The very fact of the foreign prohibition against imports would indicate that normally the foreign country would import the articles in question from the United States. If such is the case, economic conditions would prevent any considerable import of the same articles, unless of widely different grade or class, from such countries into the United States, and accordingly our legal prohibition would be of little effect.

In several respects the provision intended to offset restrictions imposed by belligerent countries by Section 805 of the Revenue Act offers greater latitude. The restriction, as well as the prevention of importation by a belligerent may be penalized; the action may affect importation into the country itself or into any other country; the President may restrict, as well as prohibit the importation of products of such country into the United States; and he may select any article—"similar or other articles"—for retaliation. So far, therefore, as action on the part of this country may be desirable because of import restrictions imposed by belligerent countries, it will be found more convenient to use the authority conferred by Section 805 than that conferred by Section 804 of the Revenue Act.

Discrimination by vessels.—The next phase of restriction is discrimination on the part of vessels. Here again there are two remedial provisions, one contained in the Shipping Act, Section 36, and the other contained in the first paragraph of Section 806 of the Revenue Act. According to the former, the Secretary of the Treasury may refuse clearance to any vessel that refuses appropriate cargo. According to the latter, the President may detain any vessel that gives undue preference to any particular shipper or particular description of cargo, or unduly discriminates against any particular shipper or particular description of cargo. The first provision is general in its application, while the second is limited to discrimination occurring during a war in which the United

States is not engaged and resulting from the laws, regulations, or practices of a belligerent Government.

In order for the Secretary of the Treasury to refuse clearance to a vessel in accordance with the Shipping Act, five things must be shown to his satisfaction:

1. That the vessel has refused to accept freight;
2. That the freight was offered in good condition;
3. That the proper transportation charges were tendered;
4. That the vessel has space available with due regard to its proper loading; and
5. that the vessel is "adaptable" for the freight.

On account of the rigid wording of the Section, it is unlikely that any action will be taken under this provision, if the discrimination complained of can be regarded as due to the law or practices of a belligerent Government. The provision under the Revenue Act is much wider in scope. It covers any undue preference granted to one shipper over another, or to one kind of freight over other kinds. The President may either withhold clearance or give formal notice forbidding the departure of the vessel.

Discrimination against American vessels and citizens.—The third kind of restriction for which the Revenue Act, in the second paragraph of Section 806, provides a remedy, is discrimination by belligerent countries against American vessels or American citizens. The discrimination may consist not merely of preference granted to other nationalities over Americans, but also of failure to accord reciprocal privileges to American vessels and American citizens—that is, in other words, withholding from American vessels and American citizens privileges or facilities granted by the United States to vessels or citizens of such belligerent country. The language used is very broad and might well be construed to cover any direct discrimination against American vessels or American citizens, or any failure to observe full reciprocity of trading privilege. If thus construed, it would cover, for example, any restrictions placed on citizens of the United States whose names might appear on the blacklist of a belligerent country, or any curtailment of the right of American citizens to deal with blacklisted firms in other countries; and it would also cover any failure to allow coaling or other privileges to vessels carrying cargo shipped by, or consigned to, black-listed firms. At the same time it would doubtless be argued by a belligerent country that there was no discrimination in such cases—that American vessels were treated just like vessels of any other nationality, and American citizens like those of any other nationality. While trade by blacklisted firms, it might be admitted, is prevented so far as possible, the restriction applies equally to blacklisted firms of American nationality, and those of all other nationalities.

In case of discrimination or failure to grant reciprocal privileges, the President has two options:

1. He may withhold clearance from one or more vessels of such belligerents, or
2. He may refuse to vessels or citizens of such belligerents "similar privileges and facilities, if any, enjoyed * * * in the United States or its possessions.

INJURIES SUFFERED

The formal acts of belligerent countries that have operated to restrict American commerce fall under four items as follows:

1. Embargoes or export restrictions,
2. Import prohibitions or restrictions,
3. Orders prohibiting trade with the enemy, and
4. Penalization of specified firms suspected of having aided the enemy commercially (blacklist) or confining trade exclusively to approved firms (whitelist).

A distinction may properly be drawn between export and import restrictions on the one hand, and the restrictions on neutral trade with the enemy, or with blacklisted firms on the other hand. In theory at least, the former are intended to determine merely the lines of trade in which the country itself shall engage; their principle is sanctioned by international law; exception may be taken only to their extension beyond the point of commercial necessity, or their application in such a manner, as to discriminate against particular neutral countries, or conflict with treaty stipulations. Restrictions on neutral trade with the enemy in non-contraband goods have, on the contrary, no sanction in international law. Official blacklists constitute a new device in trade warfare, and are equally repugnant to international law. In other words, the prohibition against dealing with blacklisted concerns applies only to citizens of the country issuing the list. American houses are nominally free to trade with blacklisted concerns, say in Argentina, but in practice, the carrying trade of the world is so largely controlled by the belligerents that it is practically impossible to make a shipment to foreign countries that is not at some stage shipped by a vessel or handled by an intermediary that owes allegiance to the United Kingdom, or some other belligerent. Since no British vessel, or British citizen is allowed to trade with blacklisted firms, the prohibition operates indirectly as a restriction on American commerce.

In general, the laws and orders have been very carefully framed so as to avoid, at least nominally, any discrimination against individual countries, or the vessels or citizens of such countries. By commercial treaty most of the countries at war have guaranteed equality of treatment to other countries, and every effort has been made to avoid any apparent infringement of the treaty provisions. Only Russia in its embargo, gives certain advantages to allied countries that are withheld from neutrals. All other belligerent countries place neutral countries, outside of Europe, on terms as favorable as are accorded to any foreign countries. There was for a time one exception in the British embargo. From May to August, 1915, the United Kingdom prohibited the exportation of coal to all countries except British possessions and the allies. Similarly in the case of import prohibitions, the position of the United States has been the same as that of the allies.

In actual practice, however, it is at least possible that the allied countries have enjoyed greater privileges than were accorded to the United States. Exceptions are granted in individual cases, both for exportation and for importation. Recently arrangements have been made whereby licenses for importation into France may be granted in London and licenses for importation into the United Kingdom may be granted in Paris. No blacklist has been published of firms in allied countries. It might naturally be argued, of course, that no blacklist is necessary in such cases, since the country itself has presumably taken action to prevent the commercial activity of enemy firms there resident.

Embargoes on exports.—In order of time the embargoes against exportation come first. The effect of these measures has been to render extremely difficult the purchase of many important raw materials. Such as have been obtained have frequently had to be purchased under guarantee not to export the finished product into which the raw material entered. Indirectly, therefore, the embargo in its actual operation may be deemed a practice that restricts the importation of non-injurious products of the United States into countries other than that laying the embargo. While the Revenue Act provides no special remedy to combat foreign embargoes, the embargo viewed as an indirect restriction on importation into a third country may justify the prohibition, or restriction of importation into the country laying the embargo. Moreover, since no embargo has been imposed by this country the European embargoes may be viewed as withholding from American citizens the facilities or privileges granted by the United States to citizens of the belligerent countries. In accordance with that view the President may withhold clearance from one or more vessels of the belligerent, or may refuse corresponding privileges to citizens of the belligerent country. Indirectly, therefore, under a broad construction of the law, it might be held that the President may impose an embargo to offset the European embargo. The failure of Congress explicitly to authorize the laying of embargoes might well lead to the adoption of a narrower construction of the second paragraph of Section 806 of the Revenue Act.

Import restrictions.—The import prohibitions of belligerent countries came much later. Originally the lists were confined to articles of luxury and were justified as a means of enforcing economy on citizens of the warring countries, and as a means of conserving cargo space. In Italy the list is still limited to articles that may be deemed luxuries. In France the list has been extended considerably beyond that point, and in the United Kingdom a much longer list is now in force. In spite of the special licenses for importation that have been granted, the prohibition has resulted in much loss to American exporters, especially in the case of goods for individual use, as distinct from Government purchases. At the same time, import prohibitions cut off only a single market for our output, while export prohibitions may affect the whole supply of the selected raw materials, and thus indirectly restrict the exportation of the whole output manufactured therefrom.

Trade with the enemy.—The British Orders in Council, by preventing trade between neutral countries and enemy countries, have proved to be the most serious restriction that has been applied to American commerce since the war began. Trade, both import and export, has been cut off between the United

States and the central powers. The restrictions imposed by the United Kingdom and other countries at war are in effect applied by the steamship companies. To carry cargo contrary to the regulations in force means stoppage, delay, and loss, and consequently the owners and officers of vessels observe strictly the commercial regulations of the belligerent countries.

For this reason the refusal of a vessel to accept noncontraband goods directly or indirectly for a port or city of Germany or Austria-Hungary, may be deemed undue discrimination on account of the laws, regulations, or practices of a belligerent Government, and as such, would justify the President, under the first paragraph of Section 806 of the Revenue Act, in detaining the vessel.

Preference given to shipments accompanied by a license from a belligerent over shipments without such license may similarly be deemed to fall under the same provision of law. At the same time, if preferred, the regulations may be deemed to constitute a restriction or prohibition of American products in countries other than those that impose a restriction, and as such, to authorize the President to prohibit or restrict the importation of any products of the countries prescribing the regulation in question.

Blacklisting.—The situation in respect to the blacklisting of specified American concerns, and concerns in neutral countries is much the same. It may be regarded (1) as a restriction of the importation of American products into certain countries; (2) as an undue discrimination on the part of vessels that refuse cargo shipped by or to a blacklisted concern; or (3) as a failure to extend to certain American citizens the same privilege that the United States accords to all citizens of the belligerent country. According to the first view, the restriction falls under Section 805 of the Revenue Act, and the President is authorized to prohibit or restrict the importation of any product from the country imposing the restriction; according to the second view, the restriction falls under Section 806, first paragraph, of the Revenue Act, and consequently the President may detain the vessel that refuses the freight offered; according to the third view, the restriction falls under Section 806, second paragraph; of the Revenue Act, and the President may withhold clearance from one or more vessels of the belligerent, or may refuse the Commercial privileges in the United States to some or all citizens of the belligerent country that issues any blacklist against American firms.

FEASIBLE MEASURES

Without question, the measures taken by the United Kingdom during the present war, have proved much more injurious to American commerce than the restrictions imposed by any other belligerent country. This is due in part to the comprehensive character of the restrictions imposed by the United Kingdom, and in part, to the enormous volume of trade between the United States and the United Kingdom in normal times. The control by the United Kingdom of the most important sea routes, and the preponderance of British shipping over the shipping of any other nationality combine to make the restrictions imposed by the United Kingdom effective, and injurious to American commerce. What steps, if any, can be taken under the Shipping Act and the Revenue Act to induce the United Kingdom to relax its requirements, and at the same time cause the least injury and friction to American business?

Three means of retaliation are provided in the two Acts: (1) Prohibition or restriction of imports, (2) refusal of clearance or positive detention of vessels, (3) withdrawal of privileges from vessels or citizens of the country imposing the restriction.

Restriction of imports.—The prohibition or restriction of imports is the most natural means provided for combating foreign import prohibition. It may equally well be used to combat the Orders in Council forbidding trade with enemy countries. Under a broad interpretation of the law, it may be used to combat foreign blacklists; and, under a still broader construction, foreign embargoes.

If import prohibitions or restrictions are imposed in the United States, the authority conferred upon the President by Section 805 of the Revenue Act is more elastic and better adapted to the purpose than the authority conferred by Section 804. All of the Acts complained of on the part of foreign countries have occurred during the European war and have been justified as war measures.

An import prohibition, to have the maximum effect, should cover articles produced largely by the country against which the prohibition is directed and at the same time procurable in sufficient quantities from other countries. Unless the country against which the prohibition is directed is a large producer of the article, the loss of a foreign market for it will not prove a severe injury. On the other hand, if the importing country has no alternative source from which to draw its supply, it may suffer from the prohibition more than the country against which the action is taken.

Under present conditions it is difficult if not impossible in many cases to find several sources of supply in adequate quantities for a given article. In the great majority of lines, therefore, a prohibition of imports by the United States as a retaliatory measure is likely to react more to the disadvantage of consumers, importers, and the trade generally in this country than to the detriment of exporters in the United Kingdom.

Such action would, moreover, without question be regarded as unfriendly, and might lead to retaliation—perhaps in the form of additional embargoes. The United Kingdom through its numerous possessions controls the source of supply of many important industrial materials. Any extension, or more rigid application of the British embargo is therefore to be averted.

Almost every article is imported to a greater or less extent from the United Kingdom. The products of the British Empire and of many foreign countries are reshipped from British ports to the United States. There are few distinctive products in comparison with our import trade with most other countries. Nineteen articles have been selected on account of the large proportion imported from the United Kingdom. Imports into the United States of these 19 articles from all countries represent 4 per cent of all imports for the fiscal year ending June 30, 1916; while the imports from the United Kingdom represent over 21 per cent of all imports from that country. The articles, with the values imported from all countries, and from the United Kingdom, during the fiscal year 1916 are as follows:

Articles	From all countries	From the United Kingdom
Cotton thread and yarn	$5,085,000	$5,056,000
Cotton cloth	8,846,000	7,394,000
Cotton laces	11,173,000	5,226,000
Cotton nets or nettings	2,113,000	2,064,000
Cotton plushes and other pile fabrics (except corduroys)	1,706,000	1,654,000
Earthen and crockery ware, decorated or ornamented	1,369,000	1,101,000
Ostrich feathers	2,195,000	678,000
Linens	11,256,000	10,850,000
Linoleum	513,000	487,000
Sausage casings	3,866,000	1,189,000
Mother of pearl	1,873,000	958,000
Artificial silk yarns and threads	2,924,000	1,293,000
Diamonds, uncut	11,443,000	10,676,000
Pearls, not strung or set	10,474 000	4,683,000
Malt liquors	1,457,000	1,308,000
Gin	750,000	603,000
Whisky	3,678,000	2,903,000
Woolen cloth	6,479,000	6,318,000
Woolen dress goods	1,806,000	1,663,000
Total, 19 articles	88,906,000	66,104,000
Total imports	2,197,884,000	308,443,000

This list might be extended almost at will. Taking it as it stands, however, four groups of items seem to call for particular consideration in connection with possible import prohibitions. These four groups are cotton manufacture; woolen manufacture; diamonds and pearls; and alcoholic liquors.

Among cotton manufacture, the three items most largely imported from the United Kingdom are cotton thread and yarn, cotton cloth, and cotton laces. Nettings and plushes are also imported, though to a smaller value than the items previously named. Our imports from the United Kingdom consist both of partly manufactured goods, such as the finer counts of yarns for weaving in this country, and of the more elaborate goods such as machine-made laces, nettings, plushes, and colored cloth. The only goods that may be considered strictly competitive are bleached and unbleached cloth, and even in these grades, it is understood that the imports from the United Kingdom consists in the main of finer fabrices than are produced in large quantities in the United States. That an import prohibition would encourage a larger domestic production of the finer grades for which we now depend chiefly on imports, goes without saying. To some extent this might prove a prominent advantage but only in the case of those lines in which the British and the American cost of production most closely approach. When it comes to those weaves that require a relatively large expenditure in wages, American mills can scarcely hope permanently to overcome the advantages of lower labor cost enjoyed by British mills. So far as the import prohibition encourages domestic makers to go into lines unsuited to our economic position, the permanent result would doubtless be a loss. Against the permanent gain that may be expected in certain lines must be offset the very considerable disarrangement of trade and consequent loss to American importers and consumers.

In the case of woolen goods, the situation is similar, with this exception—nearly all the raw cotton used in our cotton mills is American grown, while our woolen mills depend largely for their raw materials on foreign sources. The effect of any import prohibition against woolen cloth and woolen dress goods would undoubtedly be a stimulus to the woolen mills located in this country. The encouragement to them might result in a lasting gain to American mills and a lasting injury to British export trade. It must be realized, however, that protection to woolen factories over a long period has not resulted in establishing domestic industries capable of supplying all demands of this country. The decisive objection to an import prohibition on woolens is the fact of our dependence on British raw wool. Any restriction placed upon the importation of British woolen goods into this country would undoubtedly result in the rigid application of the British embargo against the exportation of raw wool to the United States. This might prevent American manufacturers from replacing by their own products, the finer grades of woolen cloth now imported from England, since the raw materials needed for the manufacture of such fabrics is obtained mainly from the British Empire. To cut off from our factôries, Australian and New Zealand wool would undoubtedly prove more hurtful than the suspension of British competition in cloth and dress goods would be helpful.

The prohibition against diamonds and pearls might cause some inconvenience and dissatisfaction, but no real hardship to consumers in this country. The natural effect of cutting off additional supplies would be an enhancement in price. Diamonds imported from the United Kingdom are mostly uncut while those imported from the Netherlands are received already cut. To some extent, therefore, a prohibition against the United Kingdom might tend to discourage diamond cutting in the United States. The difficulty of enforcing the prohibition against an article so small in bulk and so large in value is almost insuperable.

Malt liquors are largely imported from England and Ireland, gin is largely imported from England, and whisky is largely imported from Scotland, with a considerable amount also from Ireland. A prohibition of all alcoholic beverages from the United Kingdom might be approved not merely as a reprisal on account of British restrictions but also as a step toward reducing the consumption of liquor in the United States. It is likely, however, that the imported spirits would be replaced by larger quantities produced in the United States: if so, the measure might be favored by distillers and brewers in this country. Such an encouragement would probably prove merely temporary, since the foreign beverages are called for on account of differences in flavor and quality rather than cheaper prices.

As has been pointed out, a prohibition against the importation of woolens from the United Kingdom would doubtless result in cutting off supplies of British wool to the serious loss of manufacturers in this country. The prohibition against cotton manufacturers would not be open to this objection, but the injury it might cause to British exporters would probably be only temporary, except in a few lines in which American mills are now competing with British mills on terms almost of equality. The prohibition against diamonds and pearls and against alcoholic beverages is likely to cause much less injury to consumers in this country than the prohibition against cotton or woolen manufacture. Such measures might be advocated as indicative of our national resentment against British restrictions but it could scarcely be expected that any loss so inflicted on British trade would bring about the removal of the objectionable restrictions. As long as the war lasts British statesmen may be expected to subordinate commercial gains to military advantage. In the long run any reprisals taken by the United States that do not accomplish their purpose are likely to injure our prestige. In view of the probability of a vast modification of commercial relations after the war the maintenance of our prestige as a commercial nation is of prime importance.

If it be decided, as suggested in the foregoing argument, that it is undesirable to place an import prohibition against British merchandise, the question may be raised whether the prohibition of the importation of gold from the United Kingdom is advisable. The belligerent countries are in imperative need of goods from the United States. Those goods must be paid for by commodities, by securities, by loans or other instruments of credit, or by specie. It may be argued that, if the importation of gold is cut off, the belligerent must import less American goods, or ship more commodities in exchange, or sell more securities on our market, or obtain by loans or otherwise, larger credits in this country. The pressing need of supplies would probably render a contraction of imports from the United States more hurtful to the importing country than to the United States. The exports from the United Kingdom are now probably as large as the present industrial capacity of the country permits. There would remain then as the most feasible means to offset the prohibition against the importation of gold either the sale of securities on our market or the contraction of further loans, probably at higher rates of interest. The impossibility of enforcing a prohibition against gold, as pointed out in the next paragraph, is a decisive objection to such a measure.

So long as import restrictions are limited to countries that restrict, contrary to international law, the movement of American products into foreign countries, it will be difficult, if not impossible, to make any import prohibition fully effective. Even if the existing legal provisions are construed so as to authorize the prohibition of the indirect importation, through a neutral country, of the proscribed products of a belligerent country, the enforcement of the prohibition in all cases would be impossible. Proofs of origin would be necessary for all imports of such articles, and in spite of that requirement, some goods covered by the prohibition would probably be admitted into this country. Shipping charges and ease of identification differ vastly according to the nature of the article selected. The extra cost of shipping cottons or woolens by way of a third country might prove a sufficient deterrent, but in the case of gold, and still more in the case of diamonds, trans-shipment would entail comparatively little expense. British woolens and British spirits could generally be recognized, even if imported from another country; but gold can be readily exchanged and cannot be identified, and its prohibition could not be made effective, unless applied to all countries.

Detention of vessels.—The detention of vessels is the second means of reprisal sanctioned by the Shipping Act and the Revenue Act. As a means of correcting restrictive measures of belligerents this method seems most appropriate in the case of the Orders of Council, although it may be also applied probably as a method of retaliation against the blacklisting of American firms.

Against the use of this weapon it may be urged that the result would be to tie up a large volume of shipping of which our commerce is in dire need. If the British Orders in Council and the British blacklist are treated as a discrimination against the United States, or as a failure to accord reciprocal treatment, one or more vessels of British nationality may be detained by the refusal of clearance. Or any vessel refusing cargo because of these British regulations may be detained, no matter what its nationality. The last measure would simply cause the enforcement of the regulations to be placed in the hands of British naval officers instead of the officers of merchant vessels. Vessels refuse cargo merely to enjoy free and unhindered passage. If, by our laws, the vessels were compelled to accept such cargo, search and seizure of vessels by the British navy would be more frequent. The goods would not, however, reach their intended destinations unless convoyed by an American naval vessel with imminent risk of armed conflict.

Probably the most effective remedy would be to refuse clearance to vessels carrying war supplies until the Orders in Council and the blacklist are withdrawn. This would seem to be strictly within the authority granted to the President by the Revenue Act, Section 806, Par. 2, "To withhold clearance from one or more vessels of such belligerent country." In effect, however, this would be to lay an American embargo, and Congress failed to authorize expressly the laying of an embargo. Moreover, it may be doubted whether an embargo on arms and ammunition would be as successful now, as a year or more ago. More factories in the United Kingdom have been converted into munition plants. While our exports of arms and ammunition have been continuously on the increase, their need is now probably less pressing. In some cases, it is understood, American concerns have taken up this work only after a contract was given for a sufficiently long period to justify the necessary alterations or enlargement of the establishment. As a result, the embargo might prove in some cases more injurious to American manufacturers than to the countries at war, and might, in practice, effect the cancellation of a contract more highly regarded by the American concern than by the British Government.

If, instead of placing a virtual embargo on munitions, one be placed on wheat, it would. without question, prove highly inconvenient, if not distinctly harmful to the United Kingdom. One advantage of the wheat embargo is that it might be justified by economic conditions within our own country. Faced by a great shortage in our wheat crop as compared with the last few years, and with an abnormal export demand, the United States is confronted by the danger of a rise in price to a famine level. To offset similar dangers the belligerent nations have resorted to the embargo, and they could scarcely deem it an unfriendly act if the United States followed their example. On the other hand, the measure would arouse the strongest antagonism on the part of the vast number of wheat growers in this country. They would argue that it would be grossly unfair .by legal action to depress the price of wheat below that which would result from the unrestricted operation of economic causes, and would scarcely admit the force of the counter-argument that the embargo would merely remove the excessive demand from the nations at war.

It is very doubtful whether, under existing law, an embargo could be made really effective. Clearance might be refused to belligerent vessels but not to neutral vessels unless there was proof of actual discrimination between different shippers or different classes of freight. Moreover, the practical difficulty of enforcing the embargo is as great as the legal difficulty. If direct shipment to a belligerent was made difficult or impossible, the shipments might be made indirectly through a neutral country, and it would be difficult to justify an embargo against neutral countries or to require, in the face of shipments to such countries, a guarantee that the wheat or the munitions would be retained there.

Withdrawal of privileges.—The third remedy provided by the recent laws is the withdrawal of reciprocal privileges from vessels or citizens of a country that impose restrictions upon American vessels or American citizens. This remedy is most appropriate against the black list, although it might also be directed against the British embargo.

It should be repeated that there is no discrimination as such against American vessels, nor as such against American citizens. American vessels are treated like those of British nationality; if they are suspected of carrying enemy goods or unlicensed goods subject to an embargo, or goods belonging to persons on the black list, they are stopped and searched, and if found to carry an objectionable cargo may be ordered into a British port or coaling or other privileges may be withheld. Against most other countries, as well as the United States, there is an official black list or an official white list; and British citizens and other residents of the British Empire are even more strictly enjoined against trading with the enemy.

Coaling privileges in the United States might be withheld from one or more vessels. Trading privileges might be refused to certain British firms. The privileges of British subjects resident in the United States might be curtailed. Any of these steps, however, might be deemed an infraction of our commercial treaties, just as we deemed the action of the British authorities an infraction of our treaties, and without the excuse of being war measures. And any such step is likely to lead to a further withdrawal of privileges from American citizens.

The case of the United Kingdom has been considered in detail on account of its importance. Other belligerent countries have taken action that affected adversely our commercial interests. Many of these countries are more open to reprisals than is the United Kingdom. To take action against any of them, however, without similar measures against the United Kingdom would be unjustifiable.

CONCLUSIONS

Measures authorized by existing law.—Various possible measures have been pointed out. None of them, however, seem to promise any likelihood of success in the withdrawal of restrictions on American trade and would probably jeopardize our present position. In the belligerent countries, war for the moment is supreme; commercial considerations take a subordinate place. We can attack their commerce but our own commerce will unavoidably suffer in consequence even more than it has suffered from the restrictions placed on it by the countries at war. There is little likelihood by these means of obtaining the withdrawal of the objectionable regulations. Counter reprisals would be almost inevitable. The warring nations have not hesitated to place embargoes on their exports, thus suffering commercial loss for military gain.

And they would probably not hesitate to enforce more strictly existive embargoes, besides extending the present embargo list, in retaliation for any commercial restrictions that we might impose. At present, rubber, wool, jute, tin, plumbago, and certain other raw products essential to our industries are under export prohibition in Great Britain and in the various colonies and self governing dominions which are the principle sources of supply. Shipment of these articles have been continuously imported into the United States from British countries, however, under special agreements between the British Government and associations of leading importers of the various products. It is obvious that by a termination of these agreements, Great Britain could paralyze many of our industries.

We have suffered the effect of embargoes and Orders in Council for a long period—under protest but without retaliation. The restrictions are no more hurtful now than a year and a half ago. But the weapon then in our hands—an embargo on war munitions and supplies—has become dulled.

The most effective measure at our disposal is still a virtual embargo of arms and ammunition. It might still be applied if fully authorized by the Revenue Act, Section 806, 2nd paragraph, and if, upon investigation, it promises to be effective. To determine the first condition an authoritative legal opinion is necessary; to determine the second condition a report from a competent military authority should be had. A virtual embargo on wheat, though open to serious objections, comes second in point of availability.

Before any action is taken, however, one other point must be carefully weighed. For success in commerce after the war we need the friendship of the belligerents if it can be obtained and held without undue sacrifice. Is not their good will then likely to be worth more to us than the present temporary restrictions have cost us?

Conference of neutral nations.—If it should be decided to take no direct action under the provisions of the Shipping Act and the Revenue Act, one other step might well receive consideration. An international congress of neutral powers might be called to discuss means of terminating or ameliorating the commercial restrictions imposed during the present war. Concerted action would cause less hard feeling than would the action of a single country. There would be time and opportunity for a full discussion of the restrictions, their effect, and the most appropriate means to insure their abrogation. An embargo by one neutral country might be nullified by exportation first to a neutral country and reshipment thence to the belligerent against which the embargo was laid; to be effective an embargo must be observed or at least recognized by all neutral countries. While the United States is commercially the most powerful country now at peace, its action would be strengthened if it had the moral and legal support of other nations affected by the restrictive measures.

Since the Allies have recently held at Paris a conference to discuss commercial policy after the return of peace, a conference of neutrals could scarcely be viewed as unfriendly by any of the belligerents. It might be well to extend the scope of the conference to include a discussion of appropriate means to insure the "open door" policy in Europe. The calling of a conference would not bind this country to any definite course until after the recommendations of the conference were ratified.

Against the conference two objections might be raised: (1) The delay before positive retaliatory measures could be enforced; (2) the close commercial and political relations between some of the neutral countries and some of the belligerents.

It must also be recognized that the call for a conference is likely to be criticised by opponents of the administration as an evidence of reliance upon moral suasion instead of force.

Some months' delay is inevitable. But if no measures so far authorized are considered feasible, delay at least until the next session of Congress is certain in any case, and the time could be well spent in a study of actual conditions by all the powers that would participate in the conference.

Some of the neutral powers might, on account of their close relations with the belligerents, hesitate to send representatives to the conference. Actual refusal to participate, however, seems unlikely, at least by those countries most affected by the existing regulations. It is more likely that the nations most closely affiliated with the belligerents would attend, in order to counsel moderation. Any conservative argument may well prove salutary to offset any unduly radical proposals that may be made.

Summary.

The general conclusions reached by this survey are:

(1) That immediate reprisals as authorized by recent laws afford no assurance of success, and threaten even the present basis of neutral commerce.

(2) That an international conference of neutral powers might be desirable to discuss the effect of trade restrictions imposed by belligerents and the best means of obtaining their relaxation, and also to consider the general question of international tariff relations after the conclusion of the war.

File no. 763.72/2931½

EMBASSY OF THE UNITED STATES OF AMERICA,
Constantinople, September 15, 1916.

Strictly personal and private.

Honorable ROBERT LANSING,
Secretary of State, Washington.

DEAR MR. SECRETARY: I arrived here September 11th and on my way spent several days in Berlin and had an opportunity of estimating the sentiments and feelings of people there because I had been to Berlin several times before and know a number of people; being familiar with the language and knowing the people they talk with me more freely than they would publicly.

First: Food. As you probably know there are two no meat days in Germany, and bread, meat, eggs, sugar, coffee, soap, et cetera, are distributed upon cards as are also articles of clothing. Coffee, sugar and milk are very difficult to obtain. The coffee is very poor; a substitute for it that is used consists of roasted bread and some kinds of beans. The absence of this is very much felt. There is no real milk to be had, only skimmed milk. The Government allows one egg per person per week, one-eight pound of meat per person per week; a similar allowance of skimmed milk; practically no sugar and a very small quantity of butter per person per week. Potatoes and bread such as it is are fairly plentiful and while filling, the people find them absolutely unsatisfying. The middle classes and the poor people talk of nothing but food and when they speak frankly as they did to me in their homes they said that they were always hungry. When talking publicly these same people will say how plentifully they are fed and indeed how much healthier they now are because they eat so much less meat. Statistics which were given to me by some of the bank and government officials apparently show that food supplies after the gathering of this harvest will be sufficient. It is claimed that this harvest is a very abundant one and more than thirty per cent. larger than the harvest of last year. I learned, however, from unofficial sources that while the harvest is in excess of that of last year, that the harvest of 1915 was far below the average and that this year's harvest is still below the average yield. You know what statistics are and anyhow the mass of the people do not believe that there is going to be any great improvement in food supplies; in fact, it is unofficially rumored that after October first there will be three no meat days and that there will be no milk at all except for children and invalids.

I was also told unofficially that there was a great increase in tuberculosis cases because of the lack of sufficient proper food. Although the open-air restaurants are full of people who at first sight seem to be not only well but happy, yet it needs but little close inspection to see the marked depression underlying all. Almost all of the faces are pale and denote bad or insufficient food and the great loss of bulk in the men and women is noticeable. This is claimed to be a sign of increased or improved health and it may be so.

These conditions to which I have thus briefly referred and which struck me forcibly because of the great contrast between the situation now as I saw it and when I was in Berlin a few years ago cannot be underestimated. From my interviews and conversations with numerous people it already appears to have sapped the courage and the nerve of the people. It seems that the rich, especially those with country estates, do not suffer as much as the medium class and the poor, as apparently, also, there is some favoritism.

Second. Peace. Along with the universal talk of food the subject of importance discussed is peace. When they talk frankly with you the people say they want peace at almost any price or on any terms. While they will not say it openly they seem to think the end is going to be very disastrous especially since the entry of Roumania into the war. There is of course the conflict between the military element and the business element. A leading business man, whose brother is a well known merchant and an American citizen of high standing in America, told me that the universal sentiment of the business men in Germany was for immediate peace on any terms which would preserve a part if not the whole of Germany's self-respect.

Third. Feeling about America. There is still a great dislike of America and Americans which is based on three grounds: First, supplying ammunition to the Allies; second, the stopping of the submarine warfare and three, permitting England to interfere with the neutral mails, et cetera. But despite all this they all look to President Wilson as the only commanding figure in the world who will be able to bring about peace. Mr. Gerard told me, and it is rumored and talked about among the people that because of the dissatisfaction with the present administration in Germany that the present Chancellor will be succeeded by von Tirpitz or Falkenhaeyn. Von Tirpitz is still demanding the resumption of submarine warfare and in case of his selection it would mean the resumption of that kind of warfare. One official said in my presence that one submarine saw forty one English or French ships carrying ammunition crossing the English channel and that because each one of these ships had hired a few Americans to travel on them for safety's sake, the submarines did not dare to interfere. Mr. Gerard told me that he believed that Germany was so disappointed about the war and conditions that they would replace von Bethman-Hollweg by von Tirpitz or some one like him and begin a new submarine warfare. But two or three business men told me, with strict injunctions as to secrecy, that this was all bluff and that the business men and general public would not submit to any such proposition; that they were fast being ruined and did not propose to allow the military to ruin them entirely as they had substantially ruined the country itself. The newspapers unfriendly to the President contained statements when I was in Berlin unwillingly admitting that his election now seemed certain because of his magnificent work in settling the railroad strike and because of his other works of public importance.

* * * * * * *

Very sincerely yours,

[s] Abram I. Elkus.

Exhibit No. 2542

State Dept. Doc.
Confidential file 763.72/2992.

Embassy of the United States of America,
Berlin, *October 16, 1916.*

No. 4322
Strictly confidential.

The Honorable The Secretary of State,
Washington.

Sir: Supplementary to the telegrams bearing on the political situation in Germany, which I am regularly transmitting to Washington in accordance with the directions contained in the Department's telegram no. 3456 of October 5, 1916, I have the honor to communicate to the Department below a résumé of the political developments which have occurred in this country during the last three weeks, with particular reference to the question of a possible resumption of indiscriminate submarine warfare on merchant vessels in violation of neutral rights on the high seas.

The submarine question had appeared to be in abeyance and matters between the United States and Germany on a temporarily quiet footing when, on September 29th, came the unexpected anti-American outburst in the press, based on the report of the death of the American aviator Rockwell in the service of France. The Foreign Office had for a long time been able to suppress all articles in the press tending to inflame public opinion against the United States and it appears that this outburst was forced past the Foreign Office censor by the military representative at the daily press conference, who gave out the material regarding Rockwell and the French corps of American aviators and permitted it to be published before the Foreign Office could interfere. As full advantage was taken of the item as a basis for scathing comment on the neutrality of the United States, it seems probable that the whole incident was a carefully timed political move on the part of the adversaries of the Chancellor in order to stir up public opinion against the United States and thus to weaken the Chancellor in dealing with the submarine issue in the coming deliberations of the Reichstag. There is no doubt that the Chancellor and the Foreign Office were greatly perturbed over the incident and that they took immediate steps to suppress all further comment in the press. I am aware that the Chancellor referred the matter to the Emperor himself.

At about the same time we received information from various sources that the Admiralty Staff were hastening their preparations for a resumption of the indiscriminate submarine warfare, as they hoped and apparently expected that the political situation would develop in a way to permit them to carry out their plans in this direction. This information, together with reports of a pessimistic nature from many sources regarding the increasing strength of the Chancellor's opponents in the Reichstag and of the champions of the reckless submarine warfare, led me to send my confidential telegram no. 4412 of October 1st. On September 29th and 30th well informed persons here were of the opinion that a grave political crisis was impending.

The situation did not however develop as was expected by the Admiralty. After the Chancellor's opening speech in the Reichstag on September 28th, twelve days were spent by the Budget Committee of the Reichstag in secret session for the purpose of considering foreign affairs and it was during these sessions that the Chancellor succeeded in coming at least to a temporary agreement with the leaders of the various political parties. On such information as I was able to obtain regarding the general trend of these deliberations I based my confidential telegrams to the Department Nos. 4417, of October 2nd, 4433 of October 5th, 4436 of October 6th, 4442 of October 7th, 4439 of October 7th, 4450 of October 9th, and 4478 of October 14th.

The meetings of this committee were strictly secret, members of the Reichstag not belonging to the committee being excluded. The principal witnesses before the committee were the Chancellor (von Bethmann Hollweg), the Secretary of State for the Navy von Capelle) and the Secretary of State for Foreign Affairs (von Jagow). The principal topic of discussion was the submarine issue and whether to take up the submarine warfare in its extreme form, thereby involving neutrals in the war, or not. The opponents of such action, I may add, are the Chancellor, supported by the Emperor, Helfferich (Minister of the Interior), von Hindenburg (Chief of the General Staff), the Foreign Office and what appears to be a majority in the Reichstag, including the Socialists, the People's progressive Party, a few of the National Liberals, and most of the Center Party. Its advocates are the Navy in its entirety, including of course von Tirpitz, the former Secretary of State for the Navy, a probably large percentage of the Army, the Conservatives, including the Free Conservatives, and most of the National Liberal Party, in the Reichstag, and above all the majority of public opinion, which has been carefully educated by the press to regard the indiscriminate submarine warfare as a sure means of causing England's defeat.

At certain phases of the discussions the leaders of the various parties in the Reichstag were called before the Budget Committee and allowed to state the views of their respective parties in regard to the matter.

One of the strongest speeches in support of the Chancellor appears to have been made by Helfferich, who elaborated the importance of avoiding a break with the United States, first on account of the necessity of retaining American financial cooperation after the war, second on account of the effective closing of the frontiers of the neutral countries contiguous to Germany which would result from the combined pressure of England and the United States thus putting an end to the importation of supplies which still enter Germany in certain quantities across those frontiers. Helfferich's speech, in fact, may be regarded as the turning point of the political crisis, as indicated in my telegram No. 4417 of October 2nd.

During these secret discussions it was announced in the press that a confidential memorandum written by the Admiralty Staff and submitted to the Chancellor on the subject of the economic effects of an indiscriminate submarine warfare on England's commerce had been distributed surreptitiously to the political leaders, in order to influence them in demanding by resolution in the Reichstag that the submarine war be adopted. An official statement was later published to the effect that this memorandum was simply a work on England's political economy as affected by submarine warfare, sent by the Admiralty to the Chancellor in February last marked "confidential, not for publication" and described as a purely economic memorandum prepared for the use of the Admiralty.

It is of course not generally known what arguments were used by the Chancellor in the secret sessions of the Budget Committee to keep them from voting to open the discussion in the REICHSTAG with a view to calling on the Government for a renewal of the extreme form of submarine warfare. It is however rumored that he was able to hold out some hope that peace might be arranged if Germany did not go forward with this policy at the present time and that it was on this basis that the party leaders agreed to let the matter drop for the present moment.

At any rate the Committee voted 24 to 4 against a general discussion of the submarine issue in the Reichstag and, when the open session came, what had promised to be a debate of great acrimony, with the possible result of a vote of lack of confidence in the Chancellor, was reduced to a few mild speeches by the leaders of the Conservative and of the Socialist Labor parties, that is the extreme right and the extreme left, who had refused to accede to the resolution of the Budget Committee and spoke on the submarine issue, but without effect. Westarp, the leader of the Conservatives, said that while his party regarded a resumption of the indiscriminate submarine warfare as absolutely necessary, he would refrain, in the public interest from stating their reasons therefor. The general sentiment of the Reichstag was that the decision should be left in the hands of the highest military authorities, namely the Emperor and von Hindenburg.

It is now generally felt that confidence in the Government has been largely restored as a result of the proceedings in the Reichstag and that, as I predicted in my telegram No. 4439 of October 7th, the political atmosphere has for the moment been cleared.

The Navy as a whole is convinced that the submarine warfare must be taken up again and pushed to its extreme form in order to save the situation, and it is reported that a round-robin letter, signed by all the officers of the Navy, has been addressed to the Emperor calling upon him to adopt this method of warfare in order that the war may be won. Admiral Scheer, who, since the battle off the Skagerrak, has been the dominating personality on the active list of the Navy, supports the "rucksichtslos" war, as does von Tirpitz, who in his retirement is said to have more influence on the minds of the naval officers than anybody else in Germany. Admiral Scheer is reported to have twice petitioned the Emperor for the taking up of the active submarine warfare against commerce in its extreme form. In his second letter on this subject I am reliably informed that he wrote the following:

"It is true that if operations to be inaugurated take a favorable turn, the enemy may be considerably injured, yet there cannot be the slightest doubt that even the most fortunate result of a high-sea battle cannot force England in this war to peace; the disadvantages of our military-geographic situation as compared with that of the island Power and the great material superiority of the enemy will not allow us to overcome the blockade directed against us or to overcome England itself; even if the U-boats are all available for military purposes. A victorious ending within a foreseen time can only be achieved by destroying the English economic life, i. e. by using the German U-boat against the English commerce.

"I am constrained according to my conviction and duty to counsel your Majesty against employing any weaker method, not only because it does not correspond to the character of the weapon and the risk to the U-boats, which is in no proportion to the gain to be achieved, but because in spite of the great conscientiousness on the part of the captains of the U-boats it is not possible for them to avoid incidents in English waters, in which waters American interests are active, incidents which are liable to humiliate us and would force us to recede, if we cannot hold through to the fullest extent . . ."

It is as yet impossible to predict what will be the result of this letter and the petition of the officers, but they should be given careful consideration from the point of view of the effect which they may have on the Emperor and in connection with my various telegraphic reports indicating that the Chancellor's present strength depends largely upon the support which he is receiving from the Emperor in his attitude towards the submarine issue.

Although it is evident that the Navy would gladly break loose from the restrictions imposed upon it by the Government, it nevertheless appears, from all available sources of information here, that the U-53, which has been operating off the Atlantic coast of the United States, has so far adhered to the instructions of the Government based on the assurances given us last spring that the submarine warfare would be conducted in accordance with international law and the rights of neutrals on the high seas. I am informed that Commander Rose, of the U-53, is regarded as one of the most reliable officers in the German Navy and that no anxiety is felt as to his exceeding his instructions in any respect. Whether his operations in American waters have already run counter to the assurances given us by the German Government, the Embassy is not as yet in a position to know. The German press has simply announced that nine merchant vessels have been sunk off the coast of the United States.

A statement which appeared in the *Nordeutsche Allgemeine Zeitung*, the semi-official organ of the German Government, on October 12th, while not labelled official, has all the earmarks of emanating from the Admiralty Staff. It is as follows:

"In the press of our enemies different statements and assertions have been made with regard to the German submarine war on the coast of the United States which must be contradicted.

"The English radio-telegraphic service of Poldhu reported under date of October 10th that "U 53" had "torpedoed six ships and in several cases sunk them."

"We are informed from authoritative sources that the trade war off the coast of the United States is carried on in accordance with the German Prize Rules which provide that a merchant ship may be stopped and searched, and, after the crew and passengers have been saved, the ships may under certain conditions be sunk. These conditions are, for instance, if the steamer belongs to an enemy, or if it is a neutral steamer carrying contraband of war, the military situation being such as to exclude the possibility of bringing the ship in as a prize. In no case are merchant ships sunk by a torpedo shot without warning.

"Reuter further reports from Washington that the American authorities fear the coming of complicated questions of neutrality if submarines operate so close to the American coast that it resembles a blockade.

"To this end it must be replied that the German naval forces have the right to carry on the cruiser war anywhere upon the open sea, if the waters of neutral sovereignty are scrupulously respected. This is not a question of a blockade as only enemy ships or neutral ships with contraband of war on board are held up, whereas the declaration of a blockade would include the seizure of all ships steering towards the blockaded coast or leaving it, irrespective of flag or cargo.

"The question of the American "Journal of Commerce" 'Is our coast to be the base for German submarines?' is also superfluous in view of the fact that when the "U-53" ran in to Newport she did not make use of her right as a warship to take on fuel supply or provisions. That secret supply stations for German submarines could be established on the coast of the United States, no American citizen with sound sense could believe.

"In strong contrast to these complaints stands the fact that since the beginning of the war English cruisers have been standing guard before American ports, New York for instance, which approach the coast so closely that they may be seen with the naked eye from the roofs of high buildings."

As far as can be made out, then, there was about ten days ago a belief in the Admiralty Staff that the political situation was such that the resumption of the "rucksichtslos" submarine warfare against commerce would be permitted them. The political leaders, however, failed to carry this point against the opposition of the Chancellor and, in fact, receded for the present from their position and gave the Chancellor support in his milder policy. The Navy, therefore, postponed any plans it may have had for taking up an extreme form of submarine warfare and are waiting until the Government is forced to their views, which are that the only way of winning the war is to strike with all their force against the English economic life by way of an extreme form of submarine warfare, i. e. by sinking everything that approaches the English and French coasts.

Whether the issue has been laid in abeyance indefinitely or whether it has been postponed merely for a certain period, say until after the Presidential elections in the United States, or longer, it is as yet impossible to ascertain. Only the Government and the political leaders who took part in the deliberations in the secret sessions of the Budget Committee of the Reichstag know. I wish, however, to repeat what I have endeavored to indicate in my various confidential telegrams to the Department, that while the political outlook is *for the present moment* reassuring, there is no permanent security to be looked for in the situation, in view of the attitude of the Navy, the Conservative Party and its allies in the Reichstag, and the majority of public opinion, and that our Government should therefore be fully prepared for an eventual resumption of the indiscriminate submarine warfare against commerce in violation of the rights of neutrals on the high-seas.

I may add that I have kept the Department informed of the trend of public opinion as expressed in the various party organs of the press in my telegrams Nos. 4413, 4416, 4420, 4424, 4430, 4434, 4443, 4449, 4453, 4459, 4466, 4474, 4477, and 4480, of October 2, 3, 4, 5, 6, 7, 9, 10, 11, 12, 13, 14, and 16 respectively.

The proceedings in the two important open sittings of the Reichstag were reported in my telegrams Nos. 4401 and 4471, of September 28 and October 12, respectively.

I have the honor to be, Sir,
Your obedient servant,

[s] I. C. GERARD,
Chargé d'Affaires ad Interim

The Ambassador in France (Sharp) to the Secretary of State

[Telegram]

PARIS, *January 10, 1917, 8 p. m.*
[*Received January 11, 8.20 a. m.*]

1806. My 1805. Translation of French note as follows:

The Allied Governments have received the note which was delivered to them in the name of the Government of the United States on the 19th of December, 1916. They have studied it with the care imposed upon them both by the exact realization which they have of the gravity of the hour and by the sincere friendship which attaches them to the American people.

In general way they wish to declare that they pay tribute to the elevation of the sentiment with which the American note is inspired and that they associate themselves with all their hopes with the project for the creation of a league of nations to insure peace and justice throughout the world. They recognize all the advantages for the cause of humanity and civilization, which the institution of international agreements, destined to avoid violent conflicts between nations, would present; agreements which must imply the sanctions necessary to insure their execution and thus to prevent an apparent security from only facilitating new aggressions. But a discussion of future arrangements destined to insure an enduring peace presupposes a satisfactory settlement of the actual conflict; the Allies have as profound a desire as the Government of the United States to terminate as soon as possible a war for which the Central Empires are responsible and which inflicts such cruel sufferings upon humanity. But they believe that it is impossible at the present moment to attain a peace which will assure them reparation, restitution, and such guaranties to which they are entitled by the aggression for which the responsibility rests with the Central Powers and of which the principle itself tended to ruin the security of Europe; a peace which would on the other hand permit the establishment of the future of European nations on a solid basis. The Allied nations are conscious that they are not fighting for selfish interests, but above all to safeguard the independence of peoples, of right, and of humanity.

The Allies are fully aware of the losses and suffering which the war causes to neutrals as well as to belligerents and they deplore them; but they do not hold themselves responsible for them, having in no way either willed or provoked this war, and they strive to reduce these damages in the measure compatible with the inexorable exigencies of their defense against the violence and the wiles of the enemy.

It is with satisfaction therefore that they take note of the declaration that the American communication is in no wise associated in its origin with that of the Central Powers transmitted on the 18th of December by the Government of the United States. They did not doubt moreover the resolution of that Government to avoid even the appearance of a support, even moral, of the authors responsible for the war.

The Allied Governments believe that they must protest in the most friendly but in the most specific manner against the assimilation established in the American note between the two groups of belligerents; this assimilation, based upon public declarations by the Central powers, is in direct opposition to the evidence, both as regards responsibility for the past and as concerns guaranties for the future; President Wilson in mentioning it certainly had no intention of associating himself with it.

If there is an historical fact established at the present date, it is the wilful aggression of Germany and Austria-Hungary to insure their hegemony over Europe and their economic domination over the world. Germany proved by her declaration of war, by the immediate violation of Belgium and Luxemburg, and by her manner of conducting the war, her simulating contempt for all principles of humanity and all respect for small states; as the conflict developed the attitude of the Central powers and their allies has been a continual defiance of humanity and civilization. Is it necessary to recall the horrors which accompanied the invasion of Belgium and of Serbia, the atrocious regime imposed upon the invaded countries, the massacre of hundreds of thousands of inoffensive Armenians, the barbarities perpetrated against the populations of Syria, the raids of Zeppelins on open towns, the destruction by submarines of passenger steamers and of merchantmen even under neutral flags, the cruel treatment inflicted upon prisoners of war, the juridical murders of Miss Cavell, of Captain Fryatt, the deportation and the reduction to slavery of civil populations, etc.? The execution of such a series of crimes perpetrated without any regard for universal reprobation fully explains to President Wilson the protest of the Allies.

They consider that the note which they sent to the United States in reply to the German note will be a response to the questions put by the American Government, and according to the exact words of the latter, constitute "a public declaration as to the conditions upon which the war could be terminated."

President Wilson desires more: he desires that the belligerent powers openly affirm the objects which they seek by continuing the war; the Allies experience no difficulty in replying to this request. Their objects in the war are well known; they have been formulated on many occasions by the chiefs of their divers governments. Their objects in the war will not be made known in detail with all the equitable compensations and indemnities for damages suffered until the hour of negotiations. But the civilized world knows that they imply in all necessity and in the first instance the restoration of Belgium, of Serbia, and of Montenegro, and the indemnities which are due them; the evacuation of the invaded territories of France, of Russia, and of Roumania with just reparation; the reorganization of Europe, guaranteed by a stable regime and founded as much upon respect of nationalities and full security and liberty, economic development, which all nations, great or small, possess, as upon territorial conventions and international agreements suitable to guarantee territorial and maritime frontiers against unjustified attacks; the restitution of provinces or territories wrested in the past from the Allies by force or against the will of their populations, the liberation of Italians, of Slavs, of Roumanians and of Czecho-Slovaks from foreign domination; the enfranchisement of populations subject to the bloody tyranny of the Turks; the expulsion from Europe of the Ottoman Empire decidedly (foreign) to western civilization. The intentions of His Majesty the Emperor of Russia regarding Poland have been clearly indicated in the proclamation which he has just addressed to his armies. It goes without saying that if the Allies wish to liberate Europe from the brutal covetousness of Prussian militarism, it never has been their design, as has been alleged, to encompass the extermination of the German peoples and their political disappearance. That which they desire above all is to insure a peace upon the principles of liberty and justice, upon the inviolable fidelity to international obligation with which the Government of the United States has never ceased to be inspired.

United in the pursuits of this supreme object the Allies are determined, individually and collectively, to act with all their power and to consent to all sacrifices to bring to a victorious close a conflict upon which they are convinced not only their own safety and prosperity depend but also the future of civilization itself.

Copy of Belgian note as follows:

The Government of the King, which has associated itself with the answer handed by the President of the French Council to the American Ambassador on behalf of all, is particularly desirous of paying tribute to the sentiment of humanity which prompted the President of the United States to send his note to the belligerent powers and it highly esteems the friendship expressed for Belgium through his kindly intermediation. It desires as much as Mr. Woodrow Wilson to see the present war ended as early as possible.

But the President seems to believe that the statesmen of the two opposing camps pursue the same objects of war. The example of Belgium unfortunately demonstrates that this is in nowise the fact. Belgium has never, like the Central powers, aimed at conquests. The barbarous fashion in which the German Government has treated, and is still treating, the Belgian nation, does not permit the supposition that Germany will preoccupy herself with guaranteeing in the future the rights of the weak nations which she has not ceased to trample under foot since the war, let loose by her, began to desolate Europe. On the other hand, the Government of the King has noted with pleasure and with confidence the assurances that the United States is impatient to cooperate in the measures which will be taken after the conclusion of peace, to protect and guarantee the small nations against violence and oppression.

Previous to the German ultimatum, Belgium only aspired to live upon good terms with all her neighbors; she practiced with scrupulous loyalty towards each one of them the duties imposed by her neutrality. In the same manner she has been rewarded by Germany for the confidence she placed in her, through which, from one day to the other, without any plausible reason, her neutrality was violated; and the Chancellor of the Empire when announcing to the Reichstag this violation of right and of treaties, was obliged to recognize the iniquity of such an act and predetermine that it would be repaired. But the Germans, after the occupation of Belgian territory, have displayed no better observance of the rules of international law or the stipulations of the Hague convention. They have, by taxation, as heavy as it is arbitrary, drained the resources of the country; they have intentionally ruined its industries, destroyed whole cities; put to death and imprisoned a considerable number of inhabitants. Even now, while they are loudly proclaiming their desire to put an end to the horrors of war, they increase the rigors of the occupation by deporting into servitude Belgian workers by the thousands.

If there is a country which has the right to say that it has taken up arms to defend its existence, it is assuredly Belgium. Compelled to fight or to submit to shame, she passionately desires that an end be brought to the unprecedented sufferings of her population. But she could only accept a peace which would assure her, as well as equitable reparation, security and guaranties for the future.

The American people, since the beginning of the war, has manifested for the oppressed Belgian nation its most ardent sympathy. It is an American committee, the Commission for Relief in Belgium, which, in close union with the Government of the King and the national committee, displays an untiring devotion and marvelous activity in revictualing Belgium. The Government of the King is happy to avail itself of this opportunity to express its profound gratitude to the Commission for Relief as well as to the generous Americans eager to relieve the misery of the Belgian population. Finally, nowhere more than in the United States have the abductions and deportations of Belgian civilians provoked such a spontaneous movement of protestation and indignant reproof.

These facts, entirely to the honor of the American nation, allow the Government of the King to entertain the legitimate hope that at the time of the definitive settlement of this long war, the voice of the Entente powers will find in the United States a unanimous echo to claim in favor of the Belgian nation, innocent victim of German ambition and covetousness, the rank and the place which its irreproachable past, the valor of its soldiers, its fidelity to honor, and its remarkable faculties for work assign to it among the civilized nations.

[Telegram received. Special Green]

BERLIN VIA COPENHAGEN
Dated January 31, 1917.
Rec'd February 1, 7:55 P. M.

SECRETARY OF STATE,
Washington.

4961. January 31, one p. m. Confidential. Giving more details of my conversation with Zimmermann last night.

He said that he and I must work hard now to keep peace between Germany and America. I said yes but it was rather late and apparently a sudden decision. He said yes, that it had been much discussed in the last two weeks and that that was the reason for his constant trips to Great Headquarters but that now even the Chancellor had come around; that the military and naval people had forced this and said that America could do nothing; that the Foreign Office had warned them and done what it could and was on record against this step. But he said it was their last chance as Germany could not hold out a year on the food question but that what finally decided them was the nasty answer to Wilson of the Allies showing that it is impossible to make peace. That he realized that it was a very serious step and would probably bring the whole world into the war but that Germany had this weapon and must use it no matter what the consequences were.

End Conversation.

There is no doubt but that Germany believes that Americans are a fat, rich race without sense of honor and ready to stand for anything in order to keep out of war and Americans in Germany have encouraged them in this belief. The Germans think and newspapers have published that the President's peace moves are inspired by fear only. Please do not give out my conversation with Zimmermann which was confidential. I think the reasons for the hasty decision, First, the desire to torpedo ships carrying grain from Argentina; Second, food situation here; Third, threatened great Allied offensive; Fourth, public demanding use of submarine weapon and contempt and hate for America. I expect note tonight.

GERARD.

(Private and confidential)

(In ink: File DAS–HS 2/17/34)

The Honorable ROBERT LANSING,
Secretary of State, Washington.

MY DEAR MR. SECRETARY: Night before last I was called on by a gentleman who had received from the Vatican a very interesting memorandum in regard to the views of the latter on the Allies' note to the President in reply to his note of December 18th, although more specifically it related to Mr. Balfour's note of explanation and endorsement of the Allies' note. The substance of this memorandum I sent you in a confidential telegram 3149 yesterday morning and I am writing you this so that you may show it to the President. I gave the substance of the memorandum in my telegram, but there were one or two interesting things mentioned by the gentleman in question which were not in the written memorandum. This memorandum was first written out and given him, but the next morning he was recalled and was given permission to copy the memorandum, but had to leave the original, as indeed he had been told he must do, when it was first handed to him. He was told that Poincare when Minister in 1912 promised Russia, in consideration of her support in France, that she should have Constantinople and the Straits, and that after Poincare was elected President, he confirmed this promise in writing. Also, that when in the autumn of 1914 the conference of the Allies took place in London at the time, I think it was, when England secured the promise from the Allies that no one would make a separate peace but that all would stand together to the end, Russia presented Poincare's written engagement,—that she should have Constantinople and the Straits,—and England had to yield to secure her engagement not to make a separate peace.

I have read in the press in the last few days that the Vatican got the Spanish Ambassador in Washington to call on the President and assure him of the Vatican's entire sympathy with his recent move to ascertain the terms of the Allies in the hope of leading eventually to peace, yet at the same time the press here has been commenting constantly on the Pope's entire abstention from any reference to the President's step in the allocation which the former made here the day before Christmas and his failure in such a discourse to refer to the President has been generally accepted as evidence that he did not approve of the President's step. On the side many have drawn the inference therefrom that the Pope is working with Spain to be, if possible, selected as the arbiter when the peace conference shall assemble, but in any event to be recognized and have a seat in that conference. I have given you the information which has come to me, not because I do not appreciate the futility of the curiously antiquated sort of intriguing diplomacy which it exemplifies, but because I think it shows very clearly that the Vatican is working with all its power for Austria. The contention set forth in the memorandum which came to me and which I telegraphed you is undoubtedly true; the handing over to Russia of all the provinces therein listed with the cession of Constantinople and the Dardanelles will undoubtedly give her tremendous, if not overwhelming, power in Europe and make her very strong in the Orient. The whole tone of this memorandum, however, is against England and, incidentally, her allies, who accede to this program, it was said, indeed, in the memorandum that England does not dare to present the true program which she has in mind to Europe and therefore has violently protested against the cruelty of the Turks against the Armenians, et cetera.

The gentleman told me that the Vatican keeps, he believes, absolutely informed of every move that is made in the whole field of present diplomacy and he believes that the Vatican knows just what terms Germany and Austria would be willing to make peace on. I am sure that the Vatican used certain influences during the last electoral campaign in America, on account of the President's attitude with regard to Mexico, to withdraw from the President the support of representatives of the church in America.

The newspapers here are filled all the time with stories of the troubled conditions existing in Germany and Austria. Thoughtful men, however, who are not swayed by prejudice think that Germany can hardly be starved out, but the very general impression is that Austria is in a very bad way indeed. I myself, remembering the days of my childhood in the South, am skeptical as to the people's being forced to yield because of the scarcity of even the necessaries of life.

I have written the foregoing to you, not only for yourself, but thinking this the most confidential way to have it reach the President.

Believe me, my dear Mr. Secretary, always,

Faithfully yours,

[sgd] THOS. NELSON PAGE

AMERICAN EMBASSY
Rome, January 22, 1917.

The PRESIDENT,
The White House, Washington

MY DEAR MR. PRESIDENT: I have written a letter to the Secretary Mr. Lansing by this pouch which it may interest you to see and I will not repeat anything that I said in that letter.

The unknown quantity in the present problem, here at least, seems to be Russia. No one here appears to know just what is going on there. The Russians themselves say that Russia is getting ready for a great move and that she will be able to save Roumania; that the change will take place very soon, et cetera. They also declare that Russia is absolutely determined to carry the war through to complete victory. I am sensible myself that there at least seems to be, not only considerable ignorance here among the representatives of the other Allies as to what Russia is doing or can do; but also some anxiety on this point. According to what we read and hear here, the Russian cabinet appears to be in a constant state of change, or "crisis", as they say here. Ministers succeed Ministers with startling rapidity, without any one here knowing precisely why. One thing, however, appears reasonably certain, that Russia has recently been on the verge of making some sort of separate accommodation, if not actually a separate peace, and the whole matter of the Dardanelles and Constantinople has come out in consequence of this fact. As my telegram of yesterday stated, Russia seems to be in a fair way of getting from the other Allies a hand sufficiently free to give her a very preponderant position as regards, not only Eastern and Southeastern Europe; but even the Orient itself. I draw from this the conclusion that it was necessary to make large concessions to Russia, either to secure her continued co-operation or to make it appear worth while to her to face the conditions in which she finds herself and to put forth extraordinary efforts.

There seems a general impression here that Germany may be in a bad way, economically, but that Austria is certainly in an exceedingly bad way. I incline to the opinion that the Memorandum to which I have referred in my letter to Mr. Lansing, was brought to my attention because of the untoward condition in which Austria-Hungary is at present and the apprehension that Russia may become absolutely preponderant in Southeastern Europe.

As you will have heard, the recent Conference here of the Prime Ministers of the Allies, excepting that of Russia,—with their leading military representatives, besides deciding on an answer to your Note, decided also to create a mobile army the size of which is set at anywhere from three-quarters of a million to a million men, composed of forces of all the Allies to be used wherever occasion demands. In pursuance of this, considerable numbers of French troops have been coming into Italy,—whether for use in the Balkans or for use in Italy along her northern battle front, I have not so far been able to ascertain. Some say one thing, some another. It was, however, in consequence of this proposed mobile army, no less perhaps than in consequence of the alleged increase of German Austrian forces along the Swiss northern and western frontier, that Switzerland the other day decided to mobilize the greater part of her troops. The press here, as in the other Allied countries, makes the claim that this mobilization is entirely against Germany and Austria, while I see the latter say it is against the Allies. I think it may be said with certainty that it is not against the Allies solely that Switzerland has mobilized. I know that the Swiss Government made representations to the Allies that the step was not taken with any hostile intent against them. It was taken to protect Switzerland's neutrality from aggression on either side. This is the real fact and I understand that Switzerland now feels pretty well assured that neither side in the great combat will undertake to do that which will fling the whole weight of her force, which although small by modern reckoning, is pretty compact,—against them.

I learn from the best authority here that Switzerland at present, although very short of supplies, has sufficient for her immediate needs. A short time ago there was a great discussion among the Allies as to whether Switzerland should be permitted to export anything to Germany, which she imported, and that England was for excluding her right to export anything whatever. She was obliged, however, to yield to the extent of permitting the exportation of what is called here "agrume", that is, fruits such as oranges, lemons, citron, etc. and possibly certain vegetables such as onions, inasmuch as Sicily and Southern Italy, where these fruits are the principal staple of production and export, absolutely demanded it, and Italy herself stated that it was necessary to make this concession.

Switzerland, as you know, has been a great producer of condensed milk, cheese, butter, etc. and I learn that there is great apprehension lest, owing to the inability to get a continuance of imports of winter feed for the cattle, they will have to be killed, in sufficient numbers at least to injure seriously this source of her supply.

I have been much troubled recently to find how far Italy has appeared to think it necessary to yield to what I cannot but think is a sort of dictatorship on the part of England with regard to certain very important necessaries of life here for which Italy is entirely dependent on importations, such as coal, grain, steel, etc. There is very apparent propaganda in progress and not a great deal that is American escapes the interference on the part of these British propagandists in one way or another, the general method being that which dates back to the earliest days of Rome, of whispers that these American representatives have Austrian connections and are really working not in Italy's interest.

I took the matter up informally with the Minister of Foreign Affairs. He, however, gave me to understand that, with regard to the particular articles as to which I approached him,—coal, grain, steel,—Italy had no choice. It was a matter of necessity for her to fix prices in order to secure a guarantee of the quantities of these staples necessary for her existence. My contention with him was that America could not compete if the prices were that at which they were fixed; but that if she were left to take her chance of finding a market, she would bring coal, etc. to Italy. The Minister said that this was a war measure, and was necessary for the reasons he gave me, as otherwise the war could not continue; but he said it would not be continued after the war.

The text of your address of this afternoon before the Senate arrived here in sufficient time to have it put in proper shape to deliver, according to instructions, this evening at the hour of its delivery in Washington, and I have made an appointment with the Minister of Foreign Affairs for that purpose. At the same time I am having today careful translation made from English into Italian, so that if necessary I may send it with the English text for publication in the press here.

Your Note of the 18th of December suffered very much I think from the somewhat inexact translation made here at the Foreign Office, and I attribute a part of the virulence of attack made on it here in the press, to this translation.

I do not, however, mean to attribute too large a part of this attack to this cause, for I feel sure that the cue came from the outside and I believe that it was given because there was a serious apprehension that the suggestion of Peace might weaken the power of the Allied countries.

The position that was allowed to be taken that you had declared the two sides to be of similar merit was so manifestly without foundation that I feel very well assured that no representative of any Government who read your note, really believed what the press declared.

I think it quite possible that at the very beginning some of them suspected that Germany had asked you to intervene in some way; but certainly they were soon disillusionized and I do not think that this view was ever entertained by Baron Bonnino. A certain amount of mischief has resulted from the efforts of certain American busy-bodies who have undertaken a sort of propaganda to create in the minds of representatives of the Allies as well as in the public mind, the impression that you and your administration speak rather for a fraction than for the whole of the American people. Even the complete reversal of their prophesy that you would not be re-elected, has not entirely failed to stop them and there is so much ignorance here as to America that their propaganda is at times really mischievous.

Immediately after your Note came out, I heard from one of the Ministeries here a reference to the impression which had been made by the impertinent activities of the man who in Paris is the sort of head and front of this propaganda and more recently the press has occasionally had a reference to the opinion of Americans of standing who are critical of the position which you have set forth in your note.

I cannot close this without expressing to you the enormous interest which your address before the Senate set for this afternoon has for me. It is a very high note which you have struck. I do not see how it could be higher. I shall await with breathless interest its effect. I do not mean its immediate reception; but its subsequent influence on the present world conflict and its consequences. Whether the world is ready for it or not remains to be seen. In any event, it is nearer to a declaration of the principle of right, based on the highest ethical foundation, than anything that I remember in any State paper, of which I have knowledge.

Believe me, my dear Mr. President, always with the greatest regard and the sincerest friendship, yours,

[sgd.] THOS. NELSON PAGE.

(Personal and confidential)

PETROGRAD, *Jan. 29/Feb. 11, 1917.*

Honorable ROBERT LANSING,
Secretary of State, Washington, D. C.

DEAR MR. SECRETARY: Yours of December 28th came to hand January 14/27 and I was pleased to hear that your health is not bad and that you do not contemplate resigning. I was also appreciative of your statement that you read my personal letters, and that they are not tiresome, but give you an insight into the local situation which is interesting if not valuable.

I don't know what time you will receive this letter, but it ought to get to Washington not later than April 1st, as the pouch containing it will be sent by Lydig, who will leave via Vladivostock next Tuesday evening on the Siberian Express and who tells me he expects to arrive in Washington about the last of March. It is possible I may make him a courier only to Vladivostock or to Peking, but that will depend upon what I determine is the most expeditious plan.

Since writing you last there have been several very important changes. My despatches advised of the delivery of the general peace note and also of the note of the President concerning peace; I also wrote a despatch giving the details of the delivery to the Foreign Office of the address of the President to the Senate, but don't know whether you have received the pouch in which it was sent.

The peace note of the President was not received by the Allies with unmixed approval. The criticisms were mainly based upon the statement or assertion that the statesmen of both sides of this contest claimed to be fighting for the same objects—the critics of the note were inclined to charge that such was the President's view also. In the address to the Senate, the "peace without victory" expression is what aroused opposition, which in some quarters was quite bitter. The peace note and the address to the Senate however were so completely overshadowed by the severing of our diplomatic relations with Germany that they are not discussed nearly so much if at all. I cabled you my opinion concerning the address to the Senate and either cabled the President direct or through you my feeling concerning the stand taken with Germany. I have not yet seen a word of the address of the President to the Congress on February 3rd, but have been much pleased to learn through the indefinite and unsatisfactory telegrams in the Russian papers that the stand taken has met with the enthusiastic approval and support of the American people. One telegram says that the Senate approved by a vote of 78 to 5; I have never seen that the House has taken any definite action.

I gave a statement to the newspapers concerning the breaking off of diplomatic relations with Germany immediately after the receipt of cable so informing me. It was necessary to do that in order to give the Russian people a clear understanding of what the United States had done, as otherwise they would have thought we had declared war, and if so there would have been a demonstration in front of the Embassy which I should have been compelled to address. I talked to great length to the representatives of the press all during Sunday Feb. 4th, and after the receipt of the cables sent for my information and giving the instructions that had been forwarded to our missions in neutral countries, I was compelled to submit to second talks of half an hour or more with each representative who had seen me before the receipt of the cable and to whom I had been compelled to say that I could make no statement whatever as I had received no official information that we had severed diplomatic relations with Germany. Each newspaper man insisted on the authenticity of the news and it was very difficult to explain why I could not confirm it and consequently could give no expression on the subject.

The Russians are very much pleased with the stand we have taken and are already beginning to treat us as Allies. The French are delighted also and according to telegraphic reports there have been demonstrations of an enthusiastic nature in Paris. I don't like the position of England or rather the

British Embassy here. Neither the British Ambassador nor the French nor the Italian has called nor have I met any one of them since Bernsdorf was given his passports—it seemed to me that it would not have been improper for those Ambassadors to call and express gratification at least that our diplomatic relations with the arch-enemy of their countries had been severed. The Belgian Minister deBuisseret did call and expressed himself as being much pleased with the stand we had taken. The Siamese Minister called yesterday and stated that his Government had instructed him to ascertain what reply the neutral countries had made or would make to the suggestions of President Wilson that they take similar action to ours. I told him that no official information had been received on the subject and that all I knew concerning it was what had appeared through the public prints. He told me he had called upon me first, but proposed to call upon the Ministers of the other neutral countries and that when he left the Embassay he would go to the Norweigan Legation; I requested him to phone me the result of his conference with Minister Prebensen, which he did later and informed me that the Scandinavian countries had come to no conclusion other than an agreement to confer and make a joint reply. Meantime I had telephoned to the Chinese Minister and called at his Legation where he informed me of the action taken by his government. He seemed very much pleased thereat and I was exceedingly also. I informed the Siamese Minister of the action taken by China and strongly urged him to recommend his Government to do likewise—he about promised to do so. You will observe from the editorial of the Novoe Vremya of today which I send by this pouch that the motives of China are impugned from the Russian viewpoint and that this semi-official organ of the Government states that it will be the policy of Russia to aid Japan in being the heir to the German possessions in the East. It seems to me that we should have some voice in that matter. I account for the luke-warmness if not the opposition of the British Embassy in this way; England fears that America by coming into the war will be too potential a factor in the negotiations for peace. It may be however that the phlegmatic nature of the Englishman has not yet realized what it means for America to sever diplomatic relations with Germany, especially if such step should be followed by a declaration of war, which under the circumstances seems to me to be inevitable. The Allies should bear in mind that their united efforts for two and a half years have been ineffective in bringing the Central Empires to terms. They should also bear in mind that during that period, while they had been weakened by the loss of millions of men and the incurring of billions of debt, America has grown stronger not only in wealth and man-power, but has learned more about making munitions of war than it had acquired during all the years of its existence. I must confess that I am not pleased with the attitude of our English Cousins. As I have written you more than once they dominate the situation in Russia. The French and the Italian Ambassadors almost hesitate to give the time of day without consulting the British Ambassador. British influence has permeated to such an extent Government circles that it brought about the appointment of Sazanov as Ambassador to St. James. Sazanov was removed from the Ministry of Foreign Affairs mainly because he was supposed to be much under British influence. There is no question about his being an able diplomat, nor is there any doubt about his being exceedingly friendly to the English. I have written you time and again how direct commerce with America is interferred with by British dictation and if I have not written you that the people and the commercial circles here both are becoming restive under that domination, I certainly meant to do so. I do recall however having written to either you or Polk that the Russians are saying that if they were going to have a commercial master, there is no reason why they should have changed from Germany especially when the change has entailed such a great cost. It is true that England is financing Russia and has the power to require an approval of how the money advanced should be expended, and it must also be admitted that in doing so England is exercising a right which any country or Government might be expected to exercise under the circumstances. England should not forget however that she is only able to finance Russia and the other Allies by the assistance she gets from the United States. That assistance however will no doubt cease now when there is a prospect of our having use for all of our money to prepare ourselves and it may be that a realization of a fear of such a situation, is the cause of England being so luke-warm in the face of the strong probability of our declaring war against Germany.

The internal situation has quieted down somewhat since my last letter to you on that subject. The note of the Emperor to the new Premier Golitzine advising cooperation between the Government and the law-making bodies of the Empire had a very good effect. There is a slumbering opposition however to the influences controlling the Emperor, and if it were not that Russia is engaged in a life-and-death struggle, it might assume more definite form, and in fact " show its teeth."

The Russian papers have contained several telegrams to the effect that there will be a Coalition Administration in Washington in the event we should engage in war. One telegram today stated that Elihu Root would be Secretary of State and Theodore Roosevelt Secretary of the Navy. Of course I gave the report no credence and trust I was right. I write by this pouch a gossipy letter to Polk which I shall tell him to show you. I wrote Polk some time ago asking him whether it was expected that Ambassadors would tender their resignations at the expiration of the Administration but had no reply. Of course I shall be pleased to tender mine if expected or if customary, but otherwise I shall not do so and am moved to that course not so much by the desire to remain here but by a conviction on my part that I can serve our country quite as well here as anyone else. This may seem conceited but if I felt otherwise I would be equally candid. My relations with the Government are very friendly as I have written you and my relations with my Colleagues in the diplomatic corps are likewise. Minister Pokrovski and his wife will occupy seats in my loge at the ballet this evening as will the Chinese Minister. About two weeks ago I entertained at a dinner the Ministers of Sweden, Norway, Denmark, Holland, Servia, China and Siam. I wrote about this last week but I fear that the pouch containing the letter will not be received for many weeks to come.

With sincere personal regards,
Yours truly,

[sgd] David R. Francis.

February 13th, 1917.

I am this day in receipt of notice from the Agent of the Norweigan steamers in Petrograd that service on that line has been resumed; consequently I send a copy of this letter in the pouch that goes by that route.

Last night there was a large banquet given at one of the principal restaurants of this city by the British Colony to the English members of the Allied Conference now in session here. Speeches were made by Rodzianko, President of the Duma; by an Ex Russian Minister of War and by a Russian Professor in Oxford University; also by Lord Milnor, a British General and a British Admiral. The main object of this banquet appears to have been to cement the relations between England and Russia. The British Ambassador, Sir George Buchanan spoke and proposed the health of Sazanov who has recently been appointed Russian Ambassador to St. James. Sazanov replied; the main subject of the speeches of both Buchanan and Sazanov was, in addition to mutual expressions of admiration, to felicitate Russia and England on the complete understanding now existing between those countries and to express the hope that the relations will become still closer. Each of these two speakers stated that the other was a potential if not the main influence in removing the misunderstanding so long existing betwen England and Russia.

It will require many banquets and other instrumentalities to remove the prejudice existing in Russia against British influence or British domination, which apears to become more distasteful from week to week to the commercial interests of Russia.

I have the honor to be, Sir,
Your obedient servant,

[sgd] David R. Francis.

State Dept. Doc.
711.612/248½

Petrograd, May 2, 1916.

The Honorable Robert Lansing,
Secretary of State, Washington, D. C.

My Dear Mr. Secretary: I cabled you Sunday of my arrival and of my taking charge on April 28, and of sending a note on the same day to the Foreign Office and of my conference with the Minister of Foreign Affairs and also with the President of The Council of Ministers. My conferences with both of these officials was set forth almost in detail in the cablegram; consequently I shall not tire your patience in a résumé further than to say that the statement of Mr. Sazonoff was so surprising and inexplicable to me that I have been endeavoring since the interview to ascertain the cause for this change of position or of policy on the part of Russia toward the United States in regard to a commercial treaty.

I wrote you at length twice on the steamer while enroute from New York to Christiania, and in both letters expressed my fear that certain interests in New York were making effort to have all trade between our country and Russia pay tribute to England as an intermediary. Since arriving here my fears have not been dissipated; in fact I have heard many things which confirm the suspicions I have cherished.

The economic conference between the Allies which is fixed for Paris June first was, in my judgment, inspired by England, as that country is making decided effort to occupy toward Russia the position held by Germany before the war. It is true that both Sazonoff and Steumer expressed themselves as favoring direct commercial relations between their country and ours, but the English influence here is very strong and a persistent effort is being made to strengthen it. The loan which was being negotiated in New York some eight weeks ago, but for some unaccountable reason has not been consummated, was alluded to by Sazonoff in my interview with him, and he expressed the opinion that it would be impossible for America to get what he called double security on any loan our banks might make to Russia. When I asked him what he meant by double security he said that our capitalists were demanding in addition to the obligation specific collateral. I told him that no country now engaged in war would be able to negotiate a loan in America without collateral and cited my experience and that of others with the Anglo-French loan which we were unable to sell at 98, as we endeavored to do; and in fact never since the expiration of the syndicate have we been able to dispose of those securities without loss. From 96¼ it declined to 93⅝, and when I left America was selling at 95. All of this I told Mr. Sazonoff, but he persisted in saying that Russia would make no loan that required any security other than the faith or credit of the government itself.

In talking with Mr. Meserve, a representative of the National City Bank, on Saturday he told me that Russia had agreed, or was about to agree early in March, to the requirements of New York bankers, but subsequently refused to do so, and the only way of accounting for the change in position was the influence of England which was desirous that all foreign relations of a commercial or financial character had by Russia should be through London.

In a talk with a gentleman today who has had a great deal of experience in Russia and is well known in the United States, the opinion was expressed that Bark, who is the Minister of Finance of Russia, is completely under British influence, and the same gentleman went so far as to state that in his judgment Sazonoff is held in the position of Minister of Foreign Affairs by British rather than by Russian support. If this is true, and I am not prepared to question it, we can account for Russia's change of front concerning the commercial treaty with the United States.

Mr. Sazonoff seemed to be prepared for my broaching the subject of a commercial treaty, because when I did so he very promptly stated that Russia would make no commercial treaty now with any country whatever. In addition to expressing sincere disappointment on the part of our government and our people generally, I made effort to impress upon Mr. Sazonoff that personally I so regretted his position that if not discouraged I was greatly chagrined because of the apparent impossibility of achieving what was my main object in accepting the Russian mission. Our interview was in good spirit on both sides, but there was no variation in his expression to the effect that nothing certainly would be considered until after the Paris conference.

* * * * * * *

The Embassy building is in very poor condition. I am sleeping in the Embassy and taking breakfast here, which is furnished by the wife of one of the messengers; my luncheon and dinner I get elsewhere. Of course I shall not keep up this manner of life because, regardless of my own pleasure and convenience it is not becoming to an American Ambassador. I shall not go to a hotel; the Astoria has been requisitioned by the government for the exclusive accommodation of army officers. The Hotel de l'Europe is full to overflowing, and there is no other hotel in the city which would comport with the dignity of an American ambassador. Mr. Dearing has written you concerning the needs of the Embassy and I have only to add thereto that if we would make headway with the people of this great country it is advisable, if not necessary, that our representative here should live in a manner that would not reflect upon our country by comparison with the representatives of other governments. I have met no official Russians other than those mentioned above, but I have met many Americans whose number seems to be increasing from week to week.

Mr. Pierce told me that he could not remain here longer than August; I made no reply thereto, but could not help feeling that I wished he had said June instead of August. He is carried on the roll of the Embassy as Chief Advisory Officer and has little to do. My predecessor did not give his name to the Master of Ceremonies as one of the suite, but on Dearing's recommendation I have concluded to add his name to that list. I may perhaps write you more definitely concerning Mr. Pierce within a few days.

Your cablegram of information sent via Tokio and also via London was received yesterday; I am preparing a resume of that information to send to the Foreign Office here for its information.

From the most recent dispatches we have had concerning the relations between the United States and Germany it appears that the Imperial Government is willing to make whatever concessions may be required in order to prevent a severence of diplomatic relations.

When in Stockholm I was met by several persons who came there from Germany to confer with me concerning the care of German and Austrian prisoners in Russia which, without exception, they presented as deplorable. We are organizing the inspection force and I shall be able to make more full report on this subject within a few days.

Respectfully yours,
[s] DAVID R. FRANCIS,
American Ambassador.

P. S.—As I have not yet been presented to the Emperor, all communications addressed to any branch of the Russian government must still be signed by the Charge d'Affaires.

D. R. F.

AMERICAN EMBASSY,
Rome, March 20th., 1917.

The Honorable, The SECRETARY OF STATE,
Washington.

MY DEAR MR. SECRETARY: Mrs. Heiberg, the wife of our late Military Attaché, Major Elvin R. Heiberg, is leaving Rome this evening with her two children, returning to Washington, and will be escorted by Mr. Roger C. Tredwell, our Consul here, who goes home on leave. Accordingly I avail myself of this opportunity to write you a confidential letter.

The internal situation here seems about the same as for some time past, except that through apprehension or through the actual sinking of merchant ships by German and Austrian submarines, the lines have been much more closely drawn of late in every way, and this has caused pressure enough to make itself felt in many new directions; for example, bread tickets have just begun to be issued here, the sale of sweets and articles which require sugar are forbidden from the first of next month; the consumption of meat is regulated etc.

All this has naturally an effect on the spirit and temper of the people at large. So far as appears on the surface, however, everything seems to be going along as smoothly as ever; the Government appears to have everything well in hand, and it is only from whispers caught here and there that one finds the existence of the feeling that lies underneath. I would say that the people at large, partly from necessity, but mainly I think because they are really hopeful of a favorable issue of the war, are willing to undergo any reasonable sacrifices to give the ruling authorities the opportunity to carry out their plans, and have steeled themselves to the sacrifices which may be entailed by the great struggle that is expected to take place now almost immediately.

The Government was, as I telegraphed you duly, sustained in the Chamber on Saturday evening by a vote of confidence of 369 to 43.

The fact still stands, however, that the majority is composed of elements held together rather by not knowing what better to do than by any desire to sustain this especial Government.

The situation in Russia and the situation in France are still involved in some mystery, and their effect on Italy will only be known hereafter. For one thing, unless the situation becomes too exigent, Italy will take much pride in being able to show the world that she has a more ordered policy and a more steadfast position than some of the other Allied countries. Baron Sonnino is undoubtedly the master spirit of the Government, and has strengthened himself greatly in the public esteem by his consistent and firm policy united with the moderation of his language as compared to that of some of the other Cabinet leaders.

I am struck by a certain influence which the memory and reputation of Cavour seem to have on the procedure here and indeed on the spirit in which matters are dealt with.

One of the serious elements in the present situation is the depreciation in the currency here. The exchange at present has risen to about 7.86 as against 5.18—the normal exchange. The press is full of discussion about this and all sorts of nostrums are proposed to rectify this trouble, with certain suggestions which certainly are sound if they could be adopted. Naturally these last are related to the fundamental principle of supply and demand.

One trouble is that the rise in exchange is felt throughout Italy in every class and in every direction, and the entire economic situation is affected by it, and unless relieved it may affect disastrously in time even the prosecution of the war.

Out of this situation has arisen apparently a strong desire on the part of those responsible for the future conduct of the Government to get into new relations which may aid in relieving the press existing through the other old relations, and I have had several important people interested in finance come to me to ask if some assistance could not be rendered from America in solving this serious problem. The suggestion made is that it might be found of mutual interest if Italian financiers might be brought into direct relations with American financial circles. Among those who have come to me is the head of the Bank of Italy, greatest of the Italian banks. I have told him to give me a memorandum of the whole situation, and when this is done I will be able to inform you as to what is wanted, and to learn whether what they want will probably interest America sufficiently to justify my reporting the same to you.

One result of the present situation is that Italy finds herself almost completely in the power of England, who has been mainly financing her, and who not unnaturally perhaps has taken measures which many Italians consider far more for England's interest, at least immediate interest, than for that of Italy. In fact, there is much grumbling over England's control of matters, of great, if not of vital, importance, to Italy. An examination of this was England's recent orders against the importation of articles from abroad, which include articles of Italian production whose exportation is of great importance to Italy. For example: fruits, wine, silk, carved stone, wood, etc.

England seems on the insistence of the Italian Government, which in turn was pressed by Sicily and Calabria who live by the sale of their fruits, to have bought up the fruit crop of Italy for distribution in France, where a part of it is as I understand to be resold, and a part given to the British soldiers. But the problem of silk and other articles still remains and causes great dissatisfaction here, and I understand in France also. In this connection it seems not out of place to mention a fact that was told me the other day by General Ricciotti Garibaldi.

He says that he was in London a few months back and attended a dinner at which a number of important persons were invited to meet him, and in the course of the conversation he asked how the Allies were going to pay their debts when the war was over. On this point, an Englishman whom he spoke of as a man of great importance and wealth, worth he said about forty million dollars, said: "Why, we will make America (The United States) pay for them". "How will you do this?" asked General Garibaldi. "Why", said the other, "England will at the close of the war control all of the markets of the world, and if necessary we will put an ad valorem tax of 100 per cent which will have the effect of making America pay the debts."

This is chiefly of interest to me as showing a point of view which undoubtedly is very extensively held. Happily, as I said to General Garibaldi, we are pretty good at building tariff walls ourselves if occasion demands.

I am, my dear Mr. Secretary, with kindest regards,

Yours very sincerely,

[s] THOS. NELSON PAGE.

The Ambassador in Great Britain (Page) to the Secretary of State

[Telegram]

American Embassy
London, August 5, 1914, 10 p.m.
(Received August 6, 6.30 a.m.)

278. The Foreign Office has just transmitted to me the following list of articles which the British Government have declared to be absolute and conditional contraband, respectively, during the present war:

(The following articles will be treated as absolute contraband:)

1. Arms of all kinds, including arms for sporting purposes, and their distinctive component parts.
2. Projectiles, charges, and cartridges of all kinds, and their distinctive component parts.
3. Powder and explosives specially prepared for use in war.
4. Gun mountings, limber boxes, limbers, military waggons, field forges, and their distinctive component parts.
5. Clothing and equipment of a distinctively military character.
6. All kinds of harness of a distinctively military character.
7. Saddle, draught, and pack animals suitable for use in war.
8. Articles of camp equipment and their distinctive component parts.
9. Armour plates.
10. Warships, including boats, and their distinctive component parts of such a nature that they can only be used on a vessel of war.
11. Aeroplanes, airships, balloons, and aircraft of all kinds, and their component parts, together with accessories and articles recognisable as intended for use in connection with balloons and aircraft.
12. Implements and apparatus designed exclusively for the manufacture of munitions of war, for the manufacture or repair of arms, or war material for use on land and sea.

The following articles will be treated as conditioned contraband:

1. Foodstuffs.
2. Forage and grain suitable for feeding animals.
3. Clothing, fabrics for clothing, and boots and shoes, suitable for use in war.
4. Gold and silver in coin or bullion; paper money.
5. Vehicles of all kinds available for use in war and their component parts.
6. Vessels, craft, and boats of all kinds; floating docks, parts of docks, and their component parts.
7. Railway material, both fixed and rolling stock, and materials for telegraphs, wireless telegraphs, and telephones.
8. Fuel; lubricants.
9. Powder and explosives not specially prepared for use in war.
10. Barbed wire, and implements for fixing and cutting the same.
11. Horseshoes and shoeing materials.
12. Harness and saddlery.
13. Field glasses, telescopes, chronometers, and all kinds of nautical instruments.

American Ambassador.

The Vice Consul at London (Reed) to the Secretary of State

London, *April 20, 1916.*
(Received May 9)

[Despatch not printed, as it merely quotes from and summarizes the enclosure]

[Enclosure]

List of Articles Declared to be Contraband of War Presented to Parliament

The articles declared to be contraband of war in the Proclamation now in force have been arranged alphabetically in the accompanying list. It is hoped that this will be convenient to all parties concerned.

The list comprises the articles which have been declared to be absolute contraband as well as those which have been declared to be conditional contraband. The circumstances of the present war are so peculiar that His Majesty's Government consider that for practical purposes the distinction between the two classes of contraband has ceased to have any value. So large a proportion of the inhabitants of the enemy country are taking part, directly or indirectly, in the war that no real distinction can now be drawn between the armed forces and the civilian population. Similarly, the enemy Government has taken control, by a series of decrees and orders, of practically all the articles in the list of conditional contraband, so that they are now available for Government use. So long as these exceptional conditions continue our belligerent rights with respect to the two kinds of contraband are the same, and our treatment of them must be identical.

FOREIGN OFFICE, *April 13, 1916.*

LIST OF ARTICLES

Acetic acid and acetates.
Acetic ether.
Acetones, and raw and finished materials, usable for their preparation.
Aircraft of all kinds, including aeroplanes, airships, balloons, and their component parts, together with accessories and articles suitable for use in connection with aircraft.
Aluminium, alumina, and salts of aluminium.
Ammonia liquor.
Ammonium salts.
Aniline and its derivatives.
Animals, saddle, draught, or pack, suitable, or which may become suitable, for use in war.
Antimony, together with the sulphides and oxides of antimony.
Apparatus designed exclusively for the manufacture of munitions of war, or for the manufacture or repair of arms or of war material for use on land or sea.
Armour plates.
Arms of all kinds, including arms for sporting purposes, and their component parts.
Arsenic and its compounds.
Arsenical ore.
Articles especially adapted for use in the manufacture or repair of tyres.
Asbestos.
Barbed wire.
Barium chlorate and perchlorate.
Bauxite.
Benzol and its mixtures and derivatives.
Bladders, guts, casings, and sausage skins.
Bones in any form, whole or crushed, and bone ash.
Boots and shoes suitable for use in war.
Borax, boric acid, and other boron compounds.
Bromine.
Calcium acetate, calcium nitrate, and calcium carbide.
Camp equipments, articles of, and their component parts.
Camphor.
Capsicum.
Carbon disulphide.
Carbon, halogen compounds of.
Carbonyl chloride.
Carborundum in all forms.
Casein.
Caustic potash and caustic soda.
Celluloid.
Charges and cartridges of all kinds and their component parts.
Chlorides, metallic (except chloride of sodium) and metalloidic.
Chlorine.
Chrome ore.
Chronometers.
Clothing and fabrics for clothing suitable for use in war.
Clothing of a distinctively military character.
Cobalt.
Copper pyrites and other copper ores.

Copper unwrought and part wrought, copper wire, alloys and compounds of copper.
Cork, including cork dust.
Corundum, natural and artificial (alundum), in all forms.
Cotton, raw, linters, cotton waste, cotton yarns, cotton piecegoods, and other cotton products capable of being used in the manufacture of explosives.
Cresol and its mixtures and derivatives.
Cyanamide.
Docks, parts of.
Emery in all forms.
Equipment of a distinctively military character.
Ethyl alcohol.
Explosives, whether specially prepared for use in war or not.
Ferro alloys, including ferro-tungsten, ferro-molybdenum, ferro-manganese, ferro-vanadium, and ferro-chrome.
Field forges and their component parts.
Field glasses.
Flax.
Floating docks and their component parts.
Foodstuffs.
Forage and feeding stuffs for animals.
Formic ether.
Fuel, other than mineral oils.
Fuming sulphuric acid.
Furs utilisable for clothing suitable for use in war.
Glycerine.
Gold.
Gun mountings and their component parts.
Hair, animal, of all kinds, and tops, noils, and yarns of animal hair.
Harness and saddlery.
Harness of a distinctly military character, all kinds of.
Hemp.
Hides of cattle, buffaloes, and horses.
Horseshoes and shoeing material.
Hydrochloric acid.
Implements designed exclusively for the manufacture of munitions of war, or for the manufacture or repair of arms or of war material for use on land or sea.
Implements for fixing and cutting barbed wire.
Iodine and its compounds.
Iron, electrolytic.
Iron, haematite and haematite iron ore.
Iron pyrites.
Kapok.
Lathes capable of being employed in the manufacture of munitions of war.
Lead and lead ore.
Leather belting, hydraulic leather, pump leather.
Leather, undressed or dressed, suitable for saddlery, harness, military boots, or military clothing.
Limbers and limber-boxes and their component parts.
Lubricants.
Machines capable of being employed in the manufacture of munitions of war.
Manganese and manganese ore.
Manganese dioxide.
Maps and plans of any place within the territory of any belligerent, or within the area of military operations, on a scale of 4 miles to 1 inch or any larger scale, and reproductions on any scale, by photography, or otherwise, of such maps or plans.
Materials especially adapted for use in the manufacture or repair of tyres.
Materials used in the manufacture of explosives.
Mercury.
Methyl alcohol.
Military waggons and their component parts.
Mineral oils, including benzine and motor spirit.
Molybdenum and molybdenite.
Motor vehicles of all kinds and their component parts and accessories.
Naphthalene and its mixtures and derivatives.
Nautical instruments, all kinds of.

Negotiable instruments.
Nickel and nickel ore.
Nitric acid and nitrates of all kinds.
Oils and fats, animal, fish, and vegetable, other than those capable of use as lubricants, and not including essential oils.
Oleaginous seeds, nuts, and kernels.
Oleum.
Paper money.
Paraffin wax.
Peppers.
Phenol (carbolic acid) and its mixtures and derivatives.
Phosphorus and its compounds.
Phosgene.
Potassium salts.
Powders, whether specially prepared for use in war or not.
Projectiles of all kinds and their component parts.
Prussiate of soda.
Railway materials, both fixed and rolling stock.
Ramie.
Rangefinders and their component parts.
Rattans.
Realisable securities.
Resinous products.
Rubber (including raw, waste, and reclaimed rubber, solutions and jellies containing rubber, or any other preparations containing rubber, balata, and guttapercha, and the following varieties of rubber, viz, Borneo, Guayule, Jelutong, Palembang, Pontianac, and all other substances containing caoutchouc), and goods made wholly or partly of rubber.
Sabadilla seeds and preparations therefrom.
Scheelite.
Searchlights and their component parts.
Selenium.
Silver.
Skins of calves, pigs, sheep, goats, and deer.
Skins utilisable for clothing suitable for use in war.
Soap.
Sodium.
Sodium chlorate and perchlorate.
Sodium cyanide.
Solvent naphtha and its mixtures and derivatives.
Starch.
Steel containing tungsten or molybdenum.
Submarine sound signalling apparatus.
Sulphur.
Sulphur dioxide.
Sulphuric acid.
Sulphuric ether.
Tanning substances of all kinds, including quebracho wood and extracts for use in tanning.
Telegraphs, materials for.
Telephones, materials for.
Telescopes.
Tin, chloride of tin, and tin-ore.
Toluol and its mixtures and derivatives.
Tools capable of being employed in the manufacture of munitions of war.
Tungsten.
Turpentine (oil and spirit).
Tyres for motor vehicles and for cycles.
Urea.
Vanadium.
Vegetable fibres and yarns made therefrom.
Vehicles of all kinds, other than motor vehicles, available for use in war, and their component parts.
Vessels, craft, and boats of all kinds.
Warships, including boats and their component parts of such a nature that they can only be used on a vessel of war.
Wireless telegraphs, materials for.
Wolframite.

Wood tar and wood tar oil.
Wool, raw, combed, or carded; wool waste; wool tops and noils; woollen or worsted yarns.
Xylol and its mixtures and derivatives.
Zinc ore.

File No. 763.72111/252

The German Ambassador (Bernstorff) to the Counselor for the Department of State

New York, *September 15, 1914.*
[*Received September 16.*]

My Dear Mr. Lansing: Although you told me, when I last had the pleasure of seeing you, that according to the neutrality laws of the United States nothing could be done in the following matter, I beg to draw your attention to the facts mentioned below:

Purchase of horses for the English Army: 31,000 in St. Paul, Minnesota; 12,000 in Chicago, Illinois; 5,000 in Cincinnati; 1,000 in Evansville, Indiana; 500 in Lexington, Kentucky.

Japan purchases field guns, ammunition, etc., through Mitsui and Company.

Winchester Arms Manufacturing Company, New Haven, has delivered 500,000 rifles to the London Armory since August 5.

Japan orders dynamite from the Hercules and the Giant Powder Company, all available quantities.

Russia purchases from powder trust (DuPont Company) 1,000 tons powder for cannon, 1,000 tons powder for rifles, shipment via San Francisco.

I know that I cannot make any complaint in this matter, but I only wished to draw your attention to it, because every cargo of arms and ammunition, etc., which is sent to Europe must necessarily prolong the war, and this does not seem to be the wish either of the American Government or the American people.

Yours very sincerely,

J. Bernstorff

P. S. I further hear that a French general and a French senator are staying at the Bethlehem Club, Bethlehem, Pennsylvania, where they are ordering arms, etc., at the Bethlehem Steel Works.

The Counselor for the Department of State to the German Ambassador (Bernstorff)

Department of State,
Washington, September 16, 1914.

My Dear Mr. Ambassador: I have received your informal note of the 15th instant calling my attention to the purchase of certain military supplies in this country by the belligerents now engaged in the European wars. I am glad to have this information, but, as I recently told you, there appears to be nothing that can be done to prevent traffic in contraband of war under the neutrality laws or the treaties of the United States so long as such traffic is limited to ordinary commercial transactions by citizens of the United States.

Robert Lansing.

Exhibit No. 2559

F. R. Supp. 1915, pp. 700–1
File No. 763.72111Em1/13

The Ambassador in Austria-Hungary (Penfield) to the Secretary of State

Vienna, *July 2, 1915.*
No. 608) [*Received July 20.*]

Sir: I have the honor to transmit herewith enclosed a copy and translation of a note dated June 29 from Baron Burian, the Austro-Hungarian Minister for

Foreign Affairs, relative to the shipment of arms and ammunition by citizens of the United States to Great Britain and her allies, and taking issue with the American Government as to its neutrality in permitting the continuance of this traffic in view of the proportions to which it has grown in view of the fact that Austria-Hungary and Germany are cut off from the American market. The full text of the note was today cabled you in cipher.

In view of the importance of the subject in hand and of the delay which would attend a transmission by pouch, I am venturing to bring to your attention by telegraph certain actions on the part of the Austro-Hungarian and German Governments which have come to my notice, which form precedents, and which, although no doubt already known to the Department, I feel it my duty to recall to your notice on this occasion. The Embassy has ventured, unofficially, to recall these facts to the Minister of Foreign Affairs and did not omit to mention the large number of so-called Mexican guns now in the hands of the Austro-Hungarian troops, the shipment of which to Mexico was prevented only by the outbreak of the present European War, and likewise that American manufacturers of war materials could transfer their plants to Canada with a facility equal to that evidenced by the removal of the Belgian arms plant from Herstal to Germany, and the still more recent removal of similar plants from the shores of the Adriatic provinces—from Monfalcone, Pola, and Fiume—to safer places within the Monarchy where they are now in operation.

It was further suggested that the proportion of arms and ammunition supplied to the Allies by American manufacturers was probably much exaggerated in the Austro-German mind; that no account seemed to be taken of the fact that France and England, with her colonies, were utilizing every available resource to this end; that American manufacturers realized that the production of articles of this kind was altogether of a temporary nature, and that one might be sure that their attention had not been distracted thereby from the rich fields for export in South America and Asia, which had formerly been supplied by Europe, but which must now look to the United States for supplies. It was reasonable to suppose that American business men had not lost sight of the future advantages of gaining control of those markets in the present circumstances, and that therefore the Nation can not be supposed to have given itself up to the production of war material to the degree to which Austro-German publicists seem to imagine; that, to the contrary, should the United States mobilize her manufactories on the lines at present followed in Great Britain, it is highly probable that enough ammunition could, within a short time, be produced to supply the wants of any of the belligerents.

(I have etc.)

FREDERIO C. PENFIELD

F. R. Supp. 1915, p. 791–3

[Enclosure—Translation]

The Austro-Hungarian Minister of Foreign Affairs (*Burian*) *to the American Ambassador* (*Penfield*)

VIENNA, *June 29, 1915.*

No. 59, 465/7)

The far-reaching effects which result from the fact that for a long time the traffic in munitions of war to the greatest extent has been carried on between the United States of America on the one hand and Great Britain and its allies on the other, while Austria-Hungary as well as Germany have been absolutely excluded from the American market, have from the very beginning attracted the most serious attention of the Imperial and Royal Government.

If now the undersigned permits himself to address himself to this question, with which the Washington Cabinet has been concerned until now only with the Imperial German Government, he follows the injunction of imperative duty to protect the interests intrusted to him from further serious damage which results from this situation as well to Austria-Hungary as to the German Empire.

Although the Imperial and Royal Government is absolutely convinced that the attitude of the Federal Government in this connection emanates from no other intention than to maintain the strictest neutrality and to conform to the letter of the provisions of international treaties, nevertheless, the question arises whether the conditions as they have developed during the course of the war, certainly independently of the will of the Federal Government, are not such as in effect thwart the intentions of the Washington Cabinet or even actually oppose them. In the affirmative case—and affirmation, in the opinion of the Imperial and Royal Government, can not be doubted—then immediately follows the further question whether it would not seem possible, even imperative, that appropriate measures be adopted toward bringing into full effect the desire of the Federal Government to maintain an attitude of strict parity with respect to both belligerent parties. The Imperial and Royal Government does not hesitate to answer also this question unqualifiedly in the affirmative.

It can not certainly have escaped the attention of the American Government, which has so eminently cooperated in the work of The Hague, that the meaning and essence of neutrality are in no way exhaustively dealt with in the fragmentary provisions of the pertinent treaties. If one takes into consideration particularly the genesis of Article 7 of the fifth and thirteenth conventions, respectively, upon which the Federal Government clearly relies in the present case, and the wording of which, as is in no way to be denied, affords it a formal pretext for the toleration of traffic in munitions of war now being carried on by the United States, it is only necessary, in order to measure the true spirit and import of this provision—which, moreover, appears to have been departed from in the prevention of the delivery of vessels of war and in the prevention of certain deliveries to vessels of war of belligerent nations—to point out the fact that the detailed privileges conceded to neutral states in the sense of the preamble to the above-mentioned convention are limited by the requirements of neutrality which conform to the universally recognized principles of international law.

According to all authorities on international law who concern themselves more particularly with the question now under consideration, a neutral government may not permit traffic in contraband of war to be carried on without hindrance when this traffic assumes such a form or such dimensions that the neutrality of the nation becomes involved thereby.

If any one of the various criteria which have been laid down in science in this respect be used as a basis in determining the permissibility of commerce in contraband, one reaches the conclusion from each of these criteria that the exportation of war requisites from the United States, as is being carried on in the present war, is not to be brought into accord with the demands of neutrality.

The question now before us is surely not whether American industries which are engaged in the manufacture of war material should be protected from loss in the export trade that was theirs in times of peace. Rather has that industry soared to unimagined heights. In order to turn out the huge quantities of arms, ammunition, and other war material of every description ordered in the past months by Great Britain and her allies from the United States, not only the full capacity of the existing plants, but also their transformation and enlargement and the creation of new large plants, as well as a flocking of workmen of all trades into that branch of industry, in brief, far-reaching changes of economic life encompassing the whole country, became necessary. From no quarter, then, can there come any question of the right of the American Government to prohibit, through the issuance of an embargo, that enormous exportation of war implements that is openly carried on and, besides, is commonly known to be availed of by only one of the parties to the war. If the Federal Government would exercise that power it possesses, it could not lay itself open to blame if, in order to keep within the requirements of the law of the land, it adopted the course of enacting a law. For while the principle obtains that a neutral state may not alter the rules in force within its province concerning its attitude toward belligerents while war is being waged, yet this principle, as clearly appears from the preamble to the thirteenth Hague convention, suffers an exception in the case "ou l'experience acquise en demontrerait la necessite pour la sauvegarde de ses droits" (where experience has shown the necessity thereof for the protection of its rights).

Moreover, this case is already established for the American Government through the fact that Austria-Hungary, as well as Germany is cut off from all commercial intercourse with the United States of America without the existence of a legal prerequisite therefor—a legally constituted blockade.

In reply to the possible objection that, notwithstanding the willingness of American industry to furnish merchandise to Austria-Hungary and Germany as well as to Great Britain and her allies, it is not possible for the United States of America to trade with Austria-Hungary and Germany as the result of the war situation, it may be pointed out that the Federal Government is undoubtedly in a position to improve the situation described. It would be amply sufficient to confront the opponents of Austria-Hungary and Germany with the possibility of the prohibition of the exportation of foodstuffs and raw materials in case legitimate commerce in these articles between the

Union and the two Central Powers should not be allowed. If the Washington Cabinet should find itself prepared for an action in this sense, it would not only be following the tradition always held in such high regard in the United States of contending for the freedom of legitimate maritime commerce, but would also earn the high merit of nullifying the wanton efforts of the enemies of Austria-Hungary and Germany to use hunger as an ally.

The Imperial and Royal Government may therefore, in the spirit of the excellent relations which have never ceased to exist between the Austro-Hungarian Monarchy and the United States of America, appeal to the Federal Government in sincere friendship, in view of the expositions here set forth, to subject its previously adopted standpoint in this so important question to a mature reconsideration. A revision of the attitude observed by the Government of the Union in the sense of the views advocated by the Imperial and Royal Government would, according to the convictions of the latter, be not only within the bounds of the rights and obligations of a neutral government, but also in close keeping with those principles dictated by true humanity and love of peace which the United States has ever written on its banner.

The undersigned has the honor to ask the good offices of his excellency, the ambassador extraordinary and plenipotentiary of the United States of America, Mr. Frederic Courtland Penfield, to convey the foregoing by telegram to the attention of the Washington Cabinet; he avails himself (etc.)

The Secretary of State to the Ambassador in Austria-Hungary (*Penfield*)

[Telegram]

WASHINGTON, *August 12, 1915.*

846. Your 751, July 1 and 759, July 5. Please present a note to the Royal Foreign Office in reply to its note of June 29, in the following sense:

The Government of the United States has given careful consideration to the statement of the Imperial and Royal Government in regard to the exportation of arms and ammunition from the United States to the countries at war with Austria-Hungary and Germany. The Government of the United States notes with satisfaction the recognition by the Imperial and Royal Government of the undoubted fact that its attitude with regard to the exportation of arms and ammunition from the United States is prompted by its intention to "maintain the strictest neutrality and to conform to the letter of the provisions of international treaties," but is surprised to find the Imperial and Royal Government implying that the observance of the strict principles of the law under the conditions which have developed in the present war is insufficient, and asserting that this Government should go beyond the long-recognized rules governing such traffic, by neutrals and adopt measures to "maintain an attitude of strict parity with respect to both belligerent parties."

To this assertion of an obligation to change or modify the rules of international usage on account of special conditions the Government of the United States can not accede. The recognition of an obligation of this sort, unknown to the international practice of the past, would impose upon every neutral nation a duty to sit in judgment on the progress of a war and to resrict its commercial intercourse with a belligerent whose naval successes prevented the neutral from trade with the enemy. The contention of the Imperial and Royal Government appears to be that the advantages gained to a belligerent by its superiority on the sea should be equalized by the neutral powers by the establishment of a system of non-intercourse with the victor. The Imperial and Royal Government confines its comments to arms and ammunition, but if the principle for which it contends is sound, it should apply with equal force to all articles of contraband. A belligerent controlling the high seas might possess an ample supply of arms and ammunition, but be in want of food and clothing. On the novel principle that equalization is a neutral duty, neutral nations would be obligated to place an embargo on such articles because one of the belligerents could not obtain them through commercial intercourse.

But if this principle, so strongly urged by the Imperial and Royal Government, should be admitted to obtain by reason of the superiority of a belligerent at sea, ought it not to operate equally as to a belligerent superior on land?

Applying this theory of equalization, a belligerent who lacks the necessary munitions to contend successfully on land ought to be permitted to purchase them from neutrals, while a belligerent with an abundance of war stores or with the power to produce them should be debarred from such traffic.

Manifestly the idea of strict neutrality now advanced by the Imperial and Royal Government would involve a neutral nation in a mass of perplexities which would obscure the whole field of international obligation, produce economic confusion, and deprive all commerce and industry of legitimate fields of enterprise, already heavily burdened by the unavoidable restrictions of war.

In this connection it is pertinent to direct the attention of the Imperial and Royal Government to the fact that Austria-Hungary and Germany, particularly the latter, have during the years preceding the present European war produced a great surplus of arms and ammunition, which they sold throughout the world and especially to belligerents. Never during that period did either of them suggest or apply the principle now advocated by the Imperial and Royal Government.

During the Boer war between Great Britain and the South African Republics the patrol of the coasts of neighboring neutral colonies by British naval vessels prevented arms and ammunitions reaching the Transvaal or the Orange Free State. The allied republics were in a situation almost identical in that respect with that in which Austria-Hungary and Germany find themselves at the present time. Yet, in spite of the commercial isolation of one belligerent, Germany sold to Great Britain, the other belligerent, hundreds of thousands of kilos of explosives, gunpowder, cartridges, shot, and weapons; and it is known that Austria-Hungary also sold similar munitions to the same purchaser, though in smaller quantities. While, as compared with the present war, the quantities sold were small (a table of the sales is appended), the principle of neutrality involved was the same. If at that time Austria-Hungary and her present ally had refused to sell arms and ammunition to Great Britain on the ground that to do so would violate the spirit of strict neutrality, the Imperial and Royal Government might with greater consistency and greater force urge its present contention.

It might be further pointed out that during the Crimean war large quantities of arms and military stores were furnished to Russia by Prussian manufacturers; that during the recent war between Turkey and Italy, as this Government is advised, arms and ammunition were furnished to the Ottoman Government by Germany; and that during the Balkan wars the belligerents were supplied with munitions by both Austria-Hungary and Germany. While these latter cases are not analogous, as is the case of the South African war, to the situation of Austria-Hungary and Germany in the present war, they nevertheless clearly indicate the long-established practice of the two Empires in the matter of trade in war supplies.

In view of the foregoing statements, this Government is reluctant to believe that the Imperial and Royal Government will ascribe to the United States a lack of impartial neutrality in continuing its legitimate trade in all kinds of supplies used to render the armed forces of a belligerent efficient, even though the circumstances of the present war prevent Austria-Hungary from obtaining such supplies from the markets of the United States, which have been and remain, so far as the action and policy of this Government are concerned, open to all belligerents alike.

But, in addition to the question of principle, there is a practical and substantial reason why the Government of the United States has from the foundation of the Republic to the present time advocated and practiced unrestricted trade in arms and military supplies. It has never been the policy of this country to maintain in time of peace a large military establishment of stores of arms and ammunition sufficient to repel invasion by a well-equipped and powerful enemy. It has desired to remain at peace with all nations and to avoid any appearance of menacing such peace by the threat of its armies and navies. In consequence of this standing policy the United States would, in the event of attack by a foreign power, be at the outset of the war seriously, if not fatally, embarrassed by the lack of arms and ammunition and by the means to produce them in sufficient quantities to supply the requirements of national defense. The United States has always depended upon the right and power to purchase arms and ammunition from neutral nations in case of foreign attack. This right, which it claims for itself, it can not deny to others.

A nation whose principle and policy it is to rely upon international obligations and international justice to preserve its political and territorial integrity, might become the prey of an aggressive nation whose policy and practice it is to increase its military strength during times of peace with the design of conquest, unless the nation attacked can, after war had been declared go into the markets of the world and purchase the means to defend itself against the aggressor.

The general adoption by the nations of the world of the theory that neutral powers ought to prohibit the sale of arms and ammunition to belligerents would compel every nation to have in readiness at all times sufficient munitions of war to meet any emergency which might arise and to erect and maintain establishments for the manufacture of arms and ammunition sufficient to supply the needs of its military and naval forces throughout the progress of a war. Manifestly the application of this theory would result in every nation becoming an armed camp, ready to resist aggression and tempted to employ force in asserting its rights rather than appeal to reason and justice for the settlement of international disputes.

Perceiving, as it does, that the adoption of the principle that it is the duty of a neutral to prohibit the sale of arms and ammunition to a belligerent during the progress of a war would inevitably give the advantage to the belligerent which had encouraged the manufacture of munitions in time of peace and which had laid in vast stores of arms and ammunition in anticipation of war, the Government of the United States is convinced that the adoption of the theory would force militarism on the world and work against that universal peace which is the desire and purpose of all nations which exalt justice and righteousness in their relations with one another.

The Government of the United States in the foregoing discussion of the practical reason why it has advocated and practiced trade in munitions of war, wishes to be understood as speaking with no thought of expressing or implying any judgment with regard to the circumstances of the present war, but as merely putting very frankly the argument in this matter which has been conclusive in determining the policy of the United States.

While the practice of nations, so well illustrated by the practice of Austria-Hungary and Germany during the South African war, and the manifest evil which would result from a change of that practice render compliance with the suggestions of the Imperial and Royal Government out of the question, certain assertions appearing in the Austro-Hungarian statement as grounds for its contentions can not be passed over without comment. These assertions are substantially as follows:

(1) That the exportation of arms and ammunition from the United States to belligerents contravenes, the preamble of the Hague Convention No. XIII of 1907;

(2) That it is inconsistent with the refusal of this Government to allow delivery of supplies to vessels of war on the high seas;

(3) That, "according to all authorities on international law who concern themselves more properly with the question," exportation should be prevented "when this traffic assumes such a form or such dimensions that the neutrality of a nation becomes involved thereby."

As to the assertion that the exportation of arms and ammunition contravenes the preamble of the Hague Convention No. XIII of 1907, this Government presumes that reference is made to the last paragraph of the preamble, which is as follows: "Seeing that, in this category of ideas, these rules should not, in principle, be altered, in the course of the war, by a neutral power, except in a case where experience has shown the necessity for such change for the protection of the rights of that power."

Manifestly the only ground to change the rules laid down by the convention, one of which, it should be noted, explicitly declares that a neutral is not bound to prohibit the exportation of contraband of war, is the necessity of a neutral power to do so in order to protect its own rights. The right and duty to determine when this necessity exists rests with the neutral, not with a belligerent. It is discretionary, not mandatory. If a neutral power does not avail itself of the right, a belligerent is not privileged to complain, for in doing so it would be in the position of declaring to the neutral power what is necessary to protect that power's own rights. The Imperial and Royal Government can not but perceive that a complaint of this nature would invite just rebuke.

With reference to the asserted inconsistency of the course adopted by this Government in relation to the exportation of arms and ammunition and that followed in not allowing supplies to be taken from its ports to ships of war on the high seas, it is only necessary to point out that the prohibition of supplies to ships of war rests upon the principle that a neutral power must not permit its territory to become a naval base for either belligerent. A warship may, under certain restrictions, obtain fuel and supplies in a neutral port once in three months. To permit merchant vessels acting as tenders to carry supplies more often than three months and in unlimited amount would defeat the purpose of the rule and might constitute the neutral territory a naval base. Furthermore, this Government is unaware that any Austro-Hungarian ship of war has sought to obtain supplies from a port in the United States, either directly or indirectly. This subject has, however, already been discussed with the Imperial German Government, to which the position of this Government was fully set forth December 24, 1914.

In view of the positive assertion in the statement of the Imperial and Royal Government as to the unanimity of the opinions of text-writers as to the exportation of contraband being unneutral, this Government has caused a careful examination of the principal authorities on international law to be made. As a result of this examination it has come to the conclusion that the Imperial and Royal Government has been mislead and has inadvertently made an erroneous assertion. Less than one fifth of the authorities consulted advocate unreservedly the prohibition of the export of contraband. Several of those who constitute this minority admit that the practice of nations has been otherwise. It may not be inopportune to direct particular attention to the declaration of the German authority, Paul Einicke, who states that at the beginning of a war, belligerents have never remonstrated against the enactment of prohibitions on trade in contraband, but adds "that such prohibitions may be considered as violations of neutrality, or at least as unfriendly acts, if they are enacted during a war with the purpose to close unexpectedly the sources of supply to a party which heretofore had relied on them."

The Government of the United States deems it unnecessary to extend further at the present time a consideration of the statement of the Austro-Hungarian Government. The principles of international law, the practice of nations, the national safety of the United States and other nations without great military and naval establishments, the prevention of increased armies and navies, the adoption of peaceful methods for the adjustment of international differences, and, finally, neutrality itself are opposed to the prohibition by a neutral nation of the exportation of arms, ammunition, or other munitions of war to belligerent powers during the progress of the war.

LANSING.

[*Received February 15, 11.30 a. m.*]

1595. That Government at least approves late campaign against us shown by official communiqué of day's operations which states: "On our west front artillery ammunition was found which undoubtedly came from American factories." Hear on all sides of possibility of war with America. Belief here that great quantities of munitions are sent from America, thus prolonging the war. German officials confident Germans in America organized by consuls will rise and destroy bridges, arsenals and factories. I assure you the situation is very tense. Newspapers say American Government is partial to England; that we permit English to use our flag and have done nothing although Russians sunk an American ship, the *Washington*, in Black Sea, and that we did not protest against English closing the North Sea.

File No. 763.72/1864

The Ambassador in Germany (Gerard) to the Secretary of State

BERLIN, *June 1, 1915.*
No. 992) [*Received June 14*]

SIR: I have the honor to transmit herewith a memorandum of a conversation which I had on May 29, 1915, with Admiral Behncke, Acting Chief of the German Admiralty Staff, at his request; Commander Gherardi, naval attaché of this Embassy, was present during the conversation.

The conversation touched on many points besides the ones mentioned. Admiral Behncke spoke with great earnestness and with apparent conviction that the German attitude was a correct one. The tone of the conversation was in no sense provocative or unpleasant.

* * * * * * *

Admiral Behncke and the Ambassador each stated their positions in regard to the American delivery of ammunition which has been one of the great factors in the intense dislike of the German people for America. Afterwards Admiral Behncke spoke about the growing power of submarine warfare about as follows:

With the increasing efficiency of the German submarine fleet due to the numbers now under construction and to the greatly increased efficiency of the units, it is certain that we can blockade England absolutely so that not a single ship can get in or out. If we surrender our rights to conduct the warfare of the sea with the submarine, we bar ourselves forever for securing our rights under international law for the free navigation of the ocean for our merchant marine. We can therefore make no concessions which will lead to the abandonment of the submarine blockade. The captains of our submarines have orders to be most careful in their regard for neutral ships and they report having had opportunity to torpedo in one case as many as nineteen ships before a ship flying the British flag came along.

The Honorable WOODROW WILSON,
The White House.

MY DEAR MR. PRESIDENT: I am sending you a memorandum by Mr. Lansing in regard to the question of "Warning." As you and I have gone over this matter together I need not re-state my views.

Mr. Villard, of the New York Evening Post, called this morning. I do not know what value you attach to his opinions but he presented the idea of calling a conference of neutral nations to discuss the interference with trade, of which both sides have been guilty.

I explained to him that the difficulty about calling a neutral conference was that any position taken by such a conference during the war would be considered, not upon its merits, but as it affected one side or the other. He thought that both sides had done enough so that complaint could be made against the action of both sides.

With assurances of high respect I am, my dear Mr. President,

Yours very sincerely,

[s] W. J. BRYAN.

Enclosure.

State Dept. Doc.
File No. 763.72111/2236½

DEPARTMENT OF STATE,
OFFICE OF THE COUNSELOR,
May 9, 1915.

The Honorable The SECRETARY OF STATE.

DEAR MR. SECRETARY: I have been thinking over your suggestion that it might be considered that Americans, taking passage in a British vessel bound for a British port and passing through the German "war zone," did so, in a measure at least, at their own peril, and, therefore, were not entitled to the full protection of this Government.

After carefully considering the suggestion I am convinced that this Government is in no position to adopt that view. To accept it would be to admit that the Government of the United States failed in its duty to its own citizens and permitted them to run risks without attempting to prevent them from doing so.

By its note to the German Government on February 10th this Government declared that it would hold Germany to a strict accountability for the loss of American lives and property within the "war zone." It did not discriminate as to the vessels carrying American citizens and property. If it intended to discriminate, it was its manifest duty to its own people to have said so, and to have issued a public warning to them to keep off British ships and to say to them "If you go, you go at your own peril."

On the contrary, this Government has permitted in silence hundreds of American citizens to travel by British steamships crossing the "war zone." It has by its silence allowed them to believe that their Government approved and would stand behind them in case their legal rights were invaded.

I do not see how this Government can avoid responsibility now by asserting that an American in traveling by a British vessel took a risk which he should not have taken. If it held that point of view it should have declared it at the time it protested against the "war zone."

The Government has even gone further than that. When the German Embassy published its "Warning" (a most improper proceeding diplomatically) just prior to the sailing of the *Lusitania*, this Government continued silent. It did not even then advise Americans not to sail on British vessels. It continued to allow them to believe that the assertions in the note of February 10th were unconditional.

It is my opinion in view of the facts that it would cause general public condemnation and indignant criticism in this country, if the Government should now attempt to avoid vigorous action by asserting that the Americans drowned by the torpedoing of the *Lusitania* were blameable in having taken passage on that vessel. They had the right to rely on the note of February 10th, and they had the right to expect a warning from their Government if it considered that it could not support them if they took risks by going abroad on British vessels.

I think that it would be a serious mistake for this Government to take a position so untenable and so vulnerable to attack if it should be taken.

With great respect, I am,

Faithfully yours,

[s] ROBERT LANSING

763.72111/2237½

THE WHITE HOUSE,
Washington, 11 May, 1915.

The SECRETARY OF STATE.

MY DEAR MR. SECRETARY: Mr. Lansing's argument seems to me unanswerable. Even if it were just to take the position that a warning that an unlawful and outrageous thing would be done might operate as an exemption from responsibility on the part of those who issued it, so far as our citizens were concerned, it is now too late to take it. We defined our position at the outset and cannot alter it, at any rate so far as it affects the past.

Faithfully Yours,

W. W.

Mr. Villard's suggestion interests me very much; but the objections you make are certainly very vital ones. We can turn the matter over in our minds.

THE WHITE HOUSE,
Washington, July 2, 1915.

The SECRETARY OF STATE.

MY DEAR MR. SECRETARY: These suggestions of Gerard's seem to be entirely unwise, or, at the least, impossible of acceptance, as, I dare say, they seem to you. But if you have any thought that something might be done, I would be very much indebted to you if you would indicate it.

Faithfully yours,

[s] W. W.

STEAMER OSCAR II,
April 10, 1916.

The HONORABLE ROBERT LANSING,
Secretary of State, Washington, D. C.

MY DEAR MR. SECRETARY: I take the liberty of enclosing copy of letter written to the President in the expectation of being able to mail it in New York by the harbor pilot after clearing of the boat on which I am travelling. The President may not read my letter, or if he does, he may not think it of sufficient importance to talk to you of its contents. If you do not object, I should like you to show this letter to Mr. Polk and also to Mr. Phillips, with both of whom I have talked more fully than with yourself.

Do not conclude from this communication to the President that it is my plan to antagonise any of the large interests in New York or to offend any of the potential influence there. A commercial and financial experience of thirty years or more with the men in New York who regulate affairs there and direct the financial policies throughout our country has inspired me with wholesome respect of their power. At the same time, it is my judgment that they are not as much to be feared, even by those seeking credit, like myself, as they were before the Federal Reserve Bank Act became a law and was put into successful operation. The passing of J. P. Morgan, Sr., has wrought a great change in the relations of New York's financial interests. The young men of that house who control its policies are possessed of ability and imbued with ambition, but no one of them has the prestige nor the force of the man who controlled the policy of the house during his life time, who was a thorough American, and who through several trying ordeals in our financial history deservedly commanded the respect of all who followed his career. Furthermore, the men who control the National City Bank are also possessed of ability and ambition; they are not disposed to yield to the supremacy or leadership of those whom they think no more able to guide than themselves, and whose influence is no more far reaching. There are no surface manifestations of this rivalry between the two great financial competitors, but it does not escape the attention of observing men who have a look behind the scenes in New York. If I had not been called to the mission upon which I have started, it was my plan and desire to aid in distributing throughout the country the great power which the concentration of money in New York had enabled that city to wield. Nothing is so intoxicating as success unless it be the power which success brings. New York capital has for years past domimated and more tyranically all the industry and transportation interests of the United States. They have looked upon any opposition with contempt, but the successful operation of the Federal Reserve Bank system has shorn them of some of their power. It was my judgment that such would be the effect, and that was my reason for advocating the passage of the act with such diligence and perseverance. I have had, during the past six months, some rather spirited correspondence with a strong protective committee of Rock Island securities, and some of the letters that passed have been given to the public through the *Wall Street Journal* and other channels. The *St. Louis Republic*, which I control, has contained a number of editorials on this subject and will continue to work along the same line, although it will be greatly handicapped in such work by my absence, especially as the distance will be so great that it will impede promptness of communication.

I did not intend to disgress to this extent when this letter was begun, especially as its contents may not interest you. If you do not object, I should like you to request Secretary McAdoo to read this letter when he returns. If you have time to write me, I shall be pleased and honored. I hope you will not be annoyed by a communication of this character which, of course, is not official.

I appreciate the labors you have to perform and shall trouble you as little as I possibly can about our relations with Russia. If I can serve our Government or you by going away from the post to which I have been assigned, to transact any diplomatic business requiring temporary absence or entailing any amount of inconvenience on my part, do not hesitate to command me.

With best wishes, I am

Yours sincerely,

[s] David R. Francis.

(Personal—copy for Mr. Lansing)

Steamer Oscar II,
April 8, 1916.

The Honorable Woodrow Wilson,
Washington, D. C.

My Dear Mr. President: We have just cleared from the wharf at Hoboken and I take advantage of the opportunity to write you something of my experiences in New York and since my appointment as ambassador to Russia.

When in Washington I told you how astounding to me had been the expression of approval of my appointment, and you will recall what I gave you as my opinion to be the cause of the universal commendation,—that it was a deep rooted desire on the part of the people to uphold your hands in our critical foreign relations.

In New York, where my acquaintance is mostly in financial circles, the commendations were more personal to myself because the sentiment among my acquaintances in that city is largely Republican. The Republican sentiment of New Yorkers is alternately amusing and exasperating to me; they look upon a Democratic administration of national affairs as a usurpation, and if they have anything to say that is not critical, their tone is one of forebearance to criticise because of their fealty to the administration in power.

This, however, is not what I intended to write you. The main object of this letter is to advise as to the feeling I found concerning our relations with

Russia. At a luncheon given me on Sunday last my son Perry and myself were the only Gentiles present—there were twelve Jews who represented the anti-Russian feeling. They asked me how they could aid in my mission. After asking them if they wished me to be candid in my reply, and receiving an affirmative answer, I told them "by not talking so much." I explained that their antagonism to Russia had been looked upon as attributable more to pro-German sentiment than to any feeling of resentment for the persecution of their race. Mr. Schiff, who is the leader of the pro-German and anti-Russian sentiment in New York, was not present as he was sojourning in the South. I have known him for many years and he has always been extremely courteous to me. A day or two later I saw Dr. Gottheil who represents the more conservative and more reasonable Jewish sentiment of New York,—a sentiment which is inclined to rebell against the domination of Mr. Schiff and a few others who have assumed to speak for the Jews of the United States. I shall write you more on this subject when I have more time.

On my arrival in New York, or, in fact, many weeks previous thereto, I had accepted invitations for luncheons and dinners for every one of the four days of my stay in that city. My commercial or financial relations with the house of J. P. Morgan and Company have been very friendly for fifteen or twenty years. No one of that house, however, attended any one of the functions given to me. When I met any member of the house, including J. P. Morgan himself. the expression of good will was emphatic and spontaneous, as was the manifestation of confidence in my ability to rise to the opportunity before me. Upon further investigation and reflection I have come to the following conclusion, the expression of which is the main object of this hastily written letter. J. P. Morgan and Company are so thoroughly English in sentiment that they look with solicitude, and in fact with suspicion, if not fear, upon any movement to promote commercial relations, or even closer social relations, between Russia and the United States. In other words, their desire and plan is to have whatever Russian financing is done in this country to come through the intermediary of London. They also seem to think that any direct commercial relations between this country and Russia is an approach on their preserves. I have also talked with the National City Bank people who thoroughly agree with my plan to promote direct commercial relations between Russia and the United States without the intervention of any other country or influence. Mr. Vanderlip, president of the National City Bank, will send to Russia during the present month two of his vice-presidents, whose mission he did not make known to me, but Mr. Vanderlip assured me (I have known him for many years) that he would second any efforts I would make to establish direct commercial relations with Russia. I have visited the Western Union Telegraph Company and I think I have induced its president, Mr. Carleton, whom I have known for fifteen years or more, to take under serious consideration the laying of a cable from this country direct to Russia, so that our messages need not be relayed or censored in England.

I have written this much hastily in order to give you some idea of conditions in New York. It may be that I shall find time during the voyage to write you more in detail. I am sure you will excuse this hastily dictated letter which I shall not have time to read before sending.

I do not know what kind of receiption I shall meet with in Petrograd, but shall do my best to properly represent the country over whose destinies you are so wisely presiding. I shall return to the United States in time to participate in the campaign this fall if it is possible for me to do so without neglecting an important duty. It is unnecessary for me to say that you have my best wishes for your success in the trying situation in which you are placed.

My stenographer was unable to put the above on the typewriter in time for the New York pilot; consequently you will not receive it until two weeks or more after my clearance. I concluded not to rewrite it because upon reading I find it gives as succintly as I could express it my view of the situation on my departure from New York.

I am told that this vessel will be held up two or three days at Kirkwall, which is an English port on the northern coast of Scotland; the object is to make a thorough inspection of the cargo and also of the passengers, all of whom, no doubt, have passports. I expect to mail this letter from there; consequently you should receive it by April 22.

It has come to my knowledge that effort has been made in Petrograd to produce the impression that my predecessor has been recalled because of his outspoken pro-ally expressions, and that the nominating of his successor has been influenced, in some degree at least, by the pro-German sentiment in the United States. It is, of course, unnecessary for me to inform you that my sentiments are not pro-German to any extent whatever, but are as nearly neutral as a man with my instinct and ancestry can cherish. It goes without saying that my official conduct and personal utterances will be carefully guarded at all times, as will become a representative of a neutral government.

As to political conditions, it seemed to me from careful observation and diligent inquiry in New York that persistent effort will be made by those who have heretofore influenced Republican nominations to prevent the naming of Mr. Roosevelt at Chicago in June next. The formal announcement of Mr. Root's candidacy, as it appeared in the New York morning papers of April 8, was engineered by Nicholas Murray Butler, who seems to pay more attention to politics than to Columbia University. I stated above that I shall return in time to enter the campaign but I make no such request at this time, as the best service I can render not only to the administration and the party, but to the country itself, it to. negotiate a commercial treaty with Russia. In order to accomplish that which is by no means an easy task, I shall have to feel my way carefully and get my bearings, which I think I can do within sixty days after arriving at Petrograd. Nothing, in my judgment, will contribute as much toward molifying Russian anti-Simitic sentiment as impressing upon the government and the commercial interests of Russia the friendly feeling cherished for them by the people of the United States. Russia, in my judgment, offers a better field for the investment of American capital and for the exercise of American ingenuity and enterprise than any country on the globe. I am rapidly becoming absorbed in the possibilities of my mission; my interest therein has almost supplanted my anxiety over the varied interests I leave in the United States. I realize the great burden you have to bear, and hope I am not presuming in assuring you that you need entertain no solicitude concerning the relations of our country with Russia. I may make mistakes but if so they will not be irreparable,—I have little patience with a man who has not the courage to admit he is wrong when convinced thereof. Our Jewish friends must not expect too much. They are but 3% of the population of Russia. Many cultured and well meaning Russians have no desire to oppress the Jews; in fact they consider the Jewish question almost immaterial compared with the other problems on their hands, and have no conception of the proportion the issue has assumed in the United States.

I am sure you will pardon the length of this letter when you remember that it is inspired by a deep seated desire on the part of the writer to achieve success in a new line of work.

Very sincerely yours,

David R. Francis.

Berlin (via Copenhagen), *Dated Sept. 14, 1916,*
[*Recd. Sept. 15, 1:50 p. m.*]

Secretary of State,
Washington.

4338. September 14, 12 noon.

In general conversation with von Jagow recently he said that the offensive in the Somme could not continue without the great supply of shells from America. He also said that recently a German submarine submerged in the Channel had to allow forty-one ships to pass and that he was sure that each ship was full of ammunition and soldiers but probably had some American (?) also on board and therefore the submarine did not torpedo without warning. He seemed quite bitter. Gerard.

Egan.

J. P. Morgan & Co.,
Export Department,
New York, August 2, 1916.

[Copy of telegram despatched 10:35 p. m. to Morgan, London]

23656. For E. C. Grenfell. 23611. We had concluded all arrangements, executed necessary papers, secured the approval of the superintendent of banks of the State of New York, and had our attorneys in Albany yesterday morning to file the papers organizing the American and British Loan Corporation, but at the last moment telephoned our attorneys to return without filing papers for reasons stated hereinafter. Our plan of corporation was as follows:

J. P. Morgan, president; H. P. Davison, vice president; directors the same, and Lamont, Porter, Morrow, Stettinius, Hamilton. The capital, $10,000,000; all stock to be owned by J. P. Morgan & Co. subject to approval of the Treasury. We then proposed to borrow money in the market in the usual custom of the Street on demand and time up to a period of one year. We had arranged with the Bankers Trust Co., N. Y., to receive the collateral issuing their receipt to the lender, we to have power of substitution so as to enable us to make sales or for other purposes. The corporation to be properly paid for its services including brokerage.

It has taken us a few days to form an opinion of the result of the offering of the American Foreign Securities Co. notes, which as you know were dated yesterday, and will be cleared on Friday of this week. We regarded this note as very attractive and hoped we were offering it on a basis which would show not only the underwriters but the purchaser a nice and immediate profit. In this we have been somewhat mistaken, although on the whole we regard the undertaking as successful. For your confidential information we and Brown Brothers & Co., New York, have already bought in the market about $9,000,000 of the notes at the issue price. Otherwise the price would have broken and the market become somewhat demoralized. We are still buying but hope to turn the corner within a day or two.

This experience has led us to defer organizing the American and British Loan Corporation pending further consideration whole subject. As you know French are eager to have us undertake another offering which in our judgment is out of the question in the immediate future. In view of the large needs of the Treasury we find ourselves back to your original plan of borrowing upon the promise of the British Government, provided it can be done in a manner and in an amount creditable to the Government. For your consideration we submit the following suggestions:

That the British Government arrange at once to borrow in this market $250,000,000 to $300,000,000 for a period of two years to be secured by collateral [40% Americans], 40% Canadians, 40% Argentine and Chile, thus making 120% of loan. That it be understood that some or all of the American securities may be sold and if as and when sold proceeds should be used to buy the notes in the market if obtainable below a callable price to be fixed. The point of this is that it would insure a market and correspondingly whet the appetites for the issue. If left to our discretion we might or might not sell securities thus hypothecated. That is we would so handle the securities in our possession that we would sell from other securities or from the hypothecated securities as seemed in the interest of Government.

Our thought as to terms would be issue a 5% bond at 99 to be underwritten at 1%, said 1% to include selling expense, we to be paid ½% for our services. You realize we must have continued and due regard to the Anglo-French loan 1915 bonds, and to the American Foreign Securities notes and to secure any such amount as we are considering, the offering must be almost irresistible in character and terms. Much as we regret to say it we doubt if this offering could be made successful without being handled in a very strong and aggressive manner. We have in mind therefore that if this principle and plan are approved by you you might arrange, say, with the Bank of England to underwrite jointly with us up to $100,000,000 of the issue and to trade back and forth in the notes to a point not exceeding in the aggregate that amount at any one time, believing that this plan would so strengthen the situation and develop such a market that we would succeed in ultimately placing the entire issue and be relieved of our joint commitment. We hope foregoing is clear and will be understood as merely a suggestion for your consideration. In this connection you will have in mind the successful outcome of the purchases we made for the two Governments in connection with the Anglo-French loan, 1915. Of course we would not make suggestion if we were not hopeful that we could put the thing through, but we would not have this hope if we were not assured of some such plan as that proposed with Bank of England.

As to terms, they are predicated upon the large amount. We would expect an issue of $100,000,000 to go at a lower interest cost, but we feel the amount desired could not be handled unless most attractive, and that it would be undignified for British Government to appear as obligor on an amount less than $250,000,000. After this issue we would then expect immediately to have our American and British Corporation organized and put into operation, as that would enable us to carry the situation with demand loans, and short time paper pending a further large operation by the British Government if such should prove necessary.

We are assuming that a two-year period would be better for you than a longer period, on account of the present limitations upon your power to use the securities. If not and you were in a position to consider a serial loan say two, five and ten year period, we migh be able to handle same. A five-year note would perhaps have the objection of inviting direct comparison with Anglo-French loan 1915, and hurt somewhat the market price of that issue.—H. P. DAVISON.

MORGAN.

DWM.

NOTE.—Pencil notation enclosed in brackets.

Exhibit No. 2572

46–A

J. P. Morgan & Co.,
Export Department,
New York, August 8, 1916.

[Copy of telegram despatched 9: 30 p. m. to Ministere des Finances pour Harjes, Paris]

13780. 17703. We should regret more than we can state any embarrassment M. Ribot would suffer because of the inability to use Spanish Railways as collateral in this country. We shall make every effort to avoid such embarrassment and if and when a subsequent operation in this country is determined upon, we should expect to take up in the fullest and frankest manner with Ribot what is the wisest course in our judgment for France under all the circumstances as they then exist. We are quite sure that Ribot does not expect us to make a positive commitment at this time; that there will be a second loan and not being able to make such a commitment it would be futile to say that if such loan is made the Spanish railways will positively be included.

We regret that there is a misunderstanding in your minds as to our responsibility for the appeal for securities. If you will read your 16853, 16899, our 12451 and your 16915, you will see how clearly we tried to point out to Ribot as we pointed out to Homberg here that it was impracticable to make a definite commitment in advance of securing the requisite amount of collateral. Moreover, if you will consult 11882, 16522. 11919, 16662, 12102, you will see that we were always speaking of approved Government bonds of nonbelligerents and that we kept expressing this view to you despite your suggestion that we leave the door open to the deposit of collateral other than purely Government bonds.

The recollection of J. P. Morgan, H. P. Davison, James Brown, and [Moreau] Delano [member, Brown Bros.] 13790 is that in our conversation with Homberg, he stated that the Spanish railway bonds were guaranteed by the Spanish Government. M. Block advises us that Homberg now says that he stated quite the contrary. Homberg will also say to Ribot that these railway bonds were on the list which was given to us just prior to the closing of the transaction and by not objecting at such a time, we accepted them. They were not on the list, however, in such a way as to indicate that they were not guaranteed bonds. We are all quite clear here that every intimation to us by lists, statements, or otherwise, was that all the securities except Suez Canal shares or American corporations were those of neutral governments, either direct or guaranteed. We should not go into this matter at such length now were it not for its importance in the future. Unless conditions change radically we should expect that your borrowing power in this country would not be limited by the amount and the goodness of your collateral, but by the loanable funds here. We, with the Browns, have thus far been obliged to purchase in excess of $10,000,000 of the notes recently issued in order to protect the market, and save the credit of the undertaking. In many of our cables, in the last 6 mos. we have pointed out to you the great difficulty of carrying on negotiations through two routes, that is communicating directly with Ribot through you, and communicating orally with Homberg and Block here.

Morgan.

J. P. MORGAN & Co.,
EXPORT DEPARTMENT,
New York, Oct. 25, 1916.

[Copy of telegram despatched 9 p. m. to Morgan, London]

29405. 24767. Gratified at your prompt and complete response. Are working diligently and expect to issue syndicate letters tonight. Things seem fairly favorable. We are in hopes that they will work out so as to relieve Bank of England of part of its underwriting commitment. We are issuing to press tonight general announcement as follows:

A new British Government loan offering had not been in contemplation at the present time, but the prevailing ease of money and the difficulty which the banks are having in profitably employing their funds have led us to indicate to the British Government that the present is a favorable time for it to establish additional credits in America, even though such credits may not be immediately required. Accordingly, the British Government has today accepted the views of the American bankers and has authorized them to proceed.

Final details have, of course, not yet been arranged, but the total amount of the issue will be $300,000,000, made up of $150,000,000 of three-year notes and the same amount of five-year notes, all to be dated November 1st, or thereabouts, to bear interest at 5½% and to be offered to the investor so as to net at least that interest yield. The loan will be amply secured by high-grade collateral as in the case of last United Kingdom loan, the precise assortment of such collateral to be determined at the time of the offering.

Advance applications for participation in the syndicate which will underwrite the issue indicate that it will be oversubscribed. The British Treasury has of late renewed its shipments of gold to this country upon a large scale. This continued influx of the metal has caused some concern in the banking community and it is believed that the issuance of the proposed loan will tend to cause at least a temporary cessation in gold imports. (End.)

You can readily understand our reasons for various points brought out in foregoing statement, especially our reference to gold imports. If it seems feasible a little later to request Treasury to let up again on these, we will do so. Their renewal in accordance with our request a fortnight ago has been powerful factor in shaping our market to handle proposed loan.—T. W. LAMONT.

66AG 30a

J. P. MORGAN & CO.,
EXPORT DEPARTMENT,
New York, Oct. 20, 1916.

29242. 24596. Much appreciated by us all.

24617. Will of course do our utmost to meet desires of Government, but as you can appreciate we are working under great handicaps, not the least one of which is that, upon rumors of new impending issue, prices of both United Kingdom and Royals have sold off sharply, despite our efforts to maintain.

In one point we are not in accord, and that is reduction of our commission from ¾% to ½%. We should be perfectly willing to do this were it not for the fact that the offering group outside of Trio consider that they are properly entitled to some special compensation for extraordinary services rendered; and although we have not told them so, we thoroughly agree. While we look for effective work of every member of the syndicate there is no doubt that this offering group, at least the distributing houses, eliminating Pittsburg and Chicago banks, are the ones upon whom chief distribution work falls. We are reluctant to keep laying stress on point that only way by which Great Britain can possibly hope to meet its requirements between now and March 1st is to have every member of the banking community over here working, not only steadily but enthusiastically. There is no method of instilling this spirit except by means of profit. All these houses took a handsome loss in the Anglo-French operation and they state that after paying expenses, etc., they made little real profit in United Kingdom and Royal operations. We believe that we must compensate them out of our proposed ¾% to the extent of a special ¼%, if we are to carry this business through effectively. We regret that this point did not come up before, but they were all shy about tackling us on it. As for our own compensation, we think ½% is the least that we should consider. Please appreciate again the manner in which we are standing in the gap for British Government.

For your information we are now planning to dispose of practically all our short term portfolio holdings, like telephone notes, etc., which are returning us better than 4%, simply for the purpose of getting more funds to loan to Great Britain on call. We are making every possible sacrifice for her benefit and doing it as quietly as possible, so that banking public generally will not become alarmed at the magnitude of her requirements. Therefore, in this banking operation we feel that ½% is more than moderate. It is no answer to say that we are receiving a profit from the export department, for to our mind the services rendered there are at best not more than adequately compensated.

You ask us to proceed with the whole loan as soon as possible, but you appreciate that the virtual estoppal as to active progress will still exist until we receive satisfactory reply to E. R. Stettinius's cables of last night—but we have licked proposed operation into shape so that with that mess out of the way and with no material change in general conditions, we believe that we can go ahead promptly early next week.

Participation of Bank is just as satisfactory to us as Government. There is, of course, the same understanding as we had in connection with last loan covering matter of subscription as well as underwriting.

For your information, Chancellor's remarks as to necessity of finding $10,000,000 daily for New York payments cabled over here and featured in press this morning.

MORGAN.

MARCH 15, 1916.

Mr. H. FISHER,
%*William P. Bonbright & Co., Inc.,*
Paris, France.

DEAR MR. FISHER: Under the Federal Reserve Act, and also the laws of various States, banks are authorized to accept against any one name only to a certain percentage of their capital and surplus, and in addition, with certain few exceptions, their total acceptances outstanding cannot exceed a certain percentage of their capital and surplus. Bank examiners representing both the Federal and State Governments have been giving a great deal of attention to foreign loans made by American bankers, and the position taken by many of them is according to the strictest interpretation of the law possible. Institutions which have taken part in the Anglo-French loan and have also had participations in the French notes have been notified by bank examiners that they must add these two forms of securities when figuring the total amount that they could accept of either or both. If therefore, the banks which have already taken part in these loans, and they are almost without exception the only ones in this country who are willing to make foreign loans to the Allies, make further advances in any form to France, for instance, it is necessary that the security be arranged in such manner as to distinctly separate the loans from other allied government securities. Two loans have been negotiated for France where it has been possible to do so, one under Brown Brothers' credit and the other that of Schneider & Co. In both of these cases, however, individual French banks have drawn the drafts, and it has been possible for the banks to show such acceptances as having been made for account of the several French banks participating. These lines, however, now that the second Schneider loan has been placed, are also becoming exhausted, and in fact a number of banks that took part in the first Schneider loan were unable to do so in the second on this account.

It therefore becomes necessary to devise some new arrangement, and with that in mind, it was suggested that the drawers be a series of A–1 commercial houses, that the guarantees of the French banks be replaced with collateral and that the French Government notes be deposited to assure a possible shipment of gold and the fact that the French Government is behind the issue. On a loan where the security is so built up American banks could establish new lines under the names of the drawing commercial houses, and in the form of collateral loans, which would authorize them to accept an amount equivalent to 25% of their capital instead of only 10%, as would otherwise be the case. If the only collateral were the French Government notes, the bank examiners would unquestionably consider at once the placing of such loans in the lines established for the Anglo-French and French loans, and if this were done, it would make it impossible to place a further acceptance credit of any appreciable amount. On the other hand, if the acceptances are fully collateraled in some other way and the French notes are put up to show that the French Government is back of the situation, and to assure the payment in gold, should it be necessary, it would open up a new line in the case of both National and State banks that they could avail of as they might wish. The suggestion that other collateral take the place of the guarantees of the French banks is, therefore, as you can see, a requirement made necessary by our law, without any consideration whatever as to the standing of the French Government. In other words, if every bank taking part in a new loan was positively assured that the French overnment could and would meet its obligations at maturity beyond the possibility of any human doubt, the law would not allow the banks in this country to loan the French Government more than the 10% or 25% of their capital and surplus that the law prescribes in the case of unsecured and secured loans, respectively.

It being our desire to successfully negotiate a loan, we have suggested the things that seem necessary in order to make it possible to find a market. If we did not thoroughly believe in the strength and stability of the French Government ourselves, we would under no circumstances endeavor to get our friends to take part in any form of loan that might be devised in order to meet the situation, but having full confidence in the intention and ability of the French Government to meet its obligations as they mature, we are very glad indeed to do all within our power to help work out a form of security for which a market can be found. In all of these negotiations it must be borne in mind that the banks in this country that have taken part in the European loans have not been able to pass their participations along to individuals to any appreciable extent, and consequently it is necessary to meet the requirements of our banking law if further funds are to be secured in this country.

Very truly yours,

——— ———, *Vice President.*

[Copy of telegram despatched 12 m. to Morgan, London]

29171. 24570. We are in accord with your thought with this important exception which appertains at this especial time. We are not finding it altogether easy to have the Treasury borrow on demand in unlimited amounts, even against American securities. The total amount to which participants outside the Trio shared in the temporary demand loan of last summer was $35,000,000 and at the present time we are finding it difficult to increase this amount. The reason is, on the part of trust companies, legal limits and, on the part of national banks, custom, and excessive caution. This being the case we contemplated going further afield with these demand loans, but find that out of town institutions would look upon an offering not as a merely temporary and highly advantageous matter but as a participation in a new issue, which of course we must avoid because of large pending operation. Therefore, to sum up, we shall need all gold available for the present to enable us to keep demand loan down to limits where it can be handled, and we must, therefore, postpone altogether for the present consideration of your suggestion to invest any part of this Gold in quick American securities.

Morgan.

TWL.

Exhibit No. 2580

1128 Sixteenth Street,
Washington, D. C., December 19th, 1916.

Dear Ben: I can kill two birds with one stone—wish you the season's best greetings and at the same time answer your last letter (Dec. 11th) and in part make up for past negligence.

To answer your question first, the Comptroller's report showed approximately 300 million European securities held by national banks at the latest report—not in itself an alarming showing although it can be inferred that trust companies affiliated with national banks hold considerable more. From statements of State and National banks in September it appears that the holdings of securities of various kinds (bonds and stocks which in the case of national banks is mostly bonds) all slow stuff, have increased from 2,800 million to over 4,000 million. The increase of 1,200 million being about equally divided. We assume that the placings of securities of belligerents and non-belligerents have amounted to at least 2,000 million and that the selling back of American securities have been, say, 1,500 million, perhaps more, but it is reasonably sure that a good share of this 3,500 million remains "undigested" and not in the hands of the ultimate investor. That is where the danger lies. There is a great difference between my drawing my balance out of your bank and investing it in the bonds of foreign countries and your investing my balance in that way. I wish very much I could talk with you about the situation. You realize how unwilling I was to do anything that looked like a slap at the allies. Unfortunately, Kent of the bankers in his acceptance circular and Davison by his actions and methods rather forced the issue. I did my best in our conference (6 members) with Davison to make him see the light and suggest something reasonable, but he adhered to his original statement that he proposed to issue the notes or rather sell them over the counter just as rapidly as the market would take them and without limit but as he supposed half a billion or a billion. My suggestion that I could see no objection to a moderate issue one or two hundred million he brushed aside. He said several times he asked no favors, wanted no approval, simply came as a matter of courtesy. He was too proud, I dare say, to suggest that he wanted to be guided by our advice. but I think he would have succeeded far better if he had taken that attitude. He called on the President and we suppose told him much the same story but perhaps more briefly and with less questioning. He returned to New York and at once the papers were full of the grand plan which was to save up the great embarrassment of taking so much gold—the yellow peril having been previously pictured as a serious menace. The inference was natural, and Davision certainly did nothing to avert it, that Davison had consulted the Federal Reserve Board and the President and his plan had been approved. Fortunately for the Board the advisory council met in Washington on the Monday after Davison's visit (which was Saturday). We had intended discussing with them the French revolving credits about which we had wired and written the Federal Reserve Banks—but in view of the situation we took up that and the English treasury notes. They considered the matter and brought back the unanimous recommendation (10 members present) counselling caution and advising that the Board issue a careful statement to the member banks. I strongly urged printing the statement only in the bulletin and I think *that* course would have prevailed if J. P. M. & Co. had not again forced our hand. In response to a phone request from Harding La Monte speaking for Davison said they could not delay their plans, that they were proceeding with their circulars, etc., instanter. I can see that if you had been in New York on the job you could have acted as an intermediary and held Davison in check and at the same time satisfy the fears of the Board. I say *fears* of the Board advisedly. There is no doubt that four or five were really alarmed and the rapidly advancing prices of necessaries of life and the hue and cry that aroused, all tended to feed the flames.

So much for that. If McAdoo had been here, I think he would have tempered things a little—but I am not too sure of that either.

McAdoo sat with the Board today for the first time since August 9th or 10th! We passed a resolution authorizing the arrangement with the Bank of England—without qualification about transacting *no* business.

We talked long and exhaustively about amendments which we are in hopes to get in final shape tomorrow.

I am afraid I must stay here till March 4th but after that I hope I can slip out to Denver as you suggest, thence to Dallas, etc.

Aiken gave us good accounts of you and we had a fine meeting with the Governors, as well as with the Reserve agents, the week previous. Harding is a great improvement as Governor and things are really going better.

We have 6 inches of snow here and 20° F. So you see we think it is winter.

We have very bad news about Kains. Hemorrhage of the bowels, so Perrin wires! The first we heard a month ago was a dilated heart, suddenly this!

Jay is on the sick list with bronchitis. He looks badly.

Mrs. Delano joins me in warmest good wishes, and I am,

Yours very sincerely,

(Signed) FREDERIC A. DELANO.

P. S.—The hour is late. I will ask you to excuse mistakes and want of proofreading.

J. P. MORGAN & Co.,
EXPORT DEPARTMENT,
New York, Sept. 21, 1916.

[Copy of telegram received from Harjes, Paris]

17988. For J. P. Morgan and T. W. Lamont. T. W. Lamont's interesting cable received. H. H. Harjes and I had long conference Tuesday; also yesterday with Ribot, French Minister of Finance, and Homberg, discussing at length and in detail situation at home. I believe Ribot understands it and also understands impossibility of carrying out certain schemes which they had hoped might be effected, particularly plan of inducing contractors to draw bills to be accepted by existing banks, or corporation to be organized for purpose. I have talked with them exactly as with Chancellor of the Exchequer and Governor of Bank of England, making clear that in our opinion, nothing can be done immediately, and that pending such time, the A and B Corporation, additional American securities and gold were only resources we knew to be availed of. Of course, we have known this since issue last British loan.

We are to have further conferences and I will remain here perhaps ten days longer. I believe French representatives Anglo-French Finance Commission will go to London when I go, and conferences of commission will begin there.

As we have so many times said at home, situation is so serious that Governments must sit around table with all cards on top and pool their issues, as in military and munitions.

A programme should then be determined to care for immediate requirements and we instructed to turn over every stone to meet situation. I have made clear that unless absolute confidence is reposed in us and Governments will strengthen our hands in every way possible, we will be unable to cope with situation, with no assurances that even then we can do so, and have made it particularly clear that we have no plan or schemes in mind as to how we can move when time arrives. I have suggested one thing we might do promptly if they gave us free hand, would be to arrange as confidentially as possible with important distributing houses, each to start campaign of education throughout country by personal endeavor, they to be compensated in some satisfactory form. Two or three weeks of this should develop this situation and perhaps help as to determine plan or plans. I am confident Governments will back us to limit. Wish you would think over schemes of forming one or more corporations with perhaps large capital, as am confident they would furnish capital for such purpose, and to any amount which would avail sufficient money.

Am sorry to say, my figures are correct; British requirements are 50,000,000 per week and French requirements 50,000,000 per month for how long, cannot say, but requirements unlimited from our point of view.

I know you are giving this your most serious and constant thought. It will be most helpful to me if you will cable me frequently of any suggestions you may have of whatever character, as problem must be solved, and though they have not said so, am confident they will go to any limits.

Wish, without mentioning me, you would ascertain from Guaranty Trust Co. of New York whether absolutely impossible effect credit arrangement without collateral other than Government bonds. Ribot has asked my opinion about giving other collateral which it would embarrass him to do. I have advised him not to give this collateral at this juncture, fearing it would prejudice other operations and not avail of sufficient money. If after London conference, we should be convinced that credit could not be made without collateral and say $100,000,000 could be arranged with collateral, they might be induced to put it up. To make clear my point is that requirements so large that we do not want to do anything which will avail comparatively little and injure situation, and I would suppose that in this commercial credit, if there was hope of accomplishing anything important, it could be done upon credit of drawers backed by French Government. While we have never questioned credit, or position French Government, a few days here would give courage to the most timid and assure him that Allies will win the war and the commercial and industrial institutions of France in general will live and prosper.—H. P. Davison.

HARJES.

[Copy of telegram despatched 10:45 p. m. to Morgan, London]

29577. For J. P. Morgan. 24877. Is in exact accord with Dwight's and my views. T. W. Lamont away today, and if he has no sidelights I hope matter can be put in shape at once so that we can be ready to operate as soon as present loan negotiations out of the way. Up to tonight subscriptions amount to $120,000,000, this being our first day of advertising. Reports from Central West very encouraging. Am hopeful of satisfactory results.

Wrote statement on steamer to give out upon landing, but was marconied that loan was pending so thought it best to hold up until conferred with partners. They approved statement so am giving out tonight. It is personal and rather long, giving in effect:

1st. Optimistic views of military situation.

2nd. Information regarding remarkable increase of production munitions both England and France, thus making them much more independent of this country.

3rd. Referring to their great wealth and resources, expressing opinion their unsecured external obligation just as good as our own Government obligation.

4th. That if we want to continue trade with them we must treat them as desirable customers and encourage the business, rather than discourage it by exacting unreasonable conditions.

Hope you had opportunity to do a little work at Six Mile Bottom.—H. P. DAVISON.

MORGAN.

EXHIBIT NO. 2583

[October 31st, 1916]

"SEES PROSPERITY LONG AFTER WAR"—H. P. DAVISON EXPECTS VAST TRADE WITH GREAT BRITAIN AND FRANCE TO CONTINUE—FAVORS UNSECURED LOANS—ALLIED NATIONS' BONDS AS SURE TO BE PAID AS THOSE OF OUR OWN GOVERNMENT, HE SAYS

Henry P. Davison, a member of J. P. Morgan & Co., who went abroad two months ago, to be joined in London later by Mr. Morgan, for the purpose of talking over with British and French authorities the part that the United States is playing in the provision of money and munitions, although interviewed on his return to New York on Sunday, replied to a number of requests for further impressions of the war situation yesterday by writing a statement.

Wall Street was inclined to read things into the statement that were not down in black and white. Mr. Davison's estimate of the credit position of France and Great Britain, and his reference to the probable feelings of citizens of this country if the United States were asked to secure Government bonds by collateral, were taken as a suggestion that future loans placed here by the French and British should be straight Government obligations. The $500,000,000 Anglo-French loan is the only large piece of foreign financing that has been accomplished without collateral security. Discussions of the new Russian financing, which has been pending for some months, have turned on the possibility of making that a straight Government loan.

Mr. Davison's statement in full follows:

"My trip to Europe from which I returned to my office this morning was made for the purpose of discussing munitions and finance with the authorities in London and Paris. * * *

"When in France I also availed myself of the opportunity afforded to acquaint myself with the financial and industrial situation and visit some of the munitions plants. * * *

"Now the situation is materially different. During the more than two years which have passed, Great Britain and France have not only carried on the war on the western front, as stated, but have at the same time developed their own manufacturing resources in a way which surpasses belief, so that today they find themselves well equipped and in a position to provide not only for themselves, but in a large degree to assist their allies. In stating this I do not mean to imply that there are not many things that they will require from us as they did before the war, and will after. I do not mean that there are very many supplies which they would rather purchase from us than produce at home, reserving the resources required for such production for other purposes to their better advantage. The point is that today their position is one of independence compared with that of two years ago.

"I am perfectly clear that if we regard Great Britain and France as desirable customers and wish to continue to sell them our products, we must treat them as a producer usually treats a desirable customer, in which event I am confident we will continue to supply them largely, not only during the war but for the reconstruction period which will follow.

"I have been wondering how we in this country would feel if the tables were reversed. Suppose, for instance, we suddenly found ourselves plunged into war, and, finding ourselves wholly unprepared, sought at once $500,000,000 worth of materials and munitions. Say we placed our orders with Great Britain and France and were then told by them that they would require in payment

$100,000,000 in gold, that they would accept $100,000,000 in United States Government bonds, and that the remainder must be paid in United States Government bonds secured by the bonds of certain South American Governments. I believe that this is a fair parallel to our present attitude, and I also believe that if our creditors took that position we would meet their requirements as to payment and at once set about to place ourselves in a position of independence as far as possible to do so.

"It naturally would be inconceivable to us that the people of Great Britain and France could question the obligation of the United States Government in peace or in war. In this connection it is my unqualified opinion that the unsecured Government bonds of Great Britain or of France, free from home income tax and payable in dollars in the United States is just as sure to be paid as the Government bonds of the United States Government no matter how the war terminates. In making this statement I am not unmindful of the cost of this war, and that the cost must be met and can only be met through taxation.

* * * * * * *

"If we are to make assured our present prosperity and increase it, as we properly can, it seems to me important that our people should realize these facts and meet this opportunity, the like of which let us fervently hope will never again be presented. If this prosperity is to be shared by the country at large, our investors, our bankers, and the public generally must take a broad intelligent view of the opportunities before us, and assure the peoples of these foreign Governments that we desire their trade and have confidence as to their financial soundness.

"It is not a question of wealth or value, but purely one of exchange, the solution of which lies with us now and will continue to for a long future if we show ourselves competent to handle it. It is simply a matter of holding and developing our increasing foreign trade and of acquiring in this country a security as sure to be paid as any known in the world."

Exhibit No. 2584

J. P. Morgan & Company,
Export Dept.,
N. Y., Nov. 20, 1916.

[Copy of cable from Morgan, London]

To H. P. Davison.

26519. Had lunch with Chancellor today, who says that during next ninety days he can collect between gold and securities enough to make together $1,000,000,000, and more securities if needed. Of course, he does not wish to use this gold. He wishes to issue new long-time loan here some time after January 1st. Has no doubt whatever of result of that issue, which will certainly go, but as he will have to issue in America at a higher return to investor, he does not wish to make the two issues simultaneous for fear of exciting adverse feeling here.

Since their dollar balances now reduced to practically nothing and exchange having to be paid for in large quantities, he desires advice as to what you would recommend as a course of immediate action. Should he try a new unsecured loan in America between now and January 10th, or should he make one more collateral loan before attempting the big unsecured operation? Should you issue collateral loan similar to one and two, he would wish to arrange it on basis $50,000,000 United States, $50,000,000 Canadian Pacific Ry., $50,000,000 Argentine railways, $50,000,000 British rails, balance Colonials, Japan, Egypt, etc.

* * * * * * *

He is clear, however, that the Allies must continue to pull together, and that he must say and do nothing which would show any irritation he may feel at such an upset of his and our plans; for, after all, no Ally can do without all the others and it must be a case of "bear and forbear" all the way through. He is greatly impressed with skill and usefulness of your propaganda and your speeches are much commented on and approved here.—J. P. Morgan.

Morgan.

EXHIBIT No. 2585

J. P. MORGAN & Co.,
EXPORT DEPT.,
N. Y., Nov. 24, 1916.

To Ministere des Finances, pour Harjes, Paris.

[Extract from cable #14862]

14862. For H. H. Harjes. 80102. Conferred yesterday with Bloch and Casenave and told them that we had hopes of being able to do something for M. Ribot within the next 90 days, either in form of unsecured loan or possibly of another issue of American foreign securities. We have, as you know, been active in furthering propaganda as to desirability of long-term unsecured loan, and believe that we have made some impression upon American investment public, but, frankly, one operation has followed another so closely as to have sated pretty completely for the moment the appetites of all classes of American investors, both institutional and private. By this we mean the various credit operations already alluded to like Schneiders, Brown Bros. & Co., and recent Bonbright industrial credit, French municipals, as well as, of course, the somewhat more considerable direct British borrowings. For these reasons it is impossible, as you yourself point out, to indicate any definite time when a French loan operation for France can be undertaken, but we want you to know that we are engaged in steady educational work to that end. We are today issuing following statement:

"In response to inquiries, we are able to state that British and French Government Treasuries have each authorized the sale in this market of a limited amount of their short term bills running at various maturities from thirty days to six months. These bills, which in form are much similar to New York City revenue bills, will be payable in dollars in New York City. They will probably be available for purchase on or about December 1st, and at rates based largely upon money market conditions."

We have not yet decided upon rates for various maturities, which are likely to run from minimum of 4% to 4½% to above 5%, depending upon money market conditions at the time of actual sale.

For your information, reserves are constantly dropping here despite heavy Gold imports, and money rates are materially stiffening. This is, as you are well aware, time of year when banking institutions all over country look for higher money rates. For this reason and because only few of the larger institutions which already have heavy French and British obligations on hand, are familiar with this form of security, we are inclined, to think that the output of these Treasury Bills for the next ninety days will be limited in amount, perhaps not sufficient to cut any considerable figure in exchange operations.

We consider whole financial situation is of great importance, for, as we have pointed out to the Chancellor of the Exchequer through J. P. Morgan, investment situation at the present time is such that it is difficult to contemplate any new operation in immediate future. Hardly a single one of recent issues of any account is selling above issue price, and this applies to both countries.

MORGAN.

EXHIBIT No. 2586

[Copy]

FEDERAL RESERVE BOARD,
Washington, November 23, 1916.

[Confidential]

MY DEAR MR. TREMAN: I have your letter of November 22nd and thank you very much for the same.

I sincerely appreciate your always encouraging remarks about what we are trying to accomplish here.

I am very sorry to learn that Mr. Jay is laid up again and I hope that he will be better again in a few days. Apparently he has taken a chance in getting out too early—a thing that he ought to have avoided.

Your suggestion that I write you about our recent conference here with the Advisory Council I am happy to act upon; all the more since, owing to the absence of Mr. Morgan from the conference, you might otherwise not be advised as to what transpired.

I am inclosing herewith a copy of the statement given to the press at the end of the conference, a report which no doubt you have seen in the papers.

I might add, because it is of considerable interest, that with reference to the first topic—that is, a transfer of vault money to the Federal Reserve banks—the council added that this development would be greatly facilitated by securing an amendment permitting the member banks to count Federal Reserve notes as reserve. All members present favored such an amendment with the exception only of Mr. Rowe, of Cincinnati. Mr. Morgan and Mr. Swinney were not present. We know that Mr. Morgan is in favor of such an amendment. I am not quite posted as to Mr. Swinney's position in the matter.

A free discussion of this topic ensued with the Board, in which both sides of the problem were fully developed.

There is one additional recommendation which may be of interest to you, as follows:

"The Council recommends that to the exceptions contained in section 5202 R. S. as amended by section 13 of the Federal Reserve Act the following should be added as a sixth exception:

"'6th. Liabilities as an endorser on accepted bills of exchange actually owned by the association and rediscounted at home or abroad.'"

The main discussion was on the general financial situation, a topic with which there are closely connected the questions of reserves, gold importations, and foreign loans; also the question of foreign acceptance credits.

To begin with the latter, the Council unreservedly endorsed the position taken by the Board as expressed in Governor Harding's address in New York. They even went further than that—a position which is not quite shared by the Board. I still believe that the position which we took is just right; that is to say that we should not go to the extreme of declaring these bills *ineligible*, but simply to deal with them as a matter of *policy*. I do not think that the point of view taken by the Council, that these acceptances might be eligible for rediscount when offered by member banks, but should not be taken in the open market, is a logical one—anyhow, not as a matter of ruling. What they meant to say was that inasmuch as some member banks now had these bills, they ought to have an opportunity in case of need to rediscount this paper. They did not feel that such obligation, even thought it might be only a moral one, existed toward nonmember banks, and they were in general accord that these acceptances were not a very desirable investment for Federal Reserve banks, and that their use should not be freely encouraged.

As to the general financial situation, it was pointed out that money was not so easy as it looked; that in most of the districts member banks were now lending up pretty well to their legal reserve limits, and that it would not at all surprise the members of the Council if in the near future Federal Reserve banks would be more freely resorted to. As a matter of fact, in some districts, particularly in Boston, banks are pretty well loaned up and rediscount at this time pretty freely with the Federal Reserve banks. Similar indications you have seen in New York.

It was also stated that in some districts banks had been investing a little bit too freely in foreign loans, and that it was time that the Board sounded a note of warning against further loan expansion and locking up of funds.

The question was discussed whether or not the date of November 16, 1917, should be advanced so as to terminate sooner the practice of counting balances with correspondents in reserve and central reserve cities as reserves. If the final step as contemplated for November 1917 took place today, the excess cash reserves would be wiped out and it would be found that, as a matter of fact, the banks are pretty well loaned up to their legal limits. The so-called excess reserves with reserve agents of about $600,000,000 would then appear as what, in fact, they are—bank balances which have been invested in loans by correspondent reserve agents. It was generally felt that it would be to the best advantage of the entire financial situation if Congress would empower the Federal Reserve Board, with sixty days' notice, to put this final change into effect. It would put all the banks on notice and remove some misconceptions as to the existing financial situation. It was generally felt that a step of this kind would have some effect in exploding the theory that further importations of gold must of necessity bring inflation. The banks themselves have the power to a certain extent of dealing with this danger by keeping the reserves higher; and there are other ways and means of dealing with an overflow of gold so as to keep it out of harm's way.

On the other hand, the feeling was freely expressed that some cool thought ought to prevail in dealing with foreign loans; that they ought to be closely scrutinized and that we should not overlook the fact that if this war went on for a long period, even the strongest amongst the European powers might at the end be in a financial situation which would be critical—to say the least—and which would force those who now believe themselves to be making short loans, to accept long term bonds in payment of these now apparently short investments. It was said that sooner or later this unnaturally stimulated export trade would come to a stop and that it would be better to bring it down gradually to a normal scope than to keep it up by an artificial stimulation of foreign loans, so that when peace should be established there would be a gradual falling off and not a perpendicular drop. It was thought that at the end of the war there would be vast opportunities for the United States to act as the world's banker and to do its share in the work of reconstruction then to begin; and that we should see to it that we keep ourselves strong for that moment and be careful not to get involved so deeply at this time as to become the partner of the belligerents to such an extent that when peace should be restored we should be in the position of being dependent upon our debtors rather than of being independent and choosing our own course.

The Board did not feel that it should take the responsibility of advising the investors and it was thought that as long as there was a natural process of financing our foreign trade by a back-flow of securities into the hands of the investors, the United States were doing in effect a cash business which could only be considered a healthy one.

A similar result would be reached by foreign loans secured by our own securities. When, however, our trade is to be maintained by the granting of practically unlimited amounts of unsecured loans to belligerent nations and particularly when these loans are to be put into a form appealing to our banks rather than to investors, the Board feels that such a development would not be a healthy one under present conditions. While in form these short term unsecured foreign bonds or notes may appear self-liquidating, as a matter of fact, the result will be that in the aggregate, many hundreds of millions, or possibly an amount which might approach a billion, would be locked up by our banks in an investment which would have to be seen through to the end of the war and it would then probably have to be turned into long term securities.

The Advisory Council members expressed their unreserved opinion to the effect that this was not advisable and that a further lock up of funds by the banks of the country in such a manner could only be considered with serious misgivings.

In strictest confidence: When Mr. Davison was here last Saturday, he discussed with the Board the question of the British Exchequer bonds and in this entirely informal conference views were developed by the Governor and members of the Board on these very lines and it was a great satisfaction to the Board to see that the Advisory Council members, who independently considered the situation, reached exactly the same conclusions.

Very truly yours,

(signed) PAUL M. WARBURG.

R. H. TREMAN, Esq.,
Deputy Governor, Federal Reserve Bank,
New York.

EXPORT DEPARTMENT,
New York, Nov. 20, 1916.

[Copy of telegram received 8:30 p. m. from Morgan, London]

26519. For H. P. Davison. Had lunch with Chancellor today, who says that during next ninety days he can collect between gold and securities enough to make together $1,000,000,000, and more securities if needed. Of course, he does not wish to use this gold. He wishes to issue a new long time loan here some time after January 1st. Has no doubt whatever of result of that issue, which will certainly go, but as he will have to issue in America at a higher return to investor, he does not wish to make the two issues simultaneous for fear of exciting adverse feeling here.

Since their dollar balances now reduced to practically nothing and exchange having to be paid for in large quantities, he desires advice as to what you would recommend as a course of immediate action. Should he try a new unsecured loan in America between now and January 10th, or should he make one more collateral loan before attempting the big unsecured operation? Should you issue collateral loan similar to one and two, he would wish to arrange it on basis $50,000,000 United States, $50,000,000 Canadian Pacific Ry., $50,000,000 Argentine railways, $50,000,000, British rails, balance Colonials, Japan, Egypt, etc.

In regard to unsecured loan, he suggests that it may be desirable to make it of sufficient size to refund the original Anglo-French bonds into the new one, letting the people who subscribe pay one-half in Anglo-French 5s and one-half in new money. This would of course involve loan of very great size, but only say $500,000,000 of new money and at proper terms of conversion might help the market considerably in Anglo-French 5s.

He is impressed with the great desirability of keeping J. P. Morgan & Co. as his bankers over there in a very liquid condition, so that they can feel free to act in temporary emergencies without inconveniencing themselves or putting themselves in a banking position that they would not like to occupy, and he does not want us, if it can be avoided by any act of his, to put up so large a proportion of available funds as we had prior to last loan. He has at present no obligations to the Allies beyond March 1st, though he knows that in a few weeks before that date there will have again to be an international conference and an arrangement as to what they can get from Great Britain. All that will depend largely upon his American situation at that time, and that in turn will depend upon how much we can do for him between now and March 1st and our opinion of the outlook.

To sum up, what he wants now is advice as to the possibility of immediate action and what that action had better be. Also what effect another secured loan would have on the chances of the unsecured loan a few weeks later. Very confidentially, he is considerably disturbed at the action of France with Kuhn, Loeb & Co. He is clear, however, that the Allies must continue to pull together, and that he must say and do nothing which would show any irritation he may feel at such an upset of his and our plans; for, after all, no Ally can do without all the others and it must be a case of "bear and forbear" all the way through. He is greatly impressed with skill and usefulness of your propaganda and your speeches are much commented on and approved here —J. P. MORGAN.

[Copy of telegram despatched 8: 30 p. m. to Morgan, London]

31458. For J. P. Morgan. 26519 arrived at a moment when we ourselves were giving gravest consideration to this [whole] problem. As you know, conditions here change rapidly. At present we do feel time inopportune to discuss any collateral loan issue, and most certainly an unsecured loan. Should hardly look for change of conditions by January 10th. The outlook now is rather against making a new issue of any character until further absorption of previous issues and import of substantial gold. It is discouraging to see each issue on whatever basis drag and need support. We confidently believed that last issue was on a basis which would show a profit to the public, but the requirements are so great and the public now aware of necessity of succeeding issues that we are fearful that no issue on creditable terms will show profit although with lapse of few weeks, conditions may so improve as to give us renewed hopes and courage as in past.

NOTE.—Pencil notations enclosed in brackets.

We are greatly disappointed at delay in launching the short bill operation. It seemed so simple, so comparatively inexpensive, and so manifestly in the interest of the financing that we believed that both Governments would at once instruct us to proceed. It was with this confidence that we worked up the enthusiasm on the part of the bankers in Chicago, New York, and Boston. We believed in the interest of Allies it was wise to offer both British and French bills simultaneously, but even today Bloch has not received instructions to sign, although Government has advised us that they would so instruct him. The result of this delay is that the bankers have cooled off; money rates have gone up somewhat, call money yesterday being 3½%, and we are in great quandry as to whether to issue now, as 30-day bills would mature at period when rates would be high and maturing bills would be presented for payment. Governments have not appreciated importance of 30-day bills which to us are so important to get the machinery started and the bankers interested that we are hesitating about starting with 60 day bills as shortest maturity. We expect to determine this in a day or two and if instructions from French Government in hand may decide to advise the banks and to put on counter early part of next week, as requirements are so great and we dare not delay even though rates will be higher. If we had been instructed to proceed at once we should have hoped by this time to have been well under way and on lower rates.

We are so perplexed and upset by attitude of French Government that we are sorely tempted to take position that we prefer that they do their financing elsewhere and their purchasing also. For your information, Bonbright, who should be protected in this matter, advised us this morning that he had received a cable from his Paris representative in which they state that French Government are much impressed with courage and quick action of Kuhn Loeb & Co., and that therefore Bonbright's representative suggests Bonbright confer with Kuhn Loeb & Co. regarding the French Railroad credits, which they have so long been considering. Bonbright replied before coming to us.

"Prefer not to confer with Kuhn Loeb & Co., whose belated courage is due to the improved situation and financial credit of Allies, due in turn to operations of other bankers, tried and proved friends of Allies."

Needless to say to you that we wish to keep our temper and to serve France at whatever cost of humiliation or trouble but wish you to consider whether it will not really be in the interest of the Allies if we inform France that we can no longer assume responsibility of endeavoring to provide her with funds. Our judgment here is that it might be wise for the Chancellor at once take up this matter with M. Ribot or Prime Minister with Briand and settle it definitely and finally, as our endeavors are not appreciated, but are really discouraged by the French Government. You so well understand whole situation and it is so important we want your judgment upon it.

Visit of H. P. Davison with Federal Reserve Board and with President of United States has impressed us with the very great responsibility we have before our own country. Therefore, shall we continue our endeavors with France with needless lack of support? In other words, in this cable, we are more than expressing our feelings; we are considering whether in perfect loyalty and friendliness to France we cannot advise her to look elsewhere. If not, we must be assured of more than soft words and kind expressions, and even so we cannot guarantee success to any degree. All we can guarantee is our continued endeavors in their behalf.

Again referring 26519. To repeat, we cannot possibly advise the issue of any loan now, but can only mark time relying as much as possible on the short-term bills and calling for gold to the extent necessary.

Will you please explain fully how the one thousand million referred to is made up. That is, just how much of it is gold and what is the general character of the securities. Further, please cable us total estimated requirements up to January 15th based upon Government exercising every proper means to postpone or lighten up such payments. In any event, we shall probably require gold shipments from Ottawa to begin again in the near future.—H. P. DAVISON—T. W. LAMONT.

31499. Supplementing 31458, credit balance British Government Treasury account will be only $7,000,000 at close of business today. Anticipated payments tomorrow will completely exhaust and probably will require us to reopen no. 1 and no. 2 loan, reluctant as we are to do so so soon after the conclusion of last United Kingdom loan operation, being apprehensive as to sentimental effect upon banks and bankers in this market. On account of this last reason, we shall hold (for as long as possible) as much of no. 1 and 2 in our own portfolio as possible, notwithstanding this is opposed both to our own desires and to the wise suggestion of the Chancellor as expressed 26519. Nevertheless, for the moment we consider it as the lesser of the two evils. In view of all the foregoing, kindly cable instructions promptly to ship from Ottawa $25,000,000 gold and be prepared to ship a second $25,000,000 upon cable advice.

[Copy of telegram received 11 : 40 a. m. from Morgan, London]

26591. For H. P. Davison. Your 31458 raises very serious question. If Chancellor of the Exchequer cannot feel it probable that he can put out another loan between now and January 1st, he is in grave doubt whether he ought to proceed in exhausting his available gold and American securities, and matter would have to be subject of discussion in a Cabinet and possibly among all the Allies. Chancellor regards early issue of unsecured loan as of gravest importance.

I realize fully the discouragement of seeing the issues drag, and the difficulty of putting another one out immediately on top of the last, which has not yet been digested, but if there is any way in which it can be forced between now and January 1st I believe it is essential that it should be done. You of course understand that the issue of a loan within a very short time would not keep Chancellor from wanting another one, secured or unsecured, six weeks or two months from that time, and so on in series.

The immediately available resources are as follows:

Gold now in Ottawa, $100,000,000.

Gold now enroute to Ottawa or San Francisco, $48,000,000.

Russian gold in Vladivostock or on the way there, $100,000,000, which will be available in Ottawa by end of February.

Another $100,000,000 can be delivered at Vladivostock after end of the year and could also be available in Ottawa by end of February.

French gold, $170,000,000, in process of shipment at the rate of $20,000,000 a week.

You hold now American securities unpledged about $150,000,000; also whatever amount is placed temporarily under previous loans which will be released by deposit of other securities.

This makes in all, something over $500,000,000 of gold, without counting $140,000,000 of their own which might be put in if it was needed; and they claim about $350,000,000 of American securities now free or to be released.

There are $30,000,000 value of Canadian Pacific Ry. securities now in hand, and another $120,000,000 of these, he states, can easily be obtained, and steps are being taken to accomplish this.

You will see that this makes the $1,000,000,000.

In regard to the short bills, while I agree with you that it is to the interest to offer simultaneously French and British, hope you will proceed at once with the British since the French have delayed their part of it. I am sorry the rates have gone up, but do not consider that it is as important as placing some of the bills.

Sympathize strongly in your feeling in regard to the French attitude, and appreciate temptation you speak of. They are most difficult problem in the whole situation, but I hope that you will at any rate wait a few days before serving them with note, giving time should the Chancellor or the Prime Minister be able to do anything with the French Government. They are now discussing the question and will probably take a few days to make up their minds.

I very much fear that such action as you suggest in regard to France, while perfectly loyal and sound on our part, might very well produce friction between the Allies on what is already a rather tender point, which is of all things most important to avoid at present. I hope, therefore, that you can get along, at any rate until my return.

As to the amount required, Chancellor estimates between now and March 31st about $1,000,000,000.—J. P. MORGAN.

[Copy of telegram received 11:35 a. m. from Morgan, London]

26592. For H. P. Davison. Referring to my 26591. What the Government's position amounts to is simply this:

If Chancellor can borrow, partly on other than American securities, a reasonable amount between now and the end of the year he will face the future with some confidence and some assets left in hand. If, in order to pay the required amount between now and the middle of January, which would be, say, $450,000,000, he has got to use all or large part of his immediately available American assets, he feels that he should consider the whole subject on different lines, and go in much more for economy. This, of course, he does not want to do, because it might interfere with the progress of the war. It would also involve cancellation of contracts and all sorts of other troubles which I know we are all as anxious to avoid as he is.—J. P. MORGAN.

MORGAN.

EXHIBIT No. 2592

4AK2.

J. P. MORGAN & Co.,
EXPORT DEPARTMENT,
New York, Nov. 23, 1916.

[Copy of telegram despatched 9:30 p. m. to Morgan, London]

31592. For J. P. Morgan. 26591. 26592. We are greatly concerned over situation as outlined, for we were under the impression that gold at Ottawa and immediately available was much greater and sufficient to act as a larger cushion. Will study situation in detail and reply more fully tomorrow. Meanwhile:

1. We are able to offer no encouragement whatsoever in regard to any new issue, either secured or unsecured, prior to January 1st. Not only are present issues draggy but you will recall that it is the period of the year when money works close with banking institutions all over the country. If immediately after the first of the year we find that situation has changed, you, of course, can rely upon our making every effort; but to attempt another issue before January 1st, unless there is a radical change for the better in the situation, which we do not anticipate, would be to invite failure and discredit. For the time being we fear the Chancellor must dismiss completely from his mind any thought of this.

2. We are proceeding as rapidly as we can with the exchequer bills, but frankly, while we hope that ultimately this will be source of handsome revenue, we do not, as already stated, believe that within the next 90 days, this will be likely to furnish any large amount of exchange. This fear is emphasized by higher rates for money now beginning to prevail, and much more important by the distinctly antagonistic attitude of the Federal Reserve Board, which met with Advisory Council in Washington, D. C., yesterday, and let it clearly be known that it did not look with favor upon member banks investing in these bills. It seems hardly probable that Federal Reserve Board will issue any statement on this point, but its views as thus privately expressed are already becoming widely disseminated.

3. As to requirements aggregating, [say] $450,000,000 between now and January 15th, the only certain method of caring for same is—

(A) By the speeding up of gold shipments, which is of vital importance, not only so as to use metal itself, but because of sentimental effect upon domestic bankers; this also applying to the French gold, every effort to increase which should be made, and

(B) The release of American securities now temporarily placed under United Kingdom first and second loans, such securities so pledged amounting approximately to $186,000,000, including Canadian Pacific Railway as per 26429.

4. You state the Chancellor's view is that, if he must pursue plan as just set forth, he must then reconsider whole subject with a view to rigid economy. Serious as such a step would be, we can see nothing else to be done with the situation as it is over here today. You state that Chancellor is in grave doubt as to whether he ought to proceed in using up his available quick assets over here, yet it seems to us that there is no alternative, always provided the total amount to meet is as large as stated and provided further that exchequer bill resources are, as we apprehend, not likely to be large for the present.

5. With possibility of another issue in the immediate future entirely remote, we see no way of handling except by the using of all available gold and by the operation of numbers 1 and 2 demand loans for the balance. This will undoubtedly result in utilizing more of our own balances than the Chancellor and we desire, but we see no other way out of it. We have today started both 1 and 2 loans, making the rate 5%, this in view of materially higher money rates now prevailing here.

6. Every effort should be made to hasten negotiations on British municipals and to exhaust every other possible resource in a class akin to Alabama N. O. T. & P. Junctions, Atlantic leased lines, Cuban railways, etc.

Also we hope something will be worked out of conference with Sir Thomas Shaughnessy on Canadian Pacific financing in which if business could be shaped along lines satisfactory to this market, we might do 50 million to 100 million dollars. Are prepared also, if authorities wish to see whether we could handle obligations of colonies, such as Australia or South Africa of character similar to special bonds pledged for loan no. 2.

7. Chancellor has always discouraged our suggestion that we arrange for commercial drawings on a large scale here, feeling being that this would not suit British commercial interests. It seems to us at the present critical juncture that this is a step which must be seriously and immediately considered on the other side. As commercial interests we had in mind would be Vickers, Armstrong, and others acting in close harmony with Government. We should consider that authorities could arrange that they should finance their purchases of material here by drawing on group we would hope to form to accept their bills with renewals for total period of say one year's time. Even assuming that these people already have necessary funds abroad, against which to draw, Government could guarantee them against loss in exchange during period of bills and give them as inducement whatever profit might result from possible higher exchange rates at end of 12 months. We believe this business could be arranged quickly if we were authorized to proceed. Federal Reserve bank has indicated that such British commercial acceptances would be encouraged here by board and this is a point too important to be ignored.

NOTE.—Pencil notations enclosed in brackets.

8. As to French, we will refrain from any present hint of [our] real feelings, and all things considered agree it is better for the time being to try to worry along with the status quo.

A.
MORGAN.

EXHIBIT No. 2593

4AK2

J. P. MORGAN & CO.,
EXPORT DEPARTMENT,
New York, Nov. 24, '16.

[Copy of telegram received 8 : 45 p. m. from Morgan, London]

26659. 31592. One. Believe Chancellor of the Exchequer understands your position and, while he must of necessity have the desire for a loan, realizes that it cannot be obtained before the turn of the year.

Two. Am rather disturbed by attitude of Federal Reserve Board. Do not understand their objection, since bills seem to be certain of payment and as good as anything could be. Moreover, I thought that under the law member banks and Federal Reserve banks also were permitted to invest in Government obligations. Sorry I was not present in Washington to discuss it with them a little, although presumably Paul Warburg's opinion would be sufficient against it.

Three. They are releasing American securities quite rapidly now and will continue as fast as possible. They do not think they can ship gold any quicker than has been indicated to you, but will do their best, difficulty being due to transport.

Six. Negotiations on British municipals are being hastened. We are today informed that London and Glasgow have agreed in principle and will push negotiations as quickly as possible.

Junctions.—First meeting yesterday voted in favor of transaction, so believe that will now go ahead as expected.

Atlantic leased lines.—Find directors still impossible, though if your bid of £1,610,000 could be made a firm bid, think Treasury pressure would be brought.

Other propositions still very sketchy. Do not quite understand your reference to "Lord Shaughnessy", as negotiations have been superseded by issue of $40,000,000, fresh debenture stock to Treasury. Both Australia, South Africa would be perfectly ready borrow in your market in dollars, which would suit the Treasury here very well. This would be in addition to special large pieces pledged for loan no. two, of which there would probably be equal amount in same form for loan no. three. It is also suggested loan to India might be liked; if so, this could undoubtedly be arranged.

Seven. Authorities do not like the idea very much; nevertheless, in order to ease the load at the moment, believe they would be quite willing and could arrange with firms such as Vickers, Ltd., Armstrong Cammel, Harland & Wolff, Ltd., Browns. As I understand it, the state of the case is as follows: These firms take from British Government raw materials purchased in the United States, particularly steel which is purchased for them by us as representing the Ministry of Munitions of War. When the finished product is made, the firms receive payment and in turn pay for the raw material. If the British Government were willing to accept payment in bills on New York City drawn under such credits as you have indicated and would get the firms mentioned to take out such credits, seems to me these would be pure commercial bills and as such be eligible for the Federal Reserve Bank. If this is the operation as you understand it and you think it could be worked out on your side, cable again and we will see about it. We should want to know also what sort of amount you think of. The idea of the authorities is that it would not be very large, because they could not justify beyond amount of goods bought for those firms.

Eight. As regards this very difficult French position, am very grateful and very glad that you will get along best way we can. Believe authorities here will try to help us out in this very difficult point.—J. P. MORGAN.

MORGAN.

NOTE.—Pencil notations enclosed in brackets.

EXHIBIT No. 2594

16AO/4AG 12A
226AD/230A 171 37

J. P. MORGAN & Co.,
EXPORT DEPARTMENT,
New York, Nov. 25, 1916.

[Copy of telegram despatched 7 p. m. to Morgan, London]

31674. 26659. Attitude of the Federal Reserve Board of course most disappointing. The technical question of the rights of member banks to invest is not the real question at all. The Board is simply doing everything in its power unofficially to discourage such investment. Federal Reserve Board advised H. P. Davison that the twelve Federal Reserve banks may not buy new Treasury bills.

Atlantic leased lines.—We should not have suggested amount of £1,610,000 unless we felt likely that business could be closed at that figure. Directors were so antagonistic last spring that we considered it would be needless effort to make firm bid unless convinced that authorities would take necessary steps. Position here would require forming of large syndicate and fresh negotiations with Erie, and it would be impossible without some tangible figure.

As to Canadian Pacific Railway, we had in mind the purchase by the company of their sterling debenture stock and the reissue of this amount in dollars here with a definite due date and with some slight alterations in instruments securing debenture stock, so that it would conform to practice here without making any change as regards payments required prior to common stock dividends. Memorandum upon this subject was submitted to governor. We can also handle Algoma Branch five's if provision were made to pay in dollars—see 31167.

Will take up Australia and South Africa next week and see if we can arrange anything, but do not believe India feasible as yet.

7. The creation of commercial bills eligible for Federal Reserve bank is what we had in mind. If shells and forgings, steel, powder, explosives, fuses, etc., are now being delivered to private firms to be manufactured into completed shells or assembled as the case may be, would it be feasible for arrangements to be made whereby such private firms would take delivery here of various articles which would be invoiced against them, although delivered under contracts heretofore closed with Government, idea being that no change in present centralization of buying should be made, but that after contracts were closed by us delivery would be made to individual contractors? If this were feasible might also extend to copper being delivered to private firms. Our thought was that such English firms might draw their bills payable in dollars for period of 3 months with arrangements made for renewals, we to form group here to accept and use proceeds in payment for material as required. It seems doubtful whether if such bills were drawn by firms and given to British Government in payment for materials purchased and invoiced to British Government they would come within scope of Federal Reserve bank paper, but wish to consider this point more carefully before making definite suggestions.

This whole question is, of course, a very important one for Government to consider, and as stated we do not mean to suggest any change in existing methods for concentrated buying. Would it be necessary to limit bills drawn to extent amount of goods bought for each firm. It would seem to us, for example, Armstrong could assume liability for indeterminate amount of material contracted for by Government, Armstrong paying for it here by proceeds of bills drawn on and accepted by banking group here, Armstrong in turn selling to Governments such materials as were not needed for its own requirements and receiving payment from Governments either in form of sterling bills or sterling cash.

Associates not available, today being Saturday; will confer on this point Monday and cable again.

MORGAN.

AMA.

EXHIBIT NO. 2595

16AO/66XXX/66,^{3}/49^a

J. P. MORGAN & CO.,
EXPORT DEPARTMENT,
New York, Oct. 20, '16.

[Copy of telegram despatched 11 : 30 p. m. to Morgan, London]

29260. 24615. For J. P. Morgan. It is not altogether easy to explain why we have deemed it wise to delay organization of A and B Corporation. It has, perhaps, been not so much logic as instinct, both Dwight and I having exactly the same feeling. For instance, we have been most anxious to see steady absorption of United Kingdom and Royals continue and to do nothing that would serve to interfere with that. Market and sentiment seems surprisingly sensitive, witness reaction after Mr. Sabin's peace talk after U-boat exploit, and yesterday after premature loan talk which drove United Kingdom notes from 99⅝ to 99⅛. Of course, we have had enough experience to know that we are able to discount somewhat the apprehensions of even our wisest associates, yet it is clear from what they say and from our own knowledge that the one thing that deters people from investing is the expectation or fear that something else is coming along immediately which may be a little better, but we do not want you to gain the impression that we are failing to give grave consideration to some plan for supplying what ought to be a strong banking demand for short-time maturities. To this end, we desire to lay before you for serious discussion the following plan:

First.—Let us try to market within a reasonable period by selling them over the counter, say, $300,000,000 of British Exchequer bills running anywhere from 60 days to one year and assorted over various maturities in whatever way we might determine at the time of sale.

Second.—Let these bills be secured not by any indenture or trustee, but at most by formal statement from this firm that we had allocated between $350,000,000 and $400,000,000 of American and neutral securities against these bills. If, when we get closer to the operation, which, of course, would not begin until the new loan is out of the way, we found that we could peddle out bills unsecured and even without any reference to security, then so much the better, but we do not deem that probable.

Third.—We believe that whatever amount of bills we could sell within the next three or four months, even if it were up to the sum mentioned, we could keep afloat during the balance of the war, but in order to assure keeping these bills out, we would plan to form banking syndicate for two years, of say $120,000,000, being 40% of the whole amount. Such margin ought to be ample to take care of any amount of bills that might not be from time to time renewed. If, owing to cataclysmic conditions, such margin proved insufficient, then of course for any slack Government would have to ship gold, but such contingency would, we think, be remote. Banking syndicate to receive commission, say, of 2% per annum, upon its commitment of $120,000,000 as stated.

Fourth.—The daily rates at which we should mark these bills would have to be left to our discretion, but under present money conditions they ought to average under 5%, so that even with syndicate commission referred to, interest cost to Government should be very satisfactory.

Fifth.—If and when banking syndicate is called upon to take up maturing bills, then such syndicate should receive credit at the Bank of England for amounts so taken up at the current rate of exchange at the time of taking up, Bank of England paying 6% upon such deposits; then, as the market came in and bought further exchequer bills, these credits would be liquidated.

Sixth.—Possibly there might be a credit remaining at end of two-year period, at which time Government would take up all outstanding notes, or, if syndicate so elected, would give the syndicate credit at the Bank of England at the current rate of exchange, syndicate to have the right for a further period of 6 months to liquidate that credit in the open market, or, at the expiraion of six months, to receive dollars at the same rate of exchange at which the credit was established on the books.

Seventh.—Of course, these last features are to provide some speculation in exchange for the banking syndicate. We believe that it would be very difficult to organize such syndicate simply upon the basis of underwriting commission and that to bring about success we must add some such feature as has been outlined. Even so, we anticipate total cost to Government would be moderate. We should receive, of course, reasonable commission for organizing syndicate and some small brokerage day by day for handling bills.

Eighth.—The chief points in the foregoing plan constitute an elaboration of what F. A. Vanderlip has suggested to you. We have not sounded banking community at all in this proposition, preferring to secure your views and approval of Government, but it appeals to us as on the whole preferable to the immediate organization of A and B Corporation.—T. W. LAMONT—D. W. MORROW.

31415. For J. P. Morgan. In view of interference on the part of Federal Reserve Board with French acceptance credit, we thought it very important that I should see them, so spent three hours with them Saturday morning, result of which was not satisfactory. Their attitude towards Treasury bills is not encouraging. However, they gave me to understand they would take no steps at this time and would confer with me before doing so, should they decide to make statement. Afterwards had an interview with Woodrow Wilson which was altogether cordial and rather more encouraging, but on the whole my trip to Washington does not increase my hopes for easy future financing. However, no use speculating this subject; only thing we can do is to continue to do our best.—H. P. DAVISON.

EXHIBIT No. 2603

[Excerpt of letter]

FEDERAL RESERVE BOARD,
Washington, November 23, 1916.

DEAR STRONG: I have just finished dictating a letter to Mr. Treman, in which I give him the meat of our last conference with the Advisory Council and also of our meeting with Mr. Davison, who was here last Saturday.

As you know, there has been going on quite an active press compaign, the object of which was to show that unless we granted foreign credits quite freely the country ran the risk of being choked with gold, with the attendant consequences of inflation of prices and credits.

Mr. Davison came over last Saturday and had a talk with the Board and expanded upon this theory. He advised the Board that Morgan's had planned to offer $100,000,000 of British bonds payable in dollars which were to mature in scattered maturities falling between three months and one year, it being apparently the plan to arrange the maturities so that $10,000,000 would mature each week and then be renewed, which would indicate, as he did not deny, that, provided the banks would take it, they would follow this first issue with others and place here about $500,000,000 of these exchequer bonds When these would have been placed, of course, they might consider the placing of more. But, for the time being he said, the British Government would not want to place more than a weekly maturity of $10,000,000.

Davison took the point of view that they only wanted to do what was good for the country, but that the British Government was buying about $10,000,000 worth a day, and if we did not place these loans we were taking the responsibility of cutting down the trade of the country—a very serious responsibility as we were now in a fair way of becoming the masters of the world. The more we stimulated this trade, and the more loans we made to these foreign countries, the more would we increase our predominance.

Governor Harding (who had taken the precaution during these last weeks to place himself in touch with the leading authorities in questions of foreign policy in order to be sure that we were acting in fullest accord with what generally would be considered the best interest of the country) pointed out to Mr. Davison that there was some danger of a creditor becoming so much involved with one debtor that finally, no matter whether the creditor wanted to or not, he would have to go in deeper and deeper. In other words, while you thought you had the bull by the tail, as a matter of fact the bull had you by the tail. In this case, it is *John* Bull who would have us by the tail.

England has now outstanding in short loans an amount which must be as large as between one and two billions of pounds. How these are to be funded, nobody knows. England's per capita debt next year will have multiplied by seven as against the beginning of the war. The continuation of the war, therefore, appears madness, and as long as nobody knows how long this madness will last there is no saying in what condition Europe will be when the war ceases. The feeling generally appears to be breaking through here at Washington (and I think also amongst a substantial part of the cooler elements of the country) that the end of this war will be a draw; that the sooner it ends the better; and that continuing the war means only a needless and fruitless sacrifice of life and treasure. To think that this war must go on to keep our trade going is an abomination. To think that it ought to be the duty of the Government or the Federal Reserve Board to prevent disastrous economic consequences by prolonging it is unjustifiable. And we said to Mr. Davison that it was the general feeling that we had grown enough and that we should be in a position of contemplating the "breaking out" of peace without a thought of alarm; that to our mind it was better to let this extraordinary trade gradually go down to more nearly normal proportions than to have it stop with a vengeance.

Davison himself said that he thought there were $500,000,000 or $800,000,000 of first class American securities which were held back which we might still receive in payment of goods that we are sending. We all feel that the export trade would not stop at once but would possibly take smaller proportions and that England would pay for it with our securities and maybe, to a certain extent, with shipments of gold.

As long as Europe sells us secured investments and as long as the investors take them there is no harm done. Altogether, we do not feel that we have the duty of protecting the investor; but we are concerned in the strength of the banking situation, and it was generally felt that these exchequer bonds, while they were made up in a form which made them appear self-liquidating, were as a matter of fact what in the aggregate would constitute a lockup of the funds of our banks and in the end would probably have to be turned into long term bonds. When the war is over, it may or may not be good policy to grant these long term and unsecured foreign loans, but we feel that first we should know whether and when and how the war will be over.

As to the gold danger, the Board feels that there are many ways in which it can be dealt with. We have $700,000,000 of national bank notes which could be withdrawn if our gold circulation should increase too fast. We have greenbacks the gold cover of which could be provided very acceptably. We have a Government that will have to borrow sooner or later and might come into the market and borrow at this time in order to lock up the gold. We could induce our member banks, either by voluntary agreement or by law, temporarily to keep higher reserves. And, finally, we could, as a beginning, advance the date of November 1917, so as to compel our reserve transfers early next year. The latter proposition appeared to appeal to Davison, who, on the whole, placed himself in a position of only wanting to do what was best for the country, and it was very satisfactory to us that the Advisory Council had independently reached the same conclusions as to the general situation.

Forgan stated that they were all down to the lowest point of reserves. In New England the strongest banks are rediscounting quite freely with the Federal Reserve bank. In New York we have noticed that, in spite of the increase of the acceptance rate, we are getting our material quite freely, and, while it is true that our gold holdings have increased, our loan pyramid has increased in proportion; and while our cash reserve in 1914 was 12.8 it is now 13.6, so that, as a matter of fact, we are where we were and there is serious danger in letting the thought go out that it is safe for us to pump into our financial structure a dose of one half a billion or a billion of self perpetuating foreign bonds.

The discussion with Davison was very pleasant and led to no definite conclusions, which I believe he wanted to avoid. He understood, however, our point of view. While he pointed out to us that we had a duty to finance this trade, he could not answer us when we pointed out that we were financing ten days according to his own statement and that he could figure out for himself the tremendous amounts that this country would have to take in foreign loans if his argument were to prevail that this trade ought to be continued indefinitely and by all means by continuing loans. He answered that, of course, they would not go beyond a reasonable amount, but I believe we have lost what was our standard for what is reasonable and what unreasonable; and, moreover, the further we go the more difficult it will be to stop.

Men like Wing, Rue, Forgan, and Fleishhacker all shared these views, and as to the foreign acceptance credits they went in their recommendation even further than the Board wishes to go. They recommended that these acceptances should not be purchased in the open market while they might be taken when necessary as rediscounts from member banks. They all felt that in this question of acceptances the Board had acted splendidly, even though they apparently felt we had not gone quite far enough.

I know that there are two sides to the arguments. It is not an easy matter at this time to decide what is right or wrong, but apparently the general consensus of opinion is getting around to the point of view that we should not overdo this foreign business at this time and that the harm would not lie so much in the influx of gold as in the over stimulation of our trade leading to enormously increased prices, thereby increasing the volume of credits with the entire chain of increased cost of living, wages, etc.

I could write volumes about this without being able to exhaust the subject, but for fear of exhausting myself and my stenographic staff, I better stop.

Always cordially yours,

(Signed) PAUL M. WARBURG.

Exhibit No. 2604

Federal Reserve Board,
Washington, November 27, 1916.

Dear Mr. President: Will you permit me to thank you for your memorandum and to say that the Board has strengthened its statement somewhat and that it will be given to the press for publication tomorrow morning.

I enclose a copy of the revised statement with the new matter underlined.

Respectfully yours,

(Signed) W. P. G. Harding.

The President,
The White House.

STATEMENT FOR THE PRESS

November 27, 1916.

The Federal Reserve Board today made public the following statement relating to foreign credits, which is to appear in the next issue of the Federal Reserve Bulletin:

* * * * * * *

In view of contradictory reports which have appeared in the press regarding its attitude toward the purchasing by banks in this country of Treasury bills of foreign governments, the Board deems it a duty to define its position clearly. In making this statement the Board desires to disclaim any intention of discussing the finances or of reflecting upon the financial stability of any nation, but wishes it understood that it seeks to deal only with general principles which affect all alike.

The Board does not share the view frequently expressed of late that further importations of large amounts of gold must of necessity prove a source of danger or disturbance to this country. That danger, the Board believes, will arise only in case the inflowing gold should remain uncontrolled and be permitted to become the basis of undesirable loan expansions and of inflation. There are means, however, of controlling accessions of gold by proper and voluntary cooperation of the banks, or if need be by legislative enactment. An important step in this direction would be the anticipation of the final transfer of reserves contemplated by the Federal Reserve Act to become effective on November 16, 1917. This date could be advanced to February or March 1917. Member banks would then be placed on the permanent basis of their reserve requirements and fictitious reserves would then disappear and the banks have a clearer conception of actual reserve and financial conditions. It will then appear that while a large increase in the country's gold holdings has taken place, the expansion of loans and deposits has been such that there will not remain any excess of reserves, apart from the important reserve loaning power of the Federal Reserve banks.

In these circumstances the Board feels that member banks should pursue a policy of keeping themselves liquid; of not loaning down to the legal limit, but of maintaining an excess of reserves—not with reserve agents, where their balances are loaned out and constitute no actual reserve, but in their own vaults or preferably with their Federal Reserve banks. The Board believes that at this time banks should proceed with much caution in locking up their funds in long-term obligations or in investments, which are short term in form or name but which, either by contract or through force of circumstances, may in the aggregate have to be renewed until normal conditions return. The Board does not undertake to forecast probabilities or to specify circumstances which may become important factors in determining future conditions. Its concern and responsibility lies primarily with the banking situation. If, however, our banking institutions have to intervene because foreign securities are offered faster than they can be absorbed by investors—that is, their depositors—an element would be introduced into the situation which, if not kept under control, would tend toward instability, and ultimate injury to the economic development of this country. The natural absorbing power of the investment market supplies an important regulator of the volume of our sales to foreign countries in excess of the goods that they send us. The from which the most recent borrowing is taking, apart from reference to its intrinsic merits, makes it appear particularly attractive as a banking investment. The Board, as a matter of fact, understands that it is expected to place it primarily with banks. In fact, it would appear so attractive that unless a broader and national point of view be adopted individual banks might easily be tempted to invest in it to such an extent that the banking resources of this country employed in this manner might run into many hundreds of millions of dollars. While the loans may be short in form, and severally, may be collected at maturity, the object of the borrower must be to attempt to renew them collectively, with the result that the aggregate amount placed here will remain until such time as it may be advantageously converted into a long-term obligation. It would, therefore, seem as a consequence that liquid funds of our banks, which should be available for short credit facilities to our merchants, manufacturers, and farmers, would be exposed to the danger of being absorbed for other purposes to a disproportionate degree, especially in view of the fact that many of our banks and trust companies are already carrying substantial amounts of foreign obligations and of acceptances which they are under agreement to renew. The Board deems it, therefore, its duty to caution the member banks that it does not regard it in the interest of the country at this time that they invest in foreign treasury bills of this character.

The Board does not consider that it is called upon to advise private investors, but as the United States is fast becoming the banker of foreign countries in all parts of the world, it takes occasion to suggest that the investor should receive full and authoritative data—particularly in the case of unsecured loans—in order that he may judge the future intelligently in the light of present conditions and in conjunction with the economic developments of the past.

The United States has now attained a position of wealth and of international financial power, which, in the natural course of events, it could not have reached for a generation. We must be careful not to impair this position of strength and independence. While it is true that a slowing down in the purpose of credit extension may mean some curtailment of our abnormally stimulated export trade to certain countries, we need not fear that our business will fall off precipitately should we become more conservative in the matter of investing in loans, because there are still hundreds of millions of our own and foreign securities held abroad which our investors would be glad to take over, and, moreover, trade can be stimulated in other directions.

In the opinion of the Board, it is the duty of our banks to remain liquid in order that they may be able to continue to respond to our home requirements, the nature and scope of which none can foresee, and in order that our present economic and financial strength may be maintained when, at the end of the war, we shall wish to do our full share in the work of international reconstruction and development which will then lie ahead of use, and when a clearer understanding of economic conditions as they will then exist, will enable this country more safely and intelligently to do its proper part in the financial rehabilitation of the world.

* * * * * * *

November 24, 1916.

BRITISH GOVERNMENT TREASURY BILLS—FRENCH GOVERNMENT TREASURY BILLS

Seward Prosser, Esq.,
Vice President Bankers Trust Company,
16 Wall Street, New York, N. Y.

Dear Sir: We have completed arrangements respectively with the British and French Governments whereby we shall be in a position, on December 1st, to supply for investment, Treasury bills of the two respective Governments, in the form of the specimen note attached hereto, which is substantially along the lines of New York City revenue bills.

All purchases of bills are to be made for payment and delivery at our office, and the bills when due and payable will be repayable here.

As will be noted, these bills are payable in New York, in dollars. They will have maturities ranging from thirty days to six months, the discount rates for the different maturities to be fixed by us from time to time in accordance with prevailing money conditions. We shall plan to offer these bills at an attractive basis, as compared with current money rates for similar maturities.

We believe that these Government bills furnish an unusual and a desirable form of short-term investment for banking institutions, possessing many of the same advantages that have rendered New York City revenue bills attractive.

The initial discount rates, for delivery of bills on or about December 1st, will be as follows:

	Percent
30 day bills	4
60 day bills	4¼
90 day bills	4½
4 months bills	4½
6 months bills	4¾

While these rates are to be subject to change without notice, we shall plan to keep you advised as to any change in the discount rates. If this form of investment appeals to you for your institution or for your correspondents, we shall be glad to keep in touch with you and furnish any further information you may desire.

Yours very truly,

——— ———.

Enclosure.

[Telegram]

NOVEMBER 25, 1916.

FRANK B. ANDERSON,
President, Bank of California, N. A.,
San Francisco, California.

We have completed arrangements with British and French Governments whereby we shall be in position on December 1st to supply for investment Treasury bills of respective Governments of character similar to New York City revenue bills. Bills will be payable in New York in dollars and will have maturities ranging from thirty days to six months the discount rates for the different maturities to be fixed by us from time to time in accordance prevailing money conditions. We plan to offer bills at attractive basis compared with current money rates. Initial discount rates for delivery of bills about December 1st will vary probably from 4 to 4¾% depending on maturity. If you agree with us this is attractive business we shall be glad to have you co-operate by bringing notes to attention your principal correspondent institutions and we shall be glad to keep you advised of changes in discount rates from time to time. This suggestion is being sent only to [certain] banks in New York, Boston, Chicago, and San Francisco, where we are also communicating with Fleishhacker, and possibly in St. Louis.

H. P. DAVISON.

J. P. MORGAN & CO.,
EXPORT DEPARTMENT,
New York, Nov. 27, 1916.

[Copy of telegram despatched 1:30 p. m. to Morgan, London]

31728. Following is text of statement issued publicly late this afternoon by Federal Reserve Board as reported to us by telegraph from Washington, D. C.:

"In view of contradictory reports which have appeared in the press regarding the committee's attitude toward purchasing by the banks in this country of treasury bills of foreign governments, the Board deems it a duty to define its position clearly. In making this statement, the Board desires to disclaim any intention of discussing the finances or of reflecting upon the financial stability of any nation, but wishes it understood that it seeks to deal with general principles which affect all alike.

"The Board does not appreciate the view freely expressed of late that further importations of large amounts of gold must of necessity prove a source of danger or disturbance to this country. That danger the Board believes will arise only in case the inflowing gold should remain uncontrolled and be permitted to become the basis of undesirable loan expansion and of inflation. There are means, however, of controlling accessions of gold by proper and voluntary co-operation of the banks, or if need be, by legislative enactment. An important step in this direction would be the anticipation of the final transfer of reserves contemplated by the Federal Reserve Act to become effective on November 16th, 1917. This date could be advanced to February or March 1917. Member banks would then be placed on the permanent basis of their reserve requirements and fictitious reserves would then disappear and the banks have a clearer conception of actual reserve and financial conditions. It will then appear that while a large increase in the country's gold holdings has taken place, the expansion of loans and deposits has been such that there will not remain any excess of reserves apart from the important reserve loaning power of the Federal Reserve banks.

"In these circumstances, the Board feels that member banks should pursue a policy of keeping themselves liquid, of not loaning down to the legal limit but of maintaining an excess of reserves, not with reserve agents where their balances are loaned out and constitute no actual reserve but in their own vaults or preferably with their Federal Reserve banks. The Board believes that at this time banks should proceed with much caution in locking up their funds in long term obligations or in investments which are short term in form or name, but which, either by contract or through force of circumstances, may in the aggregate have to be renewed until normal conditions return. The Board does not undertake to forecast probabilities or to specify circumstances which may become important factors in determining future conditions. This concern and responsibility lies primarily with the banking situation. If, however, our banking institutions have to intervene because foreign securities are offered faster than they can be absorbed by investors—that is, by depositors—an element would be introduced into the situation which, if not kept under control, would tend toward ultimate injury to the economic development of this country. The natural absorbing power of the investment market supplies an important regulator of the volume of our sales to foreign countries in excess of the goods they send us. As to the [latest] form of borrowing, the Board as a matter of fact understands that it is expected to place it primarily with the banks. In fact, it would appear so attractive that unless a broader point of view be adopted individual bankers might easily be tempted to invest in it to such extent that the banking resources in this country employed in this manner might run into many hundreds of millions of dollars.

"While the loans may be short in form and severally may be collected at maturity, the object of the borrower must be to attempt to renew them collectively, with the result that the aggregate amount placed here will remain until such time as it may be advantageously converted into a long term obligation. It would therefore seem as a consequence that liquid funds of our banks which should be available for short credit facilities to our merchants, manufacturers, and farmers, would be exposed to the danger of being absorbed for other purposes to a disproportionate degree, especially in view of the fact that many of our banks and trust companies are already carrying substantial amounts of foreign obligations and of acceptances which they are under agreement to renew. The Board deems it therefore its duty to caution the member banks that it does not regard it in the interest of the country at this time that they invest in foreign treasury bills of this character.

"The Board does not consider that it is called upon to advise private investors, but as the United State is fast becoming the banker of foreign countries in all parts of the world it takes occasion to suggest that the investor should receive full and authoritative data, particularly in the case of unsecured loans, in order that he may judge the future intelligently in the light of present conditions and in conjunction with economic developments of the past. The United States has now attained a position of wealth and international financial power which, in the natural course of events, it could not have reached for generations, and we must be careful not to impair this position of strength and independence. We need not fear that our business will fall off perceptibly should we become more conservative in the matter of investing in loans, because there are still hundreds of millions of our own and foreign securities held abroad which our investors should be glad to take over and, moreover, trade can be stimulated in other directions.

"In the opinion of the Board, it is the duty of our banks to remain liquid in order that they may be able to continue to respond to our home requirements, the nature and scope of which none can foresee, and in order that our present economic and financial strength may be maintained when at the end of the war we shall wish to do our full share in the work of international reconstruction and development which will then lie ahead of us and when a clearer understanding of economic conditions as they will then exist will enable this country more safely [and intelligently] to do its proper part in the financial rehabilitation of the world."

Impossible to forecast effect upon banks and upon investors of public statement of this kind. It will certainly add greatly to difficulties of any new borrowings and may result in some liquidation of existing loans. We will cable fully after effect can be observed. Meanwhile, suggest that you expedite in every way possible release of Americans temporarily deposited to the end they may be readily usable.

For your information, Federal Reserve Board composed of seven members, Secretary of Treasury, Comptrollers of Currency, ex-officio. By many, including ourselves, Board is thought to be dominated by Paul Warburg, whose former family affiliations with German bankers you know. He was formerly of the firm of Kuhn, Loeb, & Co., married, we believe, daughter of one of firm, and is brother of Felix Warburg, present member of that firm.

J. P. MORGAN & Co.,
EXPORT DEPARTMENT,
New York, Nov. 28, 1916.

[Copy of telegram despatched 12:15 a. m. to Morgan, London]

3177S. For E. C. Grenfell. Statement of Federal Reserve Board cabled you last night prominently displayed in our newspapers all over country and has caused great excitement in financial circles here. Comment is to effect that Board has gone far beyond its proper function in attempting to advise individual American investors to refrain from foreign loans. At a meeting of several prominent bankers this morning it was expressed opinion of all that statement is product of a certain gentleman who hopes that his efforts will be effective in forwarding peace propaganda being made by his native country. Regardless of the motives lying back of statement, we must recognize this as the most serious financial development in this country since the outbreak of the war and one likely to be of far-reaching consequence. Please make this fact plain to the authorities so that they may consider whole situation in its grave aspects. All foreign loans were under pressure today, the Anglo-French fives declining to 94¼ and interest, the United Kingdom two year 5% to 98 13/16 and interest, the three year 5½% to 99 and interest, and the 5 year 5½% to 98⅛ and interest. The city of Paris 6% were the weakest and at their low point of 96⅜ and interest were off over 1% from yesterday's close. They closed slightly up at 97 as against issue price of 98¾. The American Foreign Securities Co. notes declined ¼%.

For your information we plan to carry out programme of having British and French Treasury bills available for sale December 1st, but in view of

Federal Reserve Board statement are convinced that sales will be negligible at any rate at start.

For practical purposes Chancellor of the Exchequer must, in his calculations, disregard Treasury bills entirely, relying for his future requirements until situation radically changes upon his available supplies of gold and American securities for, as he must realize, this weighty statement from Government banking heads expressly requesting American investors to refrain from buying Allied obligations, postpones by still further period possibility of any new British, French, or Allied loan here. Of course, situation may change, but at present outlook is very dark, and we should now doubt whether it would be possible even to consider any fresh loan operation of importance until well after the turn of the year. Every effort, as you must realize, will be made by us and our associates by educational processes to counteract throughout the country statement just issued, but we have got to begin at the bottom of the hill once more and it will be a long slow process with very much depending upon future attitude of our authorities. Meanwhile, we can see no way except for your authorities to consider ways and means for immediate curtailment of purchases letting such action be announced without rancour but explicitly with possible good effect upon American attitude. Furthermore, we consider it absolutely essential that gold shipments be expedited and that for moral effect every publicity consistent with safety be given. You have indicated that transport difficulties interfered, but we deem it vital that attempt be made to overcome them. We think it would have excellent effect if one or two warships from France were to bring over gold direct to New York City. Exchange situation is, of course, very grave and we have bought for you today almost £4,000,000 of exchange. We cannot, of course, maintain this pace even for a few days. We will cable you again on this particular aspect referring to the guaranty of exchange on American deposits in London.

We wish this cable to make clear the fact that despite our most strenuous efforts this Federal Reserve Board statement has brought about such a radical change for the worse in the whole situation that from this time on until further notice, authorities must rely for their requirements solely upon their gold, their American securities, and the various special deals along lines of railway shares and the others that we have already discussed. Despite the heavy pressure that has been put upon English investors we believe that we have now reached the time when every possible available source of exchange, no matter how disagreeable for us and you to contemplate, must be used and that with all promptitude. You will find us most co-operative and eager in every direction, but we must ask you to realize that for the time being our hands are almost completely tied. Any suggestion or plan that you may have to offer will, you may be assured, be availed of to the limit of our ability.

MORGAN.

14882. 18405. The effect of the Federal Reserve Board ruling is still to be determined, but our belief is that it will make investors scrutinize collateral more carefully than before, and we doubt whether Indo China securities or Royal Dutch Co. would be well received. We strongly recommend taking the most radical measures to secure the remaining available amounts of issues pledged in American foreign securities loan, particularly bringing pressure on the American securities which may still be held in France.

Since the despatch of your cable the situation has gravely changed for the worse by issue of Federal Reserve Board statement which has caused great excitement here, and effect of which is to discourage American investors of every kind from buying Allied loans. We have had conference today with Casenave and Bloch, and they quite agree with us that any attempt now to forecast time for another operation whether secured or unsecured is impossible. We will keep you in touch with situation, but regret to say we regard it as more difficult and ominous than ever before. You appreciate that in this whole very difficult situation we are giving our almost undivided attention to the possibility of raising loans for the Allies, and if we do not advocate proceeding it is because our judgment is against the feasibility of such operation. For your information the new French municipals offered by Kuhn, Loeb & Co. are said to be going very badly.

26758. Have communicated your long cable 31728 as regards Federal Reserve Board to Governor and Chancellor who of course feel very disturbed thereat, especially as they see in it evidence of control which Mr. Paul Warburg and his associates appear to have at Washington.

We await further information from you as regards the effect which announcement has had upon existing loans, short paper, and commercial acceptances.—E. C. GRENFELL.

[Telegram]

NOVEMBER 28, 1916.

[Pencil notation: Treasury bills.]

Telegram to be sent to attached list of names:

Referring our recent letter initial rates for delivery of bills on December first will be as follows: Four and one half percent for thirty day, sixty day, and ninety day bills, four and three quarters percent for the four months bills; and five percent for six months bills. These rates will be subject to variation from time to time to meet prevailing conditions. We believe we have made it hitherto clear that these bills call for payment at maturity and are not subject to renewal.

[Copy of telegram received 5:58 from Morgan, London]

J. P. MORGAN & Co.,
EXPORT DEPARTMENT,
New York, Nov. 29, 1916.

26810. Have fully discussed the very serious contents of your 31778 with Chancellor of the Exchequer and Governor, who have taken up question with Cabinet committee.

One. Cabinet regards such a statement as that issued by the Federal Reserve Board in relation to Government [Br.] Treasury bills, as being the action of the United States Government, in that the Secretary of Treasury, and the Controller, are members of the Board. Chancellor accordingly sent you formal cable no. 26788. British Government is communicating upon the subject with Sir Cecil Spring-Rice.

Whilst I have impressed upon the Ministers the fact that the Federal Reserve Board is not directly a Government committee, yet our Ministers adhere to their view and consider it more dignified to take action in concert with the other Allied Governments.

Your statement that the British and French Treasury bills will not sell to any extent is not the main factor in the Government's decision.

Two. As regards your statement that authorities must consider curtailment of purchases, they feel the full necessity of this, but they think that any announcement with regard to such action should be made in a dignified manner by the Allied Governments. Such action will take some days as it is necessary to communicate with the other Allies. Please do not inform anyone that British Government is communicating upon this subject with the other Allies.

Three. With regard to the very large purchases of exchange, we shall be glad of course to have your views as to whether this is a speculative exchange operation, or whether it is probably engineered by the Schiff, Speyer, and other German houses.

Four. I fully understood that J. P. Morgan & Co. cannot go on advancing indefinitely themselves, but wish to know if there is any difficulty in your getting accommodation against American securities from other banks, as you have done before. Chancellor assures me that gold position is as follows:

In Ottawa.—Out of the $25,000,000 for which you have received authority to call $17,000,000, for which you will call through us if you require it $120,000,000.

En route Atlantic.—$20,000,000.

Pacific.—$10,000,000.

Total in Ottawa and en route $167,000,000.

French.—Now in England ready for shipment $80,000,000. To come during December to England for shipment $90,000,000. In all $337,000,000. He states you have $150,000,000 free American securities with further $255,000,000 which he hopes to release from the securities pledged under collateral loans.

Do you see any difficulty in making or getting advances against these to meet payments during coming month?

Five. Authorities do not see any way to guarantee the exchange on the American deposits in London, nor do they think this would be effective in view of the rise in the value of money in New York City, as compared to London.

Six. Chancellor and I are most conscious of the strain we are putting upon you and are very grateful for your efforts.

I shall be glad to know whether you are in communication with the partners of Kuhn, Loeb & Co. and what view Kahn and other pro-Ally members of the firm take as regards Paul Warburg's action.

What is the position as regards Kuhn, Loeb & Co.'s issue of French municipalities.—E. C. GRENFELL.

26788. Chancellor of the Exchequer sends you following message:

(Begins) In view of the attitude of the Federal Reserve Board towards the issue of Treasury bills by us in the U. S. A., I am now telegraphing to Monsieur Ribot, French Minister of Finance, that we propose, if he concurs, to refrain from proceeding with the issue. (Ends.)

Futher message will follow from E. C. Grenfell.—E. C. GRENFELL.

New York, Nov. 29, 1916.

[Copy of telegram despatched 6:30 p. m. to Min. Fin. Harjes, Paris]

14889. Neither we nor M. Bloch have received authority to sign Treasury bills, and inasmuch as they are subject to issue Friday of this week, it is necessary that immediately you should cable M. Bloch and ourselves authorizing him to sign on behalf of Government and notifying us of that arrangement. See 14781.

Further, Ribot has cabled approving form of Treasury bills, but never excepting through Mr. Morgan, has he specifically authorized us to proceed with the sale. Kindly obtain written authority on this matter and have same cabled to us.

Also, we ought to have from Ribot, as we already have from the British Chancellor, a general statement to the effect that France will have in our hands sufficient gold from time to time to take up such maturities as are presented for payment, and as are not replaced by fresh purchases.

J. P. MORGAN & Co.,
EXPORT DEPARTMENT,
New York. Nov. 30, 1916,
[Rec'd Dec. 1st, 1916.]

[Copy of telegram received 8:04 a. m. from Harjes, Paris]

18421. 14889. M. Ribot has cabled full authorization to-day to Bloch for the signature of Treasury bills. Minister of Finance has handed us following letter addressed to you:

(Translation begins): I have the honor to authorize you by the present to issue until further notice under the same conditions as for the British Government, French Treasury bills with maturities not exceeding one-year. You will kindly advise me every Saturday through Morgan, Harjes & Co. the amount you will have issued and placed of each category of bills. You will give the same information to the French Financial Agency in New York City. It goes without saying that I will take the necessary steps to place at the proper time in your hands the provision in gold dollars which the reimbursement of the bills issued by you may require in accordance with this general authorization to the extent by which the amounts maturing exceed the amount of the new bills placed through you. (End of translation.)

We trust the above covers to your entire satisfaction the whole situation. Your 14878, 14882. We are anxiously awaiting to hear from you what is effect on general situation. We find that apart from the prevailing feeling of apprehension caused here by the point of view set out in the Federal Reserve Board's statement that what strikes everyone most painfully is the significance of the cynically arbitrary manner of the form in which the statement is expressed.

J. P. MORGAN & Co.,
EXPORT DEPARTMENT,
New York, Nov. 30, 1916.

[Copy of telegram despatched 9:30 p. m. to Morgan, London]

31844. For E. C. Grenfell. 26788. Before formally withdrawing Treasury bills from sale we will await word from you that Ribot concurs. We then suggest making announcement, and propose for your consideration a form substantially as follows:

Begins: "The Governments of Great Britain and France have asked us to make the following announcement: The sale of Treasury bills of the two respective Governments, payable in dollars in New York City, had never been an essential part of the Governments' financial plans, but had been for some time under consideration with a view to furnishing a credit medium that would accommodate the American banking demand for an instrument of short maturity, and of such limited volume that the Governments could always undertake to lay down gold in New York sufficient to meet maturing bills. Inasmuch, however, as this suggestion has manifestly failed to meet the approval of the Federal Reserve Board, a governmental body upon which both the Secretary of Treasury and the Comptroller of the Currency have seats, the Governments of Great Britain and France have, after conference, both decided to withdraw completely the limited amount of their Treasury bills which they had hitherto authorized sold." Ends.

If it would be preferable for Government to make no direct statement but for us to put the foregoing into indirect discourse as representing, through ourselves as medium, the informal views of Government that can readily be arranged.
